80 Maintenance Reset
Lexmark T64x/ T65x/E460/W840/W850

The printer is displaying an **80 Scheduled Maintenance** message.

This message indicates that the maintenance kit parts needs to be replaced at this time in order to maintain the print quality and the reliability of the printer. The printer will display the **Scheduled Maintenance** message at a fixed page-count interval. The page count interval for the maintenance message is approximately 300,000 letter-size pages. If you regularly use paper of a larger size, such as 'legal', the **Scheduled Maintenance** message will appear sooner.

1. Turn printer off

2. Press and hold the CHECK and RIGHT arrow buttons & turn printer on

3. When you see PERFORM SELF TEST, release the buttons

4. Press the CHECK button to go to the CONFIG MENU

5. Select reset MAINTENANCE COUNT
