## Product information

Product name:

Lexmark B2865, M5255, M5270, MS725, MS821, MS822, MS823, MS825, MS826 printers

Machine type:

4064

Model(s):

210, 230, 235, 295, 410, 430, 438, 630, 635, 695, 830, and their equivalent models

## Edition notice

February 16, 2021

**The following paragraph does not apply to any country where such provisions are inconsistent with local law:** LEXMARK INTERNATIONAL, INC., PROVIDES THIS PUBLICATION “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not allow disclaimer of express or implied warranties in certain transactions; therefore, this statement may not apply to you.

This publication could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in later editions. Improvements or changes in the products or the programs described may be made at any time.

References in this publication to products, programs, or services do not imply that the manufacturer intends to make these available in all countries in which it operates. Any reference to a product, program, or service is not intended to state or imply that only that product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any existing intellectual property right may be used instead. Evaluation and verification of operation in conjunction with other products, programs, or services, except those expressly designated by the manufacturer, are the user's responsibility.

## Trademarks

Lexmark and the Lexmark logo are trademarks of Lexmark International, Inc., registered in the United States and/or other countries. PCL® is a registered trademark of the Hewlett-Packard Company. PCL is Hewlett-Packard Company's designation of a set of printer commands (language) and functions included in its printer products. This printer is intended to be compatible with the PCL language. This means the printer recognizes PCL commands used in various application programs, and that the printer emulates the functions corresponding to the commands.

PostScript is a registered trademark of Adobe Systems Incorporated in the United States and/or other countries.

All other trademarks are the property of their respective owners.

250- and 550-sheet tray transport drive jam service check .....	151
2100-sheet tray elevator drive jam service check.....	153
243 paper jams .....	155
243 paper jam messages.....	155
Sensor (tray 3 pass-through) static jam service check.....	157
Tray 3 pick jam service check .....	159
Sensor (tray 3 pass-through) late-arriving or late-leaving jam service check .....	162
Sensor (tray 3 pass-through) unknown source late-arriving or late-leaving jam service check.....	165
Sensor (tray 3 pass-through) unknown source pick jam service check .....	169
244 paper jams .....	172
244 paper jam messages.....	172
Sensor (tray 4 pass-through) static jam service check.....	174
Tray 4 pick jam service check .....	175
Sensor (tray 4 pass-through) late-arriving or late-leaving jam service check .....	178
245 paper jams .....	182
245 paper jam messages.....	182
Sensor (tray 5 pass-through) static jam service check.....	182
Tray 5 pick jam service check .....	184
40y paper jams .....	187
405–407 paper jam messages.....	187
Output expander diverter drive jam service check.....	188
Sensor (OE pass-through) late-arriving jam service check .....	190
Sensor (OE pass-through) late-leaving jam service check.....	192
410–412 paper jams.....	195
410–412 paper jam messages.....	195
HCOE diverter drive jam service check .....	196
HCOE transport drive jam service check.....	198
Sensor (HCOE pass-through) static jam service check.....	200
Sensor (HCOE pass-through) late-arriving or late-leaving jam service check.....	201

415–418 paper jams .....	205
415–418 paper jam messages.....	205
Mailbox diverter drive jam service check.....	207
Mailbox transport drive jam service check .....	209
Sensor (mailbox pass-through 1) static jam service check .....	210
Sensor (mailbox pass-through 1) late-arriving or late-leaving jam service check.....	212
Sensor (mailbox pass-through 2) static jam service check .....	215
Sensor (mailbox pass-through 2) late-arriving or late-leaving jam service check .....	216
420 paper jams .....	220
420 paper jam messages.....	220
Sensor (staple finisher pass-through) static jam service check .....	221
Sensor (staple finisher pass-through) early- or late-arriving jam service check.....	223
Sensor (staple finisher pass-through) late leaving jam service check .....	227
Sensor (HPU leading edge) jam service check .....	230
SHPF transport drive jam service check .....	231
421–429 paper jams .....	233
421–429 paper jam messages.....	233
Left tamper jam service check .....	238
Right tamper jam service check .....	240
Staple finisher paddle jam service check .....	243
Staple finisher diverter jam service check.....	245
Staple jam service check.....	247
Sensor (staple throat paper present) jam service check .....	249
SHPF left tamper jam service check .....	251
SHPF right tamper jam service check.....	254
SHPF ejector jam service check.....	257
SHPF paddle jam service check.....	258
SHPF diverter jam service check .....	259
SHPF staple jam service check .....	261
SHPF staple throat jam service check .....	264
430–434 paper jams .....	265
430–434 paper jam messages.....	265
SHPF stapler head prime failure service check .....	267
SHPF elevator top jam service check .....	269
SHPF left staple jam service check .....	271
SHPF left staple throat jam service check .....	273
435–438 paper jams .....	274
435–438 paper jam messages.....	274
Staple finisher stack jam service check.....	275
Staple finisher timeout error service check.....	277
SHPF stack jam service check .....	279
SHPF timeout error service check .....	281
44y paper jams.....	283
440–444 paper jam messages.....	283
Sensor (HPU leading edge) hole punch jam service check.....	284

Sensor (HPU trailing edge) jam service check .....	286
Sensor (SHPF light array) jam service check.....	288
SHPF hole punch drive failure service check .....	289

# Notices, conventions, and safety information

## Laser notice

The printer is certified in the U.S. to conform to the requirements of DHHS 21 CFR, Chapter I, Subchapter J for Class I (1) laser products, and elsewhere is certified as a Class I laser product conforming to the requirements of IEC 60825-1: 2014.

Class I laser products are not considered to be hazardous. The laser system and printer are designed so there is never any human access to laser radiation above a Class I level during normal operation, user maintenance, or prescribed service conditions. The printer has a non-serviceable printhead assembly that contains a laser with the following specifications:

Class: IIIb (3b) AlGaAs

Nominal output power (milliwatts): 25

Wavelength (nanometers): 755–800

## Avis relatif à l'utilisation du laser

Cette imprimante est certifiée conforme aux exigences de la réglementation des Etats-Unis relative aux produits laser de classe I (1) (DHHS 21 CFR, Chapitre I, Sous-chapitre J). Pour les autres pays, elle est certifiée conforme aux exigences des normes CEI 60825-1:2014 relatives aux produits laser de classe I.

Les produits laser de classe I ne sont pas considérés comme dangereux. Le système laser ainsi que l'imprimante ont été conçus de manière à ce que personne ne soit jamais exposé à des radiations laser dépassant le niveau de classe I dans le cadre d'un fonctionnement normal, de l'entretien par l'utilisateur ou de la maintenance. L'imprimante dispose d'un ensemble de têtes d'impression non réparable contenant un laser doté des caractéristiques suivantes :

Classe : IIIb (3b) AlGaAs

Puissance de sortie nominale (milliwatts) : 25

Longueur d'onde (nanomètres) : 755-800

## Aviso de láser

Esta impresora se ha certificado en EE.UU. cumpliendo con los requisitos de DHHS 21 CFR, capítulo I, subcapítulo J para los productos láser de Clase I (1) y en otros países está certificada como un producto láser de Clase I de acuerdo con los requisitos de IEC 60825-1: 2014.

Los productos láser de Clase I no se consideran peligrosos. El sistema láser y la impresora se han diseñado para que el ser humano no acceda nunca a las radiaciones láser por encima del nivel de Clase I durante su uso normal, ni en tareas de mantenimiento o intervenciones de servicio técnico prescritas. El conjunto de cabezal de impresión de la impresora no se puede reparar y contiene un láser con las siguientes especificaciones:

Clase: IIIb (3b) AlGaAs

Potencia nominal de salida (milivatios): 25

Longitud de onda (nanómetros): 755-800

## Laser-Hinweis

Der Drucker wurde in den USA zertifiziert und entspricht den Anforderungen der Vorschriften DHHS 21 CFR Kapitel I für Laserprodukte der Klasse I (1), andernorts ist er als Laserprodukt der Klasse I zertifiziert, das den Anforderungen von IEC 60825-1 entspricht: 2014.

Laserprodukte der Klasse I werden nicht als gefährlich betrachtet. Das Lasersystem und der Drucker sind so konstruiert, dass unter normalen Betriebsbedingungen, bei der Wartung durch den Benutzer oder bei den vorgeschriebenen Wartungsbedingungen Menschen keiner Laserstrahlung ausgesetzt sind, die die Werte für Klasse I überschreitet. Der Drucker verfügt über eine Druckkopfeinheit, die nicht gewartet werden kann und mit einem Laser mit den folgenden Spezifikationen ausgestattet ist.

Klasse: IIIb (3b) AlGaAs

Nennausgangsleistung (Milliwatt): 25

Wellenlänge (Nanometer): 755–800

## Conventions

**Note:** A *note* identifies information that could help you.

**Warning:** A *warning* identifies something that could damage the product hardware or software.

**CAUTION:** A *caution* indicates a potentially hazardous situation that could injure you.

Different types of caution statements include:

-  **CAUTION—POTENTIAL INJURY:** Indicates a risk of injury.
-  **CAUTION—SHOCK HAZARD:** Indicates a risk of electrical shock.
-  **CAUTION—HOT SURFACE:** Indicates a risk of burn if touched.
-  **CAUTION—TIPPING HAZARD:** Indicates a crush hazard.
-  **CAUTION—PINCH HAZARD:** Indicates a risk of being caught between moving parts.

## Conventions

**Remarque :** Une *Remarque* fournit des informations pouvant vous être utiles.

**Avertissement :** Un *Avertissement* signale un danger susceptible d'endommager le logiciel ou le matériel.

**ATTENTION :** La mention *Attention* vous signale un risque de blessure corporelle.

Il existe différentes mises en garde :

-  **ATTENTION—RISQUE DE BLESSURE :** Signale un risque de blessure.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** Signale un risque d'électrocution.
-  **ATTENTION—SURFACE CHAUDE :** Signale un risque de brûlure de contact.
-  **ATTENTION—RISQUE DE BASCULEMENT :** Signale un risque d'écrasement.

 **ATTENTION : RISQUE DE PINCEMENT :** Signale un risque de pincement entre des pièces mobiles.

## Convenciones

**Nota:** Las *notas* señalan información que puede serle útil.

**Aviso:** Las *advertencias* indican algo que podría dañar el software o el hardware del producto.

**PRECAUCIÓN:** Las *precauciones* indican una situación de posible peligro que puede implicar lesiones para el usuario.

Estos son los tipos de avisos de precaución que existen:

 **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** Indica que existe riesgo de lesiones.

 **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Indica que existe riesgo de descarga eléctrica.

 **PRECAUCIÓN: SUPERFICIE CALIENTE:** Indica que existe riesgo de sufrir quemaduras por contacto.

 **PRECAUCIÓN: RIESGO DE CAÍDA:** Indica que existe peligro de aplastamiento.

 **PRECAUCIÓN: PELIGRO DE ATRAPAMIENTO:** Existe riesgo de atrapamiento entre las piezas en movimiento.

## Konventionen

**Hinweis:** Ein *Hinweis* enthält nützliche Informationen.

**Warnung:** Durch eine *Warnung* werden Sie auf einen Umstand hingewiesen, durch den die Produkthardware oder -software beschädigt werden könnte.

**VORSICHT:** *Vorsicht* weist auf eine mögliche gefährliche Situation hin, die ein Verletzungsrisiko birgt.

Verschiedene Vorsichtshinweise:

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Weist auf ein Verletzungsrisiko hin.

 **VORSICHT – STROMSCHLAGGEFAHR:** Weist auf das Risiko eines elektrischen Schlags hin.

 **VORSICHT – HEISSE OBERFLÄCHE:** Weist auf das Risiko von Verbrennungen bei Berührung hin.

 **VORSICHT – KIPPGEFAHR:** Weist auf Quetschgefahr hin.

 **VORSICHT – QUETSCHGEFAHR:** Weist auf das Risiko hin, zwischen beweglichen Komponenten eingequetscht zu werden.

## Safety information

- The safety of this product is based on testing and approvals of the original design and specific components. The manufacturer is not responsible for safety in the event of use of unauthorized replacement parts.
- The maintenance information for this product has been prepared for use by a professional service person and is not intended to be used by others.

- There may be an increased risk of electrical shock and personal injury during disassembly and servicing of this product. Professional service personnel should understand this risk and take necessary precautions.

 **CAUTION—SHOCK HAZARD:** When you see this symbol on the product, there is a danger from hazardous voltage in the area of the product where you are working. Unplug the product before you begin, or use caution if the product must receive power in order to perform the task.

 **CAUTION—POTENTIAL INJURY:** The lithium battery in this product is not intended to be replaced. There is a danger of explosion if a lithium battery is incorrectly replaced. Do not recharge, disassemble, or incinerate a lithium battery. Discard used lithium batteries according to the manufacturer's instructions and local regulations.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, use only the power cord provided with this product or the manufacturer's authorized replacement.

 **CAUTION—POTENTIAL INJURY:** Do not use this product with extension cords, multioutlet power strips, multioutlet extenders, or UPS devices. The power capacity of these types of accessories can be easily overloaded by a laser printer and may result in a risk of fire, property damage, or poor printer performance.

 **CAUTION—POTENTIAL INJURY:** Only a Lexmark Inline Surge Protector that is properly connected between the printer and the power cord provided with the printer may be used with this product. The use of non-Lexmark surge protection devices may result in a risk of fire, property damage, or poor printer performance.

 **CAUTION—POTENTIAL INJURY:** If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

## Consignes de sécurité

- La sécurité de ce produit est basée sur des tests et certifications de sa conception d'origine et de ses composants spécifiques. Le fabricant décline toute responsabilité en cas d'utilisation de pièces de rechange non autorisées.
- Les informations de maintenance de ce produit sont destinées à des professionnels qualifiés et ne sont pas conçues pour être utilisées par d'autres personnes.
- Il existe un risque potentiel de choc électrique et de blessures lors du démontage et de la maintenance de ce produit. Le personnel professionnel de maintenance doit comprendre les risques et prendre les précautions nécessaires.

 **ATTENTION—RISQUE D'ELECTROCUTION :** Ce symbole indique un danger lié à des niveaux de tension dangereux dans la zone du produit à manipuler. Débranchez le produit avant de commencer, ou agissez avec prudence si le produit doit être alimenté pour effectuer l'opération.

 **ATTENTION—RISQUE DE BLESSURE :** La batterie lithium de ce produit n'est pas destinée à être remplacée. Si vous ne respectez pas les instructions de remplacement de la batterie, vous risquez de provoquer une explosion. Ne rechargez pas, ne désassemblez pas et ne brûlez pas la batterie au lithium. Mettez les batteries lithium usagées au rebut selon les instructions du fabricant et les réglementations locales.

 **ATTENTION—RISQUE DE BLESSURE :** Pour éviter tout risque d'électrocution ou d'incendie, branchez le câble d'alimentation directement à une prise électrique répondant aux exigences requises et correctement mise à la terre, proche du produit et facile d'accès.

-  **ATTENTION—RISQUE DE BLESSURE** : Pour éviter tout risque d'incendie ou d'électrocution, utilisez uniquement le câble d'alimentation fourni avec ce produit ou un câble de remplacement autorisé par le fabricant.
-  **ATTENTION—RISQUE DE BLESSURE** : Ce produit ne doit pas être utilisé avec des rallonges, des barres multiprises, des rallonges multiprises ou des périphériques UPS. La capacité de ces types d'accessoires peut être facilement dépassée par une imprimante laser, d'où un risque de dégâts matériels, d'incendie ou de performances d'impression amoindries.
-  **ATTENTION—RISQUE DE BLESSURE** : Utilisez uniquement un parasurtenseur correctement raccordé à l'imprimante et au câble d'alimentation fourni avec la machine. L'utilisation de parasurtenseurs non fabriqués par Lexmark comporte un risque d'incendie et de dégâts matériels, et peut amoindrir les performances de l'imprimante.
-  **ATTENTION—RISQUE DE BLESSURE** : Si votre imprimante pèse plus de 20 kg (44 lb), l'intervention d'au moins deux personnes est nécessaire pour la soulever sans risque.

## Información de seguridad

- La seguridad de este producto se basa en las pruebas y comprobaciones del diseño original y los componentes específicos. El fabricante no se hace responsable de la seguridad en caso de uso de piezas de repuesto no autorizadas.
  - La información de mantenimiento de este producto se ha preparado para su uso por parte de un profesional de asistencia técnica y no está diseñada para su uso por parte de otros usuarios.
  - Es posible que haya un mayor riesgo de descarga eléctrica y daños personales durante el desmontaje y el mantenimiento de este producto. El personal de asistencia profesional debe conocer este riesgo y tomar las precauciones necesarias.
-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Cuando vea este símbolo en el producto, existe peligro de tensiones peligrosas en el área del producto en la que está trabajando. Desconecte el producto antes de empezar o tenga cuidado si el producto debe recibir alimentación a fin de realizar la tarea.
  -  **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** La batería de litio de este producto no debe reemplazarse. Existe riesgo de explosión si se sustituye incorrectamente una batería de litio. No recargue, desmonte ni incinere una batería de litio. Deseche las baterías de litio usadas según las instrucciones del fabricante y las normativas locales.
  -  **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** Para evitar el riesgo de incendio o descarga eléctrica, conecte el cable de alimentación a una toma de corriente debidamente conectada a tierra con la potencia adecuada que se encuentre cerca del dispositivo y resulte fácilmente accesible.
  -  **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** Para evitar el riesgo de incendio o descarga eléctrica, utilice exclusivamente el cable de alimentación que se suministra junto con este producto o el repuesto autorizado por el fabricante.
  -  **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** No utilice este producto con cables alargadores, regletas de varias tomas, cables alargadores de varias tomas o sistemas de alimentación ininterrumpida. La potencia de este tipo de accesorios puede sobrecargarse fácilmente si se utiliza una impresora láser, lo que puede dar lugar a que el rendimiento de la impresora sea bajo, a daños materiales o a posibles incendios.

 **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** Solo debe usarse con este producto un protector de sobretensión insertable Lexmark debidamente conectado entre la impresora y el cable de alimentación que con ella se suministra. El uso de protectores de sobretensión de marcas distintas a Lexmark puede dar lugar a que el rendimiento de la impresora sea bajo, a daños materiales o a posibles incendios.

 **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** si el peso de la impresora es superior a 20 kg (44 lb), pueden ser necesarias dos o más personas para levantarla de forma segura.

## Sicherheitshinweise

- Die Sicherheit dieses Produkts basiert auf Tests und Zulassungen des Originaldesigns und der spezifischen Komponenten. Sofern nicht autorisierte Ersatzteile eingesetzt werden, übernimmt der Hersteller keinerlei Verantwortung in Bezug auf die Sicherheit dieses Produkts.
- Die Wartungsinformationen für dieses Produkt wurden für ausgebildete Servicemitarbeiter zusammengestellt und dürfen nicht von anderen verwendet werden.
- Möglicherweise besteht bei der Demontage und Wartung dieses Produkts eine erhöhte Stromschlag- und Verletzungsgefahr. Ausgebildete Servicemitarbeiter sollten sich dieser Gefahr bewusst sein und die notwendigen Vorsichtsmaßnahmen ergreifen.

 **VORSICHT – STROMSCHLAGGEFAHR:** Wenn Sie dieses Symbol sehen, besteht eine Gefahr durch gefährliche Spannungen in dem Produktbereich, in dem Sie arbeiten. Trennen Sie das Produkt von seiner Stromverbindung, bevor Sie beginnen, oder gehen Sie vorsichtig vor, wenn das Produkt für die Durchführung der Aufgabe mit Strom versorgt werden muss.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Die Lithiumbatterie in diesem Produkt darf nicht ausgetauscht werden. Wird eine Lithiumbatterie nicht ordnungsgemäß ausgetauscht, besteht Explosionsgefahr. Lithiumbatterien dürfen auf keinen Fall wieder aufgeladen, auseinander genommen oder verbrannt werden. Befolgen Sie zum Entsorgen verbrauchter Lithiumbatterien die Anweisungen des Herstellers und die örtlichen Bestimmungen.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Um Feuer- und Stromschlaggefahr zu vermeiden, schließen Sie das Netzkabel direkt an eine ordnungsgemäß geerdete Steckdose an, die sich in der Nähe des Geräts befindet und leicht zugänglich ist.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Um das Risiko eines Feuers oder elektrischen Schlags zu vermeiden, verwenden Sie ausschließlich das diesem Produkt beiliegende Netzkabel bzw. ein durch den Hersteller zugelassenes Ersatzkabel.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Verwenden Sie das Produkt nicht mit Verlängerungskabeln, Mehrfachsteckdosen, Mehrfachverlängerungen oder Geräten für unterbrechungsfreie Stromversorgung. Die Belastbarkeit solcher Zubehörteile kann durch Laserdrucker schnell überschritten werden, was zu Brandgefahr, Beschädigung von Eigentum oder einer eingeschränkten Druckerleistung führen kann.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Mit diesem Produkt darf nur ein Lexmark Inline Surge Protector verwendet werden, der vorschriftsgemäß zwischen dem Drucker und dem mitgelieferten Netzkabel angeschlossen ist. Die Verwendung von nicht von Lexmark stammenden Überspannungsschutzgeräten kann zu Brandgefahr, Beschädigung von Eigentum oder einer eingeschränkten Druckerleistung führen.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Wenn der Drucker mehr als 20 kg wiegt, sind zum sicheren Anheben mindestens zwei Personen notwendig.

# Change history

## Change history

### February 17, 2021

- Removed PN 40X0289, and added PN 40X0269 in the Parts catalog chapter.

### December 15, 2020

- Duplex/MPF tray (41X1122) was added to the Duplex parts catalog.

### October 15, 2020

- Print quality checks were renamed.
- Errors were added to the User attendance messages.
  - 11.41, 11.42, 11.51, 11.52, 11. 91, 11.92

### August 14, 2020

- The 950.10 and 953.99 error codes were added to the 912–992 error messages.
- NVRAM mismatch failure service check was added.
- Critical information for controller board and control panel replacement was revised.
- Power cords parts catalog was added. New FRUs were added.
  - 40X0289, Power cord (low-voltage, 6 feet)—USA, Canada
  - 40X0288, Power cord (high-voltage)—Argentina
  - 40X1766, Power cord (high-voltage)—Bolivia, Peru
  - 40X4596, Power cord (low-voltage)—Brazil PPB kits
  - 40X0273, Power cord (high-voltage)—Chile, Uruguay
  - 40X7104, Power cord (low-voltage, 8 feet)—USA, Canada
  - 40X0301, Power cord (high-voltage)—Australia, New Zealand
  - 40X0270, Power cord (100 V)—Japan
  - 40X0303, Power cord (high-voltage)—PRC
  - 40X1791, Power cord (low-voltage)—Taiwan
  - 40X1792, Power cord (high-voltage)—Korea
  - 40X7229, Power cord—India
  - 40X0271, Power cord (high-voltage)—United Kingdom, Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Vietnam, Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Tibet, Hong Kong
  - 40X0278, Power cord (high-voltage)—Austria
  - 40X1774, Power cord (high-voltage)—Denmark, Finland, Norway, Sweden, Iceland
  - 40X1773, Power cord (high-voltage)—South Africa, Namibia, Lesotho, Botswana, Pakistan
  - 40X1772, Power cord (high-voltage)—Switzerland
  - 40X0275, Power cord (high-voltage)—Israel
  - 40X1767, Power cord (high-voltage, 8 feet)—Europe

### August 3, 2020

- A note has been added in the Restoring the printer configuration after replacing the controller board topic in the Parts removal chapter.

### July 29, 2020

- A note that the FRU is obsolete was added to the 41X1014 FRU description.

### May 11, 2020

- Bin cover PN for Covers parts catalog was changed from 41X1632 to 41X2839.

### April 17, 2020

- Special media separator pad (41X2865) was added to the Tray/feed parts catalog.
- Special media separator pad (41X2865) was added to the 250- and 550-sheet tray options 1 parts catalog.
- Special media separator pad (41X2865) was added to the 2100-sheet tray option 1 parts catalog.

### February 21, 2020

- New FRU was added to the Miscellaneous parts catalog—TWN4 USB front reader kit authentication device (41X2615).
- Topics from the Service Engineer menu were removed.
  - Accessing the service engineer (SE) menu
  - Service engineer (SE) menu
- Topics were added to the Service Engineer menu.
  - General SE menu
  - Network SE menu
- Descriptions for FRUs 41X1114 and 41X1063 were updated.
- A step for checking the sensor actuator was added to the Sensor (tray 1 pass-through) static jam service check.
- Artwork and Removal procedure references were updated for the Electronics 2 parts catalog.
- Video links were added.
  - Control panel (2.4-inch) board and display removal
  - Controller board removal
  - HVPS removal
  - LVPS removal
  - Paper feeder removal
  - Printhead removal
  - Covers removal

### January 24, 2020

- Control panel (2.4-inch) cover FRU PN was changed from 41X2689 to 41X2690 on the Control panel (2.4-inch display) parts catalog.
- Updated the Updating the printer firmware topic to include using a USB cable connection option.

**January 10, 2020**

- Front door pivot (41X1643) was added to the Covers parts catalog.

**December 19, 2019**

- Resetting the roller kit counter information was removed from the Maintenance chapter.

**November 15, 2019**

- Control panel (2.4-inch) cover removal was added.
- Control panel (2.4-inch) board and display removal was added.
- Cable harness (41X2316) was added to the Electronics 1 parts catalog.
- An error code (202.95) was added to the 202 paper jam messages.
- HCOE rear door PN was changed from 41X1896 to 41X1869.

**October 11, 2019**

- Control panel (2.4-inch) cover (41X2689) was added to the Control panel (2.4-inch display) parts catalog.

**September 20, 2019**

- Supplies security error service check was added to address 938.04 errors.

**August 16, 2019**

- LVPS failure service check was updated to include replacing the controller board.
- Combo card (41X2703) for 2.4-inch control panel models was added to the Miscellaneous parts catalog.

**July 18, 2019**

- Part numbers and descriptions were updated for the Fuser parts catalog.
- Wax wiper FRU PN was changed from 40X0581 to 40X8581.
- Oil wiper FRU PN was changed from 40X0579 to 40X8579.
- Optional staple finisher operation section was added.

**June 17, 2019**

- Printhead error service check was updated.
- Error codes and descriptions were updated for the 32 user attendance messages.
- Unsupported toner cartridge service check was added to address 32.40D errors.

**May 31, 2019**

- Fuser components information was added to the Printer operation section.
- Inspection guide was added to the Maintenance section.
- Step for removing the printhead access cover was added to the Fuser removal.
- Wax wiper (40X0581) and oil wiper (40X0579) were added to the Fuser Parts catalog.
- Printhead access cover (41X1063) was added to the Covers Parts catalog.
- Transfer roller contact (41X2673) was added to the Electronics 2 Parts catalog.
- Transfer roller contact removal was added.
- System software error service check was updated.

**May 10, 2019**

- Critical information for controller board or control panel replacement was added to the Parts removal section.
- Printhead shield (41X2137) was added to the Electronics 1 Parts catalog.
- Descriptions for 41X1094 and 41X1093 were swapped on the Electronics 2 Parts catalog.

**February 15, 2019**

- An error code was added to the 221 paper jam messages.
- An error code was added to the 240 paper jam messages.
- Error codes were added to the 241 paper jam messages.

**January 11, 2019**

- Model information was revised for the description of the 41X1127 FRU on the Electronics 1 Parts catalog.

**December 10, 2018**

- Added Maintenance kits in the parts catalog section.

**November 16, 2018**

- Spacer (41X2181), Caster base (41X2180), and Caster wheel (41X2345) FRUs were added to the Miscellaneous Parts catalog.

**October 30, 2018**

- Guide roller (41X2610) was added to the Motors Parts catalog.
- Guide roller (41X2610) was added to the Electronics 1 Parts catalog.

**October 16, 2018**

- User attendance messages section was added.
- Installation information was added to the Controller board removal.

**September 27, 2018**

- Controller board (41X2606) was added to the Electronics 1 Parts catalog.
- Step for checking the roller was added to the Sensor (fuser exit) late-arriving jam service check.
- New topics (147 error messages and MPF drive failure service check) were added.
- New error codes and service checks were added to the 420 paper jams section.
- New error codes and service checks were added to the 421–429 paper jams section.
- New error codes and service checks were added to the 435–438 paper jams section.
- 430–434 paper jams section was added.
- 440–444 paper jams section was added.
- 331 errors section was added.
- New error codes were added to the 320–323 error messages.

**September 7, 2018**

- 80-mm fan (41X1177) was added to the Electronics 2 Parts catalog.
- 43y paper jams section was added.

- 200K Maintenance kit was changed to 225K Maintenance kit for the Belt SY fusers on the Maintenance kits topic.

### **August 17, 2018**

- HVPS (41X1099) was added to the Electronics 1 Parts catalog.
- 421–429 paper jams section was added.

### **August 3, 2018**

- Data security notice was updated.
- 421–422 paper jams section was added.
- 420 paper jams section was added.
- 32y errors section was added.
- 316 errors section was added.
- Error codes were revised on the 415–418 paper jams.
- Error codes were revised on the 311 error messages.
- Error codes were deleted on the 306 error messages.

### **July 16, 2018**

- Software CD was added to the Miscellaneous Parts catalog.
- 415–418 paper jams section was added.
- 410–412 paper jams section was added.
- 311 errors section was added.
- Steps for checking the diverter was removed from the Sensor (OE pass-through) late-leaving jam service check.

### **June 29, 2018**

- Miscellaneous Parts catalog was added.
- Base printer symptoms and Network service check were added.

# General information

## Printer model configurations

The Lexmark™ MS725, Lexmark MS82x, Lexmark B2865, and Lexmark M52xx printers are network-capable, laser printers. All information in this service manual pertains to all models unless explicitly noted.

The printer is available in the following models:

Model name	Configuration / description	Machine type / model number
MS821n	Network, simplex, 2.4-inch color display	4064-210
MS821dn	Network, duplex, 2.4-inch color display	4064-230
MS822de	Network, duplex, 4.3-inch e-Task touch screen	4064-235
MS725dvn	Network, duplex, 2.4-inch color display, HR fuser	4064-830
MS823n	Network, simplex, 2.4-inch color display	4064-410
MS823dn	Network, duplex, 2.4-inch color display	4064-430
MS825dn	Network, duplex, 2.4-inch color display	4064-630
MS826de	Network, duplex, 4.3-inch e-Task touch screen	4064-635
B2865dw	Network, duplex, 2.4-inch color display	4064-438
M5255	Network, duplex, 4.3-inch e-Task touch screen	4064-295
M5270	Network, duplex, 4.3-inch e-Task touch screen	4064-695

## Paper support

The following tables provide information on standard and optional paper sources and the sizes, types, and weights of paper they support.

**Note:** For an unlisted paper size, select the closest *larger* listed size.

### Supported paper sizes

#### Paper sizes supported by the printer

Paper size	Standard 550-sheet tray, optional 250- or 550-sheet tray	Optional 2100-sheet tray	Multipurpose feeder	Two-sided printing
<b>A4</b> 210 x 297 mm (8.3 x 11.7 in.)	✓	✓	✓	✓
<b>A5 LEF<sup>1</sup></b> 210 x 148 mm (8.3 x 5.8 in.)	✓	✓	✓	✓
<b>A5 SEF<sup>1</sup></b> 148 x 210 mm (5.8 x 8.3 in.)	✓	x	✓	x
<b>A6</b> 105 x 148 mm (4.1 x 5.8 in.)	✓	x	✓	✓
<b>JIS B5</b> 182 x 257 mm (7.2 x 10.1 in.)	✓	x	✓	✓
<b>Oficio (Mexico)</b> 216 x 340 mm (8.5 x 13.4 in.)	✓	✓	✓	✓
<b>Statement</b> 140 x 216 mm (5.5 x 8.5 in.)	✓	x	✓	✓
<b>Executive</b> 184 x 267 mm (7.3 x 10.5 in.)	✓	x	✓	✓
<b>Letter</b> 216 x 279 mm (8.5 x 11 in.)	✓	✓	✓	✓
<b>Legal</b> 216 x 356 mm (8.5 x 14 in.)	✓	✓	✓	✓
<b>Folio</b> 216 x 330 mm (8.5 x 13 in.)	✓	✓	✓	✓

<sup>1</sup> A5 long edge feed (LEF) is recommended over A5 short edge feed (SEF).  
<sup>2</sup> Envelopes wider than 101.6 mm (4.5 in.) may crease. This paper type must be tested for acceptability.  
<sup>3</sup> Envelopes are not supported on Lexmark MS725.

Paper size	Standard 550-sheet tray, optional 250- or 550-sheet tray	Optional 2100-sheet tray	Multipurpose feeder	Two-sided printing
<b>Universal</b> 105 x 148 mm (4.1 x 5.8 in.) to 216 x 356 mm (8.5 x 14 in.)	✓	X	✓	✓
<b>7 3/4 Envelope (Monarch)<sup>3</sup></b> 98 x 191 mm (3.9 x 7.5 in.)	✓	X	✓	X
<b>9 Envelope<sup>3</sup></b> 98 x 225 mm (3.9 x 8.9 in.)	✓	X	✓	X
<b>10 Envelope<sup>2,3</sup></b> 105 x 241 mm (4.1 x 9.5 in.)	✓	X	✓	X
<b>DL Envelope<sup>2,3</sup></b> 110 x 220 mm (4.3 x 8.7 in.)	✓	X	✓	X
<b>C5 Envelope<sup>2,3</sup></b> 162 x 229 mm (6.4 x 9 in.)	✓	X	✓	X
<b>B5 Envelope<sup>2,3</sup></b> 176 x 250 mm (6.9 x 9.8 in.)	✓	X	✓	X
<b>Other Envelope<sup>2,3</sup></b> 98.4 x 162 mm (3.9 x 6.4 in.) to 176 x 250 mm (6.9 x 9.8 in.)	✓	X	✓	X

<sup>1</sup> A5 long edge feed (LEF) is recommended over A5 short edge feed (SEF).

