

80 Maintenance Reset

Lexmark X64x/X65x/X73x/X94x/MS610/MS710/MS810/X850

The printer is displaying an **80 Scheduled Maintenance** message.

This message indicates that the maintenance kit parts need to be replaced at this time in order to maintain the print quality and the reliability of the printer. The printer will display the **Scheduled Maintenance** message at a fixed page-count interval. The page count interval for the maintenance message is approximately 300,000 letter-size pages. If you regularly use paper of a larger size, such as 'legal', the **Scheduled Maintenance** message will appear sooner.

1. Turn printer off
2. Press and hold #2 and #6 buttons & turn printer on
3. When you see CONFIG MENU, release the buttons
4. Touch the RIGHT ARROW to select MAINTENANCE COUNTER
5. Press YES