<sup>2</sup> Envelopes wider than 101.6 mm (4.5 in.) may crease. This paper type must be tested for acceptability.

<sup>3</sup> Envelopes are not supported on Lexmark MS725.

### Paper sizes supported by the output options or finishers

Paper size	Output expander or high-capacity output expander	4-bin mailbox	Staple finisher		Staple, hole punch finisher		
			Stack	Staple	Stack	Staple	Hole punch
<b>A4</b> 210 x 297 mm (8.3 x 11.7 in.)	✓	✓	✓	✓	✓	✓	✓
<b>A5 LEF</b> 210 x 148 mm (8.3 x 5.8 in.)	✓	✓	✓	✓	✓	✓	X
<b>A5 SEF</b> 148 x 210 mm (5.8 x 8.3 in.)	✓	✓	✓	X	✓	X	X

Paper size	Output expander or high-capacity output expander	4-bin mailbox	Staple finisher		Staple, hole punch finisher		
			Stack	Staple	Stack	Staple	Hole punch

## Supported paper weights

### Paper weights supported by the printer

Paper type and weight	Standard 550-sheet tray, optional 250- or 550-sheet tray	Optional 2100-sheet tray	Multipurpose feeder	Two-sided printing
<b>Plain paper or Bond<sup>1</sup></b> 60–176 g/m <sup>2</sup> grain long (16–47-lb bond)	✓	✓	✓	✓
<b>Card stock</b> 203 g/m <sup>2</sup> grain long (125-lb bond)	✓	X	✓	✓
<b>Card stock</b> 199 g/m <sup>2</sup> grain long (110-lb bond)	✓	X	✓	✓
<b>Card stock</b> 176 g/m <sup>2</sup> grain long (65-lb bond)	✓	X	✓	✓
<b>Transparency</b> 138–146 g/m <sup>2</sup> grain long (37–39-lb bond)	✓	X	✓	X
<b>Paper labels</b> 180 g/m <sup>2</sup> (48-lb bond)	✓	X	✓	✓

<sup>1</sup> Grain short is preferred for paper over 176 g/m<sup>2</sup> (47 lb).

<sup>2</sup> Pressure-sensitive area must enter the printer first.

<sup>3</sup> 28-lb bond envelopes are limited to 25% cotton content.

Paper type and weight	Standard 550-sheet tray, optional 250- or 550-sheet tray	Optional 2100-sheet tray	Multipurpose feeder	Two-sided printing
<b>Integrated forms<sup>2</sup></b> 140–175 g/m <sup>2</sup> (37–47-lb bond)	✓	X	✓	✓
<b>Integrated forms</b> 75–135 g/m <sup>2</sup> (20–36-lb bond)	✓	X	✓	✓
<b>Envelopes<sup>3</sup></b> 60–105 g/m <sup>2</sup> (16–28-lb bond)	✓	X	✓	✓

## Tools required for service

- Flat-blade screwdrivers, various sizes
- #1 Phillips screwdriver, magnetic
- #2 Phillips screwdriver, magnetic
- #2 Phillips screwdriver, magnetic short-blade
- 7/32-inch (5.5-mm) open-end wrench
- 7.0-mm nut driver
- Needle-nose pliers
- Diagonal side cutters

- Spring hook
- Feeler gauges
- Analog or digital multimeter
- Parallel wrap plug 1319128
- Twinax/serial debug cable 1381963
- Coax/serial debug cable 1381964
- Flashlight (optional)
- 3-mm hex wrench
- 5.5-mm hex wrench

# Diagnostics and troubleshooting

## Troubleshooting precautions

-  **CAUTION—SHOCK HAZARD:** When you see this symbol on the product, there is a danger from hazardous voltage in the area of the product where you are working. Unplug the product before you begin, or use caution if the product must receive power in order to perform the task.
-  **CAUTION—SHOCK HAZARD:** This product uses an electronic power switch. It does not physically disconnect the input AC voltage. To avoid the risk of electrical shock, always remove the power cord from the printer when removal of the input AC voltage is required.
-  **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock while troubleshooting with covers removed or doors open, do not touch the exposed wires or circuits while the printer is connected to an electrical outlet.
-  **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock and to prevent damage to the printer, remove the power cord from the electrical outlet and disconnect all connections to any external devices before you connect or disconnect any cable, electronic board, or assembly.
-  **CAUTION—HOT SURFACE:** The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.
-  **CAUTION—PINCH HAZARD:** To avoid the risk of a pinch injury, use caution in areas marked with this label. Pinch injuries may occur around moving parts, such as gears, doors, trays, and covers.

## Précautions de dépannage

-  **ATTENTION—RISQUE D'ELECTROCUTION :** Ce symbole indique un danger lié à des niveaux de tension dangereux dans la zone du produit à manipuler. Débranchez le produit avant de commencer, ou agissez avec prudence si le produit doit être alimenté pour effectuer l'opération.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** Ce produit utilise un commutateur d'alimentation électronique. Il ne déconnecte pas physiquement la tension d'alimentation CA. Pour éviter tout risque d'électrocution, débranchez toujours le cordon d'alimentation de l'imprimante lorsque vous devez déconnecter la tension d'alimentation CA.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** Pour éviter tout risque d'électrocution lors du dépannage de l'imprimante avec les capots retirés ou les portes ouvertes, prenez garde de ne pas toucher les fils ou circuits dénudés si l'imprimante est connectée à une prise électrique.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** Pour éviter tout risque d'électrocution et éviter d'endommager l'imprimante, débranchez le cordon d'alimentation de la prise électrique et déconnectez toute connexion à tout périphérique externe avant de brancher ou débrancher des câbles ou circuits et assemblages électroniques.
-  **ATTENTION—SURFACE CHAUDE :** L'intérieur de l'imprimante risque d'être brûlant. Pour réduire le risque de brûlure, laissez la surface ou le composant refroidir avant d'y toucher.
-  **ATTENTION : RISQUE DE PINCEMENT :** Pour éviter tout risque de blessure par pincement, agissez avec précaution au niveau des zones signalées par cette étiquette. Les blessures par pincement peuvent se produire autour des pièces mobiles telles que les engrenages, portes, tiroirs et capots.

## Precauciones durante la solución de problemas

-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Cuando vea este símbolo en el producto, existe peligro de tensiones peligrosas en el área del producto en la que está trabajando. Desconecte el producto antes de empezar o tenga cuidado si el producto debe recibir alimentación a fin de realizar la tarea.
-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Este producto utiliza un interruptor de corriente electrónico. No desconecta físicamente la entrada de voltaje de CA. Para evitar el riesgo de descarga eléctrica, desenchufe siempre el cable de alimentación de la impresora cuando sea necesario retirar la entrada de voltaje de CA.
-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Para evitar el riesgo de descarga eléctrica al solucionar problemas sin las cubiertas o con las puertas abiertas, no toque los cables ni los circuitos expuestos mientras la impresora está conectada a una toma de corriente.
-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Para evitar el riesgo de descargas eléctricas y daños en la impresora, retire el cable de alimentación de la toma eléctrica y desconecte todas las conexiones a dispositivos externos antes de conectar o desconectar cualquier cable, placa electrónica o conjunto.
-  **PRECAUCIÓN: SUPERFICIE CALIENTE:** El interior de la impresora podría estar caliente. Para evitar el riesgo de heridas producidas por el contacto con un componente caliente, deje que la superficie se enfríe antes de tocarlo.
-  **PRECAUCIÓN: PELIGRO DE ATRAPAMIENTO:** Para evitar el riesgo de lesión por atrapamiento, preste atención en las áreas marcadas con esta etiqueta. Las lesiones por atrapamiento se pueden producir en torno a partes móviles, tales como engranajes, puertas, bandejas y cubiertas.

## Vorsichtsmaßnahmen bei der Fehlerbehebung

-  **VORSICHT – STROMSCHLAGGEFAHR:** Wenn Sie dieses Symbol sehen, besteht eine Gefahr durch gefährliche Spannungen in dem Produktbereich, in dem Sie arbeiten. Trennen Sie das Produkt von seiner Stromverbindung, bevor Sie beginnen, oder gehen Sie vorsichtig vor, wenn das Produkt für die Durchführung der Aufgabe mit Strom versorgt werden muss.
-  **VORSICHT – STROMSCHLAGGEFAHR:** Dieses Produkt verwendet einen elektronischen Leistungsschalter. Er trennt die Eingangswchselspannung nicht physikalisch. Um das Risiko eines elektrischen Schlags zu vermeiden, ziehen Sie stets das Netzkabel vom Drucker ab, wenn eine Abtrennung der Eingangswchselspannung erforderlich ist.
-  **VORSICHT – STROMSCHLAGGEFAHR:** Um die Gefahr eines Stromschlags während der Fehlerbehebung bei entfernten Abdeckungen oder offenen Klappen zu vermeiden, berühren Sie die freiliegenden Drähte oder Stromkreise nicht, wenn der Drucker an eine Steckdose angeschlossen ist.
-  **VORSICHT – STROMSCHLAGGEFAHR:** Um das Risiko eines elektrischen Schlags und Schäden am Drucker zu vermeiden, ziehen Sie das Netzkabel aus der Steckdose und trennen Sie alle Verbindungen zu jeglichen externen Geräten, bevor Sie Kabel, Elektronikplatinen oder Baugruppen einstecken oder abziehen.
-  **VORSICHT – HEISSE OBERFLÄCHE:** Das Innere des Druckers kann sehr heiß sein. Vermeiden Sie Verletzungen, indem Sie heiße Komponenten stets abkühlen lassen, bevor Sie ihre Oberfläche berühren.

**VORSICHT – QUETSCHGEFAHR:** Um das Risiko einer Quetschung zu vermeiden, gehen Sie in Bereichen, die mit diesem Etikett gekennzeichnet sind, mit Vorsicht vor. Quetschungen können im Bereich von beweglichen Komponenten auftreten, wie z. B. Zahnrädern, Klappen, Fächern und Abdeckungen.

## Troubleshooting overview

### Performing the initial troubleshooting check

Before you start the troubleshooting procedures, perform the following checks:

- Use genuine Lexmark supplies and parts for the best results. Third-party supplies or parts may affect the performance, reliability, or life of the printer and its imaging components.
- With the power cord unplugged from the electrical outlet, check that the cord is free from the breakage, short circuits, disconnected wires, or incorrect connections.
- Make sure the printer is properly grounded. Check the power cord ground terminal.
- Make sure the power supply line voltage is within 10% of the rated line voltage.
- Make sure the machine is securely installed on a level surface in a well-ventilated area.
- Make sure the room temperature is between 16 and 32°C (60 and 90°F) and that the relative humidity is between 20 and 80%.
- Avoid sites generating ammonia gas, high temperature, high humidity (near water faucets, kettles, humidifiers), cold spaces, near open flames, and dusty areas.
- Avoid sites exposed to direct sunlight.
- Make sure the paper is the recommended paper for this printer.
- Make a trial print with paper from a newly opened package, and check the result.

### Using Safe Mode

Safe Mode lets the printer continue to operate in a special limited mode in which it attempts to continue offering as much functionality as possible despite known issues. See [“Safe Mode print behavior” on page 46](#).

**Warning—Potential Damage:** Safe Mode is intended as a short-term workaround and should be used only in the case of a non-critical error when a print job must be completed before service can be arranged to repair the printer. The printer must be returned to standard operating mode before diagnostics can be run or full-function printing can continue.

You can enter Safe Mode in one of the following ways:

- Enter Safe Mode from the Configuration menu, and then POR the printer. See [“Config Menu” on page 390](#).
- For 2.4” display models, press the **Stop** and **Back** keys, and then POR the printer.

- For 4.3" and 7" display touch-screen models, press the **6** and **7** keys, and then POR the printer.
- For LED models, contact the next level of technical support for assistance.

Return the printer to standard operating mode to service the printer and return to full-function printing.

## Safe Mode print behavior

The following table outlines the behavior for this printer model while in Safe Mode:

Safe Mode engine features	Engine behavior	Control panel behavior
Simplex printing only	Reports that duplex printing is disabled.	Duplex print option is not selectable.
Ignore duplex sensor		
Ignore standard bin full sensor	Standard bin full messages are not reported.	Standard bin full messages will not occur.
Print at narrow media operating point	Pages are printed slower.	N/A
Ignore all input options	Reports that only Tray 1 is installed.	Only Tray 1 and the MPF are selectable.
Ignore all output options	Does not report any installed finishing options.	No finishing options are selectable.
Ignore rear door sensor	Rear door open messages are not reported.	Rear door open messages do not occur.
Reduce print speed	Pages are printed slower.	N/A
Reduce time to first print	Slower time to first print.	N/A

## Fixing print quality issues

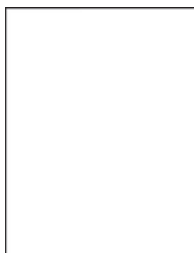

### Initial print quality check

Before troubleshooting print problems, perform the following:

- Make sure that the printer is located in an area that follows the recommended operating environment and power requirement specifications.
- Check the status of supplies. Replace supplies that are low or empty.
- Load 20-lb (75-80 g/m<sup>2</sup>) plain letter or A4 paper. Make sure that the paper guides are properly set and locked. From the control panel, set the paper size and type to match the paper loaded in the tray.
- From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Print and keep the Menu Settings Page. The original page is used to restore the custom settings if necessary. From the control panel, navigate to **Settings > Reports > Menu Settings Page**, and then press **OK**.

- On the Menu Settings page, check if the print resolution is set to 600 dpi and the toner darkness is set to Normal.
- Check the toner cartridges for damage, and replace if necessary.
- Make sure that the correct print driver is used to prevent print problems. If the wrong print driver is installed, then incorrect characters could print and the copy may not fit the page correctly.

## Blank or white pages check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Check and remove any packing material left on the imaging unit.</p> <p><b>b</b> Firmly shake the imaging unit to redistribute the toner, and then reinstall it.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Check the imaging unit for damage and proper installation, and replace if necessary.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Actions	Yes	No
<p><b>Step 5</b> Check the transfer roller for proper installation.</p> <p>Is the transfer roller properly installed?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reinstall the transfer roller. See <a href="#">“Transfer roller removal” on page 453.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the transfer roller for surface contamination and damage.</p> <p>Is the transfer roller free of contamination and damage?</p>	Go to step 8.	Go to step 14.
<p><b>Step 8</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check all the connections on the HVPS for proper connection.</p> <p>Is the HVPS properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Replace the connections.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Reseat connection J15 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Replace the connection.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.

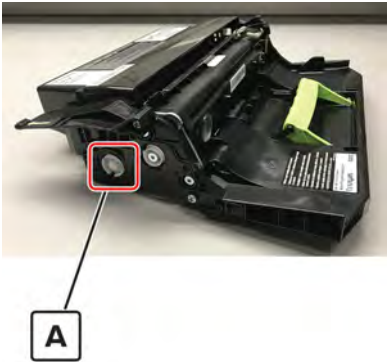

Actions	Yes	No
<p><b>Step 12</b></p> <p><b>a</b> Check the coupler for signs of damage. The coupler is located on the main motor drive of the printer.</p> <ul style="list-style-type: none"> <li>• Good condition</li> </ul>  <ul style="list-style-type: none"> <li>• Bad condition</li> </ul>  <p><b>b</b> If the coupler is damaged, then replace the main motor drive. See <a href="#">“Main motor drive removal” on page 417</a>.</p> <p>Does the problem remain?</p>	<p>Go to step 13.</p>	<p>The problem is solved.</p>
<p><b>Step 13</b></p> <p>Reseat the cable J71 on the controller board.</p> <p>Does the problem remain?</p>	<p>Go to step 14.</p>	<p>The problem is solved.</p>
<p><b>Step 14</b></p> <p>Replace the transfer roller. See <a href="#">“Transfer roller removal” on page 453</a>.</p> <p>Does the problem remain?</p>	<p>Go to step 15.</p>	<p>The problem is solved.</p>

Actions	Yes	No
<p><b>Step 15</b> Replace the laser printhead. See <a href="#">“Printhead removal” on page 461</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Compressed images appear on prints check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Remove the imaging unit, and then inspect the white photoconductor coupler (A). The coupler should be firmly connected to the imaging unit and should not freely rotate.</p>  <p>Does the coupler move freely or appear damaged?</p>	Go to step 2.	Go to step 3.
<p><b>Step 2</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Actions	Yes	No
<p><b>Step 3</b> Replace the motor (main). See <a href="#">“Main motor drive removal” on page 417.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Dark print check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46.](#)

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Turn off the printer, wait for 10 seconds, and then turn on the printer.</p> <p><b>b</b> Reduce the toner darkness. From the control panel, navigate to: <b>Settings &gt; Print Settings &gt; Quality menu</b></p> <p><b>Note:</b> 8 is the factory default setting.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Actions	Yes	No
<p><b>Step 4</b> From the control panel, set the paper type, texture, and weight in the Paper menu to match the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Depending on the operating system, specify the paper type, texture, and weight from Printing Preferences or Print dialog.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <ul style="list-style-type: none"> <li><b>a</b> Check if the paper loaded has texture or rough finishes.</li> <li><b>b</b> From the control panel, set the paper texture in the Paper menu to match the texture of the paper loaded.</li> </ul> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Make sure that the paper loaded is from a fresh package.</p> <p><b>Note:</b> Paper absorbs moisture due to high humidity. Store paper in its original wrapper until you use it.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <ul style="list-style-type: none"> <li><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</li> <li><b>b</b> Check all the connections on the HVPS for proper connection.</li> </ul> <p>Is the HVPS properly connected?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b> Replace the connections.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Fine lines are not printed correctly check

**Note:** This issue mostly occurs on fonts or characters with fine lines (especially on Chinese characters). Small texts and details may also not be printed correctly.

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

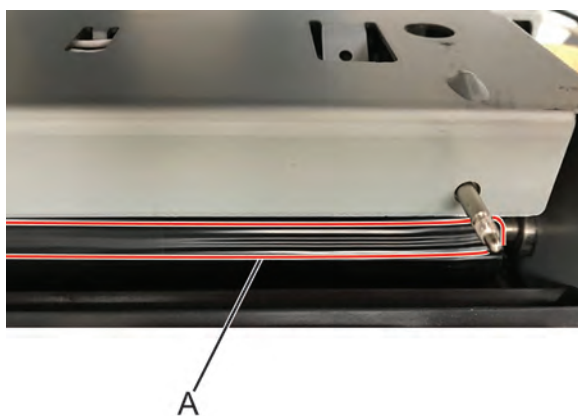

Actions	Yes	No
<p><b>Step 1</b></p> <p>Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> From the control panel, navigate to: <b>Print &gt; Quality &gt; Pixel Boost &gt; Fonts</b></p> <p><b>b</b> From the Quality menu, select <b>Toner Darkness</b>, and then adjust the setting to 7.</p> <p><b>c</b> Submit the changes.</p> <p><b>Note:</b> Adjusting the Toner Darkness setting to 7 results in a slightly lighter print. You may leave the Toner Darkness value at 8 in order to maintain the darkness that you have grown accustomed to, but this will result in reduced toner yield.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Folded or wrinkled paper check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

**Note:** Do not replace the fuser due to a wrinkled backup roller (A).

Actions	Yes	No
<p><b>Step 1</b></p> <p><b>a</b> Check if the printer is using a non-Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then do not replace the imaging unit. Refer the users to their cartridge supplier.</p> <p><b>b</b> Make sure that the toner cartridge is compatible with the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p><b>a</b> Check if the paper loaded is from a fresh package.</p> <p><b>Note:</b> The amount of moisture in paper affects both print quality and printer ability to feed paper correctly.</p> <p><b>b</b> Make sure that the printer supports the paper loaded. For a complete list of supported paper, see the printer <i>User's Guide</i>.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Actions	Yes	No
<p><b>Step 3</b></p> <p>Make sure that the fuser entry guide is free of waste toner and dust.</p> <p><b>Warning—Potential Damage:</b> Clean the fuser entry guide with a toner vacuum and cloth. Do not use compressed air.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>If the fuser has reached end of life, then replace the maintenance kit.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Gray background check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b></p> <p><b>a</b> Turn off the printer, wait for 10 seconds, and then turn on the printer.</p> <p><b>b</b> From the printer control panel:</p> <ol style="list-style-type: none"> <li><b>1</b> Increase the toner darkness in the Quality menu. <b>Note:</b> 8 is the factory default setting.</li> <li><b>2</b> Set the paper type, texture, and weight in the Paper menu to match the paper loaded.</li> </ol> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 4.	Go to step 3.

Actions	Yes	No
<p><b>Step 3</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Remove any packing material left on the imaging unit, including pieces of tape on the side of the unit and the red separator plastic.</p> <div data-bbox="386 514 760 1024" style="text-align: center;"> </div> <p><b>Note:</b> You may need a pair of pliers to remove a piece of broken plastic inside the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Make sure that connection J15 on the controller board and the connections on the HVPS are properly connected.</p> <p>Are the connections properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Reseat the connections.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Actions	Yes	No
<b>Step 8</b> Check all connections in the HVPS for proper connection.  Is the HVPS properly connected?	Go to step 10.	Go to step 9.
<b>Step 9</b> Replace the connections.  Does the problem remain?	Go to step 10.	The problem is solved.
<b>Step 10</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427.</a>  Does the problem remain?	Contact the next level of support.	The problem is solved.

## Horizontal light bands check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46.](#)

Actions	Yes	No
<b>Step 1</b> Remove, and then clean the imaging unit contacts.  Does the problem remain?	Go to step 2.	The problem is solved.
<b>Step 2</b> Check if the printer is using a genuine and supported Lexmark imaging unit.  Is the printer using a genuine and supported imaging unit?	Go to step 4.	Go to step 3.
<b>Step 3</b> Install a genuine and supported imaging unit.  Does the problem remain?	Go to step 4.	The problem is solved.

Actions	Yes	No
<p><b>Step 4</b> Turn off the printer, wait for 10 seconds, and then turn on the printer.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Remove the HVPS. See <a href="#">“HVPS removal” on page 427</a>. <b>b</b> Check if the HVPS wire connectors are pinched or damaged.</p> <p>Are the wire connectors pinched or damaged?</p>	Go to step 6.	Go to step 7.
<p><b>Step 6</b> Repair or replace the wire connectors.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>. <b>b</b> Check connection J15 from the controller board to the HVPS, and then check all other connections on the HVPS.</p> <p>Are the connections properly connected?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Replace the connections.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Incorrect margins on prints check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Adjust the guides in the tray according to the size of the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Do one of the following:</p> <ul style="list-style-type: none"> <li>• From the printer control panel, set the paper size in the Paper menu to match the paper loaded in the tray.</li> <li>• Change the paper loaded in the tray to match the paper size specified in the tray settings.</li> </ul> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Depending on the operating system used, specify the paper size from Printing Preferences or from the Print dialog.</p> <p>Does the problem remain?</p>	Go to step 4 or contact the next level of support.	The problem is solved.
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Registration adjust</b></p> <p><b>b</b> Adjust the margins.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Light print check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Turn off the printer, wait for 10 seconds, and then turn on the printer.</p> <p><b>b</b> From the control panel:</p> <ol style="list-style-type: none"> <li><b>1</b> Increase the toner darkness in the Quality menu. <b>Note:</b> 8 is the factory default setting.</li> <li><b>2</b> Set the paper type, texture, and weight in the Paper menu to match the paper loaded.</li> </ol> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <ol style="list-style-type: none"> <li><b>a</b> Remove the toner cartridge and imaging unit.</li> <li><b>b</b> Push either side of the transfer roller, located below the imaging unit, to check if it depresses and bounces back into place.</li> <li><b>c</b> If the transfer roller does not depress and bounce back into place, then reinstall it by pulling up the blue gear and pulling it out from the right side to the left.</li> <li><b>d</b> Firmly shake the imaging unit to redistribute the toner, and then reinstall it.</li> <li><b>e</b> Reinstall the toner cartridge.</li> <li><b>f</b> Turn off the printer, wait for 10 seconds, and then turn on the printer.</li> </ol> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <ol style="list-style-type: none"> <li><b>a</b> If the issue happens after installing a new maintenance kit, then check whether the transfer roller included with the kit is installed in the printer.</li> <li><b>b</b> If necessary, replace the transfer roller. See <a href="#">“Transfer roller removal” on page 453</a>.</li> </ol> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Actions	Yes	No
<p><b>Step 6</b> Check the shutter on the imaging unit for signs of damage. <b>Note:</b> The shutter opens to receive toner from the toner cartridge.</p> <p>Is the shutter on the imaging unit working properly?</p>	Go to step 7.	Go to step 8.
<p><b>Step 7</b> <b>a</b> Check the status of the imaging unit.     <b>1</b> From the home screen, select <b>Status/supplies</b>.     <b>2</b> Select <b>Supplies</b>. <b>b</b> Check the condition of the imaging unit.</p> <p>Is the imaging unit near end of life and/or showing signs of toner leakage?</p>	Go to step 8.	Go to step 9.
<p><b>Step 8</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> <b>a</b> Remove the HVPS shield. See <a href="#">“HVPS removal” on page 427</a>. <b>b</b> Verify if all the cables on the HVPS are properly installed. If necessary, reinstall the cables.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Replace the transfer roller. See <a href="#">“Transfer roller removal” on page 453</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427</a>.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check connection J71 on the controller board and the connection on the toner add motor for proper connection.</p> <p>Are the connections properly connected?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Replace the connections.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.

Actions	Yes	No
<p><b>Step 14</b> Replace the controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Mottled print and dots check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check if toner specks appear only on the edges or back side of the pages.</p> <p>Do toner specks appear only on the edges or back side of the pages?</p>	Go to step 4.	Go to step 5.
<p><b>Step 4</b> Replace the transfer roller. See <a href="#">“Transfer roller removal” on page 453</a>.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Actions	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Check the status of the imaging unit.</p> <p>    <b>1</b> From the home screen, select <b>Status/supplies</b>.</p> <p>    <b>2</b> Select <b>Supplies</b> .</p> <p><b>b</b> Check the condition of the imaging unit.</p> <p>Is the imaging unit near end of life and/or showing signs of toner leakage?</p>	Go to step 6.	Go to step 7.
<p><b>Step 6</b></p> <p>Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the printer for stray toner contamination.</p> <p>Is the printer contaminated with stray toner?</p>	Go to step 8.	Contact the next level of support.
<p><b>Step 8</b></p> <p>Using an approved toner vacuum cleaner, completely clean the printer, toner cartridge, and imaging unit of toner contamination.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Paper curl check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Adjust the guides in the tray to the correct position for the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> From the control panel, set the paper size, type, and weight in the Paper menu to match the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Depending on the operating system, specify the paper size from Printing Preferences or Print dialog.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Remove paper from the tray, and then turn it over.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Make sure that the paper loaded is from a fresh package.</p> <p><b>Note:</b> Paper absorbs moisture due to high humidity. Store paper in its original wrapper until you use it.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Make sure that the printer supports the paper loaded.</p> <p>Is the paper supported?</p>	Contact the next level of support.	Go to step 9.

Actions	Yes	No
<p><b>Step 9</b> Load a supported paper.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Print crooked or skewed check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check the guides in the tray where the skewed prints are sourced from.</p> <p><b>Note:</b> If paper is sourced from the MPF, then proceed to step 9.</p> <p>Does the position of the guides match the paper loaded?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Adjust the guides to match the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check if the printer supports the paper loaded.</p> <p><b>Note:</b> For a complete list of supported paper, see the printer <i>User's Guide</i>.</p> <p>Is the paper supported?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Remove the paper, and then load a supported one.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the tray pick roller for excess wear and contamination.</p> <p>Is the pick roller free from excess wear and contamination?</p>	Go to step 7.	Go to step 6.

Actions	Yes	No
<p><b>Step 6</b> Replace the pick roller. See <a href="#">“Pick roller removal” on page 471.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Perform a print test. Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray [x] &gt; Single</b></p> <p><b>Note:</b> [x] refers to the tray where the skewed prints are sourced from.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Registration adjust</b> <b>b</b> Adjust the margins.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 9</b> Check the guides in the MPF tray.</p> <p>Does the position of the guides match the paper loaded?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Adjust the guides to match the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check if the printer supports the paper loaded. <b>Note:</b> For a complete list of supported paper, see the printer <i>User's Guide</i>.</p> <p>Is the paper supported?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Remove the paper, and then load a supported one.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the MPF pick roller for excess wear and contamination.</p> <p>Is the MPF pick roller free from excess wear and contamination?</p>	Go to step 15.	Go to step 14.

Actions	Yes	No
<p><b>Step 14</b></p> <p>Replace the MPF pick roller. See <a href="#">“MPF pick roller removal” on page 448</a>.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Perform the paper skew adjustment. See <a href="#">“Adjustments” on page 408</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Repeating defects check

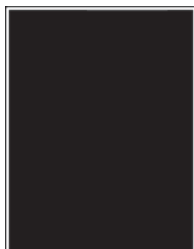

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b></p> <p><b>a</b> From the control panel, navigate to: <b>Menu &gt; Help &gt; Print Defects Guide</b></p> <p><b>b</b> Using the Print Defects Guide, check if the distance between defects is equal to any of the following:</p> <ul style="list-style-type: none"> <li>• 96 mm (3.78 in.)</li> <li>• 49 mm (1.93 in.)</li> <li>• 47.5 mm (1.87 in.)</li> <li>• 30.2 mm (1.18 in.)</li> </ul> <p><b>Note:</b> Make sure to measure the defect interval accurately.</p> <p>Does the distance measured match any of the items listed?</p>	Go to step 2.	Go to step 3.
<p><b>Step 2</b></p> <p>Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

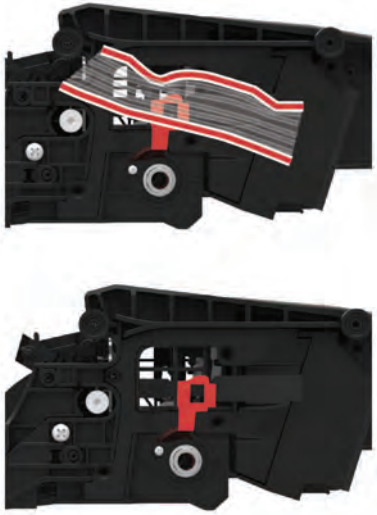

Actions	Yes	No
<p><b>Step 3</b></p> <p>Measure the distance between repeating defects, and then check if it matches any of the following:</p> <ul style="list-style-type: none"> <li>• 3.71 in. (94.25 mm)</li> <li>• 3.75 in. (95.2 mm)</li> </ul> <p>Does the distance measured match any of the items listed?</p>	Go to step 4.	Contact the next level of support.
<p><b>Step 4</b></p> <p>Replace the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Replace the transfer roller. See <a href="#">“Transfer roller removal” on page 453.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Solid black pages check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46.](#)

Actions	Yes	No
<p><b>Step 1</b></p> <p>Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Actions	Yes	No
<p><b>Step 3</b> Remove any packing material left on the imaging unit, including pieces of tape on the side of the unit and the red separator plastic.</p>  <p><b>Note:</b> You may need a pair of pliers to remove a piece of broken plastic inside the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <ul style="list-style-type: none"> <li><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></li> <li><b>b</b> Check the cable connections between the HVPS and J15 on the controller board. If necessary, reseal the cables.</li> </ul> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Text or images cut off check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

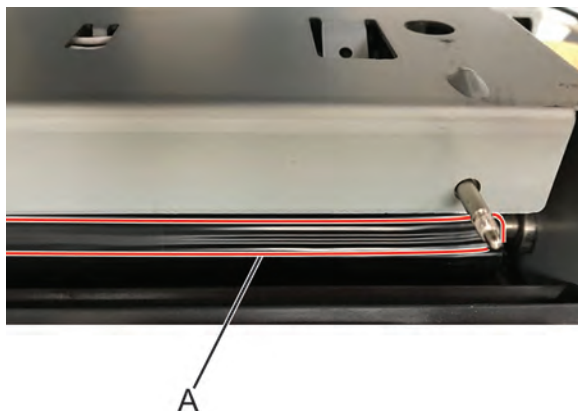

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Remove, and then reinstall the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Toner easily rubs off check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

**Note:** Do not replace a fuser due to a wrinkled backup roller (A).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> From the control panel, set the paper type, texture, and weight in the Paper menu to match the paper loaded.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Remove, and then reinstall the fuser.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Actions	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Reseat the connections on the LVPS.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the LVPS. See <a href="#">“LVPS removal” on page 420</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

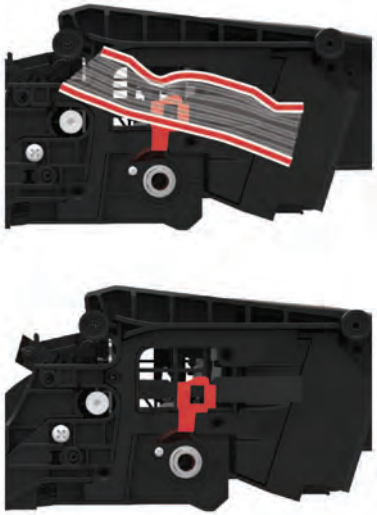

## Vertical dark bands check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b></p> <p>Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Actions	Yes	No
<p><b>Step 3</b> Remove any packing material left on the imaging unit, including pieces of tape on the side of the unit and the red separator plastic.</p>  <p><b>Note:</b> You may need a pair of pliers to remove a piece of broken plastic inside the imaging unit.</p> <p>Does the problem remain?</p>	<p>Go to step 4.</p>	<p>The problem is solved.</p>
<p><b>Step 4</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	<p>Contact the next level of support.</p>	<p>The problem is solved.</p>

## Vertical dark lines check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

**Note:** This check applies only to printer models with a hot roll fuser.

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Remove, and then reinstall the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Remove the hot roll fuser, and then check for scratches and other damage.</p> <p>Is the fuser free of scratches and other damage?</p>	Contact the next level of support.	Go to step 6.
<p><b>Step 6</b> Replace the hot roll fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 7</b> Remove the fuser, and then check the rollers and belts for damage or debris.</p> <p>Are the rollers and belts free of damage or debris?</p>	Contact the next level of support.	Go to step 8.
<p><b>Step 8</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Vertical dark streaks with print missing check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check connection J15 from the controller board to the HVPS, and then check all other connections on the HVPS.</p> <p>Are the connections properly connected?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b> Reconnect the cables.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Vertical light bands check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

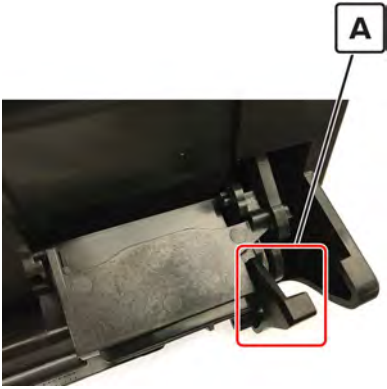

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Clean the printhead glass. See <a href="#">“Cleaning the printhead glass” on page 770</a>.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Replace the printhead. See <a href="#">“Printhead removal” on page 461</a>.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Vertical white lines check

**Note:** Before performing this print quality check, go to the control panel home screen and navigate to **Settings > Troubleshooting > Print Quality Test Pages**, and then perform the initial print quality check. See [“Initial print quality check” on page 46](#).

Actions	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, do not replace the imaging unit. Refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Set the paper type and weight settings in the Paper menu to match the paper loaded.</p> <p><b>Note:</b> Make sure that the printer supports the paper loaded. For a complete list of supported paper, see the printer <i>User's Guide</i>.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <ul style="list-style-type: none"> <li><b>a</b> Update the firmware to the latest version available.</li> <li><b>b</b> Enter the Diagnostics menu, and then change the EngSetting 14 value to 48. <b>Note:</b> You can also change the setting through a bundle file or NPA command.</li> <li><b>c</b> Set Quiet mode to Off.</li> <li><b>d</b> Review the Event Log Summary sheets and check if either error code 31.46 or 31.66 events occurred for the imaging unit. If they did, check if they are occurring with the current toner cartridge.</li> </ul> <p>Do the errors occur with the current toner cartridge?</p>	Go to step 6.	Go to step 5.

Actions	Yes	No
<p><b>Step 5</b> Check the shutter tab (A) on the toner cartridge for signs of damage.</p>  <p>Is the shutter tab damaged?</p>	Go to step 6.	Go to step 7.
<p><b>Step 6</b> Replace the imaging unit and the toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the printhead glass for contamination.</p> <p>Is the printhead glass free from dust and debris?</p>	Go to step 8.	Go to step 9.
<p><b>Step 8</b> Clean the printhead glass. See <a href="#">“Cleaning the printhead glass” on page 770</a>.</p> <p><b>Warning—Potential Damage:</b> When cleaning the printhead glass, do not use compressed air.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check connection J15 from the controller board to the HVPS, and then check all other connections on the HVPS.</p> <p>Are the connections properly connected?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the connections.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.

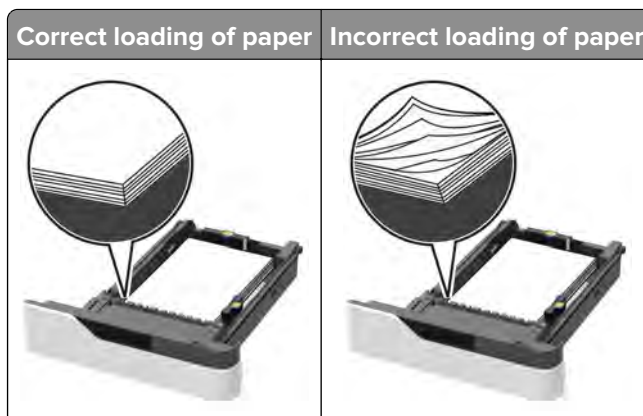

Actions	Yes	No
<p><b>Step 11</b> Replace the HVPS. See <a href="#">“HVPS removal” on page 427.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Replace the laser printhead. See <a href="#">“Printhead removal” on page 461.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Paper jams

### Avoiding jams

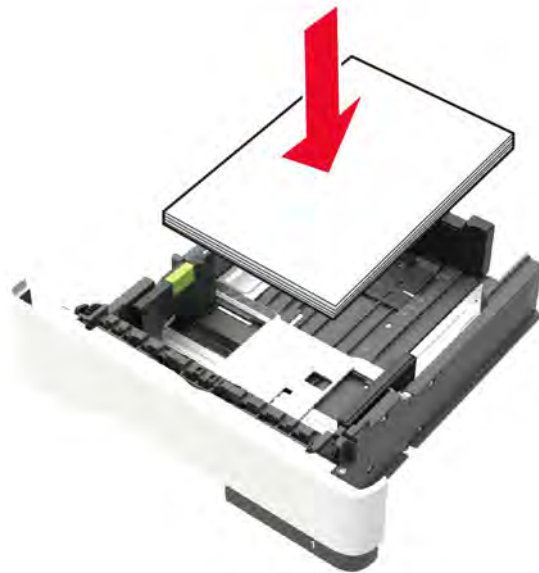

#### Load paper properly

- Make sure paper lies flat in the tray.

- Do not remove a tray while the printer is printing.
- Do not load a tray while the printer is printing. Load it before printing, or wait for a prompt to load it.
- Do not load too much paper. Make sure the stack height is below the maximum paper fill indicator.

- Do not slide the paper into the tray. Load paper as shown in the illustration.

- Make sure the guides in the tray or the multipurpose feeder are properly positioned and are not pressing tightly against the paper or envelopes.
- Push the tray firmly into the printer after loading paper.
- If you are loading prepunched paper for use with the staple finisher, then make sure the holes on the long edge of the paper are on the right side of the tray. For more information, see the “Loading paper and specialty media” section of the *User's Guide*.

#### **Allow the paper to enter the optional mailbox bins properly**

- Make sure to adjust the bin extender so that the paper size indicators match the size of the paper used.

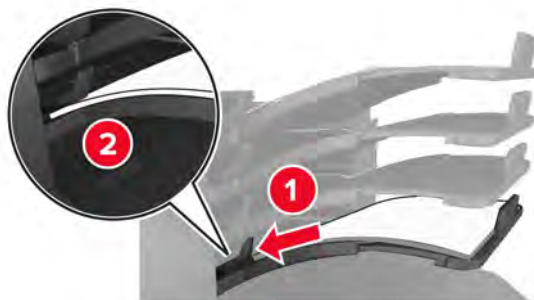

#### **Notes:**

- If the bin extender is shorter than the size of the paper you are printing on, then the paper causes a jam in the mailbox bin. For example, if you are printing on a legal-size paper and the bin extender is set to letter-size, then a jam occurs.

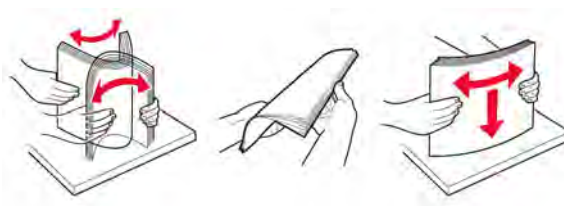

- If the bin extender is longer than the size of the paper you are printing on, then the edges become uneven and the paper is not stacked properly. For example, if you are printing on a letter-size paper and the bin extender is set to legal-size, then the paper does not stack properly.
- If paper needs to be returned to the mailbox bin, then insert the paper under the bin arm, and then push the paper all the way back.

**Note:** If the paper is not under the bin arm, then a jam occurs due to an overfilled bin.

### Use recommended paper

- Use only recommended paper or specialty media.
- Do not load wrinkled, creased, damp, bent, or curled paper.
- Flex, fan, and straighten paper or specialty media before loading it.

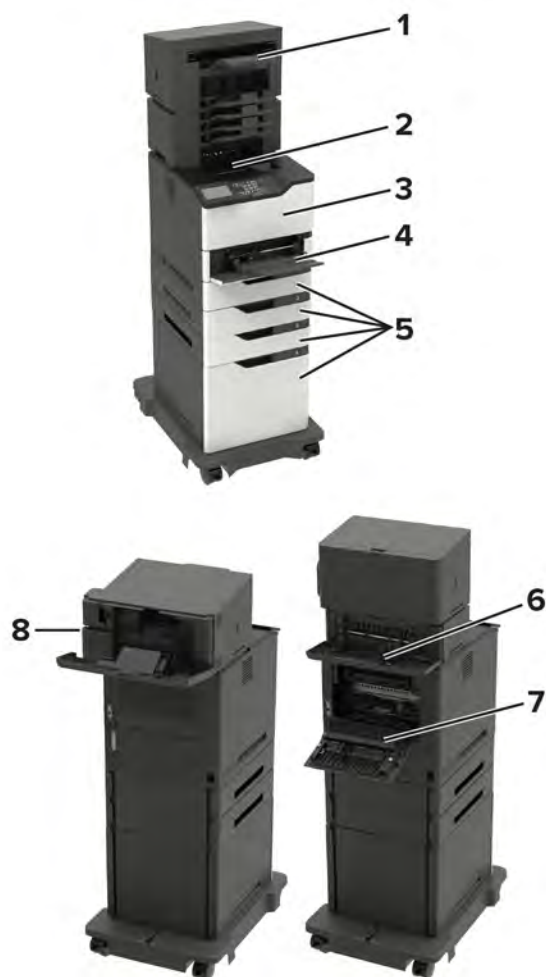

- Do not use paper that has been cut or trimmed by hand.
- Do not mix paper sizes, weights, or types in the same tray.
- Make sure the paper size and type are set correctly on the computer or printer control panel.
- Store paper per manufacturer recommendations.

### Identifying jam locations

#### Notes:

- When Jam Assist is set to On, the printer flushes blank pages or pages with partial prints after a jammed page has been cleared. Check your printed output for blank pages.
- When Jam Recovery is set to On or Auto, the printer reprints jammed pages.

Jam locations	
<b>1</b>	Finisher or output option bin
<b>2</b>	Standard bin
<b>3</b>	Door A
<b>4</b>	Multipurpose feeder
<b>5</b>	Trays
<b>6</b>	Finisher or output option rear door <ul style="list-style-type: none"> <li>• Door H</li> <li>• Door K</li> <li>• Door L</li> <li>• Door N</li> <li>• Door P</li> </ul>

200.45	Paper fed from tray 4 never cleared the sensor (input).	See <a href="#">“Sensor (input) late-leaving or did-not-clear jam service check” on page 88.</a>
200.52	Paper fed from tray 5 was detected earlier than expected at the sensor (input).	See <a href="#">“Sensor (input) early-arriving jam service check” on page 84.</a>
200.53	Paper fed from tray 5 was detected later than expected or was never detected at the sensor (input).	See <a href="#">“Sensor (input) never- or late-arriving jam service check” on page 86.</a>
200.54	Paper fed from tray 5 cleared the sensor (input) earlier than expected.	See <a href="#">“Sensor (input) early-leaving jam service check” on page 92.</a>
200.55	Paper fed from tray 5 never cleared the sensor (input).	See <a href="#">“Sensor (input) late-leaving or did-not-clear jam service check” on page 88.</a>
200.91	Paper remains detected at the sensor (input) after the printer is turned on.	See <a href="#">“Sensor (input) static jam service check” on page 91.</a>

### Sensor (input) early-arriving jam service check

Action	Yes	No
<p><b>Step 1</b> Identify the source tray.</p> <p>Is the MPF the source tray?</p>	Go to step 2.	Go to step 7.
<p><b>Step 2</b> Check the MPF pick roller for excess wear and contamination.</p> <p>Is the pick roller free of excess wear and contamination?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Clean or replace the MPF pick roller. See <a href="#">“MPF pick roller removal” on page 448.</a></p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p><b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (MPF pick), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Reseat the motor cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Replace the motor. See <a href="#">“Motor (MPF) removal” on page 419.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check if paper is properly loaded in each tray.</p> <p>Is paper properly loaded in each tray?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Remove the paper, and then properly load it to the tray.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check each tray for paper fragments and partially fed paper.</p> <p>Are the trays free of paper fragments and partially fed paper?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Remove all paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 15.	Go to step 12.

Action	Yes	No
<p><b>Step 12</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446</a>.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (input) never- or late-arriving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if blank pages were fed out before the error occurred.</p> <p>Were there blank pages fed out prior to the error?</p>	Go to step 10.	Go to step 2.
<p><b>Step 2</b></p> <p>Pull out all the source trays, and then check if the paper size matches the size set on the tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Check if the tray is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 5.	Go to step 6.

Action	Yes	No
<p><b>Step 5</b> Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Check the tray for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the aligner rollers for obstructions.</p> <p>Are the aligner rollers free of obstructions?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Remove the obstructions.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 14.	Go to step 11.
<p><b>Step 11</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446</a>.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.

Action	Yes	No
<p><b>Step 14</b></p> <p><b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Imaging unit), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 17.	Go to step 15.
<p><b>Step 15</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Reseat the motor cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p>Replace the motor. See <a href="#">“Main motor drive removal” on page 417.</a></p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (input) late-leaving or did-not-clear jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Pull out all the source trays, and then check if the paper size matches the size set on the tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Check if the tray is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 4.	Go to step 5.

Action	Yes	No
<p><b>Step 4</b> Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the tray for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Identify the source tray.</p> <p>Is the MPF the source tray?</p>	Go to step 8.	Go to step 13.
<p><b>Step 8</b> Check the MPF pick roller for excess wear and contamination.</p> <p>Is the pick roller free of excess wear and contamination?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Clean or replace the MPF pick roller. See <a href="#">“MPF pick roller removal” on page 448</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415</a>.</p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (MPF pick), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 13.	Go to step 11.
<p><b>Step 11</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Reseat the motor cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Replace the motor. See <a href="#">“Motor (MPF) removal” on page 419</a>.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b> Check the pick roller of the source tray for dirt, excess wear, and contamination.</p> <p><b>Note:</b> Check also the gears for debris and toner.</p> <p>Are the pick roller components free of dirt, excess wear, and contamination?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Clean or replace the pick roller.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the aligner rollers for obstructions.</p> <p>Are the aligner rollers free of obstructions?</p>	Go to step 17.	Go to step 16.
<p><b>Step 16</b> Remove the obstructions.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 21.	Go to step 18.
<p><b>Step 18</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446</a>.</p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.

Action	Yes	No
<p><b>Step 21</b> Perform a print test on each tray, and then check if the paper is properly picked and transported out of the source tray by the paper feeder.</p> <p>Was the paper properly transported by the paper feeder?</p>	Go to step 23.	Go to step 22.
<p><b>Step 22</b> Replace the affected paper feeder.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b> Perform a print test, and then check if the paper is properly transported by the main motor drive to the sensor (input).</p> <p>Was the paper properly transported by the main motor drive?</p>	Go to step 25.	Go to step 24.
<p><b>Step 24</b> Replace the main motor drive. See <a href="#">“Main motor drive removal” on page 417</a>.</p> <p>Does the problem remain?</p>	Go to step 25.	The problem is solved.
<p><b>Step 25</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (input) static jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 7.	Go to step 4.

Action	Yes	No
<p><b>Step 4</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (input) early-leaving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Check if paper is properly loaded in each tray.</p> <p>Is paper properly loaded in each tray?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b></p> <p>Remove the paper, and then properly load it to the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 202 paper jams

### 202 paper jam messages

Error code	Description	Action
202.02	Paper fed from the MPF was detected earlier than expected at the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) early-arriving jam service check” on page 94.</a>
202.03	Paper fed from the MPF never reached the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.04	Paper fed from the MPF cleared the sensor (fuser exit) earlier than expected.	See <a href="#">“Sensor (fuser exit) early-leaving jam service check” on page 99.</a>
202.05	Paper fed from the MPF never cleared the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>
202.12	Paper fed from tray 1 was detected earlier than expected at the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) early-arriving jam service check” on page 94.</a>
202.13	Paper fed from tray 1 never reached the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.14	Paper fed from tray 1 cleared the sensor (fuser exit) earlier than expected.	See <a href="#">“Sensor (fuser exit) early-leaving jam service check” on page 99.</a>
202.15	Paper fed from tray 1 never cleared the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>
202.22	Paper fed from tray 2 was detected earlier than expected at the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) early-arriving jam service check” on page 94.</a>
202.23	Paper fed from tray 2 never reached the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.24	Paper fed from tray 2 cleared the sensor (fuser exit) earlier than expected.	See <a href="#">“Sensor (fuser exit) early-leaving jam service check” on page 99.</a>
202.25	Paper fed from tray 2 never cleared the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>
202.32	Paper fed from tray 3 was detected earlier than expected at the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) early-arriving jam service check” on page 94.</a>
202.33	Paper fed from tray 3 never reached the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.34	Paper fed from tray 3 cleared the sensor (fuser exit) earlier than expected.	See <a href="#">“Sensor (fuser exit) early-leaving jam service check” on page 99.</a>
202.35	Paper fed from tray 3 never cleared the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>
202.42	Paper fed from tray 4 was detected earlier than expected at the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) early-arriving jam service check” on page 94.</a>
202.43	Paper fed from tray 4 never reached the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.44	Paper fed from tray 4 cleared the sensor (fuser exit) earlier than expected.	See <a href="#">“Sensor (fuser exit) early-leaving jam service check” on page 99.</a>

Error code	Description	Action
202.45	Paper fed from tray 4 never cleared the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>
202.52	Paper fed from tray 5 was detected earlier than expected at the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) early-arriving jam service check” on page 94.</a>
202.53	Paper fed from tray 5 never reached the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.54	Paper fed from tray 5 cleared the sensor (fuser exit) earlier than expected.	See <a href="#">“Sensor (fuser exit) early-leaving jam service check” on page 99.</a>
202.55	Paper fed from tray 5 never cleared the sensor (fuser exit).	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>
202.91	Paper remains detected at the sensor (fuser exit) after the printer is turned on.	See <a href="#">“Sensor (fuser exit) static jam service check” on page 102.</a>
202.93	The sensor (fuser exit) detected a jam during or after a flush action.	See <a href="#">“Sensor (fuser exit) late-arriving jam service check” on page 95.</a>
202.95	Paper never cleared the sensor (fuser exit). Paper source is undetermined.	See <a href="#">“Sensor (fuser exit) late-leaving jam service check” on page 100.</a>

### Sensor (fuser exit) early-arriving jam service check

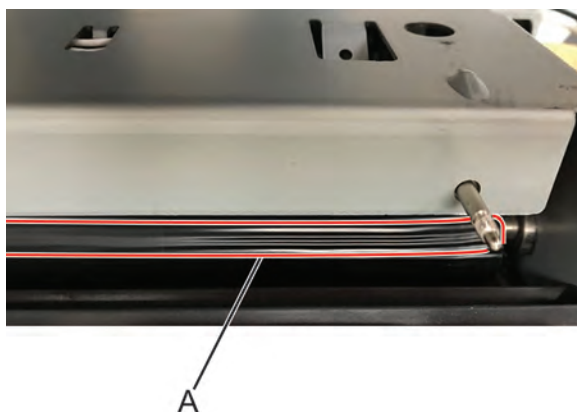

Action	Yes	No
<p><b>Step 1</b> Check if paper is properly loaded in each tray.</p> <p>Is paper properly loaded in each tray?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper, and then properly load it to the tray.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Are the paper path and trays free of paper fragments and partially fed paper?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Remove all paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

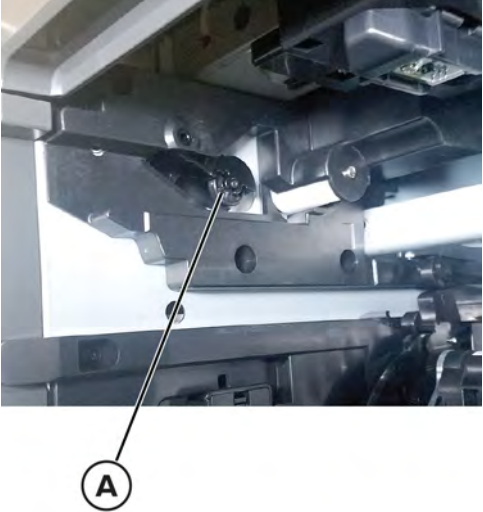

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Fuser exit).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the cable J60 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Reseat the cable, and then perform a print test.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Replace the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (fuser exit) late-arriving jam service check

### Notes:

- Make sure to install a genuine and supported toner cartridge.
- Do not replace a fuser due to a wrinkled backup roller (A).

Action	Yes	No
<p><b>Step 1</b></p> <p><b>a</b> Remove the toner cartridge.</p> <p><b>b</b> Inside the printer on the left side, check if the roller (A) is missing.</p>  <p><b>Note:</b> A dislodged or missing roller may cause a grinding noise when the printer is operating.</p> <p>Is the roller missing?</p>	Go to step 2.	Go to step 3.
<p><b>Step 2</b></p> <p><b>a</b> Find the missing roller at the following locations:</p> <ul style="list-style-type: none"> <li>• Check inside the printer.</li> <li>• Remove, and then check the toner cartridge drive.</li> </ul> <p><b>b</b> Reinstall the roller (if found) or replace the toner cartridge drive.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Check the fuser for damage and life expiration.</p> <p>Is the fuser damaged or has it reached end of life?</p>	Go to step 4.	Go to step 5.
<p><b>Step 4</b></p> <p>Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Remove obstructions from the fuser.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Fuser exit).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the cable J60 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 8.
<p><b>Step 8</b></p> <p>Reseat the cable, and then perform a print test.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Replace the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the transfer roller for damage.</p> <p>Is the transfer roller free of damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Replace the transfer roller. See <a href="#">“Transfer roller removal” on page 453.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.

Action	Yes	No
<p><b>Step 12</b></p> <p><b>a</b> Remove the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p><b>b</b> Manually rotate the fuser drive gear (A).</p> <p><b>Note:</b> The gear should turn smoothly, but with some resistance.</p>  <p>Does the gear rotate properly?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b></p> <p>Replace the fuser drive gear. See <a href="#">“Fuser drive gears removal” on page 418.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Check the aligner rollers for obstructions and damage.</p> <p>Are the aligner rollers free of obstructions and damage?</p>	Go to step 16.	Go to step 15.
<p><b>Step 15</b></p> <p>Remove the obstructions or replace the aligner rollers. See <a href="#">“Aligner removal” on page 445.</a></p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.

Action	Yes	No
<p><b>Step 16</b> Perform a print test, and then check if the paper is properly transported by the fuser drive motor assembly to the sensor (fuser exit).</p> <p>Was the paper properly transported by the fuser drive motor assembly?</p>	Go to step 19.	Go to step 17.
<p><b>Step 17</b> Reseat the cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b> Replace the motor (fuser). See <a href="#">“Main motor drive removal” on page 417.</a></p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (fuser exit) early-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Are the paper path and trays free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove all paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Perform a print test.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (fuser exit) late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the rear door for damage. Make sure that the rear door properly closes.</p> <p>Is the rear door functional and free of damage?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Replace the rear door. See <a href="#">“Rear door removal” on page 455</a>.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check the fuser for damage and life expiration.</p> <p>Is the fuser damaged or has it reached end of life?</p>	Go to step 4.	Go to step 5.
<p><b>Step 4</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Printer diagnostics and adjustments &gt; Sensor tests</b>  <b>b</b> Find the sensor (Fuser exit).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b>  <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.  <b>b</b> Check the cable J60 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Reseat the cable, and then perform a print test.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the upper redrive for damage.</p> <p>Is the upper redrive free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the upper redrive. See <a href="#">“Upper redrive removal” on page 459</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>b</b> Select the motor (redrive), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 14.	Go to step 12.
<p><b>Step 12</b> Reseat the cable J66 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Replace the motor (redrive). See <a href="#">“Motor (redrive) removal” on page 423</a>.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (fuser exit) static jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and the trays for paper fragments and partially fed paper.</p> <p>Are the paper path and trays free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b> <b>b</b> Find the sensor (Fuser exit).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 6.	Go to step 4.
<p><b>Step 4</b> <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>. <b>b</b> Check the cable J60 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b> Reseat the cable, and then perform a print test.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 221 paper jams

### 221 paper jam messages

Error code	Description	Action
221.91	Paper remains detected at the sensor (narrow media) after the printer is turned on.	See <a href="#">“Sensor (narrow media) static jam service check” on page 103.</a>
221.93	Paper never arrived at the sensor (narrow media). Paper source is undetermined.	See <a href="#">“Sensor (narrow media) late-arriving jam service check” on page 104.</a>

### Sensor (narrow media) static jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Are the paper path and trays free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Narrow media).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 6.	Go to step 4.
<p><b>Step 4</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the cable J60 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b></p> <p>Reseat the cable, and then perform a print test.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Replace the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.

Action	Yes	No
<p><b>Step 7</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (narrow media) late-arriving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the fuser for damage and life expiration.</p> <p>Is the fuser damaged or has it reached end of life?</p>	Go to step 2.	Go to step 3.
<p><b>Step 2</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Remove obstructions from the fuser.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Narrow media).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 8.	Go to step 5.
<p><b>Step 5</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Check the cable J60 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b> Reseat the cable, and then perform a print test.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<b>Step 8</b> Perform a print test.  Does the problem remain?	Contact the next level of support.	The problem is solved.

## 230 paper jams

### 230 paper jam messages

Error code	Description	Action
230.03	Paper fed from the MPF never reached the sensor (duplex path).	See <a href="#">“Sensor (duplex path) late-arriving jam service check” on page 107.</a>
230.05	Paper fed from the MPF never cleared the sensor (duplex path).	See <a href="#">“Sensor (duplex path) late-leaving jam service check” on page 109.</a>

230.54	Paper fed from tray 5 cleared the sensor (duplex path) earlier than expected.	See <a href="#">“Sensor (duplex path) early-leaving jam service check” on page 109.</a>
230.55	Paper fed from tray 5 never cleared the sensor (duplex path).	See <a href="#">“Sensor (duplex path) late-leaving jam service check” on page 109.</a>
230.91	Paper remains detected at the sensor (duplex path) after the printer is turned on.	See <a href="#">“Sensor (duplex path) static jam service check” on page 111.</a>

### Sensor (duplex path) early-arriving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the duplex paper path for jammed paper and obstructions.</p> <p><b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex paper path free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>c</b> Find the sensor (Duplex path).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 6.	Go to step 4.
<p><b>Step 4</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.

Action	Yes	No
<p><b>Step 5</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the sensor. See <a href="#">“Sensor (duplex path) with cover removal” on page 472.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (duplex path) late-arriving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the fuser access area on the rear door for jammed paper and obstructions.</p> <p><b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the fuser access area free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check the duplex path area for jammed paper and obstructions.</p> <p><b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex path area free of jammed paper and obstructions?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>c</b> Find the sensor (Duplex path).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Replace the sensor. See <a href="#">“Sensor (duplex path) with cover removal” on page 472.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p><b>a</b> Remove the rear door. See <a href="#">“Rear door removal” on page 455.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Duplex), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 12.	Go to step 10.
<p><b>Step 10</b></p> <p>Reseat the motor cable J27 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Replace the motor. See <a href="#">“Motor (duplex) removal” on page 456.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.

Action	Yes	No
<p><b>Step 12</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (duplex path) early-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check if paper is properly loaded in each tray.</p> <p>Is paper properly loaded in each tray?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Remove the paper, and then properly load it to the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (duplex path) late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the duplex path area for jammed paper and obstructions. <b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex path area free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b></p> <p><b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>c</b> Find the sensor (Duplex path).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 7.	Go to step 4.
<p><b>Step 4</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Replace the sensor. See <a href="#">“Sensor (duplex path) with cover removal” on page 472.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the upper redrive for damage.</p> <p>Is the upper redrive free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Replace the upper redrive. See <a href="#">“Upper redrive removal” on page 459.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p><b>a</b> Remove the rear door. See <a href="#">“Rear door removal” on page 455.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Duplex), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 12.	Go to step 10.

Action	Yes	No
<p><b>Step 10</b> Reseat the motor cable J27 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Replace the motor. See <a href="#">“Motor (duplex) removal” on page 456.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (duplex path) static jam service check

Action	Yes	No
<p><b>Step 1</b> Check the duplex path area for jammed paper and obstructions. <b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex path area free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b>  <b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a>  <b>b</b> Enter the Diagnostics menu, and then navigate to:  <b>Printer diagnostics and adjustments &gt; Sensor tests</b>  <b>c</b> Find the sensor (Duplex path).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 7.	Go to step 4.
<p><b>Step 4</b>  <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a>  <b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.

Action	Yes	No
<b>Step 5</b> Reseat the cable.  Does the problem remain?	Go to step 6.	The problem is solved.
<b>Step 6</b> Replace the sensor. See <a href="#">“Sensor (duplex path) with cover removal” on page 472.</a>  Does the problem remain?	Go to step 7.	The problem is solved.
<b>Step 7</b> Perform a print test.  Does the problem remain?	Contact the next level of support.	The problem is solved.

## 232 paper jams

### 232 paper jam messages

Error code	Description	Action
232.03	During a duplex print job, paper fed from the MPF never reached the sensor (input).	See <a href="#">“Sensor (input) late-arriving jam (during duplex print) service check” on page 113.</a>

### Sensor (input) late-arriving jam (during duplex print) service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the duplex path area for jammed paper and obstructions.</p> <p><b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex path area free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 7.	Go to step 4.
<p><b>Step 4</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.

Action	Yes	No
<p><b>Step 5</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p><b>a</b> Remove the rear door. See <a href="#">“Rear door removal” on page 455</a>.</p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Duplex), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 10.	Go to step 8.
<p><b>Step 8</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Reseat the motor cable J27 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Replace the motor. See <a href="#">“Motor (duplex) removal” on page 456</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (input) early-leaving jam (during duplex print) service check

Action	Yes	No
<p><b>Step 1</b> Check the duplex path area for jammed paper and obstructions. <b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex path area free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Check the sensor (input) area for paper fragments and partially fed paper.</p> <p>Is the area free of paper fragments and partially fed paper?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (input) late-leaving jam (during duplex print) service check

Action	Yes	No
<p><b>Step 1</b> Check the duplex path area for jammed paper and obstructions. <b>Note:</b> Make sure that all paper fragments are removed.</p> <p>Is the duplex path area free of jammed paper and obstructions?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the jammed paper and obstructions.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check the sensor (input) area for paper fragments and partially fed paper.</p> <p>Is the area free of paper fragments and partially fed paper?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <ul style="list-style-type: none"> <li>a Remove the left cover. See <a href="#">“Left cover removal” on page 415</a>.</li> <li>b Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></li> <li>c Select the motor (Imaging unit), and then touch <b>Start</b>.</li> </ul> <p>Does the motor run?</p> </p>	Go to step 8.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Reseat the motor cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the motor. See <a href="#">“Main motor drive removal” on page 417</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 240 paper jams

### 240 paper jam messages

Error code	Description	Action
240.06	Paper fed from the MPF was picked but it never reached the sensor (input).	See <a href="#">“MPF pick jam service check” on page 116</a> .
240.82	The motor (MPF) has stalled.	See <a href="#">“MPF drive control failure service check” on page 119</a> .
240.84	The motor (MPF) has stalled.	

### MPF pick jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the printer supports the paper loaded.</p> <p><b>Note:</b> For a complete list of supported paper, see the printer <i>User's Guide</i>.</p> <p>Is the paper supported?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper, and then load a supported one.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Check if the paper size matches the size set on the MPF tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 7.	Go to step 4.
<p><b>Step 4</b> Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check if the MPF tray is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 6.	Go to step 5.
<p><b>Step 6</b> Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the MPF tray for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the MPF tray pick roller for proper installation.</p> <p>Is the pick roller properly installed?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Reinstall the pick roller.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the MPF pick roller for excess wear, damage, and contamination.</p> <p>Is the pick roller free of excess wear, damage, and contamination?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Replace the pick roller. See <a href="#">“MPF pick roller removal” on page 448</a>.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (MPF media present).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 18.	Go to step 14.
<p><b>Step 14</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J73 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 16.	Go to step 15.
<p><b>Step 15</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p>Replace the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the sensor (MPF paper present).</p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 22.	Go to step 19.
<p><b>Step 19</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 21.	Go to step 20.
<p><b>Step 20</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.

Action	Yes	No
<p><b>Step 21</b> Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446.</a></p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b>  <b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a>  <b>b</b> Enter the Diagnostics menu, and then navigate to:  <b>Printer diagnostics and adjustments &gt; Motor tests</b>  <b>c</b> Select the motor (MPF pick), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 25.	Go to step 23.
<p><b>Step 23</b>  <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a>  <b>b</b> Reseat the motor cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 24.	The problem is solved.
<p><b>Step 24</b> Replace the motor. See <a href="#">“Motor (MPF) removal” on page 419.</a></p> <p>Does the problem remain?</p>	Go to step 25.	The problem is solved.
<p><b>Step 25</b> Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### MPF drive control failure service check

Action	Yes	No
<p><b>Step 1</b> Check if the paper size matches the size set on the MPF tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check if the MPF tray is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 5.	Go to step 4.

Action	Yes	No
<p><b>Step 4</b> Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the MPF tray for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p><b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (MPF pick/aligner), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 10.	Go to step 8.
<p><b>Step 8</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Reseat the motor cable J71 on the controller board.</p> <p><b>c</b> Reseat the motor cable.</p> <p><b>d</b> Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Replace the motor (MPF). See <a href="#">“Motor (MPF) removal” on page 419.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 241 paper jams

### 241 paper jam messages

Error code	Description	Action
241.16	Paper fed from tray 1 was picked but it never reached the sensor (input).	See <a href="#">“Tray 1 pick jam service check” on page 121.</a>
241.23	Paper fed from tray 2 never reached the sensor (tray 1 pass-through).	See <a href="#">“Sensor (tray 1 pass-through) late-arriving jam service check” on page 127.</a>
241.25	Paper fed from tray 2 cleared the sensor (tray 1 pass-through) later than expected.	
241.33	Paper fed from tray 3 never reached the sensor (tray 1 pass-through).	
241.35	Paper fed from tray 3 cleared the sensor (tray 1 pass-through) later than expected.	See <a href="#">“Sensor (tray 1 pass-through) late-leaving or did-not-clear jam service check” on page 130.</a>
241.43	Paper fed from tray 4 never reached the sensor (tray 1 pass-through).	See <a href="#">“Sensor (tray 1 pass-through) late-arriving jam service check” on page 127.</a>
241.45	Paper fed from tray 4 cleared the sensor (tray 1 pass-through) later than expected.	See <a href="#">“Sensor (tray 1 pass-through) late-leaving or did-not-clear jam service check” on page 130.</a>
241.53	Paper fed from tray 5 never reached the sensor (tray 1 pass-through).	See <a href="#">“Sensor (tray 1 pass-through) late-arriving jam service check” on page 127.</a>
241.55	Paper fed from tray 5 cleared the sensor (tray 1 pass-through) later than expected.	See <a href="#">“Sensor (tray 1 pass-through) late-leaving or did-not-clear jam service check” on page 130.</a>
241.82	The motor (tray 1 pick) has stalled.	See <a href="#">“Tray 1 paper feeder control failure service check” on page 124.</a>
241.84	The motor (tray 1 pick) has stalled.	
241.91	Paper remains detected at the sensor (tray 1 pass-through) after the printer is turned on.	See <a href="#">“Sensor (tray 1 pass-through) static jam service check” on page 125.</a>

### Tray 1 pick jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Pull out tray 1, and then check if the paper size matches the size set on the tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Check if tray 1 is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 4.	Go to step 5.
<p><b>Step 4</b> Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check tray 1 for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the tray 1 pick roller for proper installation.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall the pick roller.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the tray 1 pick roller and separator pad for excess wear, damage, and contamination.</p> <p>Is the pick roller and separator pad free of excess wear, damage, and contamination?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the affected pick roller or separator pad. See <a href="#">“Pick roller removal” on page 471</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the tray 1 tray insert for damage.</p> <p>Is the tray insert free of damage?</p>	Go to step 13.	Go to step 12.

Action	Yes	No
<p><b>Step 12</b> Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the aligner for obstructions.</p> <p>Is the aligner free of obstructions?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Remove the obstructions.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Printer diagnostics and adjustments &gt; Sensor tests</b>  <b>b</b> Find the sensor (Input).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 19.	Go to step 16.
<p><b>Step 16</b>  <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a>  <b>b</b> Check the sensor cable J27 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 18.	Go to step 17.
<p><b>Step 17</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b> Replace the sensor. See <a href="#">“Sensor (input) removal” on page 446.</a></p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b>  <b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a>  <b>b</b> Enter the Diagnostics menu, and then navigate to:  <b>Printer diagnostics and adjustments &gt; Motor tests</b>  <b>c</b> Select the motor (Pick (tray 1)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 22.	Go to step 20.

Action	Yes	No
<p><b>Step 20</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Reseat the motor cable J73 on the controller board.</p> <p><b>c</b> Reseat the paper feeder cable.</p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Replace the paper feeder. See <a href="#">“Paper feeder removal” on page 423</a>.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 1 paper feeder control failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Pull out tray 1, and then check if the paper size matches the size set on the tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Check if tray 1 is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 4.	Go to step 5.
<p><b>Step 4</b></p> <p>Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Check tray 1 for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 7.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b>  <b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a>  <b>b</b> Enter the Diagnostics menu, and then navigate to:  <b>Printer diagnostics and adjustments &gt; Motor tests</b>  <b>c</b> Select the motor (Pick (tray 1)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 10.	Go to step 8.
<p><b>Step 8</b>  <b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a>  <b>b</b> Reseat the motor cable J73 on the controller board.  <b>c</b> Reseat the paper feeder cable.  <b>d</b> Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Replace the paper feeder. See <a href="#">“Paper feeder removal” on page 423.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 1 pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b></p> <p><b>a</b> Make sure that the actuator of the sensor (tray 1 pass-through) is not dislodged or stuck.</p> <p><b>b</b> Check the actuator for damage.</p> <p>Is the sensor actuator functional and free of damage?</p>	Go to step 4.	Go to step 7.
<p><b>Step 4</b></p> <p><b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>c</b> Find the sensor (Tray 1 pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 8.	Go to step 5.
<p><b>Step 5</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J73 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the sensor. See <a href="#">“Sensor (tray 1 pass-through) removal” on page 474.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (tray 1 pass-through) late-arriving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt; select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments</b> &gt; <b>Sensor tests</b></p> <p><b>c</b> Find the sensor (Tray 1 pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J73 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Replace the sensor. See <a href="#">“Sensor (tray 1 pass-through) removal” on page 474.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b></p> <p>Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470</a>.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Motor tests</b></p> <p><b>c</b> Select the motor (MPF pick/aligner), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Reseat the motor cable J71 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor. See <a href="#">“Motor (MPF) removal” on page 419.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray x)), and then touch <b>Start.</b></p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 21.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Replace the source tray paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.

Action	Yes	No
<p><b>Step 22</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 23.
<p><b>Step 23</b> Replace the controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 1 pass-through) late-leaving or did-not-clear jam service check

Action	Yes	No
<p><b>Step 1</b> Pull out all the source trays, and then check if the paper size matches the size set on the tray guides.</p> <p>Does the paper size match the size set on the tray?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Change the paper size or adjust the size setting in the tray.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check if the tray is overfilled.</p> <p>Is the tray overfilled?</p>	Go to step 4.	Go to step 5.
<p><b>Step 4</b> Remove the excess paper from the tray.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the tray for crumpled, damaged, or deformed paper.</p> <p>Are the sheets of paper on the tray still in good condition?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Replace the affected sheets.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.

Action	Yes	No
<p><b>Step 7</b> Check the pick roller of the source tray for dirt, excess wear, and contamination.</p> <p><b>Note:</b> Check also the gears for debris and toner.</p> <p>Are the pick roller components free of dirt, excess wear, and contamination?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Clean or replace the pick roller.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the aligner rollers for obstructions.</p> <p>Are the aligner rollers free of obstructions?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Remove the obstructions.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p><b>a</b> Remove the duplex/MPF tray. See <a href="#">“Duplex/MPF tray removal” on page 440.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>c</b> Find the sensor (Tray 1 pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 15.	Go to step 12.
<p><b>Step 12</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J73 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Replace the sensor. See <a href="#">“Sensor (tray 1 pass-through) removal” on page 474.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b></p> <p>Perform a print test on each tray, and then check if the paper is properly picked and transported out of the source tray by the paper feeder.</p> <p>Was the paper properly transported by the paper feeder?</p>	Go to step 17.	Go to step 16.
<p><b>Step 16</b></p> <p>Replace the affected paper feeder.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Perform a print test, and then check if the paper is properly transported by the MPF motor drive to the sensor (tray 1 pass-through).</p> <p>Was the paper properly transported by the MPF motor drive?</p>	Go to step 19.	Go to step 18.
<p><b>Step 18</b></p> <p>Replace the motor (MPF). See <a href="#">“Motor (MPF) removal” on page 419</a>.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b></p> <p>Perform a print test.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 242 paper jams

### 242 paper jam messages

Error code	Description	Action
242.26	Paper fed from tray 2 was picked but it never reached the sensor (tray 1 pass-through).	See <a href="#">“Tray 2 pick jam service check” on page 136</a> .
242.31	Paper remains detected at the sensor (tray 2 pass-through) although the printer is idle. Tray 3 is the paper source.	See <a href="#">“Sensor (tray 2 pass-through) static jam service check” on page 134</a> .
242.33	Paper fed from tray 3 never reached the sensor (tray 2 pass-through).	See <a href="#">“Sensor (tray 2 pass-through) late-arriving or late-leaving jam service check” on page 140</a> .
242.35	Paper fed from tray 3 cleared the sensor (tray 2 pass-through) later than expected.	
242.37	Paper fed from tray 3 never cleared the sensor (tray 2 pass-through).	

Error code	Description	Action
242.41	Paper remains detected at the sensor (tray 2 pass-through) although the printer is idle. Tray 4 is the paper source.	See <a href="#">“Sensor (tray 2 pass-through) static jam service check” on page 134.</a>
242.43	Paper fed from tray 4 never reached the sensor (tray 2 pass-through).	See <a href="#">“Sensor (tray 2 pass-through) late-arriving or late-leaving jam service check” on page 140.</a>
242.45	Paper fed from tray 4 cleared the sensor (tray 2 pass-through) later than expected.	
242.47	Paper fed from tray 4 never cleared the sensor (tray 2 pass-through).	
242.51	Paper remains detected at the sensor (tray 2 pass-through) although the printer is idle. Tray 5 is the paper source.	See <a href="#">“Sensor (tray 2 pass-through) static jam service check” on page 134.</a>
242.53	Paper fed from tray 5 never reached the sensor (tray 2 pass-through).	See <a href="#">“Sensor (tray 2 pass-through) late-arriving or late-leaving jam service check” on page 140.</a>
242.55	Paper fed from tray 5 cleared the sensor (tray 2 pass-through) later than expected.	
242.57	Paper fed from tray 5 never cleared the sensor (tray 2 pass-through).	
242.70	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) does not turn on.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
242.70	Motor (2100-sheet tray 2 elevator) does not turn on.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
242.71	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) does not turn off.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
242.71	Motor (2100-sheet tray 2 elevator) does not turn off.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
242.72	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) speed did not ramp up to the required level.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
242.72	Motor (2100-sheet tray 2 elevator) speed did not ramp up to the required level.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
242.73	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) stalled.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
242.73	Motor (2100-sheet tray 2 elevator) stalled.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
242.74	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) ran too slow.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
242.74	Motor (2100-sheet tray 2 elevator) ran too slow.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
242.75	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) ran too fast.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>

Error code	Description	Action
242.75	Motor (2100-sheet tray 2 elevator) ran too fast.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
242.76	Motor (250-sheet tray 2 transport) or Motor (550-sheet tray 2 transport) ran too long.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>

242.83	Motor (tray 2 pick/lift) stalled.	
242.84	Motor (tray 2 pick/lift) ran too slow.	
242.85	Motor (tray 2 pick/lift) ran too fast.	
242.86	Motor (tray 2 pick/lift) ran too long.	
242.91	Paper remains detected at the sensor (tray 2 pass-through) after the printer is turned on.	See <a href="#">“Sensor (tray 2 pass-through) static jam service check” on page 134.</a>
242.93	Paper never arrived at the sensor (tray 2 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 2 pass-through) unknown source late-arriving or late-leaving jam service check” on page 148.</a>
242.95	Paper cleared the sensor (tray 2 pass-through) later than expected. Paper source is undetermined.	
242.96	Paper was picked but it never reached the sensor (tray 2 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 2 pass-through) unknown source pick jam service check” on page 143.</a>
242.97	Paper never cleared the sensor (tray 2 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 2 pass-through) unknown source late-arriving or late-leaving jam service check” on page 148.</a>

### Sensor (tray 2 pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Pass-through (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 5.
<p><b>Step 5</b> <b>a</b> Remove the tray 2 left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> <b>a</b> Remove the source tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Tray 2 pick jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 2 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the source tray separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Printer diagnostics and adjustments &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Tray 1 pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 15.	Go to step 12.
<p><b>Step 12</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable J73 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Replace the sensor. See <a href="#">“Sensor (tray 1 pass-through) removal” on page 474.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pick (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 19.	Go to step 16.

Action	Yes	No
<p><b>Step 16</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 18.	Go to step 17.
<p><b>Step 17</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pick) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Media out (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 23.	Go to step 20.
<p><b>Step 20</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray paper present) removal” on page 515.</a></p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.

Action	Yes	No
<p><b>Step 23</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pick roller index (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 27.	Go to step 24.
<p><b>Step 24</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 26.	Go to step 25.
<p><b>Step 25</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 26.	The problem is solved.
<p><b>Step 26</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pick roller index) removal” on page 514.</a></p> <p>Does the problem remain?</p>	Go to step 27.	The problem is solved.
<p><b>Step 27</b></p> <p>Check if the source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 29.	Go to step 28.
<p><b>Step 28</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 29.	The problem is solved.
<p><b>Step 29</b></p> <p><b>a</b> Remove the source tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 30.	The problem is solved.

Action	Yes	No
<p><b>Step 30</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 31.
<p><b>Step 31</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 2 pass-through) late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt;select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics</b> &gt; <b>Sensor tests</b> <b>b</b> Find the sensor (Pass-through (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 2)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 2 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray x)), and then touch <b>Start.</b></p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 21.	Go to step 19.

Action	Yes	No
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Replace the source tray paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 23</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 2 pass-through) unknown source pick jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Input tray quick print</b></p> <p><b>b</b> Do feed tests from trays 2 to 5. Check if the same error occurs.</p> <p>Does the same problem remain?</p>	Go to step 5.	Perform the appropriate service check for the specific error.
<p><b>Step 5</b></p> <p>Check the affected source tray separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the affected source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Remove the affected source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 11.	Go to step 10.

Action	Yes	No
<p><b>Step 10</b> Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Pass-through (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 15.	Go to step 12.
<p><b>Step 12</b> <b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Replace the sensor. See <a href="#">“Sensor (tray 1 pass-through) removal” on page 474.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Pick (tray x)). <b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 19.	Go to step 16.
<p><b>Step 16</b> <b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 18.	Go to step 17.

Action	Yes	No
<p><b>Step 17</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pick) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Media out (tray x)). <b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 23.	Go to step 20.
<p><b>Step 20</b> <b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray paper present) removal” on page 515.</a></p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Pick roller index (tray x)). <b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 27.	Go to step 24.

Action	Yes	No
<p><b>Step 24</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 26.	Go to step 25.
<p><b>Step 25</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 26.	The problem is solved.
<p><b>Step 26</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pick roller index) removal” on page 514.</a></p> <p>Does the problem remain?</p>	Go to step 27.	The problem is solved.
<p><b>Step 27</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check if the affected source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 29.	Go to step 28.
<p><b>Step 28</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 29.	The problem is solved.
<p><b>Step 29</b></p> <p>Make sure that the affected source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 30.	The problem is solved.
<p><b>Step 30</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 31.
<p><b>Step 31</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (tray 2 pass-through) unknown source late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b></p> <p><b>b</b> Do feed tests from trays 2 to 5. Check if the same error occurs.</p> <p>Does the same problem remain?</p>	Go to step 5.	Perform the appropriate service check for the specific error.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b></p> <p>Check the affected source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the affected source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470</a>.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 2)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 2 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray x)), and then touch <b>Start.</b></p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 21.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Replace the source tray paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.

Action	Yes	No
<p><b>Step 21</b> Make sure that the affected source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 23</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### 250- and 550-sheet tray transport drive jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt;select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray x)), and then touch <b>Start</b>. <b>Note:</b> For tray x, choose the tray number of the affected tray.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the motor. See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Make sure that the controller board of the affected tray is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the affected tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.

Action	Yes	No
<p><b>Step 12</b> Replace the affected tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### 2100-sheet tray elevator drive jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt;select source tray &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reinstall, clean, or replace the pick roller.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.

Action	Yes	No
<p><b>Step 7</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pick roller index (tray x)). <b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 11.	Go to step 8.
<p><b>Step 8</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“2100-sheet tray left cover removal” on page 479.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Replace the sensor. See <a href="#">“Sensor (2100-sheet tray pick roller index) removal” on page 497.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“2100-sheet tray left cover removal” on page 479.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (High capacity tray lift), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 14.	Go to step 12.
<p><b>Step 12</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Replace the motor drive. See <a href="#">“2100-sheet tray elevator drive removal” on page 490.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.

Action	Yes	No
<p><b>Step 14</b></p> <p>Perform a print test again, and then observe if the motor (2100-sheet tray transport) is running.</p> <p>Does the motor run?</p>	Go step 17.	Go to step 15.
<p><b>Step 15</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p>Replace the motor. See <a href="#">“Motor (2100-sheet tray transport) removal” on page 484.</a></p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 18</b></p> <p>Replace the optional tray controller board. See <a href="#">“2100-sheet tray controller board removal” on page 489.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 243 paper jams

### 243 paper jam messages

Error code	Description	Action
243.36	Paper fed from tray 3 was picked but it never reached the sensor (tray 2 pass-through).	See <a href="#">“Tray 3 pick jam service check” on page 159.</a>
243.41	Paper remains detected at the sensor (tray 3 pass-through) although the printer is idle. Tray 4 is the paper source.	See <a href="#">“Sensor (tray 3 pass-through) static jam service check” on page 157.</a>
243.43	Paper fed from tray 4 never reached the sensor (tray 3 pass-through).	See <a href="#">“Sensor (tray 3 pass-through) late-arriving or late-leaving jam service check” on page 162.</a>
243.45	Paper fed from tray 4 cleared the sensor (tray 3 pass-through) later than expected.	
243.47	Paper fed from tray 4 never cleared the sensor (tray 3 pass-through).	

Error code	Description	Action
243.51	Paper remains detected at the sensor (tray 3 pass-through) although the printer is idle. Tray 5 is the paper source.	See <a href="#">“Sensor (tray 3 pass-through) static jam service check” on page 157.</a>
243.53	Paper fed from tray 5 never reached the sensor (tray 3 pass-through).	See <a href="#">“Sensor (tray 3 pass-through) late-arriving or late-leaving jam service check” on page 162.</a>
243.55	Paper fed from tray 5 cleared the sensor (tray 3 pass-through) later than expected.	
243.57	Paper fed from tray 5 never cleared the sensor (tray 3 pass-through).	
243.70	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) does not turn on.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.70	Motor (2100-sheet tray 3 elevator) does not turn on.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
243.71	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) does not turn off.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.71	Motor (2100-sheet tray 3 elevator) does not turn off.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
243.72	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) speed did not ramp up to the required level.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.72	Motor (2100-sheet tray 3 elevator) speed did not ramp up to the required level.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
243.73	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) stalled.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.73	Motor (2100-sheet tray 3 elevator) stalled.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
243.74	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) ran too slow.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.74	Motor (2100-sheet tray 3 elevator) ran too slow.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
243.75	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) ran too fast.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.75	Motor (2100-sheet tray 3 elevator) ran too fast.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
243.76	Motor (250-sheet tray 3 transport) or Motor (550-sheet tray 3 transport) ran too long.	See <a href="#">“250- and 550-sheet tray transport drive jam service check” on page 151.</a>
243.76	Motor (2100-sheet tray 3 elevator) ran too long.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>

Error code	Description	Action
243.80	Motor (tray 3 pick/lift) does not turn on.	See <a href="#">“Optional tray pick drive failure service check” on page 326.</a>
243.81	Motor (tray 3 pick/lift) does not turn off.	
243.82	Motor (tray 3 pick/lift) speed did not ramp up to the required level.	
243.83	Motor (tray 3 pick/lift) stalled.	
243.84	Motor (tray 3 pick/lift) ran too slow.	
243.85	Motor (tray 3 pick/lift) ran too fast.	
243.86	Motor (tray 3 pick/lift) ran too long.	
243.91	Paper remains detected at the sensor (tray 3 pass-through) after the printer is turned on.	See <a href="#">“Sensor (tray 3 pass-through) static jam service check” on page 157.</a>
243.92	Paper was detected earlier than expected at the sensor (tray 3 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 3 pass-through) unknown source late-arriving or late-leaving jam service check” on page 165.</a>
243.93	Paper never arrived at the sensor (tray 3 pass-through). Paper source is undetermined.	
243.95	Paper cleared the sensor (tray 3 pass-through) later than expected. Paper source is undetermined.	
243.96	Paper was picked but it never reached the sensor (tray 3 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 3 pass-through) unknown source pick jam service check” on page 169.</a>
243.97	Paper never cleared the sensor (tray 3 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 3 pass-through) unknown source late-arriving or late-leaving jam service check” on page 165.</a>

### Sensor (tray 3 pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 3)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 8.	Go to step 5.
<p><b>Step 5</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p><b>a</b> Remove the source tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 3 pick jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 3 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 2)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 11.	Go to step 8.

Action	Yes	No
<p><b>Step 8</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the source tray separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 2)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 2 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray 3)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Check if the source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.

Action	Yes	No
<p><b>Step 22</b></p> <p>Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 24.
<p><b>Step 24</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 3 pass-through) late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt;select source tray &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 3)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 3)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 3 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray x)), and then touch <b>Start.</b></p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 21.	Go to step 19.

Action	Yes	No
<p><b>Step 19</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Replace the source tray paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 23</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 3 pass-through) unknown source late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b></p> <p><b>b</b> Do feed tests from trays 3 to 5. Check if the same error occurs.</p> <p>Does the same problem remain?</p>	Go to step 5.	Perform the appropriate service check for the specific error.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 3)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the affected source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.

Action	Yes	No
<p><b>Step 11</b></p> <p>Remove the affected source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470</a>.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502</a>.</p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 3)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 3 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.

Action	Yes	No
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray x)), and then touch <b>Start</b>.</p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 21.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Replace the source tray paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Make sure that the affected source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 23</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (tray 3 pass-through) unknown source pick jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b></p> <p><b>b</b> Do feed tests from trays 3 to 5. Check if the same error occurs.</p> <p>Does the same problem remain?</p>	Go to step 5.	Perform the appropriate service check for the specific error.
<p><b>Step 5</b> Check the affected source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 3)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 11.	Go to step 8.

Action	Yes	No
<p><b>Step 8</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the affected source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 3)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 3 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray x)), and then touch <b>Start.</b></p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Check if the affected source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 22.	Go to step 21.

Action	Yes	No
<p><b>Step 21</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Make sure that the affected source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 24.
<p><b>Step 24</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 244 paper jams

### 244 paper jam messages

Error code	Description	Action
244.46	Paper fed from tray 4 was picked but it never reached the sensor (tray 3 pass-through).	See <a href="#">“Tray 4 pick jam service check” on page 175.</a>
244.51	Paper remains detected at the sensor (tray 4 pass-through) although the printer is idle. Tray 5 is the paper source.	See <a href="#">“Sensor (tray 4 pass-through) static jam service check” on page 174.</a>
244.53	Paper fed from tray 5 never reached the sensor (tray 4 pass-through).	See <a href="#">“Sensor (tray 4 pass-through) late-arriving or late-leaving jam service check” on page 178.</a>
244.55	Paper fed from tray 5 cleared the sensor (tray 4 pass-through) later than expected.	
244.57	Paper fed from tray 5 never cleared the sensor (tray 4 pass-through).	

Error code	Description	Action
244.70	Motor (2100-sheet tray 4 elevator) does not turn on.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
244.71	Motor (2100-sheet tray 4 elevator) does not turn off.	
244.72	Motor (2100-sheet tray 4 elevator) speed did not ramp up to the required level.	
244.73	Motor (2100-sheet tray 4 elevator) stalled.	
244.74	Motor (2100-sheet tray 4 elevator) ran too slow.	
244.75	Motor (2100-sheet tray 4 elevator) ran too fast.	
244.76	Motor (2100-sheet tray 4 elevator) ran too long.	
244.80	Motor (tray 4 pick/lift) does not turn on.	See <a href="#">“Optional tray pick drive failure service check” on page 326.</a>
244.81	Motor (tray 4 pick/lift) does not turn off.	
244.82	Motor (tray 4 pick/lift) speed did not ramp up to the required level.	
244.83	Motor (tray 4 pick/lift) stalled.	
244.84	Motor (tray 4 pick/lift) ran too slow.	
244.85	Motor (tray 4 pick/lift) ran too fast.	
244.86	Motor (tray 4 pick/lift) moved too long.	
244.91	Paper remains detected at the sensor (tray 4 pass-through) after the printer is turned on.	See <a href="#">“Sensor (tray 4 pass-through) static jam service check” on page 174.</a>
244.93	Paper never arrived at the sensor (tray 4 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 4 pass-through) late-arriving or late-leaving jam service check” on page 178.</a>
244.95	Paper cleared the sensor (tray 4 pass-through) later than expected. Paper source is undetermined.	
244.96	Paper was picked but it never reached the sensor (tray 4 pass-through). Paper source is undetermined.	See <a href="#">“Tray 5 pick jam service check” on page 184.</a>
244.97	Paper never cleared the sensor (tray 4 pass-through). Paper source is undetermined.	See <a href="#">“Sensor (tray 4 pass-through) late-arriving or late-leaving jam service check” on page 178.</a>

## Sensor (tray 4 pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Additional input tray diagnostics &gt; Sensor tests</b>  <b>b</b> Find the sensor (Pass-through (tray 4)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 5.
<p><b>Step 5</b>  <b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a>  <b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b>  <b>a</b> Remove the source tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a>  <b>b</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 4 pick jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 4 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the source tray pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 7.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b> Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> a Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> b Find the sensor (Pass-through (tray 3)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 11.	Go to step 8.
<p><b>Step 8</b> a Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502</a>. b Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b></p> <p>Check the source tray separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 3)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor. See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray 4)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.

Action	Yes	No
<p><b>Step 20</b></p> <p>Check if the source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 24.
<p><b>Step 24</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (tray 4 pass-through) late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p>Enter the Diagnostics menu, and then navigate to:  <b>Input tray quick print &gt; Tray 5 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 4)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the tray 5 pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall, clean, or replace the pick roller.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.

Action	Yes	No
<p><b>Step 11</b></p> <p>Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 4)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor (tray 4 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.

Action	Yes	No
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray 5)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 21.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Replace the tray 5 paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 23</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 245 paper jams

### 245 paper jam messages

Error code	Description	Action
245.56	Paper fed from tray 5 was picked but it never reached the sensor (tray 4 pass-through).	See <a href="#">“Tray 5 pick jam service check” on page 184.</a>
245.70	Motor (2100-sheet tray 5 elevator) does not turn on.	See <a href="#">“2100-sheet tray elevator drive jam service check” on page 153.</a>
245.71	Motor (2100-sheet tray 5 elevator) does not turn off.	
245.72	Motor (2100-sheet tray 5 elevator) speed did not ramp up to the required level.	
245.73	Motor (2100-sheet tray 5 elevator) stalled.	
245.74	Motor (2100-sheet tray 5 elevator) ran too slow.	
245.75	Motor (2100-sheet tray 5 elevator) ran too fast.	
245.76	Motor (2100-sheet tray 5 elevator) ran too long.	
245.80	Motor (tray 5 pick/lift) does not turn on.	
245.81	Motor (tray 5 pick/lift) does not turn off.	
245.82	Motor (tray 5 pick/lift) speed did not ramp up to the required level.	
245.83	Motor (tray 5 pick/lift) stalled.	
245.84	Motor (tray 5 pick/lift) ran too slow.	
245.85	Motor (tray 5 pick/lift) ran too fast.	
245.86	Motor (tray 5 pick/lift) moved too long.	
245.91	Paper remains detected at the sensor (tray 5 pass-through) after the printer is turned on.	See <a href="#">“Sensor (tray 5 pass-through) static jam service check” on page 182.</a>

### Sensor (tray 5 pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Pass-through (tray 5)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 5.
<p><b>Step 5</b> <b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> <b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a> <b>b</b> Make sure that the optional tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Tray 5 pick jam service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 5 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the tray 5 pick roller for improper installation, contamination, and damage.</p> <p><b>Note:</b> Make sure that the pick roller is fully pressed to its feeder shaft. A click will be heard indicating a proper engagement between the latches and the shaft.</p> <p>Is the pick roller properly installed and free of contamination and damage?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reinstall, clean, or replace the pick roller. See <a href="#">“Pick roller removal” on page 509</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b></p> <p><b>b</b> Find the sensor (Pass-through (tray 4)).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 11.	Go to step 8.

Action	Yes	No
<p><b>Step 8</b></p> <p><b>a</b> Remove the optional tray left cover. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pass-through) removal” on page 513.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Remove the tray 5 tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the tray 5 separator pad for improper installation, contamination, wear, and damage.</p> <p>Is the separator pad properly installed and free of contamination, wear, and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall, clean, or replace the separator pad. See <a href="#">“Separator pad removal” on page 470.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pass-through (tray 4)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 18.	Go to step 16.
<p><b>Step 16</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Replace the motor. See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p><b>a</b> Remove the left cover from the optional tray whose motor will be tested. See <a href="#">“250- and 550-sheet tray left cover removal” on page 502.</a></p> <p><b>b</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>c</b> Select the motor (Pick (tray 5)), and then touch <b>Start.</b></p> <p>Does the motor run?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b></p> <p>Check if the tray 5 paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.

Action	Yes	No
<p><b>Step 22</b></p> <p>Make sure that the tray 5 controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 24.
<p><b>Step 24</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 40y paper jams

### 405–407 paper jam messages

Error code	Description	Action
405.13	The bin 1 diverter plunger did not reach the sensor (OE diverter plunger) on time.	See <a href="#">“Output expander diverter drive jam service check” on page 188.</a>
405.15	The bin 1 diverter plunger did not clear the sensor (OE diverter plunger) on time.	
405.23	The bin 2 diverter plunger did not reach the sensor (OE diverter plunger) on time.	
405.25	The bin 2 diverter plunger did not clear the sensor (OE diverter plunger) on time.	
405.33	The bin 3 diverter plunger did not reach the sensor (OE diverter plunger) on time.	
405.35	The bin 3 diverter plunger did not clear the sensor (OE diverter plunger) on time.	
405.43	The bin 4 diverter plunger did not reach the sensor (OE diverter plunger) on time.	
405.45	The bin 4 diverter plunger did not clear the sensor (OE diverter plunger) on time.	
407.13	Paper going to bin 1 did not reach the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-arriving jam service check” on page 190.</a>
407.15	Paper going to bin 1 did not clear the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-leaving jam service check” on page 192.</a>

Error code	Description	Action
407.23	Paper going to bin 2 did not reach the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-arriving jam service check” on page 190.</a>
407.25	Paper going to bin 2 did not clear the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-leaving jam service check” on page 192.</a>
407.33	Paper going to bin 3 did not reach the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-arriving jam service check” on page 190.</a>
407.35	Paper going to bin 3 did not clear the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-leaving jam service check” on page 192.</a>
407.43	Paper going to bin 4 did not reach the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-arriving jam service check” on page 190.</a>
407.45	Paper going to bin 4 did not clear the sensor (OE pass-through) on time.	See <a href="#">“Sensor (OE pass-through) late-leaving jam service check” on page 192.</a>

### Output expander diverter drive jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the output expander left cover. See <a href="#">“Output expander left cover removal” on page 528</a>.</p> <p><b>b</b> Reseat the cable on the motor (OE diverter) and on the output expander controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the motor (OE diverter) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (OE diverter) removal” on page 535</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Reseat the cable on the sensor (OE diverter plunger) and on the output expander controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (OE diverter plunger) removal” on page 542</a>.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b></p> <p>Check the output expander diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b></p> <p>Reinstall or replace the diverter plunger. See <a href="#">“Output expander diverter plunger assembly removal” on page 535</a>.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.

Action	Yes	No
<p><b>Step 14</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 16.
<p><b>Step 16</b> Replace the bin controller board. See <a href="#">“Output expander controller board removal” on page 530.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (OE pass-through) late-arriving jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Output expander [x]</b></p> <p><b>Note:</b> [x] is the number of the affected bin.</p> <p><b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the output expander left cover. See <a href="#">“Output expander left cover removal” on page 528</a>.</p> <p><b>b</b> Reseat the sensor cable on the output expander controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (OE pass-through) removal” on page 548</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed</b></p> <p>Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p><b>a</b> Remove the optional bins.</p> <p><b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 12.	Contact the next level of support.

Action	Yes	No
<p><b>Step 12</b></p> <p><b>a</b> Remove the output expander left cover. See <a href="#">“Output expander left cover removal” on page 528.</a></p> <p><b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 14.
<p><b>Step 14</b></p> <p>Replace the bin controller board. See <a href="#">“Output expander controller board removal” on page 530.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (OE pass-through) late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Output expander [x]</b></p> <p><b>Note:</b> [x] is the number of the affected bin.</p> <p><b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the output expander left cover. See <a href="#">“Output expander left cover removal” on page 528</a>.</p> <p><b>b</b> Reseat the sensor cable on the output expander controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (OE pass-through) removal” on page 548</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the output expander left cover. See <a href="#">“Output expander left cover removal” on page 528</a>.</p> <p><b>b</b> Reseat the cable on the motor (OE transport) and on the output expander controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (OE transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.

Action	Yes	No
<p><b>Step 12</b> Reinstall or replace the motor. See <a href="#">“Motor (OE transport) removal” on page 538.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the output expander drive gear for damage.</p> <p>Is the drive gear free of damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Replace the gear. See <a href="#">“Output expander drive gear removal” on page 537.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p><b>a</b> Remove the output expander right cover. See <a href="#">“Output expander right cover removal” on page 526.</a></p> <p><b>b</b> Check the output expander drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 17.	Go to step 16.
<p><b>Step 16</b> Reinstall or replace the drive belt. See <a href="#">“Output expander drive belt removal” on page 546.</a></p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed</b> Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 19.	Go to step 18.
<p><b>Step 18</b></p> <p><b>a</b> Remove the optional bins.</p> <p><b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 19.	Contact the next level of support.
<p><b>Step 19</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.

Action	Yes	No
<p><b>Step 20</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 21.
<p><b>Step 21</b></p> <p>Replace the bin controller board. See <a href="#">“Output expander controller board removal” on page 530.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 410–412 paper jams

### 410–412 paper jam messages

Error code	Description	Action
410.13	The bin 1 diverter did not reach the sensor (HCOE diverter) on time.	See <a href="#">“HCOE diverter drive jam service check” on page 196.</a>
410.15	The bin 1 diverter did not clear the sensor (HCOE diverter) on time.	
411.50	Motor (HCOE transport) does not turn on.	See <a href="#">“HCOE transport drive jam service check” on page 198.</a>
411.51	Motor (HCOE transport) does not turn off.	
411.52	Motor (HCOE transport) did not ramp up to the required level.	
411.53	Motor (HCOE transport) stalled.	
411.54	Motor (HCOE transport) ran too slow.	
411.55	Motor (HCOE transport) ran too fast.	
412.11	Paper remains detected at the sensor (HCOE pass-through) after the printer is turned on.	See <a href="#">“Sensor (HCOE pass-through) static jam service check” on page 200.</a>
412.13	Paper going to bin 1 did not reach the sensor (HCOE pass-through) on time.	See <a href="#">“Sensor (HCOE pass-through) late-arriving or late-leaving jam service check” on page 201.</a>
412.15	Paper going to bin 1 did not clear the sensor (HCOE pass-through) on time.	

## HCOE diverter drive jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556</a>. <b>b</b> Reseat the cable on the motor (HCOE diverter) and on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the motor (HCOE diverter) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the motor. See <a href="#">“Motor (HCOE diverter) removal” on page 562</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Reseat the cable on the sensor (HCOE diverter) and on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the sensor (HCOE diverter) for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b> Reinstall or replace the sensor. See <a href="#">“Sensor (HCOE diverter) removal” on page 576</a>.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the HCOE diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Reinstall or replace the diverter plunger. See <a href="#">“HCOE diverter plunger assembly removal” on page 570</a>.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 16.
<p><b>Step 16</b> Replace the bin controller board. See <a href="#">“HCOE controller board removal” on page 558</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## HCOE transport drive jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556</a>.  <b>b</b> Reseat the cable on the motor (HCOE transport) and on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the motor (HCOE transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the motor. See <a href="#">“Motor (HCOE transport) removal” on page 574</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the HCOE drive gear for damage.</p> <p>Is the drive gear free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the gear. See <a href="#">“HCOE drive gear assembly removal” on page 572.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the HCOE drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Reinstall or replace the drive belt. See <a href="#">“HCOE drive belt removal” on page 567.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the HCOE belt tensioner for improper installation and damage.</p> <p>Is the belt tensioner properly installed and free of damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Reinstall or replace the belt tensioner. See <a href="#">“HCOE belt tensioner removal” on page 569.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 17.
<p><b>Step 17</b> Replace the bin controller board. See <a href="#">“HCOE controller board removal” on page 558.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (HCOE pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; High capacity output expander</b> <b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556</a>. <b>b</b> Reseat the sensor cable on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (HCOE pass-through) removal” on page 584.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556.</a></p> <p><b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the bin controller board. See <a href="#">“HCOE controller board removal” on page 558.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (HCOE pass-through) late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.

Action	Yes	No
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; High capacity output expander</b>  <b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b>  <b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556</a>.  <b>b</b> Reseat the sensor cable on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reinstall or replace the sensor. See <a href="#">“Sensor (HCOE pass-through) removal” on page 584</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.

Action	Yes	No
<p><b>Step 10</b></p> <p><b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556.</a></p> <p><b>b</b> Reseat the cable on the motor (HCOE diverter) and on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (HCOE diverter) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (HCOE diverter) removal” on page 562.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the HCOE diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall or replace the diverter plunger. See <a href="#">“HCOE diverter plunger assembly removal” on page 570.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Reseat the cable on the motor (HCOE transport) and on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p>Check the motor (HCOE transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 18.	Go to step 17.
<p><b>Step 17</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (HCOE transport) removal” on page 574.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.

Action	Yes	No
<p><b>Step 18</b> Check the HCOE drive gear for damage.</p> <p>Is the drive gear free of damage?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b> Replace the gear. See <a href="#">“HCOE drive gear assembly removal” on page 572.</a></p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Check the HCOE drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b> Reinstall or replace the drive belt. See <a href="#">“HCOE drive belt removal” on page 567.</a></p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 24.
<p><b>Step 24</b> Replace the bin controller board. See <a href="#">“HCOE controller board removal” on page 558.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 415–418 paper jams

### 415–418 paper jam messages

Error code	Description	Action
415.13	The bin 1 diverter plunger did not reach the sensor (OE diverter plunger) on time.	See <a href="#">“Mailbox diverter drive jam service check” on page 207.</a>
415.15	The bin 1 diverter plunger did not clear the sensor (OE diverter plunger) on time.

## Mailbox diverter drive jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660</a>. <b>b</b> Reseat the cable on the motor (mailbox diverter) and on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the motor (mailbox diverter) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the motor. See <a href="#">“Motor (mailbox diverter) removal” on page 678</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Reseat the cable on the sensor (mailbox diverter plunger) and on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b> Reinstall or replace the sensor. See <a href="#">“Sensor (mailbox diverter plunger) removal” on page 674.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the mailbox diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Reinstall or replace the diverter plunger. See <a href="#">“Mailbox diverter plunger assembly removal” on page 664.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 16.
<p><b>Step 16</b> Replace the bin controller board. See <a href="#">“Mailbox controller board removal” on page 673.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Mailbox transport drive jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660</a>. <b>b</b> Reseat the cable on the motor (mailbox transport) and on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the motor (mailbox transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the motor. See <a href="#">“Motor (mailbox transport) removal” on page 672</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the mailbox transport drive gear for damage.</p> <p>Is the drive gear free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the gear. See <a href="#">“Mailbox transport drive gear removal” on page 669</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 13.
<p><b>Step 13</b> Replace the bin controller board. See <a href="#">“Mailbox controller board removal” on page 673</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (mailbox pass-through 1) static jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660</a>. <b>b</b> Reseat the cable of the sensor (mailbox pass-through 1) on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the sensor (mailbox pass-through 1) for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the sensor. See <a href="#">“Sensor (mailbox pass-through) removal” on page 699</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 11.
<p><b>Step 11</b> Replace the bin controller board. See <a href="#">“Mailbox controller board removal” on page 673</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (mailbox pass-through 1) late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660</a>.  <b>b</b> Reseat the cable of the sensor (mailbox pass-through 1) on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the sensor (mailbox pass-through 1) for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the sensor. See <a href="#">“Sensor (mailbox pass-through) removal” on page 699</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the mailbox rear door for improper installation and damage.</p> <p>Is the door properly installed and free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Reinstall or replace the door. See <a href="#">“Mailbox rear door removal” on page 655.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the mailbox middle diverter for improper installation and damage.</p> <p>Is the diverter properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Reinstall or replace the diverter. See <a href="#">“Mailbox middle diverter removal” on page 694.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the mailbox top diverter for improper installation and damage.</p> <p>Is the diverter properly installed and free of damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Reinstall or replace the diverter. See <a href="#">“Mailbox top diverter removal” on page 689.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Reseat the cable on the motor (mailbox transport) and on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b> Check the motor (mailbox transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 18.	Go to step 17.
<p><b>Step 17</b> Reinstall or replace the motor. See <a href="#">“Motor (mailbox transport) removal” on page 672.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.

Action	Yes	No
<p><b>Step 18</b> Check the mailbox belts for improper installation, wear, and damage.</p> <p>Are the belts properly installed and free of wear and damage?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b> Reinstall or replace the affected belt. See <a href="#">“Mailbox belt removal” on page 684.</a></p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed</b> Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 22.	Go to step 21.
<p><b>Step 21</b> <b>a</b> Remove the optional bins. <b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 22.	Contact the next level of support.
<p><b>Step 22</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 24.
<p><b>Step 24</b> Replace the bin controller board. See <a href="#">“Mailbox controller board removal” on page 673.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (mailbox pass-through 2) static jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Mailbox [x]</b> <b>Note:</b> [x] is the number of the affected bin. <b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660</a>. <b>b</b> Reseat the cable of the sensor (mailbox pass-through 2) on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b> Check the sensor (mailbox pass-through 2) for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reinstall or replace the sensor. See <a href="#">“Sensor (mailbox pass-through) removal” on page 699.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660.</a></p> <p><b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b> Replace the bin controller board. See <a href="#">“Mailbox controller board removal” on page 673.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (mailbox pass-through 2) late-arriving or late-leaving jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.

Action	Yes	No
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Mailbox [x]</b> <b>Note:</b> [x] is the number of the affected bin. <b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660</a>. <b>b</b> Reseat the cable of the sensor (mailbox pass-through 2) on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the sensor (mailbox pass-through 2) for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reinstall or replace the sensor. See <a href="#">“Sensor (mailbox pass-through) removal” on page 699</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.

Action	Yes	No
<p><b>Step 10</b> Check the mailbox rear door for improper installation and damage.</p> <p>Is the door properly installed and free of damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b> Reinstall or replace the door. See <a href="#">“Mailbox rear door removal” on page 655.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the mailbox middle diverter for improper installation and damage.</p> <p>Is the diverter properly installed and free of damage?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Reinstall or replace the diverter. See <a href="#">“Mailbox middle diverter removal” on page 694.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Check the mailbox top diverter for improper installation and damage.</p> <p>Is the diverter properly installed and free of damage?</p>	Go to step 16.	Go to step 15.
<p><b>Step 15</b> Reinstall or replace the diverter. See <a href="#">“Mailbox top diverter removal” on page 689.</a></p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p><b>a</b> Remove the mailbox left cover. See <a href="#">“Mailbox left cover removal” on page 660.</a></p> <p><b>b</b> Reseat the cable on the motor (mailbox transport) and on the mailbox controller board.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b> Check the motor (mailbox transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 19.	Go to step 18.

Action	Yes	No
<p><b>Step 18</b> Reinstall or replace the motor. See <a href="#">“Motor (mailbox transport) removal” on page 672.</a></p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Check the mailbox belts for improper installation, wear, and damage.</p> <p>Are the belts properly installed and free of wear and damage?</p>	Go to step 21.	Go to step 20.
<p><b>Step 20</b> Reinstall or replace the affected belt. See <a href="#">“Mailbox belt removal” on page 684.</a></p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed</b> Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 23.	Go to step 22.
<p><b>Step 22</b> <b>a</b> Remove the optional bins. <b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 23.	Contact the next level of support.
<p><b>Step 23</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 24.	The problem is solved.
<p><b>Step 24</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 25.
<p><b>Step 25</b> Replace the bin controller board. See <a href="#">“Mailbox controller board removal” on page 673.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 420 paper jams

### 420 paper jam messages

Error code	Description	Action
420.11	Paper remains detected at the bin 1 sensor (staple finisher pass-through) after the printer is turned on.	See <a href="#">“Sensor (staple finisher pass-through) static jam service check” on page 221.</a>
420.11	Paper remains detected at the bin 1 sensor (HPU leading edge) after the printer is turned on.	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.12	Paper going to bin 1 was detected earlier than expected at the sensor (staple finisher pass-through).	See <a href="#">“Sensor (staple finisher pass-through) early- or late-arriving jam service check” on page 223.</a>
420.12	Paper going to bin 1 was detected earlier than expected at the sensor (HPU leading edge).	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.13	Paper going to bin 1 did not reach the sensor (staple finisher pass-through) on time.	See <a href="#">“Sensor (staple finisher pass-through) early- or late-arriving jam service check” on page 223.</a>
420.13	Paper going to bin 1 did not reach the sensor (HPU leading edge) on time.	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.15	Paper going to bin 1 did not clear the sensor (staple finisher pass-through) on time.	See <a href="#">“Sensor (staple finisher pass-through) late leaving jam service check” on page 227.</a>
420.15	Paper going to bin 1 did not clear the sensor (HPU leading edge) on time.	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.21	Paper remains detected at the bin 2 sensor (staple finisher pass-through) after the printer is turned on.	See <a href="#">“Sensor (staple finisher pass-through) static jam service check” on page 221.</a>
420.21	Paper remains detected at the bin 2 sensor (HPU leading edge) after the printer is turned on.	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.22	Paper going to bin 2 was detected earlier than expected at the sensor (staple finisher pass-through).	See <a href="#">“Sensor (staple finisher pass-through) early- or late-arriving jam service check” on page 223.</a>
420.22	Paper going to bin 2 was detected earlier than expected at the sensor (HPU leading edge).	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.23	Paper going to bin 2 did not reach the sensor (staple finisher pass-through) on time.	See <a href="#">“Sensor (staple finisher pass-through) early- or late-arriving jam service check” on page 223.</a>
420.23	Paper going to bin 2 did not reach the sensor (HPU leading edge) on time.	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>

Error code	Description	Action
420.25	Paper going to bin 2 did not clear the sensor (staple finisher pass-through) on time.	See <a href="#">“Sensor (staple finisher pass-through) late leaving jam service check” on page 227.</a>
420.25	Paper going to bin 2 did not clear the sensor (HPU leading edge) on time.	See <a href="#">“Sensor (HPU leading edge) jam service check” on page 230.</a>
420.54	The bin 1 motor (staple finisher transport) ran too slow.	See <a href="#">“Staple finisher transport drive failure service check” on page 370.</a>
420.54	The bin 1 motor (SHPF transport) ran too slow.	See <a href="#">“SHPF transport drive jam service check” on page 231.</a>
420.55	The bin 1 motor (staple finisher transport) ran too fast.	See <a href="#">“Staple finisher transport drive failure service check” on page 370.</a>
420.55	The bin 1 motor (SHPF transport) ran too fast.	See <a href="#">“SHPF transport drive jam service check” on page 231.</a>

420.64	The bin 2 motor (SHPF transport) ran too slow.	See <a href="#">“SHPF transport drive jam service check” on page 231.</a>
420.65	The bin 2 motor (staple finisher transport) ran too fast.	See <a href="#">“Staple finisher transport drive failure service check” on page 370.</a>
420.65	The bin 2 motor (SHPF transport) ran too fast.	See <a href="#">“SHPF transport drive jam service check” on page 231.</a>

### Sensor (staple finisher pass-through) static jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b> <b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>. <b>b</b> Reseat the cable of the sensor (staple finisher pass-through) on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher pass-through) removal” on page 649</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the staple finisher rear door for improper installation and damage.</p> <p>Is the door properly installed and free of damage?</p>	Go to step 12.	Go to step 11.

Action	Yes	No
<p><b>Step 11</b> Reinstall or replace the door. See <a href="#">“Staple finisher rear door removal” on page 588.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 14.
<p><b>Step 14</b> Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (staple finisher pass-through) early- or late-arriving jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b></p> <p><b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>.</p> <p><b>b</b> Reseat the cable of the sensor (staple finisher pass-through) on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher pass-through) removal” on page 649</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the staple finisher rear door for improper installation and damage.</p> <p>Is the door properly installed and free of damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Reinstall or replace the door. See <a href="#">“Staple finisher rear door removal” on page 588</a>.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.

Action	Yes	No
<p><b>Step 12</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590.</a></p> <p><b>b</b> Reseat the cable on the sensor (staple finisher diverter plunger) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher diverter plunger) removal” on page 605.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Reseat the cable on the motor (staple finisher diverter) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p>Check the motor (staple finisher diverter) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 18.	Go to step 17.
<p><b>Step 17</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (staple finisher diverter) removal” on page 604.</a></p> <p>Does the problem remain?</p>	Go to step 18.	The problem is solved.
<p><b>Step 18</b></p> <p>Check the staple finisher diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 20.	Go to step 19.
<p><b>Step 19</b></p> <p>Reinstall or replace the diverter plunger. See <a href="#">“Staple finisher diverter plunger assembly removal” on page 610.</a></p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.

Action	Yes	No
<p><b>Step 20</b></p> <p>Reseat the cable on the motor (staple finisher transport) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Check the motor (staple finisher transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 23.	Go to step 22.
<p><b>Step 22</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (staple finisher transport) removal” on page 605.</a></p> <p>Does the problem remain?</p>	Go to step 23.	The problem is solved.
<p><b>Step 23</b></p> <p>Check the staple finisher drive gear for improper installation and damage.</p> <p>Is the drive gear properly installed and free of damage?</p>	Go to step 25.	Go to step 24.
<p><b>Step 24</b></p> <p>Reinstall or replace the gear. See <a href="#">“Staple finisher drive gear assembly removal” on page 610.</a></p> <p>Does the problem remain?</p>	Go to step 25.	The problem is solved.
<p><b>Step 25</b></p> <p>Enter the Diagnostics menu, and then navigate to:</p> <p><b>Output bin quick feed</b></p> <p>Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 27.	Go to step 26.
<p><b>Step 26</b></p> <p><b>a</b> Remove the optional bins.</p> <p><b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 27.	Contact the next level of support.
<p><b>Step 27</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 28.	The problem is solved.

Action	Yes	No
<p><b>Step 28</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 29.
<p><b>Step 29</b></p> <p>Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (staple finisher pass-through) late leaving jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b></p> <p><b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590.</a></p> <p><b>b</b> Reseat the cable of the sensor (staple finisher pass-through) on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher pass-through) removal” on page 649.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the staple finisher rear door for improper installation and damage.</p> <p>Is the door properly installed and free of damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Reinstall or replace the door. See <a href="#">“Staple finisher rear door removal” on page 588.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b></p> <p>Check the tamper aligners for improper installation and damage.</p> <p>Are the tamper aligners properly installed and free of damage?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b></p> <p>Reinstall or replace the tamper aligner. See <a href="#">“Tamper aligner removal” on page 633.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.

Action	Yes	No
<p><b>Step 14</b> Check the staple finisher drive gear for improper installation and damage.</p> <p>Is the drive gear properly installed and free of damage?</p>	Go to step 16.	Go to step 15.
<p><b>Step 15</b> Reinstall or replace the gear. See <a href="#">“Staple finisher drive gear assembly removal” on page 610.</a></p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed</b> Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 18.	Go to step 17.
<p><b>Step 17</b> <b>a</b> Remove the optional bins. <b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 18.	Contact the next level of support.
<p><b>Step 18</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 20.
<p><b>Step 20</b> Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (HPU leading edge) jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b> <b>b</b> Find the sensor (Pass-through).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>. <b>b</b> Reseat the cable of the sensor (HPU leading edge) on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b> Make sure that the HPU controller board is properly installed. Reseat the cables on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the HPU controller board and its connector pins for damage.</p> <p>Are the HPU controller board and its connectors free of damage?</p>	Go to step 10.	Contact the next level of support.
<p><b>Step 10</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### SHPF transport drive jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.</p> <p><b>b</b> Reseat the cable on the motor (SHPF transport) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the motor (SHPF transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (SHPF transport) removal” on page 719</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the SHPF drive gear for improper installation and damage.</p> <p>Is the drive gear properly installed and free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall or replace the gear. See <a href="#">“SHPF drive gear assembly removal” on page 722</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.

Action	Yes	No
<p><b>Step 12</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 13.
<p><b>Step 13</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 421–429 paper jams

### 421–429 paper jam messages

Error code	Description	Action
421.13	The bin 1 left tamper did not reach the sensor (staple finisher left tamper) on time.	See <a href="#">“Left tamper jam service check” on page 238.</a>
421.13	The bin 1 left tamper did not reach the sensor (SHPF left tamper) on time.	See <a href="#">“SHPF left tamper jam service check” on page 251.</a>
421.15	The bin 1 left tamper did not clear the sensor (staple finisher left tamper) on time.	See <a href="#">“Left tamper jam service check” on page 238.</a>
421.15	The bin 1 left tamper did not clear the sensor (SHPF left tamper) on time.	See <a href="#">“SHPF left tamper jam service check” on page 251.</a>
421.23	The bin 2 left tamper did not reach the sensor (staple finisher left tamper) on time.	See <a href="#">“Left tamper jam service check” on page 238.</a>
421.23	The bin 2 left tamper did not reach the sensor (SHPF left tamper) on time.	See <a href="#">“SHPF left tamper jam service check” on page 251.</a>
421.25	The bin 2 left tamper did not clear the sensor (staple finisher left tamper) on time.	See <a href="#">“Left tamper jam service check” on page 238.</a>
421.25	The bin 2 left tamper did not clear the sensor (SHPF left tamper) on time.	See <a href="#">“SHPF left tamper jam service check” on page 251.</a>
422.13	The bin 1 right tamper did not reach the sensor (staple finisher right tamper) on time.	See <a href="#">“Right tamper jam service check” on page 240.</a>
422.13	The bin 1 right tamper did not reach the sensor (SHPF right tamper) on time.	See <a href="#">“SHPF right tamper jam service check” on page 254.</a>

Error code	Description	Action
422.15	The bin 1 right tamper did not clear the sensor (staple finisher right tamper) on time.	See <a href="#">“Right tamper jam service check” on page 240.</a>
422.15	The bin 1 right tamper did not clear the sensor (SHPF right tamper) on time.	See <a href="#">“SHPF right tamper jam service check” on page 254.</a>
422.23	The bin 2 right tamper did not reach the sensor (staple finisher right tamper) on time.	See <a href="#">“Right tamper jam service check” on page 240.</a>
422.23	The bin 2 right tamper did not reach the sensor (SHPF right tamper) on time.	See <a href="#">“SHPF right tamper jam service check” on page 254.</a>
422.25	The bin 2 right tamper did not clear the sensor (staple finisher right tamper) on time.	See <a href="#">“Right tamper jam service check” on page 240.</a>
422.25	The bin 2 right tamper did not clear the sensor (SHPF right tamper) on time.	See <a href="#">“SHPF right tamper jam service check” on page 254.</a>
423.13	The bin 1 ejector belt did not reach the sensor (staple finisher ejector) on time.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>
423.13	The bin 1 ejector belt did not reach the sensor (SHPF ejector) on time.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.15	The bin 1 ejector belt did not clear the sensor (staple finisher ejector) on time.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>
423.15	The bin 1 ejector belt did not clear the sensor (SHPF ejector) on time.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.23	The bin 1 ejector belt did not reach the sensor (staple finisher ejector) on time.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>
423.23	The bin 1 ejector belt did not reach the sensor (SHPF ejector) on time.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.25	The bin 1 ejector belt did not clear the sensor (staple finisher ejector) on time.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>
423.25	The bin 1 ejector belt did not clear the sensor (SHPF ejector) on time.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.51	The bin 1 motor (staple finisher ejector) did not turn off.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>
423.51	The bin 1 motor (SHPF ejector) did not turn off.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.54	The bin 1 motor (staple finisher ejector) did not reach the required speed.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>
423.54	The bin 1 motor (SHPF ejector) did not reach the required speed.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.55	The bin 1 motor (staple finisher ejector) went over the required speed.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>

Error code	Description	Action
423.55	The bin 1 motor (SHPF ejector) went over the required speed.	See <a href="#">“SHPF ejector jam service check” on page 257.</a>
423.61	The bin 2 motor (staple finisher ejector) did not turn off.	See <a href="#">“Staple finisher ejector drive failure service check” on page 372.</a>

## Left tamper jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b>  <b>b</b> Find the sensor (Tamper, left).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b>  <b>a</b> Remove the staple finisher top cover. See <a href="#">“Staple finisher top cover removal” on page 594</a>.  <b>b</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>.  <b>c</b> Reseat the cable on the sensor (staple finisher left tamper) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher left tamper) removal” on page 629.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the staple finisher top cover. See <a href="#">“Staple finisher top cover removal” on page 594.</a></p> <p><b>b</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590.</a></p> <p><b>c</b> Reseat the cable on the motor (staple finisher left tamper) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (staple finisher left tamper) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (staple finisher left tamper) removal” on page 625.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the tamper drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall or replace the drive belt. See <a href="#">“Tamper drive belt removal” on page 626.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Check the tamper aligner for improper installation and damage.</p> <p>Is the tamper aligner properly installed and free of damage?</p>	Go to step 17.	Go to step 16.

Action	Yes	No
<p><b>Step 16</b> Reinstall or replace the tamper aligner. See <a href="#">“Tamper aligner removal” on page 633</a>.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b> Check the tamper gear for improper installation and damage.</p> <p>Is the gear properly installed and free of damage?</p>	Go to step 19.	Go to step 18.
<p><b>Step 18</b> Reinstall or replace the gear. See <a href="#">“Tamper drive belt removal” on page 626</a>.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 21.
<p><b>Step 21</b> Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Right tamper jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.

Action	Yes	No
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b> <b>b</b> Find the sensor (Tamper, right).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the staple finisher top cover. See <a href="#">“Staple finisher top cover removal” on page 594</a>. <b>b</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>. <b>c</b> Reseat the cable on the sensor (staple finisher right tamper) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher right tamper) removal” on page 627</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.

Action	Yes	No
<p><b>Step 10</b></p> <p><b>a</b> Remove the staple finisher top cover. See <a href="#">“Staple finisher top cover removal” on page 594.</a></p> <p><b>b</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590.</a></p> <p><b>c</b> Reseat the cable on the motor (staple finisher right tamper) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (staple finisher right tamper) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (staple finisher left tamper) removal” on page 625.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the tamper drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b></p> <p>Reinstall or replace the drive belt. See <a href="#">“Tamper drive belt removal” on page 626.</a></p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Check the tamper aligner for improper installation and damage.</p> <p>Is the tamper aligner properly installed and free of damage?</p>	Go to step 17.	Go to step 16.
<p><b>Step 16</b></p> <p>Reinstall or replace the tamper aligner. See <a href="#">“Tamper aligner removal” on page 633.</a></p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b></p> <p>Check the tamper gear for improper installation and damage.</p> <p>Is the gear properly installed and free of damage?</p>	Go to step 19.	Go to step 18.

Action	Yes	No
<p><b>Step 18</b> Reinstall or replace the gear. See <a href="#">“Tamper drive belt removal” on page 626</a>.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 21.
<p><b>Step 21</b> Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Staple finisher paddle jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b></p> <p><b>b</b> Find the sensor (Paddle).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the staple finisher top cover. See <a href="#">“Staple finisher top cover removal” on page 594</a>.</p> <p><b>b</b> Reseat the cable on the sensor (staple finisher paddle) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher paddle) removal” on page 624</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>.</p> <p><b>b</b> Reseat the cable on the motor (staple finisher paddle) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (staple finisher paddle) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.

Action	Yes	No
<p><b>Step 12</b> Reinstall or replace the motor. See <a href="#">“Motor (staple finisher paddle) removal” on page 598.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 15.
<p><b>Step 15</b> Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Staple finisher diverter jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>.</p> <p><b>b</b> Reseat the cable on the sensor (staple finisher diverter plunger) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher diverter plunger) removal” on page 605</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Reseat the cable on the motor (staple finisher diverter) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the motor (staple finisher diverter) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (staple finisher diverter) removal” on page 604</a>.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b></p> <p>Check the staple finisher diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 14.	Go to step 13.

Action	Yes	No
<p><b>Step 13</b> Reinstall or replace the diverter plunger. See <a href="#">“Staple finisher diverter plunger assembly removal” on page 610.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 16.
<p><b>Step 16</b> Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Staple jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Staple test</b></p> <p><b>b</b> Select a staple job.</p> <p>Does the finisher staple?</p>	Go to step 12.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the staple finisher right cover. See <a href="#">“Staple finisher right cover removal” on page 592</a>.</p> <p><b>b</b> Make sure that the staple cartridge is properly installed.</p> <p><b>c</b> Clear the staple unit of any obstructions.</p> <p><b>d</b> Reseat the staple unit cables.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the staple unit for damage.</p> <p>Is the staple unit free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Replace the staple unit. See <a href="#">“Staple unit removal” on page 598</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Clear the staple cartridge holder of any obstructions.</p> <p><b>b</b> Check the staple cartridge holder for improper installation and damage.</p> <p>Is the cartridge holder properly installed and free of damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Reinstall or replace the staple cartridge holder. See <a href="#">“Staple cartridge holder removal” on page 710</a>.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.

Action	Yes	No
<p><b>Step 12</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 14.
<p><b>Step 14</b></p> <p>Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Sensor (staple throat paper present) jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Stapler</b></p> <p><b>b</b> Find the sensor (Stapler throat, right).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the staple unit. See <a href="#">“Staple unit removal” on page 598.</a></p> <p><b>b</b> Reseat the cable on the sensor (staple throat paper present) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (staple throat paper present) removal” on page 650.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590.</a></p> <p><b>b</b> Reseat the staple finisher ejector assembly cable on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the staple finisher ejector assembly operate properly?</p>	Go to step 14.	Go to step 12.
<p><b>Step 12</b></p> <p>Check the ejector assembly for damage.</p> <p>Is the ejector assembly free of damage?</p>	Go to step 14.	Go to step 13.

Action	Yes	No
<p><b>Step 13</b></p> <p>Replace the staple finisher ejector assembly. See <a href="#">“Staple finisher ejector assembly removal” on page 643.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 16.
<p><b>Step 16</b></p> <p>Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### SHPF left tamper jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b></p> <p><b>b</b> Find the sensor (Tamper, left).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the SHPF top cover. See <a href="#">“Staple, hole punch finisher top cover removal” on page 709</a>.</p> <p><b>b</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.</p> <p><b>c</b> Reseat the cable on the sensor (SHPF left tamper) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the SHPF top cover. See <a href="#">“Staple, hole punch finisher top cover removal” on page 709</a>.</p> <p><b>b</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.</p> <p><b>c</b> Reseat the cable on the motor (SHPF left tamper) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.

Action	Yes	No
<p><b>Step 11</b> Check the motor (SHPF left tamper) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Reinstall or replace the motor.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the tamper drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Reinstall or replace the drive belt.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the tamper aligner for improper installation and damage.</p> <p>Is the tamper aligner properly installed and free of damage?</p>	Go to step 17.	Go to step 16.
<p><b>Step 16</b> Reinstall or replace the tamper aligner.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b> Check the tamper gear for improper installation and damage.</p> <p>Is the gear properly installed and free of damage?</p>	Go to step 19.	Go to step 18.
<p><b>Step 18</b> Reinstall or replace the gear.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.

Action	Yes	No
<p><b>Step 20</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 21.
<p><b>Step 21</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### SHPF right tamper jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b></p> <p><b>b</b> Find the sensor (Tamper, left).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the SHPF top cover. See <a href="#">“Staple, hole punch finisher top cover removal” on page 709.</a></p> <p><b>b</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>c</b> Reseat the cable on the sensor (SHPF left tamper) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the SHPF top cover. See <a href="#">“Staple, hole punch finisher top cover removal” on page 709.</a></p> <p><b>b</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>c</b> Reseat the cable on the motor (SHPF left tamper) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (SHPF left tamper) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the motor.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b> Check the tamper drive belt for improper installation, wear, and damage.</p> <p>Is the drive belt properly installed and free of wear and damage?</p>	Go to step 15.	Go to step 14.
<p><b>Step 14</b> Reinstall or replace the drive belt.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the tamper aligner for improper installation and damage.</p> <p>Is the tamper aligner properly installed and free of damage?</p>	Go to step 17.	Go to step 16.
<p><b>Step 16</b> Reinstall or replace the tamper aligner.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.
<p><b>Step 17</b> Check the tamper gear for improper installation and damage.</p> <p>Is the gear properly installed and free of damage?</p>	Go to step 19.	Go to step 18.
<p><b>Step 18</b> Reinstall or replace the gear.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 20.	The problem is solved.
<p><b>Step 20</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 21.
<p><b>Step 21</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF ejector jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>. <b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 8.
<p><b>Step 8</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF paddle jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b> <b>b</b> Find the sensor (Paddle).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the SHPF top cover. See <a href="#">“Staple, hole punch finisher top cover removal” on page 709</a>. <b>b</b> Reseat the cable on the sensor (SHPF paddle) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (SHPF paddle) removal” on page 743.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>b</b> Reseat the cable on the motor (SHPF paddle) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the motor (SHPF paddle) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (SHPF paddle) removal” on page 712.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### SHPF diverter jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.

Action	Yes	No
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.  <b>b</b> Reseat the cable on the motor (SHPF diverter plunger) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the motor (SHPF diverter plunger) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the motor. See <a href="#">“Motor (SHPF diverter plunger) removal” on page 718</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Reseat the cable on the sensor (SHPF diverter plunger) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 12.	Go to step 11.

Action	Yes	No
<p><b>Step 11</b> Reinstall or replace the sensor. See <a href="#">“Sensor (staple finisher diverter plunger) removal” on page 605.</a></p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the SHPF diverter plunger for improper installation and damage.</p> <p>Is the diverter plunger properly installed and free of damage?</p>	Go to step 14.	Go to step 13.
<p><b>Step 13</b> Reinstall or replace the diverter plunger. See <a href="#">“SHPF diverter plunger assembly removal” on page 721.</a></p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 16.
<p><b>Step 16</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### SHPF staple jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.

Action	Yes	No
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments &gt; Staple test</b> <b>b</b> Select the staple job for the right staple unit.</p> <p>Does the finisher staple?</p>	Go to step 13.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>. <b>b</b> Make sure that the SHPF staple cartridge door close limit switch is properly installed. Reseat the cable on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the limit switch and its connector pins for damage.</p> <p>Are the limit switch and its connectors free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Replace the limit switch. See <a href="#">“SHPF staple cartridge door close limit switch removal” on page 712</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.

Action	Yes	No
<p><b>Step 10</b></p> <p><b>a</b> Remove the SHPF right cover. See <a href="#">“Staple, hole punch finisher right cover removal” on page 707.</a></p> <p><b>b</b> Make sure that the staple cartridge is properly installed.</p> <p><b>c</b> Clear the staple unit of any obstructions.</p> <p><b>d</b> Reseat the staple unit cables.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the staple unit for damage.</p> <p>Is the staple unit free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the staple unit. See <a href="#">“Right staple unit removal” on page 732.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 15.
<p><b>Step 15</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF staple throat jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b>  <b>b</b> Find the sensor (Stapler throat, right).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b>  <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.  <b>b</b> Remove the right staple unit. See <a href="#">“Right staple unit removal” on page 732</a>.  <b>c</b> Reseat the cable on the sensor (SHPF staple throat paper present) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Sensor (SHPF staple throat paper present) removal” on page 735.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 430–434 paper jams

### 430–434 paper jam messages

Error code	Description	Action
430.19	The bin 1 right stapler head failed to prime.	See <a href="#">“Staple jam service check” on page 247</a> or <a href="#">“SHPF stapler head prime failure service check” on page 267.</a>
430.29	The bin 2 right stapler head failed to prime.	

Error code	Description	Action
431.13	The bin 1 elevator bin did not reach the sensor (SHPF elevator, top) on time.	See <a href="#">“SHPF elevator top jam service check” on page 269.</a>
431.15	The bin 1 elevator bin did not clear the sensor (SHPF elevator, top) on time.	
431.23	The bin 2 elevator bin did not reach the sensor (SHPF elevator, top) on time.	
431.25	The bin 2 elevator bin did not clear the sensor (SHPF elevator, top) on time.	
431.54	The bin 1 motor (SHPF elevator) did not reach the required speed.	
431.55	The bin 1 motor (SHPF elevator) went over the required speed.	
431.64	The bin 2 motor (SHPF elevator) did not reach the required speed.	
431.65	The bin 2 motor (SHPF elevator) went over the required speed.	
432.13	The bin 1 left stapler head did not reach its home position.	See <a href="#">“SHPF left staple jam service check” on page 271.</a>
432.15	The bin 1 left stapler head did not clear its home position.	
432.23	The bin 2 left stapler head did not reach its home position.	
432.25	The bin 2 left stapler head did not clear its home position.	
433.13	Paper going to bin 1 did not reach the left sensor (SHPF staple throat paper present) on time.	See <a href="#">“SHPF left staple throat jam service check” on page 273.</a>
433.14	Paper going to bin 1 cleared the left sensor (SHPF staple throat paper present) earlier than expected.	
433.15	Paper going to bin 1 did not clear the left sensor (SHPF staple throat paper present) on time.	
433.23	Paper going to bin 2 did not reach the left sensor (SHPF staple throat paper present) on time.	
433.24	Paper going to bin 2 cleared the left sensor (SHPF staple throat paper present) earlier than expected.	
433.25	Paper going to bin 2 did not clear the left sensor (SHPF staple throat paper present) on time.	

Error code	Description	Action
434.19	The bin 1 left stapler head failed to prime.	See <a href="#">“SHPF left staple jam service check” on page 271.</a>
434.29	The bin 2 left stapler head failed to prime.	

### SHPF stapler head prime failure service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments &gt; Staple test</b> <b>b</b> Select the staple job for the right staple unit.</p> <p>Does the finisher staple?</p>	Go to step 10.	Go to step 7.

Action	Yes	No
<p><b>Step 7</b></p> <p><b>a</b> Remove the SHPF right cover. See <a href="#">“Staple, hole punch finisher right cover removal” on page 707.</a></p> <p><b>b</b> Make sure that the staple cartridge is properly installed.</p> <p><b>c</b> Clear the staple unit of any obstructions.</p> <p><b>d</b> Reseat the staple unit cables.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the staple unit for damage.</p> <p>Is the staple unit free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Replace the staple unit. See <a href="#">“Right staple unit removal” on page 732.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF elevator top jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b> <b>b</b> Find the sensor (Bin elevator top).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>. <b>b</b> Reseat the cable of the sensor (SHPF elevator, top) on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b> Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reinstall or replace the sensor. See <a href="#">“Staple, hole punch finisher elevator drive removal” on page 728.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Reseat the cable on the motor (SHPF elevator).</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the SHPF elevator drive for improper installation and damage.</p> <p>Is the elevator drive properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Reinstall or replace the elevator drive. See <a href="#">“Staple, hole punch finisher elevator drive removal” on page 728.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 15.
<p><b>Step 15</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF left staple jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments &gt; Staple test</b>  <b>b</b> Select the staple job for the left staple unit.</p> <p>Does the finisher staple?</p>	Go to step 13.	Go to step 7.
<p><b>Step 7</b>  <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.  <b>b</b> Make sure that the SHPF staple cartridge door close limit switch is properly installed. Reseat the cable on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the limit switch and its connector pins for damage.</p> <p>Are the limit switch and its connectors free of damage?</p>	Go to step 10.	Go to step 9.

Action	Yes	No
<p><b>Step 9</b> Replace the limit switch. See <a href="#">“SHPF staple cartridge door close limit switch removal” on page 712.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> <b>a</b> Make sure that the staple cartridge is properly installed. <b>b</b> Clear the staple unit of any obstructions. <b>c</b> Reseat the staple unit cables.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the staple unit for damage.</p> <p>Is the staple unit free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b> Replace the staple unit. See <a href="#">“Left staple unit removal” on page 715.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a> <b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 15.
<p><b>Step 15</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF left staple throat jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b>  <b>b</b> Find the sensor (Stapler throat, left).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b>  <b>a</b> Remove the left staple unit. See <a href="#">“Left staple unit removal” on page 715</a>.  <b>b</b> Reseat the cable on the sensor (SHPF staple throat paper present) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor. See <a href="#">“Left staple unit removal” on page 715.</a></p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the left staple unit. See <a href="#">“Left staple unit removal” on page 715.</a></p> <p><b>b</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 435–438 paper jams

### 435–438 paper jam messages

Error code	Description	Action
435.13	The bin 1 stack height actuator did not reach the sensor (staple finisher stack height) on time.	See <a href="#">“Staple finisher stack jam service check” on page 275.</a>
435.13	The bin 1 stack height actuator did not reach the sensor (SHPF stack height) on time.	See <a href="#">“SHPF stack jam service check” on page 279.</a>

Error code	Description	Action
435.15	The bin 1 stack height actuator did not clear the sensor (staple finisher stack height) on time.	See <a href="#">“Staple finisher stack jam service check” on page 275.</a>
435.15	The bin 1 stack height actuator did not clear the sensor (SHPF stack height) on time.	See <a href="#">“SHPF stack jam service check” on page 279.</a>
435.23	The bin 2 stack height actuator did not reach the sensor (staple finisher stack height) on time.	See <a href="#">“Staple finisher stack jam service check” on page 275.</a>
435.23	The bin 2 stack height actuator did not reach the sensor (SHPF stack height) on time.	See <a href="#">“SHPF stack jam service check” on page 279.</a>
435.25	The bin 2 stack height actuator did not clear the sensor (staple finisher stack height) on time.	See <a href="#">“Staple finisher stack jam service check” on page 275.</a>
435.25	The bin 2 stack height actuator did not clear the sensor (SHPF stack height) on time.	See <a href="#">“SHPF stack jam service check” on page 279.</a>
438.xx	A mechanical reset timeout occurred at the staple finisher or SHPF.	See <a href="#">“Staple finisher timeout error service check” on page 277</a> or <a href="#">“SHPF timeout error service check” on page 281.</a>

### Staple finisher stack jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590</a>.</p> <p><b>b</b> Reseat the cable on the motor (staple finisher stack height) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the staple finisher stack height assembly and its motor for improper installation and damage.</p> <p>Is the stack height assembly properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the stack height assembly. See <a href="#">“Staple finisher stack height assembly removal” on page 635</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Reseat the cable on the sensor (staple finisher stack height) and on the staple finisher controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b></p> <p>Reinstall or replace the sensor.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.

Action	Yes	No
<p><b>Step 13</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 14.
<p><b>Step 14</b></p> <p>Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Staple finisher timeout error service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the staple finisher left cover. See <a href="#">“Staple finisher left cover removal” on page 590.</a></p> <p><b>b</b> Reseat the staple finisher interface cable on the controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p><b>a</b> Remove the staple finisher. See <a href="#">“Optional staple finisher removal” on page 587.</a></p> <p><b>b</b> Check the connector and pins of the staple finisher interface cable for damage.</p> <p><b>c</b> Check the staple finisher interface cable for improper installation.</p> <p>Is the interface cable properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the interface cable. See <a href="#">“Staple finisher interface cable removal” on page 601.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 11.
<p><b>Step 11</b></p> <p>Replace the bin controller board. See <a href="#">“Staple finisher controller board removal” on page 596.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF stack jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output device adjustments/tests &gt; Output device sensor tests &gt; Staple, hole punch finisher</b>  <b>b</b> Find the sensor (Compiler stack height).</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 10.	Go to step 7.
<p><b>Step 7</b>  <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.  <b>b</b> Reseat the cable on the sensor (SHPF stack height) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b></p> <p>Check the sensor for improper installation, contamination, and damage.</p> <p>Is the sensor properly installed and free of contamination and damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Reinstall or replace the sensor.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>b</b> Reseat the cable on the motor (SHPF stack height) and on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the SHPF stack height assembly and its motor for improper installation and damage.</p> <p>Is the stack height assembly properly installed and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the stack height assembly.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 15.
<p><b>Step 15</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## SHPF timeout error service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a>  <b>b</b> Reseat the staple, hole punch finisher interface cable on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b>  <b>a</b> Remove the staple, hole punch finisher. See <a href="#">“Optional staple, hole punch finisher removal” on page 704.</a>  <b>b</b> Check the connector and pins of the staple, hole punch finisher interface cable for damage.  <b>c</b> Check the staple, hole punch finisher interface cable for improper installation.</p> <p>Is the interface cable properly installed and free of damage?</p>	Go to step 9.	Go to step 8.

Action	Yes	No
<p><b>Step 8</b> Reinstall or replace the interface cable. See <a href="#">“Staple, hole punch finisher interface cable removal” on page 717.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Make sure that the HPU controller board is properly installed. Reseat the cables on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the HPU controller board and its connector pins for damage.</p> <p>Are the HPU controller board and its connectors free of damage?</p>	Go to step 11.	Contact the next level of support.
<p><b>Step 11</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 13.
<p><b>Step 13</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 44y paper jams

### 440–444 paper jam messages

Error code	Description	Action
440.11	Paper remains detected at the bin 1 sensor (HPU leading edge) after the printer is turned on.	See <a href="#">“Sensor (HPU leading edge) hole punch jam service check” on page 284.</a>
440.13	During a hole punch job, paper did not reach the bin 1 sensor (HPU leading edge) on time.	
440.15	During a hole punch job, paper did not clear the bin 1 sensor (HPU leading edge) on time.	
440.19	During a hole punch job, too many sheets were detected at bin 1.	
440.21	Paper remains detected at the bin 2 sensor (HPU leading edge) after the printer is turned on.	
440.23	During a hole punch job, paper did not reach the bin 2 sensor (HPU leading edge) on time.	
440.25	During a hole punch job, paper did not clear the bin 2 sensor (HPU leading edge) on time.	
440.29	During a hole punch job, too many sheets were detected at bin 2.	
441.11	Paper remains detected at the bin 1 sensor (HPU trailing edge) after the printer is turned on.	See <a href="#">“Sensor (HPU trailing edge) jam service check” on page 286.</a>
441.13	Paper did not reach the bin 1 sensor (HPU trailing edge) on time.	
441.15	Paper did not clear the bin 1 sensor (HPU trailing edge) on time.	
441.21	Paper remains detected at the bin 2 sensor (HPU trailing edge) after the printer is turned on.	
441.23	Paper did not reach the bin 2 sensor (HPU trailing edge) on time.	
441.25	Paper did not clear the bin 2 sensor (HPU trailing edge) on time.	

Error code	Description	Action
442.13	Paper did not reach the bin 1 sensor (SHPF light array) on time.	See <a href="#">“Sensor (SHPF light array) jam service check” on page 288.</a>
442.15	Paper did not clear the bin 1 sensor (SHPF light array) on time.	
442.19	A bin 1 sensor (SHPF light array) error occurred.	
442.23	Paper did not reach the bin 2 sensor (SHPF light array) on time.	
442.25	Paper did not clear the bin 2 sensor (SHPF light array) on time.	
442.29	A bin 2 sensor (SHPF light array) error occurred.	
444.13	The bin 1 hole punch did not reach its home position on time.	See <a href="#">“SHPF hole punch drive failure service check” on page 289.</a>
444.15	The bin 1 hole punch did not clear its home position on time.	
444.19	A bin 1 hole punch homing error occurred.	
444.23	The bin 2 hole punch did not reach its home position on time.	
444.25	The bin 2 hole punch did not clear its home position on time.	
444.29	A bin 2 hole punch homing error occurred.	

### Sensor (HPU leading edge) hole punch jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.</p> <p><b>b</b> Make sure that the HPU controller board is properly installed. Reseat the cables on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the HPU controller board and its connector pins for damage.</p> <p>Are the HPU controller board and its connectors free of damage?</p>	Go to step 8.	Contact the next level of support.
<p><b>Step 8</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (HPU trailing edge) jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b>  <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>.  <b>b</b> Reseat the staple, hole punch finisher interface cable on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b>  <b>a</b> Remove the staple, hole punch finisher. See <a href="#">“Optional staple, hole punch finisher removal” on page 704</a>.  <b>b</b> Check the connector and pins of the staple, hole punch finisher interface cable for damage.  <b>c</b> Check the staple, hole punch finisher interface cable for improper installation.</p> <p>Is the interface cable properly installed and free of damage?</p>	Go to step 9.	Go to step 8.

Action	Yes	No
<p><b>Step 8</b> Reinstall or replace the interface cable. See <a href="#">“Staple, hole punch finisher interface cable removal” on page 717.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Make sure that the cable J13 from the SHPF controller board is properly connected with the cable J14 on the HPU controller board. <b>Warning—Potential Damage:</b> Cable J14 and cable J16 on the HPU controller board are not interchangeable.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Make sure that the HPU controller board is properly installed. Reseat the cables on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the HPU controller board and its connector pins for damage.</p> <p>Are the HPU controller board and its connectors free of damage?</p>	Go to step 12.	Contact the next level of support.
<p><b>Step 12</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 14.
<p><b>Step 14</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Sensor (SHPF light array) jam service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> <b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>. <b>b</b> Reseat the staple, hole punch finisher interface cable on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> <b>a</b> Remove the staple, hole punch finisher. See <a href="#">“Optional staple, hole punch finisher removal” on page 704</a>. <b>b</b> Check the connector and pins of the staple, hole punch finisher interface cable for damage. <b>c</b> Check the staple, hole punch finisher interface cable for improper installation.</p> <p>Is the interface cable properly installed and free of damage?</p>	Go to step 9.	Go to step 8.

Action	Yes	No
<p><b>Step 8</b> Reinstall or replace the interface cable. See <a href="#">“Staple, hole punch finisher interface cable removal” on page 717.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Make sure that the HPU controller board is properly installed. Reseat the cables on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the HPU controller board and its connector pins for damage.</p> <p>Are the HPU controller board and its connectors free of damage?</p>	Go to step 11.	Contact the next level of support.
<p><b>Step 11</b> Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 13.
<p><b>Step 13</b> Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### SHPF hole punch drive failure service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.

Action	Yes	No
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> a Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> b Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> a Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705</a>. b Reseat the staple, hole punch finisher interface cable on the SHPF controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> a Remove the staple, hole punch finisher. See <a href="#">“Optional staple, hole punch finisher removal” on page 704</a>. b Check the connector and pins of the staple, hole punch finisher interface cable for damage. c Check the staple, hole punch finisher interface cable for improper installation.</p> <p>Is the interface cable properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the interface cable. See <a href="#">“Staple, hole punch finisher interface cable removal” on page 717</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Reseat the cable on the motor (hole punch).</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.

Action	Yes	No
<p><b>Step 10</b></p> <p>Make sure that the HPU controller board is properly installed. Reseat the cables on the HPU controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the HPU controller board and its connector pins for damage.</p> <p>Are the HPU controller board and its connectors free of damage?</p>	Go to step 12.	Contact the next level of support.
<p><b>Step 12</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 14.
<p><b>Step 14</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## User attendance messages

### 10–32 user attendance errors

#### 10–32 user attendance messages

Error code	Description	Action
10.01	Too many vinyl labels printed successively.	Reduce the vinyl labels printed. Print less than 50 vinyl labels in a row, or print at least one vinyl label per six plain paper pages.
10.02	Too many vinyl labels printed successively.	

Error code	Description	Action
11.41	A wrong paper type, size, or orientation was detected on tray 4.	Use the recommended paper. See <a href="#">“Avoiding jams” on page 79.</a>
11.42	A wrong paper type or size was detected on tray 4.	
11.51	A wrong paper type, size, or orientation was detected on tray 5.	
11.52	A wrong paper type or size was detected on tray 5.	
11.91	A wrong paper type, size, or orientation was detected on the MPF.	
11.92	A wrong paper type or size was detected on the MPF.	
31.40	A toner cartridge smart chip or sensor communication problem was detected.	See <a href="#">“Toner cartridge smart chip error service check” on page 293.</a>
31.60	An imaging unit smart chip or sensor communication problem was detected.	See <a href="#">“Imaging unit smart chip error service check” on page 294.</a>
31.80	A fuser smart chip or sensor communication problem was detected.	See <a href="#">“Fuser smart chip error service check” on page 296.</a>
32.40A	The toner cartridge is unsupported.	See <a href="#">“Unsupported third party supply service check” on page 297.</a>
32.40B	Letter code descriptions:	
32.40C	<ul style="list-style-type: none"> <li>• A—Unsupported memory map version in the smart chip</li> </ul>	
32.40E	<ul style="list-style-type: none"> <li>• B—Failed capacity class/model compatibility check</li> </ul>	
32.40F	<ul style="list-style-type: none"> <li>• C—Failed OEM check</li> <li>• E—The supply is on the revoked list</li> <li>• F—The toner cartridge is MICR, and the firmware release does not support MICR</li> </ul>	
32.40D	The toner cartridge is incorrect or unsupported. Letter code description: <ul style="list-style-type: none"> <li>• D—Failed SWE marriage check</li> </ul>	See <a href="#">“Unsupported toner cartridge service check” on page 298.</a>
32.40Z	The toner cartridge is incorrect or unsupported. Letter code description: <ul style="list-style-type: none"> <li>• Z—Failed barrel shutter sensor</li> </ul>	See <a href="#">“Toner cartridge shutter error service check” on page 300.</a>
32.60	The imaging unit is unsupported.	See <a href="#">“Unsupported third party supply service check” on page 297.</a>
32.80	The fuser is unsupported.	

## Toner cartridge smart chip error service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Install a genuine Lexmark toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that the toner cartridge is properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Remove the toner cartridge, and then install a different unit.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Remove the left cover. See <a href="#">“Left cover removal” on page 415.</a></p> <p><b>b</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>c</b> Reseat the cable at the sensor (toner smart chip) and the cable J66 on the controller board.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Check the sensor (toner smart chip) and its contact for damage.</p> <p>Is the sensor and its contact free of damage?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Replace the sensor (toner smart chip). See <a href="#">“Sensor (toner smart chip) removal” on page 424.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the RIP firmware version.</p> <p>Does the RIP firmware have the latest version?</p>	Go to step 10.	Go to step 9.

Action	Yes	No
<b>Step 9</b> Update the RIP firmware.  Does the problem remain?	Go to step 10.	The problem is solved.
<b>Step 10</b> Restart the printer.  Does the problem remain?	Go to step 11.	The problem is solved.
<b>Step 11</b> Check the printer firmware version.  Does the printer firmware have the latest version?	Contact the next level of support.	Go to step 12.
<b>Step 12</b> Update the printer firmware.  Does the problem remain?	Contact the next level of support.	The problem is solved.

### Imaging unit smart chip error service check

Action	Yes	No
<b>Step 1</b> Check if the printer is using a genuine and supported Lexmark imaging unit.  Is the printer using a genuine and supported imaging unit?	Go to step 3.	Go to step 2.
<b>Step 2</b> Install a genuine and supported imaging unit.  Does the problem remain?	Go to step 3.	The problem is solved.
<b>Step 3</b> Make sure that the imaging unit is properly installed.  Does the problem remain?	Go to step 4.	The problem is solved.
<b>Step 4</b> Remove the imaging unit, and then install a different unit.  Does the problem remain?	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426</a>.</p> <p><b>b</b> Reseat the cables of the high voltage contacts guide on the HVPS and the controller board.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Check the high voltage contacts and its cables for damage.</p> <p>Are the contacts and its cables free of damage?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p>Replace the high voltage contacts guide. See <a href="#">“High voltage contacts guide removal” on page 433</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Check the RIP firmware version.</p> <p>Does the RIP firmware have the latest version?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Update the RIP firmware.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the printer firmware version.</p> <p>Does the printer firmware have the latest version?</p>	Contact the next level of support.	Go to step 12.
<p><b>Step 12</b></p> <p>Update the printer firmware.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Fuser smart chip error service check

Action	Yes	No
<p><b>Step 1</b> Check if the printer is using a genuine and supported Lexmark fuser.</p> <p>Is the printer using a genuine and supported fuser?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Install a genuine and supported fuser.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that the fuser is properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b>  <ul style="list-style-type: none"> <li>a Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></li> <li>b Check the cable J60 on the controller board for proper connection.</li> </ul> </p> <p>Is the cable properly connected?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the RIP firmware version.</p> <p>Does the RIP firmware have the latest version?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Update the RIP firmware.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.

Action	Yes	No
<p><b>Step 10</b> Check the printer firmware version.</p> <p>Does the printer firmware have the latest version?</p>	Contact the next level of support.	Go to step 11.
<p><b>Step 11</b> Update the printer firmware.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Unsupported third party supply service check

Action	Yes	No
<p><b>Step 1</b> Check whether third party supplies are used.</p> <ul style="list-style-type: none"> <li>• toner cartridge</li> <li>• imaging unit</li> <li>• fuser</li> </ul> <p>Are third party supplies used?</p>	Go to step 2.	Contact the next level of support.
<p><b>Step 2</b> Replace the third party supply (toner cartridge, imaging unit, or fuser) with a genuine Lexmark part.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Unsupported toner cartridge service check

Action	Yes	No
<p><b>Step 1</b> Check whether the correct toner cartridge is used.</p> <p><b>Notes:</b></p> <ul style="list-style-type: none"> <li>The original or first toner cartridge used is called an SWE toner cartridge. SWE stands for <i>shipped with equipment</i>. The SWE toner cartridge cannot be installed to another printer.</li> <li>If the SWE toner cartridge is used by another printer, then a 32.40D error occurs.</li> </ul> <p>Is the printer using the incorrect toner cartridge?</p>	Go to step 2.	Contact the next level of support.
<p><b>Step 2</b> Do either of the following:</p> <ul style="list-style-type: none"> <li>Find the SWE toner cartridge, and then reinstall it.</li> <li>Replace the cartridge with the correct and genuine Lexmark part.</li> </ul> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 4y user attendance errors

### 41–44 user attendance messages

Error code	Description	Action
41.60	The toner cartridge and imaging unit are mismatched.	See <a href="#">“Incompatible Lexmark supply service check” on page 299.</a>
42.xy	The toner cartridge and printer regions are mismatched.	See <a href="#">“Region mismatch service check” on page 299.</a>
43.40	A toner cartridge shutter error was detected.	See <a href="#">“Toner cartridge shutter error service check” on page 300.</a>
44.40	The toner cartridge and printer are mismatched.	See <a href="#">“Incompatible Lexmark supply service check” on page 299.</a>
44.60	The imaging unit and printer are mismatched.	

## Incompatible Lexmark supply service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check whether the Lexmark supplies used are genuine and compatible with the printer model.</p> <ul style="list-style-type: none"> <li>• toner cartridge</li> <li>• imaging unit</li> <li>• fuser</li> </ul> <p>Are the Lexmark supplies used genuine and compatible?</p>	Contact the next level of support.	Go to step 2.
<p><b>Step 2</b></p> <p>Replace the incorrect Lexmark supply (toner cartridge, imaging unit, or fuser).</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Region mismatch service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the toner cartridge has the correct region that matches the printer region.</p> <p>The .xy error code value represents the required region number, where x indicates the printer's region number and y for the cartridge's region number.</p> <ul style="list-style-type: none"> <li>• 0—Worldwide or Undefined region</li> <li>• 1—North America (United States, Canada)</li> <li>• 2—European Economic Area, Western Europe, Nordic countries, Switzerland</li> <li>• 3—Asia Pacific</li> <li>• 4—Latin America</li> <li>• 5—Rest of Europe, Middle East, Africa</li> <li>• 6—Australia, New Zealand</li> <li>• 9—Invalid region</li> </ul> <p><b>Note:</b> To find the region settings of the printer and toner cartridge, print the print quality test pages. From the control panel, navigate to: <b>Settings &gt; Troubleshooting &gt; Print Quality Test Pages.</b></p> <p>Do the regions match?</p>	Contact the next level of support.	Go to step 2.
<p><b>Step 2</b></p> <p>Replace the mismatched toner cartridge with the correct supply. A toner cartridge with a worldwide region may also be used.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Toner cartridge shutter error service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the printer is using a genuine and supported Lexmark toner cartridge.</p> <p><b>Note:</b> If the printer is using a third-party cartridge, then refer the users to their cartridge supplier.</p> <p>Is the printer using a genuine and supported toner cartridge?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Install a genuine Lexmark toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Remove the toner cartridge.</p> <p><b>b</b> Check the toner cartridge actuator (A) for damage.</p>  <p>Is the actuator free of damage?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b></p> <p>Replace the toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Remove the toner cartridge shutter actuator. See <a href="#">“Toner cartridge shutter actuator removal” on page 436</a>.</p> <p><b>b</b> Check the toner cartridge shutter actuator for damage.</p> <p>Is the actuator free of damage?</p>	Go to step 7.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b> Replace the toner cartridge shutter actuator. See <a href="#">“Toner cartridge shutter actuator removal” on page 436.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the sensor (toner cartridge shutter) for improper installation and damage.</p> <p>Is the sensor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the sensor. See <a href="#">“Sensor (toner cartridge shutter) removal” on page 436.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p><b>a</b> Remove the right cover. See <a href="#">“Right cover removal” on page 426.</a></p> <p><b>b</b> Check the sensor cable and the cable J8 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Contact the next level of support.	Go to step 10.
<p><b>Step 10</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 5y user attendance errors

### 58–59 user attendance messages

Error code	Description	Action
58	The optional trays or optional bins installed are too many.	See <a href="#">“Excess optional trays or optional bins service check” on page 302.</a>
59	The optional tray or optional bin is incompatible with the printer.	See <a href="#">“Incompatible optional trays or optional bins service check” on page 302.</a>

### Excess optional trays or optional bins service check

Action	Yes	No
<p><b>a</b> Turn off the printer, and then unplug it.</p> <p><b>b</b> Remove the excess optional trays or optional bins. For more information, see <a href="#">“Printer configurations” on page 745</a>.</p> <p><b>c</b> Plug the printer, and then turn it on.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Incompatible optional trays or optional bins service check

Action	Yes	No
<p><b>a</b> Turn off the printer, and then unplug it.</p> <p><b>b</b> Remove the incompatible optional trays or optional bins. For more information, see <a href="#">“Printer configurations” on page 745</a>.</p> <p><b>c</b> Plug the printer, and then turn it on.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 8y user attendance errors

### 80–88 user attendance messages

Error code	Description	Action
80.01	The remaining life of the maintenance kit is nearly low.	Replace the maintenance kit.
80.03	The remaining life of the maintenance kit is nearly low.	
80.09	The remaining life of the maintenance kit is nearly low.	
80.11	The remaining life of the maintenance kit is low.	
80.13	The remaining life of the maintenance kit is low.	
80.19	The remaining life of the maintenance kit is low.	
80.21	The remaining life of the maintenance kit is very low.	
80.23	The remaining life of the maintenance kit is very low.	
80.29	The remaining life of the maintenance kit is very low.	

Error code	Description	Action
80.31	The maintenance kit life has ended.	Replace the maintenance kit.
80.33	The maintenance kit life has ended.	
80.36	The maintenance kit life has ended.	
80.39	The maintenance kit life has ended.	
80.41	The maintenance kit life has ended. The printer forces a hard stop on the fuser.	
80.43	The maintenance kit life has ended. The printer forces a hard stop on the fuser.	
80.48	The maintenance kit life has ended. The printer forces a hard stop on the fuser.	
84.00	The remaining life of the imaging unit is nearly low.	Replace the imaging unit.
84.01	The remaining life of the imaging unit is nearly low.	
84.02	The remaining life of the imaging unit is nearly low.	
84.09	The remaining life of the imaging unit is nearly low.	
84.11	The remaining life of the imaging unit is low.	
84.12	The remaining life of the imaging unit is low.	
84.13	The remaining life of the imaging unit is low.	
84.19	The remaining life of the imaging unit is low.	
84.21	The remaining life of the imaging unit is very low.	Replace the imaging unit.
84.22	The remaining life of the imaging unit is very low.	
84.23	The remaining life of the imaging unit is very low.	
84.29	The remaining life of the imaging unit is very low.	
84.31	The imaging unit life has ended.	
84.32	The imaging unit life has ended.	
84.33	The imaging unit life has ended.	
84.38	The imaging unit life has ended.	Replace the imaging unit.
84.41	The imaging unit life has ended.	
84.42	The imaging unit life has ended.	
84.43	The imaging unit life has ended.	
84.48	The imaging unit life has ended.	

Error code	Description	Action
88.00	The remaining life of the toner cartridge is nearly low.	Replace the toner cartridge.
88.09	The remaining life of the toner cartridge is nearly low.	
88.10	The remaining life of the toner cartridge is low.	
88.19	The remaining life of the toner cartridge is low.	
88.20	The remaining life of the toner cartridge is very low.	
88.29	The remaining life of the toner cartridge is very low.	
88.30	The toner cartridge life has ended.	
88.40	The toner cartridge life has ended. The printer forces a hard stop on the toner cartridge.	
88.48	The toner cartridge life has ended. The printer forces a hard stop on the toner cartridge.	

## Printer hardware errors

### 111 errors

#### 111 error messages

Error code	Description	Action
111.20	Printhead error (mirror motor lock) was detected before the motor was turned on.	See <a href="#">“Printhead error service check” on page 305.</a>
111.21	No printhead power (+5V) when the laser servo started.	
111.30	The printhead failed during power on tests.	See <a href="#">“Printhead error service check” on page 305.</a>
111.31	Printhead error (no first HSYNC) was detected.	
111.32	Printhead error (lost HSYNC) was detected.	
111.33	Printhead error (lost HSYNC) was detected during servo.	
111.34	Printhead error (mirror motor lost lock) was detected.	
111.35	Printhead error (mirror motor never got first lock) was detected.	
111.36	Printhead error (mirror motor lock never stabilized) was detected.	

Error code	Description	Action
111.40	The wrong printhead is installed.	See <a href="#">“Printhead error service check” on page 305</a> .
111.41	Printhead NVRAM read failure occurred.	

### Printhead error service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Check if the cables J6 and J19 on the controller board are properly connected and free of damage.</p> <p>Are the cables properly connected and free of damage?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Reseat the cables or replace the printhead. See <a href="#">“Printhead removal” on page 461</a>.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Replace the controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 12y errors

### 120 error messages

Error code	Description	Action
120.80	Motor (fuser) does not turn on.	See <a href="#">“Fuser drive failure service check” on page 308.</a>
120.81	Motor (fuser) does not turn off.	
120.82	Motor (fuser) speed did not ramp up to the required level.	
120.83	Motor (fuser) stalled.	
120.84	Motor (fuser) ran too slow.	
120.85	Motor (fuser) ran too fast.	
120.86	Motor (fuser) moved too long.	

### 121 error messages

Error code	Description	Action
121.00	Fuser did not reach the required temperature.	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.01	During an attempt to heat up, the fuser was not detected.	
121.02	Fuser went over the required temperature (during EWC/line voltage detection).	
121.03	Fuser hardware and driver are mismatched.	
121.04	During an attempt to heat up, the fuser relay was open and the microcontroller was not reporting an error.	
121.05	During an attempt to heat up, the fuser relay was open and the microcontroller was reporting an error.	
121.09	Fuser fell below the required temperature for motors. <b>Note:</b> Error is not applicable to standby mode.	

Error code	Description	Action
121.10	Fuser did not reach the required temperature (during start of EWC/line voltage detection).	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.11	Fuser reached the required temperature (during final EWC/line voltage detection) too late.	
121.12	Fuser did not reach the required temperature (during final EWC/line voltage detection).	
121.13	Fuser reached the required temperature (during final EWC/line voltage detection) too fast.	
121.19	Fuser high power trace reached the required temperature (during final EWC/line voltage detection) too fast.	
121.20	Fuser high power trace heating rate went over the limit.	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.21	Fuser low power trace heating rate (from 165°C to 180°C) went over the limit.	
121.22	Open fuser relay was detected.	
121.28	Fuser did not reach the required temperature (during EP warm-up).	
121.30	Fuser did not reach the required temperature even if it has been on for a long time.	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.32	Fuser did not reach the required temperature (on 100% power).	
121.33	Fuser did not reach the required temperature (while page is in the fuser).	
121.34	Fuser did not reach the required temperature (during steady state control).	
121.36	Open fuser relay was detected with very cold or unknown ambient temperature.	
121.50	Fuser went over the required temperature (during global overtemp check).	
121.51	Fuser went over the required temperature (at the secondary heater).	
121.52	Main thermistor temperature is out of range.	
121.53	Main thermistor temperature change rate is out of range.	
121.58	Edge thermistor temperature is out of range.	
121.59	Edge thermistor temperature change rate is out of range.	

Error code	Description	Action
121.60	Belt contact thermistor temperature is out of range.	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.61	Belt contact thermistor temperature change rate is out of range.	
121.66	Narrow media thermistor temperature is out of range.	
121.67	Narrow media thermistor temperature change rate is out of range.	
121.71	Open fuser main heater thermistor was detected.	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.74	Open fuser edge thermistor was detected.	
121.76	Open belt contact thermistor was detected.	
121.81	Open fuser backup roll thermistor was detected.	See <a href="#">“Fuser temperature error service check” on page 309.</a>
121.82	Open fuser second backup roll thermistor was detected.	
121.83	Open fuser narrow media backup roll thermistor was detected.	

## 126 error messages

Error code	Description	Action
126.01	Line frequency has gone outside the operating range.	See <a href="#">“LVPS failure service check” on page 311.</a>
126.05	The LVPS power dropped but the printer was not in sleep mode.	
126.06	LVPS 25V line error was detected.	
126.07	LVPS 5V rail was down during power-on.	
126.10	No line frequency was detected.	
126.11	Line frequency has gone outside the operating range.	

## Fuser drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J71 on the controller board</li> <li>• fuser motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 3.	Go to step 2.

Action	Yes	No
<b>Step 2</b> Reseat or replace the cables.  Does the problem remain?	Go to step 3.	The problem is solved.
<b>Step 3</b> Restart the printer.  Does the problem remain?	Go to step 4.	The problem is solved.
<b>Step 4</b> Replace the motor (main). See <a href="#">“Main motor drive removal” on page 417.</a>  Does the problem remain?	Go to step 5.	The problem is solved.
<b>Step 5</b> Restart the printer.  Does the problem remain?	Contact the next level of support.	The problem is solved.

### Fuser temperature error service check

Action	Yes	No
<b>Step 1</b> Check the fuser for proper installation.  Is the fuser properly installed?	Go to step 3.	Go to step 2.
<b>Step 2</b> Reinstall the fuser.  Does the problem remain?	Go to step 3.	The problem is solved.
<b>Step 3</b> Check if the fuser is a genuine and supported Lexmark unit.  Is the fuser a genuine and supported Lexmark unit?	Go to step 4.	Go to step 6.
<b>Step 4</b> Check if the fuser type is compatible with the specific model of the printer.  Are the fuser and printer compatible?	Go to step 5.	Go to step 6.
<b>Step 5</b> Check the fuser life.  Is the fuser still within its rated or recommended life?	Go to step 7.	Go to step 6.

Action	Yes	No
<p><b>Step 6</b> Replace the fuser. See <a href="#">“Fuser removal” on page 458</a>. <b>Note:</b> Make sure that the new fuser is supported by the specific model of the printer.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Make sure that the voltage output of the electrical outlet matches the voltage rating of the printer.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the cable J66 on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b> Reseat the cables.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the cables on the LVPS for proper connection.</p> <p>Are the cables properly connected?</p>	Go to step 12.	Go to step 11.
<p><b>Step 11</b> Reseat the cables.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Make sure that the LVPS voltage selection switch is set to match with the voltage rating of the electrical outlet.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b> Replace the LVPS. See <a href="#">“LVPS removal” on page 420</a>.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.

Action	Yes	No
<p><b>Step 15</b> Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### LVPS failure service check

Action	Yes	No
<p><b>Step 1</b> Check if the printer is plugged to a power strip or UPS. Make sure that the printer is directly plugged to the electrical outlet.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Make sure that the voltage output of the electrical outlet matches the voltage rating of the printer.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check the J62 cable on the controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Check the cables on the LVPS for proper connection.</p> <p>Are the cables properly connected?</p>	Go to step 7.	Go to step 6.
<p><b>Step 6</b> Reseat the cables.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Make sure that the LVPS voltage selection switch is set to match with the voltage rating of the electrical outlet.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<b>Step 9</b> Replace the LVPS. See <a href="#">“LVPS removal” on page 420.</a>  Does the problem remain?	Go to step 10.	The problem is solved.
<b>Step 10</b> Restart the printer.  Does the problem remain?	Go to step 11.	The problem is solved.
<b>Step 11</b> Replace the controller board. See <a href="#">“Controller board removal” on page 430.</a>  Does the problem remain?	Go to step 12.	The problem is solved.
<b>Step 12</b> Restart the printer.  Does the problem remain?	Contact the next level of support.	The problem is solved.

## 133 errors

### 133 error messages

Error code	Description	Action
133.04	CTLS timeout was detected at the imaging unit.	See <a href="#">“Imaging unit CTLS failure service check” on page 312.</a>
133.05	CTLS reading at the imaging unit is above the maximum expected value.	
133.06	CTLS reading at the imaging unit is below the minimum expected value.	
133.08	Excessive CTLS noise was detected at the imaging unit.	

### Imaging unit CTLS failure service check

Action	Yes	No
<b>Step 1</b> Check the imaging unit for proper installation.  Is the imaging unit properly installed?	Go to step 3.	Go to step 2.
<b>Step 2</b> Reinstall the imaging unit.  Does the problem remain?	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Check if the cables J88 and JCTLS1 on the controller board are properly connected and free of damage.</p> <p>Are the cables properly connected and free of damage?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b> Reseat or replace the cables.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Check the imaging unit high voltage contacts for damage.</p> <p>Are the high voltage contacts free of damage?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Replace the imaging unit contact guide. See <a href="#">“High voltage contacts guide removal” on page 433.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 14y errors

### 140 error messages

Error code	Description	Action
140.80	Motor (main) does not turn on.	See <a href="#">“Main drive failure service check” on page 314.</a>
140.81	Motor (main) does not turn off.	
140.82	Motor (main) speed did not ramp up to the required level.	
140.83	Motor (main) stalled.	
140.84	Motor (main) ran too slow.	
140.85	Motor (main) ran too fast.	
140.86	Motor (main) moved too long.	

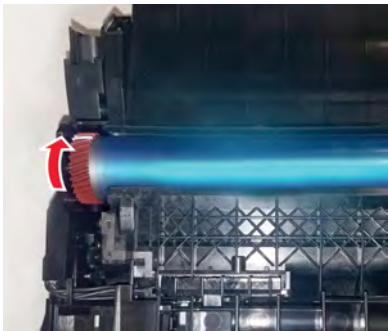

## 147 error messages

Error code	Description	Action
147.80	Motor (MPF) does not turn on.	See <a href="#">“MPF drive failure service check” on page 320.</a>
147.81	Motor (MPF) does not turn off.	
147.82	Motor (MPF) speed did not ramp up to the required level.	
147.83	Motor (MPF) stalled.	
147.84	Motor (MPF) ran too slow.	
147.85	Motor (MPF) ran too fast.	
147.86	Motor (MPF) moved too long.	

## 149 error messages

Error code	Description	Action
149.80	Motor (redrive) does not turn on.	See <a href="#">“Redrive drive failure service check” on page 315.</a>
149.81	Motor (redrive) does not turn off.	
149.82	Motor (redrive) speed did not ramp up to the required level.	
149.83	Motor (redrive) stalled.	
149.84	Motor (redrive) ran too slow.	
149.85	Motor (redrive) ran too fast.	
149.86	Motor (redrive) moved too long.	

## Main drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p><b>a</b> Remove the imaging unit.</p> <p><b>b</b> To check for cleaning blade failure, manually turn the photoconductor gear.</p>  <p>Does the photoconductor drum rotate?</p>	Go to step 3.	Go to step 2.

Action	Yes	No
<p><b>Step 2</b> Replace the imaging unit.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J71 on the controller board</li> <li>• main motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b> Reseat or replace the cables.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the motor (main). See <a href="#">“Main motor drive removal” on page 417.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Redrive drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J66 on the controller board</li> <li>• redrive motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Reseat or replace the cables.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<b>Step 3</b> Restart the printer.  Does the problem remain?	Go to step 4.	The problem is solved.
<b>Step 4</b> Replace the motor (redrive). See <a href="#">“Motor (redrive) removal” on page 423.</a>  Does the problem remain?	Go to step 5.	The problem is solved.
<b>Step 5</b> Restart the printer.  Does the problem remain?	Contact the next level of support.	The problem is solved.

## 15y errors

### 150 error messages

Error code	Description	Action
150.80	Motor (duplex) does not turn on.	See <a href="#">“Duplex drive failure service check” on page 317.</a>
150.81	Motor (duplex) does not turn off.	
150.82	Motor (duplex) speed did not ramp up to the required level.	
150.83	Motor (duplex) stalled.	
150.84	Motor (duplex) ran too slow.	
150.85	Motor (duplex) ran too fast.	
150.86	Motor (duplex) moved too long.	

### 155 error messages

Error code	Description	Action
155.80	Motor (toner cartridge) does not turn on.	See <a href="#">“Toner cartridge drive failure service check” on page 318.</a>
155.81	Motor (toner cartridge) does not turn off.	
155.82	Motor (toner cartridge) speed did not ramp up to the required level.	
155.83	Motor (toner cartridge) stalled.	
155.84	Motor (toner cartridge) ran too slow.	
155.85	Motor (toner cartridge) ran too fast.	
155.86	Motor (toner cartridge) moved too long.	

## Duplex drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J27 on the controller board</li> <li>• duplex motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Reseat or replace the cables.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Replace the motor (duplex). See <a href="#">“Motor (duplex) removal” on page 456</a>.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Toner cartridge drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p><b>a</b> Remove the toner cartridge, and then check it for damage.</p> <p><b>b</b> Manually turn the toner cartridge gear, and then check if it is stuck.</p>  <p>Is the toner cartridge functional and free of damage?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Replace the toner cartridge.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J71 on the controller board</li> <li>• toner cartridge motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b></p> <p>Reseat or replace the cables.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Replace the toner cartridge drive.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.

Action	Yes	No
<b>Step 7</b> Restart the printer.  Does the problem remain?	Contact the next level of support.	The problem is solved.

## 160–161 errors

### 160 error messages

Error code	Description	Action
160.80	Motor (MPF) does not turn on.	See <a href="#">“MPF drive failure service check” on page 320.</a>
160.81	Motor (MPF) does not turn off.	
160.82	Motor (MPF) speed did not ramp up to the required level.	
160.83	Motor (MPF) stalled.	
160.84	Motor (MPF) ran too slow.	
160.85	Motor (MPF) ran too fast.	
160.86	Motor (MPF) moved too long.	

### 161 error messages

Error code	Description	Action
161.80	Motor (tray 1 pick/lift) does not turn on.	See <a href="#">“Tray 1 pick drive failure service check” on page 320.</a>
161.81	Motor (tray 1 pick/lift) does not turn off.	
161.82	Motor (tray 1 pick/lift) speed did not ramp up to the required level.	
161.83	Motor (tray 1 pick/lift) stalled.	
161.84	Motor (tray 1 pick/lift) ran too slow.	
161.85	Motor (tray 1 pick/lift) ran too fast.	
161.86	Motor (tray 1 pick/lift) moved too long.	

## MPF drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J71 on the controller board</li> <li>• MPF motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Reseat or replace the cables.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Replace the motor (MPF). See <a href="#">“Motor (MPF) removal” on page 419.</a></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p>Replace the controller board. See <a href="#">“Controller board removal” on page 430.</a></p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Tray 1 pick drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the following cables are properly connected and free of damage:</p> <ul style="list-style-type: none"> <li>• cable J73 on the controller board</li> <li>• tray 1 pick motor cable</li> </ul> <p>Are the cables properly connected and free of damage?</p>	Go to step 3.	Go to step 2.

Action	Yes	No
<b>Step 2</b> Reseat or replace the cables.  Does the problem remain?	Go to step 3.	The problem is solved.
<b>Step 3</b> Restart the printer.  Does the problem remain?	Go to step 4.	The problem is solved.
<b>Step 4</b> Replace the tray 1 paper feeder. See <a href="#">“Paper feeder removal” on page 423</a> .  Does the problem remain?	Go to step 5.	The problem is solved.
<b>Step 5</b> Restart the printer.  Does the problem remain?	Contact the next level of support.	The problem is solved.

## 162–169 errors

### 162 error messages

Error code	Description	Action
162.80	Motor (tray 2 pick/lift) does not turn on.	See <a href="#">“Optional tray pick drive failure service check” on page 326</a> .
162.81	Motor (tray 2 pick/lift) does not turn off.	
162.82	Motor (tray 2 pick/lift) speed did not ramp up to the required level.	
162.83	Motor (tray 2 pick/lift) stalled.	
162.84	Motor (tray 2 pick/lift) ran too slow.	
162.85	Motor (tray 2 pick/lift) ran too fast.	
162.86	Motor (tray 2 pick/lift) moved too long.	

### 163 error messages

Error code	Description	Action
163.80	Motor (tray 3 pick/lift) does not turn on.	See <a href="#">“Optional tray pick drive failure service check” on page 326.</a>
163.81	Motor (tray 3 pick/lift) does not turn off.	
163.82	Motor (tray 3 pick/lift) speed did not ramp up to the required level.	
163.83	Motor (tray 3 pick/lift) stalled.	
163.84	Motor (tray 3 pick/lift) ran too slow.	
163.85	Motor (tray 3 pick/lift) ran too fast.	
163.86	Motor (tray 3 pick/lift) moved too long.	

### 164 error messages

Error code	Description	Action
164.80	Motor (tray 4 pick/lift) does not turn on.	See <a href="#">“Optional tray pick drive failure service check” on page 326.</a>
164.81	Motor (tray 4 pick/lift) does not turn off.	
164.82	Motor (tray 4 pick/lift) speed did not ramp up to the required level.	
164.83	Motor (tray 4 pick/lift) stalled.	
164.84	Motor (tray 4 pick/lift) ran too slow.	
164.85	Motor (tray 4 pick/lift) ran too fast.	
164.86	Motor (tray 4 pick/lift) moved too long.	

### 165 error messages

Error code	Description	Action
165.80	Motor (tray 5 pick/lift) does not turn on.	See <a href="#">“Optional tray pick drive failure service check” on page 326.</a>
165.81	Motor (tray 5 pick/lift) does not turn off.	
165.82	Motor (tray 5 pick/lift) speed did not ramp up to the required level.	
165.83	Motor (tray 5 pick/lift) stalled.	
165.84	Motor (tray 5 pick/lift) ran too slow.	
165.85	Motor (tray 5 pick/lift) ran too fast.	
165.86	Motor (tray 5 pick/lift) moved too long.	

## 166 error messages

Error code	Description	Action
166.70	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) does not turn on.	See <a href="#">“2100-sheet tray transport and elevator drive failure service check” on page 339.</a>
166.71	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) does not turn off.	
166.72	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) speed did not ramp up to the required level.	
166.73	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) stalled.	
166.74	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) ran too slow.	
166.75	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) ran too fast.	
166.76	The motor (2100-sheet tray 2 transport) or motor (2100-sheet tray 2 elevator) ran too long.	
166.80	Motor (tray 2 transport) does not turn on.	See <a href="#">“Tray 2 transport motor failure service check” on page 328.</a>
166.81	Motor (tray 2 transport) does not turn off.	
166.82	Motor (tray 2 transport) speed did not ramp up to the required level.	See <a href="#">“Tray 2 transport drive failure service check” on page 329.</a>
166.83	Motor (tray 2 transport) stalled.	
166.84	Motor (tray 2 transport) ran too slow.	
166.85	Motor (tray 2 transport) ran too fast.	
166.86	Motor (tray 2 transport) ran too long.	

## 167 error messages

Error code	Description	Action
167.70	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) does not turn on.	See <a href="#">“2100-sheet tray transport and elevator drive failure service check” on page 339.</a>
167.71	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) does not turn off.	
167.72	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) speed did not ramp up to the required level.	
167.73	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) stalled.	
167.74	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) ran too slow.	
167.75	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) ran too fast.	
167.76	The motor (2100-sheet tray 3 transport) or motor (2100-sheet tray 3 elevator) ran too long.	
167.80	Motor (tray 3 transport) does not turn on.	See <a href="#">“Tray 3 transport motor failure service check” on page 331.</a>
167.81	Motor (tray 3 transport) does not turn off.	
167.82	Motor (tray 3 transport) speed did not ramp up to the required level.	See <a href="#">“Tray 3 transport drive failure service check” on page 332.</a>
167.83	Motor (tray 3 transport) stalled.	
167.84	Motor (tray 3 transport) ran too slow.	
167.85	Motor (tray 3 transport) ran too fast.	
167.86	Motor (tray 3 transport) ran too long.	

## 168 error messages

Error code	Description	Action
168.70	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) does not turn on.	See <a href="#">“2100-sheet tray transport and elevator drive failure service check” on page 339.</a>
168.71	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) does not turn off.	
168.72	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) speed did not ramp up to the required level.	
168.73	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) stalled.	
168.74	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) ran too slow.	
168.75	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) ran too fast.	
168.76	The motor (2100-sheet tray 4 transport) or motor (2100-sheet tray 4 elevator) ran too long.	
168.80	Motor (tray 4 transport) does not turn on.	See <a href="#">“Tray 4 transport motor failure service check” on page 334.</a>
168.81	Motor (tray 4 transport) does not turn off.	
168.82	Motor (tray 4 transport) speed did not ramp up to the required level.	See <a href="#">“Tray 4 transport drive failure service check” on page 335.</a>
168.83	Motor (tray 4 transport) stalled.	
168.84	Motor (tray 4 transport) ran too slow.	
168.85	Motor (tray 4 transport) ran too fast.	
168.86	Motor (tray 4 transport) ran too long.	

## 169 error messages

Error code	Description	Action
169.70	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) does not turn on.	See <a href="#">“2100-sheet tray transport and elevator drive failure service check” on page 339.</a>
169.71	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) does not turn off.	
169.72	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) speed did not ramp up to the required level.	
169.73	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) stalled.	
169.74	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) ran too slow.	
169.75	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) ran too fast.	
169.76	The motor (2100-sheet tray 5 transport) or motor (2100-sheet tray 5 elevator) ran too long.	
169.80	Motor (tray 5 transport) does not turn on.	See <a href="#">“Tray 5 transport motor failure service check” on page 337.</a>
169.81	Motor (tray 5 transport) does not turn off.	
169.82	Motor (tray 5 transport) speed did not ramp up to the required level.	See <a href="#">“Tray 5 transport drive failure service check” on page 338.</a>
169.83	Motor (tray 5 transport) stalled.	
169.84	Motor (tray 5 transport) ran too slow.	
169.85	Motor (tray 5 transport) ran too fast.	
169.86	Motor (tray 5 transport) ran too long.	

## Optional tray pick drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt;select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b> <b>b</b> Select the motor (Pick (tray x)), and then touch <b>Start</b>. <b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the source tray paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 9</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Tray 2 transport motor failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 3 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b> <b>b</b> Select the motor (Pass-through (tray 2)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the motor (tray 2 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Make sure that the tray 2 interface cable is properly installed. Reseat the interface cable on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Make sure that the optional tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 13</b> Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 2 transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p>Enter the Diagnostics menu, and then navigate to:  <b>Input tray quick print &gt; Tray 3 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>b</b> Select the motor (Pass-through (tray 2)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the motor (tray 2 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Remove the optional tray insert, and then check if its transport rollers are functional and free of damage.</p> <p><b>Note:</b> Turn the transport roller gear to check for proper mechanism.</p> <p>Are the tray insert and its rollers functional and free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 11</b></p> <p>Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 3 transport motor failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 4 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b> <b>b</b> Select the motor (Pass-through (tray 3)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the motor (tray 3 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Make sure that the tray 3 interface cable is properly installed. Reseat the interface cable on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Make sure that the optional tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 13</b> Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 3 transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p>Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 4 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>b</b> Select the motor (Pass-through (tray 3)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the motor (tray 3 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Remove the optional tray insert, and then check if its transport rollers are functional and free of damage.</p> <p><b>Note:</b> Turn the transport roller gear to check for proper mechanism.</p> <p>Are the tray insert and its rollers functional and free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 11</b></p> <p>Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Tray 4 transport motor failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt; Tray 5 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b> <b>b</b> Select the motor (Pass-through (tray 4)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the motor (tray 4 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Make sure that the tray 4 interface cable is properly installed. Reseat the interface cable on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Make sure that the optional tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b> Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 13</b> Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 4 transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p>Enter the Diagnostics menu, and then navigate to:  <b>Input tray quick print &gt; Tray 5 &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>b</b> Select the motor (Pass-through (tray 4)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the motor (tray 4 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Remove the optional tray insert, and then check if its transport rollers are functional and free of damage.</p> <p><b>Note:</b> Turn the transport roller gear to check for proper mechanism.</p> <p>Are the tray insert and its rollers functional and free of damage?</p>	Go to step 10.	Go to step 9.
<p><b>Step 9</b></p> <p>Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 11</b></p> <p>Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Tray 5 transport motor failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Additional input tray diagnostics &gt; Motor tests</b>  <b>b</b> Select the motor (Pass-through (tray 5)), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 7.	Go to step 5.
<p><b>Step 5</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the motor (tray 5 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Make sure that the tray 5 interface cable is properly installed. Reseat the interface cable on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 10.	Go to step 9.

Action	Yes	No
<p><b>Step 9</b> Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516</a>.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Make sure that the optional tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b> Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 12</b> Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Tray 5 transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b>  <ul style="list-style-type: none"> <li>a Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b></li> <li>b Select the motor (Pass-through (tray 5)), and then touch <b>Start</b>.</li> </ul> <p>Does the motor run?</p> </p>	Go to step 7.	Go to step 5.

Action	Yes	No
<p><b>Step 5</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Replace the motor (tray 5 transport). See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Remove the optional tray insert, and then check if its transport rollers are functional and free of damage.</p> <p><b>Note:</b> Turn the transport roller gear to check for proper mechanism.</p> <p>Are the tray insert and its rollers functional and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 10</b> Replace the optional tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### 2100-sheet tray transport and elevator drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print &gt;select source tray &gt; Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> Perform a print test again, and then observe if the motor (2100-sheet tray transport) is running.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Replace the motor. See <a href="#">“Motor (2100-sheet tray transport) removal” on page 484.</a></p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Motor tests</b> <b>b</b> Select the motor (High capacity tray lift), and then touch <b>Start</b>.</p> <p>Does the motor run?</p>	Go to step 11.	Go to step 9.
<p><b>Step 9</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Replace the motor drive. See <a href="#">“2100-sheet tray elevator drive removal” on page 490.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.

Action	Yes	No
<p><b>Step 11</b></p> <p>Check the optional tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 12</b></p> <p>Replace the optional tray controller board. See <a href="#">“2100-sheet tray controller board removal” on page 489</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 17y errors

### 171 error messages

Error code	Description	Action
171.82	Main fan speed did not ramp up to the required level.	See <a href="#">“Main fan failure service check” on page 341</a> .
171.83	Main fan stalled.	
171.84	Main fan ran too slow.	
171.85	Main fan ran too fast.	

### 173 error messages

Error code	Description	Action
173.82	Cartridge fan speed did not ramp up to the required level.	See <a href="#">“Cartridge fan failure service check” on page 342</a> .
173.83	Cartridge fan stalled.	
173.84	Cartridge fan ran too slow.	
173.85	Cartridge fan ran too fast.	

### Main fan failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the following cables are properly connected:</p> <ul style="list-style-type: none"> <li>• cable J71 on the controller board</li> <li>• main fan cable</li> </ul> <p>Are the cables properly connected?</p>	Go to step 3.	Go to step 2.

Action	Yes	No
<b>Step 2</b> Reseat the cable.  Does the problem remain?	Go to step 3.	The problem is solved.
<b>Step 3</b> Restart the printer.  Does the problem remain?	Go to step 4.	The problem is solved.
<b>Step 4</b> Replace the main fan. See <a href="#">“Main fan removal” on page 419.</a>  Does the problem remain?	Go to step 5.	The problem is solved.
<b>Step 5</b> Restart the printer.  Does the problem remain?	Contact the next level of support.	The problem is solved.

### Cartridge fan failure service check

Action	Yes	No
<b>Step 1</b> Check if the following cables are properly connected: <ul style="list-style-type: none"> <li>• cable J15 on the controller board</li> <li>• cartridge fan cable</li> </ul> Are the cables properly connected?	Go to step 3.	Go to step 2.
<b>Step 2</b> Reseat the cable.  Does the problem remain?	Go to step 3.	The problem is solved.
<b>Step 3</b> Restart the printer.  Does the problem remain?	Go to step 4.	The problem is solved.
<b>Step 4</b> Replace the cartridge fan. See <a href="#">“Cartridge fan removal” on page 429.</a>  Does the problem remain?	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b> Restart the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 6yy errors

### 6yy error messages

Error code	Description	Action	
600.01	Toner tally from the RIP was not received.	Restart the print job. If the error persists, then contact the next level of support.	
600.02	Video did not start.		
600.03	Transfer servo did not start.		
600.04	Duplex page was not picked.		
600.07	Page is at image point before EP is ready.		
600.09	EP update error was detected.		
600.10	EP late run-in error was detected.		
600.95	RIP intentionally declared a jam error, usually to prevent a kiosk user from printing free pages.		
602.19	Tray 1 was unable to be ready for picking.		Restart the print job. If the error persists, then contact the next level of support.
602.29	Tray 2 was unable to be ready for picking.		
602.39	Tray 3 was unable to be ready for picking.		
602.49	Tray 4 was unable to be ready for picking.		
602.59	Tray 5 was unable to be ready for picking.		
611.02	An Input ISR error occurred and the printhead was not ready.		
611.32	Lost HSYNC errors were detected. Laser safety interlock system may be the cause.		
611.33	Lost HSYNC error occurred during servo.	Restart the print job. If the error persists, then contact the next level of support.	
611.34	A mirror motor lock error was detected.		
621.01	The fuser heater was not hot enough when the paper entered the fuser nip.		
647.xx	The motor (main) stalled.		
649.xx	The motor (redrive) stalled.		
650.xx	The motor (duplex) stalled.		
655.xx	The motor (toner cartridge) stalled.		
661.13	The tray 1 lift plate failed to lift.		See <a href="#">“Tray 1 paper feeder control failure service check” on page 124.</a>
661.8x	Motor (tray 1 pick/lift) error was detected.		

Error code	Description	Action
662.23	The tray 2 lift plate failed to lift.	See <a href="#">“Optional tray lift jam service check” on page 344.</a>
662.8x	Motor (tray 2 pick/lift) error was detected.	See <a href="#">“Optional tray pick/lift drive failure service check” on page 347.</a>
663.33	The tray 3 lift plate failed to lift.	See <a href="#">“Optional tray lift jam service check” on page 344.</a>
663.8x	Motor (tray 3 pick/lift) error was detected.	See <a href="#">“Optional tray pick/lift drive failure service check” on page 347.</a>
664.43	The tray 4 lift plate failed to lift.	See <a href="#">“Optional tray lift jam service check” on page 344.</a>
664.8x	Motor (tray 4 pick/lift) error was detected.	See <a href="#">“Optional tray pick/lift drive failure service check” on page 347.</a>
665.53	The tray 5 lift plate failed to lift.	See <a href="#">“Optional tray lift jam service check” on page 344.</a>
665.8x	Motor (tray 5 pick/lift) error was detected.	See <a href="#">“Optional tray pick/lift drive failure service check” on page 347.</a>
666.8x	Motor (tray 2 transport) error was detected.	See <a href="#">“Optional tray transport drive failure service check” on page 348.</a>
667.8x	Motor (tray 3 transport) error was detected.	
668.8x	Motor (tray 4 transport) error was detected.	
669.8x	Motor (tray 5 transport) error was detected.	
680.20	During an ADF job, there was no paper detected on the ADF tray.	Clear the ADF paper path of paper jams and fragments, and then restart the job.

### Optional tray lift jam service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <p>Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt;select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics &gt; Sensor tests</b> <b>b</b> Find the sensor (Pick roller index (tray x)). <b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the sensor status change while toggling the sensor?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b> Check the sensor cable on the optional tray controller board for proper connection.</p> <p>Is the cable properly connected?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Reseat the cable.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b> Replace the sensor. See <a href="#">“Sensor (250- and 550-sheet tray pick roller index) removal” on page 514.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b> Remove the source tray insert, and then check if the following components are functional and free of damage:</p> <ul style="list-style-type: none"> <li>• Paper guides</li> <li>• Lift plate</li> </ul> <p><b>Note:</b> Move the components or turn gears to check for proper mechanisms.</p> <p>Are the tray insert and its components functional and free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b> Replace the tray insert.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.

Action	Yes	No
<p><b>Step 11</b></p> <p>Check if the source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Make sure that the interface cable of the affected tray is properly installed.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 16.	Go to step 15.
<p><b>Step 15</b></p> <p>Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516.</a></p> <p>Does the problem remain?</p>	Go to step 16.	The problem is solved.
<p><b>Step 16</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 17.
<p><b>Step 17</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Optional tray pick/lift drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt;select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Additional input tray diagnostics</b> &gt; <b>Motor tests</b></p> <p><b>b</b> Select the motor (Pick (tray x)), and then touch <b>Start</b>.</p> <p><b>Note:</b> For tray x, choose the tray number of the affected source tray.</p> <p>Does the motor run?</p>	Go to step 9.	Go to step 6.
<p><b>Step 6</b> Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check if the source tray paper feeder and its actuators are functional, properly installed, and free of damage.</p> <p>Are the paper feeder and its components functional, properly installed, and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Reinstall or replace the paper feeder. See <a href="#">“250- and 550-sheet tray paper feeder removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 11.
<p><b>Step 11</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Optional tray transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> &gt;select source tray &gt; <b>Single</b></p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Additional input tray diagnostics &gt; Motor tests</b></p> <p><b>b</b> Select the motor (Pass-through (tray x)), and then touch <b>Start</b>.  <b>Note:</b> For tray x, choose the tray number of the affected optional tray.</p> <p>Does the motor run?</p>	Go to step 8.	Go to step 6.
<p><b>Step 6</b></p> <p>Reseat the cable on the motor and on the optional tray controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Replace the motor (transport) of the affected optional tray. See <a href="#">“Motor (250- and 550-sheet tray transport) removal” on page 510</a>.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.
<p><b>Step 8</b></p> <p>Make sure that the interface cable of the affected tray is properly installed.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516</a>.</p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 12.	The problem is solved.
<p><b>Step 12</b></p> <p>Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 13.

Action	Yes	No
<p><b>Step 13</b></p> <p>Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Procedure before starting the 9yy service checks

You will need to retrieve certain information. This information aids your next level of support in diagnosing the problem before replacing the controller board.

**Warning—Potential Damage:** Do not replace the controller board unless directed by your next level of support.

- 1 Collect the history information and firmware logs (Fwdebug and logs.tar.gz) from the SE menu.
- 2 Collect the settings from the menu settings page.
- 3 Collect information from the user.

**Note:** Not all of the items are retrievable from the printer you are working on.

### A. Collecting the history information from the SE menu

**Note:** Make sure that your printer is connected to a network or to a print server.

- 1 Open a web browser, type `http://printer_IP_address/se`, and then press **Enter**.

**Notes:**

- `printer_IP_address` is the TCP/IP address of the printer.
- `se` is required to access the printer diagnostic information.

- 2 Click **History Information**, copy all information, and then save it as a text file.
- 3 E-mail the text file to your next level of support.

### B. Collecting the firmware logs (Fwdebug and logs.tar.gz) from the SE menu

**Notes:**

- Make sure that your printer is connected to a network or to a print server.
- Some printers are designed to restart automatically after a 9yy error. On these printers, you can retrieve the secondary crash code information using the SE menu.

- 1 Open a Web browser, type `http://printer_IP_address/se`, and then press **Enter**.
- 2 Click **Logs Gzip Compressed**.

**Note:** A logs.tar.gz file is saved to the Downloads folder. The file may take several minutes to save. You may rename the file if a logs.tar.gz already exists in the Downloads folder.

- 3 E-mail the logs to your next level of support.

## C. Collecting the settings from the menu settings page

**Note:** The menu settings page is different for each printer. For more information, see the *User's Guide*. Your next level of support will tell you which page they want to see.

### Copying the menu settings page from the Embedded Web Server (EWS)

**Note:** Make sure that your printer is connected to a network or to a print server.

- 1 Open a Web browser, type **http://printer\_IP\_address**, and then press **Enter**.
- 2 Click Settings, and then select one of the settings pages from the links shown on the page.
- 3 Copy all the information, and then save it as a text file.
- 4 E-mail the text file to your next level of support.

### Printing the menu settings page

- 1 From the home screen, navigate to:  
**Reports > Menu Settings Page**
- 2 Print the menu settings page, and then use Scan to E-mail to send it to your next level of support.

## D. Collecting information from the user

Ask the user for information about the following:

- Print job being run
- Operating system being used
- Print driver being used
- Other information on what was happening when the 9yy error occurred

## 900 errors

### 900-909 error messages

Error code	Description	Action
900-909.x	RIP firmware errors	See <a href="#">“System software error service check” on page 351</a> .

### System software error service check

Different types of 90y.xx errors can occur. There may be a communication problem (bad cable, network connection, and software issues), or a hardware problem with the controller board or ISP (internal solutions port). Check the communication and software problems first. Determine if the problem is constant or intermittent. Use the following troubleshooting procedure to isolate the issue. Take notes as instructed. You will need that information in the event that you need to contact your next level of support.

Before troubleshooting, do the following:

- 1 Perform the [“Procedure before starting the 9yy service checks” on page 350](#).
- 2 Determine the operating system used when the error occurred. If possible, determine whether a PostScript™ or PCL™ file was sent to the printer when the error occurred. Ask the customer which Lexmark Solutions applications are installed on the printer.

Action	Yes	No
<p><b>Step 1</b> Perform a POR.</p> <p>Does the error remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p><b>a</b> Write down the exact 900.xx error code that appears on the display.</p> <p><b>b</b> Turn off the printer.</p> <p><b>c</b> Clear the print queues.</p> <p><b>d</b> Disconnect all communication cables, and then remove all memory options.</p> <p><b>e</b> Remove any installed ISP.</p> <p><b>f</b> Reset the printer into the Diagnostics menu.</p> <p>Does the problem remain?</p>	Go to step 3.	Go to step 6.
<p><b>Step 3</b> Check all the cables on the controller board for proper connection.</p> <p>Are the cables properly connected?</p>	Go to step 5.	Go to step 4.
<p><b>Step 4</b></p> <p><b>a</b> Reconnect the cables.</p> <p><b>b</b> Reset the printer into the Diagnostics menu.</p> <p>Does the problem remain?</p>	Go to step 5.	Go to step 6.
<p><b>Step 5</b></p> <p><b>a</b> Replace the controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p><b>b</b> Reset the printer.</p> <p><b>Note:</b> If a different error code displays, then go to the service check for that error code.</p> <p>Does the problem remain?</p>	Go to step 31.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p>Print the following:</p> <ul style="list-style-type: none"> <li>• Error Log</li> <li>• Menu Settings Page</li> <li>• Network Settings Page</li> </ul> <p>Does the problem remain while printing these pages?</p>	Go to step 31.	Go to step 7.
<p><b>Step 7</b></p> <p><b>Note:</b> Before performing this step, write down the following information about the file being sent to the printer:</p> <ul style="list-style-type: none"> <li>• Application used</li> <li>• Operating system</li> <li>• Driver type</li> <li>• File type (PCL, PostScript, XPS, etc.)</li> </ul> <p><b>a</b> Reattach the communications cable.</p> <p><b>b</b> Reset the printer.</p> <p><b>c</b> Perform a print job.</p> <p>Does the problem remain?</p>	Go to step 8.	Go to step 10.
<p><b>Step 8</b></p> <p><b>a</b> Reset the printer.</p> <p><b>b</b> Perform a different print job.</p> <p>Does the problem remain?</p>	Go to step 9.	Go to step 10.
<p><b>Step 9</b></p> <p><b>a</b> Upgrade the firmware.</p> <p><b>Note:</b> Contact your next level of support for the correct firmware level to use.</p> <p><b>b</b> Reset the printer.</p> <p><b>c</b> Perform a print job.</p> <p>Does the problem remain?</p>	Go to step 31.	Go to step 10.
<p><b>Step 10</b></p> <p>Verify if the printer is an MFP.</p> <p>Is the printer an MFP?</p>	Go to step 11.	Go to step 13.
<p><b>Step 11</b></p> <p>Perform a copy job.</p> <p>Does the problem remain?</p>	Go to step 31.	Go to step 12.

Action	Yes	No
<p><b>Step 12</b> Scan a document to the computer.</p> <p>Does the problem remain?</p>	Go to step 31.	Go to step 13.
<p><b>Step 13</b> Verify if an optional memory is installed.</p> <p>Is there an optional memory installed?</p>	Go to step 14.	Go to step 16.
<p><b>Step 14</b> <b>a</b> Reinstall the memory. <b>b</b> Perform a print job.</p> <p>Does the problem remain?</p>	Go to step 15.	Go to step 16.
<p><b>Step 15</b> <b>a</b> Install a Lexmark-recommended memory option. <b>b</b> Perform a print job.</p> <p>Does the problem remain?</p>	Go to step 31.	The problem is solved.
<p><b>Step 16</b> Verify if a modem is installed.</p> <p>Is a modem installed?</p>	Go to step 17.	Go to step 21.
<p><b>Step 17</b> <b>a</b> Reinstall the modem. <b>b</b> Reset the printer.</p> <p>Does the problem remain?</p>	Go to step 18.	Go to step 20.
<p><b>Step 18</b> <b>a</b> Upgrade the firmware if it was not upgraded in a previous step. <b>Note:</b> Contact your next level of support for the correct firmware level to use. <b>b</b> Reset the printer. <b>c</b> Perform a print job.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b> <b>a</b> Replace the modem. <b>b</b> Reset the printer.</p> <p>Does the problem remain?</p>	Go to step 31.	The problem is solved.

Action	Yes	No
<p><b>Step 20</b> Perform a fax job.</p> <p>Does the problem remain?</p>	Go to step 31.	Go to step 21.
<p><b>Step 21</b> Verify if an ISP option is installed.</p> <p>Is an ISP option installed?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b> <b>a</b> Reinstall the first ISP option. <b>b</b> Reset the printer.</p> <p>Does the problem remain?</p>	Go to step 24.	Go to step 23.
<p><b>Step 23</b> Perform a job to test the option.</p> <p>Does the problem remain?</p>	Go to step 24.	Go to step 26.
<p><b>Step 24</b> <b>a</b> Upgrade the firmware if it was not upgraded in a previous step. <b>Note:</b> Contact your next level of support for the correct firmware level to use. <b>b</b> Reset the printer. <b>c</b> Perform a print job.</p> <p>Does the problem remain?</p>	Go to step 25.	The problem is solved.
<p><b>Step 25</b> <b>a</b> Replace the faulty ISP option. <b>b</b> Reset the printer.</p> <p>Does the problem remain?</p>	Go to step 31.	Go to step 26.
<p><b>Step 26</b> Verify if there are more ISP options to install.</p> <p>Are there more ISP options to install?</p>	Go to step 27.	The problem is solved.
<p><b>Step 27</b> <b>a</b> Install the next ISP option. <b>b</b> Reset the printer.</p> <p>Does the problem remain?</p>	Go to step 29.	Go to step 28.

Action	Yes	No
<p><b>Step 28</b></p> <p>Perform a job to test the option.</p> <p>Does the problem remain?</p>	Go to step 29.	Go to step 26.
<p><b>Step 29</b></p> <p><b>a</b> Upgrade the firmware if it was not upgraded in a previous step.</p> <p><b>Note:</b> Contact your next level of support for the correct firmware level to use.</p> <p><b>b</b> Reset the printer.</p> <p><b>c</b> Send a print job.</p> <p>Does the problem remain?</p>	Go to step 30.	Go to step 26.
<p><b>Step 30</b></p> <p><b>a</b> Replace the faulty ISP option.</p> <p><b>b</b> Reset the printer.</p> <p>Does the problem remain?</p>	Go to step 31.	Go to step 26.
<p><b>Step 31</b></p> <p>Contact your next level of support.</p> <p>Provide the following information:</p> <ul style="list-style-type: none"> <li>• Exact 90y.xx error digits and complete error message</li> <li>• Printed Menu Settings Page</li> <li>• Printed Network Settings Page</li> <li>• Device error log</li> <li>• A sample print file if the error appears isolated to a single file</li> <li>• File/Application used if the error is related to specific print file</li> <li>• Device operating system</li> <li>• Driver used (PCL/PS)</li> <li>• Frequency of the occurrence of the error</li> </ul>		

## 912–992 errors

### 912–992 error messages

Error code	Description	Action
912.01	An engine error occurred.	Restart the print job. If the error persists, then contact the next level of support.
912.02	An engine error occurred.	
912.04	An engine error occurred.	
912.05	An engine error occurred.	
912.06	An engine error occurred.	

Error code	Description	Action
912.07	An engine error occurred.	See <a href="#">“Optional tray communication error service check” on page 359.</a>
912.08	An engine error occurred.	Restart the print job. If the error persists, then contact the next level of support.
912.09	An engine error occurred.	
912.10	An engine error occurred.	Restart the print job. If the error persists, then contact the next level of support.
912.11	An engine error occurred.	
912.12	An engine error occurred.	
912.13	An engine error occurred.	
912.14	An engine error occurred.	
912.15	An engine error occurred.	
912.16	An engine error occurred.	
912.17	An engine error occurred.	
912.18	An engine error occurred.	
912.19	An engine error occurred.	
912.20	An engine error occurred.	Restart the print job. If the error persists, then contact the next level of support.
912.21	An engine error occurred.	
912.22	An engine error occurred.	
912.28	An engine error occurred.	See <a href="#">“System software error service check” on page 351.</a>
912.36	An engine error occurred.	
912.38	An engine error occurred.	See <a href="#">“Optional tray communication error service check” on page 359.</a>
912.39	An engine error occurred.	See <a href="#">“System software error service check” on page 351.</a>
912.49	An engine error occurred.	
912.52	An engine error occurred.	
912.59	An engine error occurred.	
912.60	An engine error occurred.	
912.75	An engine error occurred.	
912.78	An engine error occurred.	
912.82	An engine error occurred.	
938.04	Supplies security is not enabled.	
938.05	Controller board failure due to a bad capacitor.	See <a href="#">“System software error service check” on page 351.</a>
950.10	An NVRAM mismatch error occurred.	See <a href="#">“NVRAM mismatch failure service check” on page 361.</a>
953.99	A control panel NVRAM error occurred.	

Error code	Description	Action	
980.01	A validation failure was detected by the Paperport communication device.	See <a href="#">“Optional tray communication error service check” on page 359.</a>	
980.02	A framing error or receive buffer overflow was detected by the Paperport communication device.		
980.03	A timeout error was detected by the Paperport communication device.		
980.04	An option failed to echo the last sent communication byte on time.		
980.05	An option declared a link reset.		
980.06	A Paperport prioritizer error was detected. Message from the option device was not read by the prioritizer.		
980.11	A Paperport command response was detected. Response was too large for the communications buffer.		
980.13	An optional device hot plug was detected by the printer. Low-level error occurred at the Paperport.		
980.14	An engine timeout error occurred while waiting for the following: <ul style="list-style-type: none"> <li>• a mechanical reset</li> <li>• an intervention required (IR) to clear after inserting a tray</li> </ul>		
980.15	An engine timeout error occurred while waiting for an option to become idle.		
981.91	An Invalid Paperport protocol error occurred.		See <a href="#">“Optional tray communication error service check” on page 359.</a>
982.92	A Paperport framing error occurred.		
982.93	A Paperport overrun error occurred.		
982.94	A Paperport parity error occurred.		
982.95	An Other Paperport error occurred.		
982.96	The Paperport encountered multiple communication errors.		
982.97	An invalid Paperport Echo occurred.		
983.98	An unsupported Paperport command error occurred.		
984.99	An invalid Paperport parameter error occurred.		
992.xx	An option device software error occurred.		

## Optional tray communication error service check

Action	Yes	No
<p><b>Step 1</b> Check the paper path and trays for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 3.	Go to step 2.
<p><b>Step 2</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b> Make sure that all the trays and tray inserts are properly installed.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Enter the Diagnostics menu, and then navigate to: <b>Input tray quick print</b> Perform the print test on each optional tray.</p> <p>Does the error occur in any of the optional trays?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b></p> <ul style="list-style-type: none"> <li><b>a</b> Remove the optional trays.</li> <li><b>b</b> Reinstall the optional trays one at a time, and then identify which tray is causing the error.</li> </ul> <p>Does the error occur in any of the optional trays?</p>	Go to step 6.	Contact the next level of support.
<p><b>Step 6</b> Make sure that the interface cable of the affected tray is properly installed.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b> Check the interface cable and its connector pins for damage.</p> <p>Is the interface cable free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b> Replace the optional tray interface cable. See <a href="#">“250- and 550-sheet tray interface cable removal” on page 516</a>.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.

Action	Yes	No
<p><b>Step 9</b> Make sure that the source tray controller board is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b> Check the source tray controller board and its connector pins for damage.</p> <p>Are the tray controller board and its connectors free of damage?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 11</b> Replace the source tray controller board. See <a href="#">“250- and 550-sheet tray controller board removal” on page 512.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

### Supplies security error service check

Action	Yes	No
<p><b>Step 1</b> Turn off the printer, wait for 10 seconds, and then turn on the printer.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <ul style="list-style-type: none"> <li><b>a</b> Turn off the printer.</li> <li><b>b</b> Remove, and then reinstall the toner cartridge, imaging unit, and fuser.</li> <li><b>c</b> Wait for 10 seconds, and then turn on the printer.</li> </ul> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.
<p><b>Step 3</b></p> <ul style="list-style-type: none"> <li><b>a</b> Turn off the printer.</li> <li><b>b</b> Make sure that all the cables on the controller board are properly connected. <b>Note:</b> Reseat the flexible flat cables (FFC) on the controller board.</li> <li><b>c</b> Wait for 10 seconds, and then turn on the printer.</li> </ul> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.

Action	Yes	No
<p><b>Step 4</b></p> <p><b>a</b> Turn off the printer.</p> <p><b>b</b> Replace the controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p><b>c</b> Wait for 10 seconds, and then turn on the printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## NVRAM mismatch failure service check

**Warning—Potential Damage:** To avoid NVRAM mismatch issues, replace only one of the following components at a time:

- Control panel
- Controller board

To replace a component and to test whether the problem is resolved:

- 1 Replace the affected component.

**Warning—Potential Damage:** Do not perform a Power-On Reset (POR) until the problem is resolved. If a POR is performed at this point, then the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 2 Enter the Diagnostics menu. The Diagnostics menu allows you to use temporarily the replacement part.

**Warning—Potential Damage:** Some printers perform automatically a POR if the Diagnostics menu is not opened within five seconds. If a POR is performed at this point, then the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 3 Use the Diagnostics menu to test the replacement part. Perform a feed test to check if the problem is resolved.
  - If the problem is not resolved—Turn off the printer, and then install the old part.
  - If the problem is resolved—Perform a POR.

Action	Yes	No
<p><b>Step 1</b></p> <p>Check if the control panel was recently replaced.</p> <p>Was the control panel recently replaced?</p>	Go to step 2.	Go to step 4.
<p><b>Step 2</b></p> <p>Replace the current control panel with the original control panel. See <a href="#">“Control panel (4.3-inch display) removal” on page 448</a>.</p> <p>Does the problem remain?</p>	Go to step 3.	The problem is solved.

Action	Yes	No
<p><b>Step 3</b></p> <p>Replace the original control panel with a new control panel.</p> <p><b>Note:</b> Make sure that the new control panel is not previously installed from another printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 4</b></p> <p>Check if the controller board was recently replaced.</p> <p>Was the controller board recently replaced?</p>	Go to step 5.	Contact the next level of support.
<p><b>Step 5</b></p> <p>Replace the current controller board with the original controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Replace the original controller board with a new controller board.</p> <p><b>Note:</b> Make sure that the new controller board is not previously installed from another printer.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Optional bin hardware errors

### 306 errors

#### 306 error messages

Error code	Description	Action
306.50	The bin 1 motor (OE transport) did not turn on.	See <a href="#">“Output expander transport drive failure service check” on page 363</a> .
306.51	The bin 1 motor (OE transport) did not turn off.	
306.60	The bin 2 motor (OE transport) did not turn on.	
306.61	The bin 2 motor (OE transport) did not turn off.	
306.70	The bin 3 motor (OE transport) did not turn on.	
306.71	The bin 3 motor (OE transport) did not turn off.	

## Output expander transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed</b> Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> <b>a</b> Remove the optional bins. <b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 8.	Contact the next level of support.

Action	Yes	No
<p><b>Step 8</b></p> <p><b>a</b> Remove the output expander left cover. See <a href="#">“Output expander left cover removal” on page 528.</a></p> <p><b>b</b> Reseat the cable on the motor (OE transport) and on the output expander controller board.</p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Check the motor (OE transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 11.	Go to step 10.
<p><b>Step 10</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (OE transport) removal” on page 538.</a></p> <p>Does the problem remain?</p>	Go to step 11.	The problem is solved.
<p><b>Step 11</b></p> <p>Check the output expander drive gear for damage.</p> <p>Is the drive gear free of damage?</p>	Go to step 13.	Go to step 12.
<p><b>Step 12</b></p> <p>Replace the gear. See <a href="#">“Output expander drive gear removal” on page 537.</a></p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 14.	The problem is solved.
<p><b>Step 14</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 15.
<p><b>Step 15</b></p> <p>Replace the bin controller board. See <a href="#">“Output expander controller board removal” on page 530.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 311 errors

### 311 error messages

Error code	Description	Action
311.50	The bin 1 motor (HCOE transport) did not turn on.	See <a href="#">“HCOE transport drive failure service check” on page 365.</a>
311.51	The bin 1 motor (HCOE transport) did not turn off.	

### HCOE transport drive failure service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b> <b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b> <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the HCOE left cover. See <a href="#">“HCOE left cover removal” on page 556.</a></p> <p><b>b</b> Reseat the cable on the motor (HCOE transport) and on the HCOE controller board.</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the motor (HCOE transport) for improper installation and damage.</p> <p>Is the motor properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the motor. See <a href="#">“Motor (HCOE transport) removal” on page 574.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 11.
<p><b>Step 11</b></p> <p>Replace the bin controller board. See <a href="#">“HCOE controller board removal” on page 558.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## 316 errors

### 316 error messages

Error code	Description	Action
316.50	The bin 1 motor (mailbox transport) did not turn on.	See <a href="#">“Mailbox transport drive failure service check” on page 367.</a>
316.51	The bin 1 motor (mailbox transport) did not turn off.	
316.60	The bin 2 motor (mailbox transport) did not turn on.	
316.61	The bin 2 motor (mailbox transport) did not turn off.	
316.70	The bin 3 motor (mailbox transport) did not turn on.	
316.71	The bin 3 motor (mailbox transport) did not turn off.	

### Mailbox transport drive failure service check

Action	Yes	No
<p><b>Step 1</b></p> <p>Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b></p> <p>Open all optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b></p> <p>Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p>Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.

Action	Yes	No
<p><b>Step 5</b></p> <p><b>a</b> Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed &gt; Feed to all bins</b></p> <p><b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p>Enter the Diagnostics menu, and then navigate to: <b>Output bin quick feed</b></p> <p>Perform the feed test on each optional bin.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b></p> <p><b>a</b> Remove the optional bins.</p> <p><b>b</b> Reinstall the optional bins one at a time, and then identify which bin is causing the error.</p> <p>Does the error occur in any of the optional bins?</p>	Go to step 8.	Contact the next level of support.
<p><b>Step 8</b></p> <p><b>a</b> Remove the mailbox left cover. 331.61	The bin 2 motor (SHPF elevator) did not turn off.	

### SHPF elevator drive failure service check

Action	Yes	No
<p><b>Step 1</b> Make sure that all the optional bins are properly installed.</p> <p>Does the problem remain?</p>	Go to step 2.	The problem is solved.
<p><b>Step 2</b> Clean all the optional bin doors, and then check the paper path and bins for paper fragments and partially fed paper.</p> <p>Is the paper path free of paper fragments and partially fed paper?</p>	Go to step 4.	Go to step 3.
<p><b>Step 3</b> Remove the paper fragments and partially fed paper.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b> Clear the optional bin paper path rollers of any dirt and contamination.</p> <p>Does the problem remain?</p>	Go to step 5.	The problem is solved.
<p><b>Step 5</b>  <b>a</b> Enter the Diagnostics menu, and then navigate to:  <b>Output bin quick feed &gt; Feed to all bins</b>  <b>b</b> Touch <b>Single</b> or <b>Continuous</b>.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.

Action	Yes	No
<p><b>Step 6</b></p> <p><b>a</b> Remove the SHPF left cover. See <a href="#">“Staple, hole punch finisher left cover removal” on page 705.</a></p> <p><b>b</b> Reseat the cable on the motor (SHPF elevator).</p> <p>Does the problem remain?</p>	Go to step 7.	The problem is solved.
<p><b>Step 7</b></p> <p>Check the SHPF elevator drive for improper installation and damage.</p> <p>Is the elevator drive properly installed and free of damage?</p>	Go to step 9.	Go to step 8.
<p><b>Step 8</b></p> <p>Reinstall or replace the elevator drive. See <a href="#">“Staple, hole punch finisher elevator drive removal” on page 728.</a></p> <p>Does the problem remain?</p>	Go to step 9.	The problem is solved.
<p><b>Step 9</b></p> <p>Make sure that the controller board of the affected optional bin is properly installed. Reseat all the cables on the controller board.</p> <p>Does the problem remain?</p>	Go to step 10.	The problem is solved.
<p><b>Step 10</b></p> <p>Check the affected controller board and its connector pins for damage.</p> <p>Are the bin controller board and its connectors free of damage?</p>	Contact the next level of support.	Go to step 11.
<p><b>Step 11</b></p> <p>Replace the bin controller board. See <a href="#">“Staple, hole punch finisher controller board removal” on page 711.</a></p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

## Other symptoms

### Base printer symptoms

#### Base printer symptoms

Symptom	Action
The printer is not communicating with the network host.	See <a href="#">“Network service check” on page 376.</a>

## Network service check

Action	Yes	No
<p><b>Step 1</b> Check if the printer is using an Ethernet network.</p> <p>Is the printer using an Ethernet network?</p>	Go to step 2.	Go to step 3.
<p><b>Step 2</b> Make sure that the Ethernet cable is properly connected at both ends.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 3</b></p> <p><b>a</b> Make sure that the printer is not physically connected to a wired LAN.</p> <p><b>b</b> If the printer is connected using an Ethernet connection, then unplug the cable from the printer, and then perform a POR to connect the printer to a wireless network.</p> <p>Does the problem remain?</p>	Go to step 4.	The problem is solved.
<p><b>Step 4</b></p> <p><b>a</b> From the home screen, navigate to <b>Settings &gt; Network/Ports &gt; Active Adapters</b>.</p> <p><b>b</b> Check if the adapter that appears matches the adapter used in the printer.</p> <p>Do the adapters match?</p>	Go to step 6.	Go to step 5.
<p><b>Step 5</b> Change the active adapter setting to match the adapter used in the printer.</p> <p>Does the problem remain?</p>	Go to step 6.	The problem is solved.
<p><b>Step 6</b></p> <p><b>a</b> Check the online status of the printer under Printers and Faxes on the host computer.</p> <p><b>b</b> Delete all print jobs in the print queue.</p> <p>Is the printer online and in the Ready state?</p>	Go to step 8.	Go to step 7.
<p><b>Step 7</b> Change the printer status to Online.</p> <p>Does the problem remain?</p>	Go to step 8.	The problem is solved.

Action	Yes	No
<p><b>Step 8</b> Check the printer IP address on the Network Settings Page.</p> <p>Does it match the IP address in the port of the drivers using the printer?</p>	Go to step 13.	Go to step 9.
<p><b>Step 9</b> Check if the printer uses a static IP address on a network.</p> <p>Is the printer using a DHCP IP address?</p>	Go to step 10.	Go to step 12.
<p><b>Step 10</b> Check the first two segments of the IP address.</p> <p>Does the IP address start with 169.254?</p>	Go to step 11.	Go to step 12.
<p><b>Step 11</b> Perform a POR.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 12</b> Reset the IP address on the printer to match the IP address on the driver.</p> <p>Does the problem remain?</p>	Go to step 13.	The problem is solved.
<p><b>Step 13</b> Check if the printer and computer IP addresses have the same subnet address.</p> <p>Does the printer and computer IP addresses have the same subnet address?</p>	Go to step 15.	Go to step 14
<p><b>Step 14</b> Using the subnet address supplied by the network administrator, assign a unique IP address to the printer.</p> <p><b>Note:</b> The printer IP address should match the IP address on the print driver.</p> <p>Does the problem remain?</p>	Go to step 15.	The problem is solved.
<p><b>Step 15</b> Check if the printer is physically connected to the network.</p> <p>Is the printer physically connected to the network?</p>	Go to step 16.	Go to step 23.
<p><b>Step 16</b> Use a different Ethernet cable.</p> <p>Does the problem remain?</p>	Go to step 17.	The problem is solved.

Action	Yes	No
<p><b>Step 17</b></p> <p>Have the network administrator check the network drop for activity.</p> <p>Is the network drop functioning properly?</p>	Go to step 19.	Go to step 18.
<p><b>Step 18</b></p> <p>Try a known and functioning network drop.</p> <p>Does the problem remain?</p>	Go to step 19.	The problem is solved.
<p><b>Step 19</b></p> <p>Check if the built-in Ethernet port on the controller board is used to connect to the network.</p> <p>Is the built-in Ethernet port on the controller board used to connect to the network?</p>	Go to step 22.	Go to step 20.
<p><b>Step 20</b></p> <p>Make sure that the option Ethernet card is properly installed, and reseal if necessary</p> <p>Does the problem remain?</p>	Go to step 21.	The problem is solved.
<p><b>Step 21</b></p> <p>Replace the option Ethernet card.</p> <p>Does the problem remain?</p>	Go to step 22.	The problem is solved.
<p><b>Step 22</b></p> <p>Replace the controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.
<p><b>Step 23</b></p> <p>Check if the printer is on the same wireless network as the other devices.</p> <p>Is the printer on the same wireless network as the other devices?</p>	Go to step 25.	Go to step 24.
<p><b>Step 24</b></p> <p>Assign the correct wireless network to the printer.</p> <p>Does the problem remain?</p>	Go to step 25.	The problem is solved.
<p><b>Step 25</b></p> <p>Check if the other devices on the wireless network are properly communicating.</p> <p>Are the other devices on the wireless network properly communicating?</p>	Go to step 26.	Contact the network administrator.

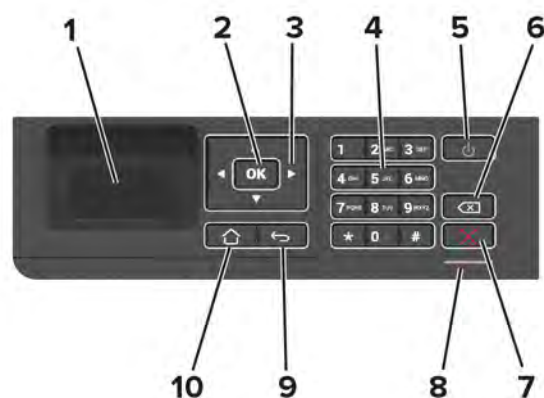

Action	Yes	No
<p><b>Step 26</b> Make sure that the wireless card on the printer is properly installed.</p> <p>Does the problem remain?</p>	Go to step 27.	The problem is solved.
<p><b>Step 27</b> Check if an antenna is attached to the wireless card.</p> <p>Is an antenna attached to the wireless card?</p>	Go to step 28.	Go to step 29.
<p><b>Step 28</b> Check the antenna for proper installation and damage, and replace if necessary.</p> <p>Does the problem remain?</p>	Go to step 29.	The problem is solved.
<p><b>Step 29</b> Replace the wireless card.</p> <p>Does the problem remain?</p>	Go to step 30.	The problem is solved.
<p><b>Step 30</b> Replace the controller board. See <a href="#">“Controller board removal” on page 430</a>.</p> <p>Does the problem remain?</p>	Contact the next level of support.	The problem is solved.

# Service menus

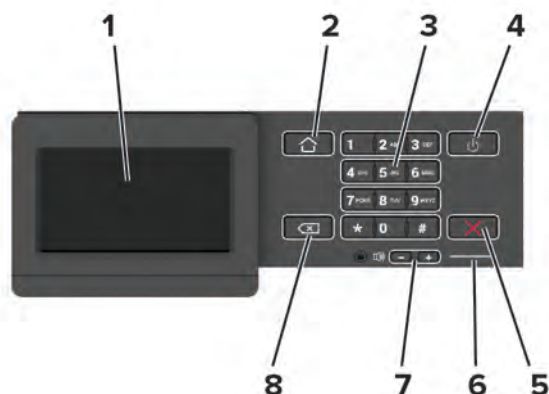

## Understanding the printer control panel

Lexmark B2865, Lexmark MS725, Lexmark MS821, Lexmark MS823, and Lexmark MS825

	Use the	To
1	Display	<ul style="list-style-type: none"> <li>View printer messages and supply status.</li> <li>Set up and operate the printer.</li> </ul>
2	Select button	<ul style="list-style-type: none"> <li>Select a menu option.</li> <li>Save the changes in a setting.</li> </ul>
3	Arrow buttons	<ul style="list-style-type: none"> <li>Scroll through menus or move between screens and menu options.</li> <li>Adjust the numeric value of a setting.</li> </ul>
4	Numeric keypad	Enter numbers or symbols in an input field.
5	Power button	Turn on or turn off the printer. <b>Note:</b> To turn off the printer, press and hold the power button for five seconds.
6	Backspace button	Move the cursor backward and delete a character in an input field.
7	Stop or Cancel button	Stop the current printer task.
8	Indicator light	Check the printer status.
9	Back button	Return to the previous screen.
10	Home button	Go to the home screen.

## Lexmark M5255, Lexmark M5265, Lexmark M5270, Lexmark MS822, Lexmark MS824, and Lexmark MS826

	Use the	To
1	Display	<ul style="list-style-type: none"> <li>View printer messages and supply status.</li> <li>Set up and operate the printer.</li> </ul>
2	Home button	Go to the home screen.
3	Numeric keypad	Enter numbers or symbols in an input field.
4	Power button	Turn on or turn off the printer. <b>Note:</b> To turn off the printer, press and hold the power button for five seconds.
5	Stop or Cancel button	Stop the current printer task.
6	Indicator light	Check the printer status.
7	Volume buttons	Adjust the speaker volume.
8	Headset or speaker port	Attach a headset or speaker. <b>Note:</b> This feature is available only in some printer units.
9	Back button	Return to the previous screen.

### Understanding the status of the power button and indicator light

Indicator light	Printer status
Off	The printer is off or in Hibernate mode.
Blue	The printer is ready or processing data.
Red	The printer requires user intervention.
Power button light	Printer status
Off	The printer is off, ready, or processing data.
Solid amber	The printer is in Sleep mode.
Blinking amber	The printer is in Hibernate mode.

# Diagnostics menu

## Entering the Diagnostics menu

The Diagnostics menu contains tests that are used to help isolate issues with the printer. To access some of these tests, avoid POST tests that run at POR. Some POST tests can generate errors that prevent a diagnostic test from running.

Do either of the following:

- To access the Diagnostics menu from the home screen, press \*\* **3 6** on the control panel. This method is preferable.
- To access the Diagnostics menu without running the POST tests:
  - 1** Press and hold the **3** and **6** buttons while turning on the printer.
  - 2** Release the buttons when the splash screen appears.

## Reports

### Device Settings

This report lists all the current printer settings.

Enter the Diagnostics menu, and then navigate to:

**Reports > Device > Device Settings**

For non-touch-screen printer models, press  to navigate through the settings.

### Installed Licenses

This setting lists all the installed licenses and their feature data.

Enter the Diagnostics menu, and then navigate to:

**Reports > Licenses > Installed Licenses**

For non-touch-screen printer models, press  to navigate through the settings.

### Advanced Print Quality Samples

This setting prints a list of the printer settings and sample pages to check print quality.

Enter the Diagnostics menu, and then navigate to:

**Advanced Print Quality Samples**

For non-touch-screen printer models, press  to navigate through the settings.

## Event Log

### Display Log

This setting displays the panel text that appears when the event occurs.

Enter the Diagnostics menu, and then navigate to:

#### **Event Log > Display Log**

For non-touch-screen printer models, press  to navigate through the settings.

### Print Log

This setting lists an extended version of the various printer events.

- 1 Enter the Diagnostics menu, and then navigate to:

#### **Event Log > Print Log**

For non-touch-screen printer models, press  to navigate through the settings.

- 2 Press  or touch **Start**.

**Note:** The events that appear in the report vary depending on the operational history of the printer.

### Print Log Summary

This setting lists a brief summary of the various printer events.

- 1 Enter the Diagnostics menu, and then navigate to:

#### **Event Log > Print Log Summary**

For non-touch-screen printer models, press  to navigate through the settings.

- 2 Press  or touch **Start**.

**Note:** The events that appear in the report vary depending on the operational history of the printer.

### Mark Log

This setting allows you to create a service, maintenance, or custom log entry. Each log entry is added in the printer event log.

- 1 Enter the Diagnostics menu, and then navigate to:

#### **Event Log > Mark Log**

For non-touch-screen printer models, press  to navigate through the settings.

- 2 Select a log that you want to create, and then press  or touch **Start**.

## Input tray quick print

This setting lets you print a single or continuous Quick Test page in either duplex or simplex mode.

- 1 Enter the Diagnostics menu, and then select **Input tray quick print**.
- 2 Select where you want to print the pages from.
- 3 Select whether to print a single or continuous test page, and then select **Start**.

## Output bin quick feed

This setting allows you to send a single or continuous test page to a bin.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then touch **Output bin quick feed**.
- 2 Select where you want to send the test page.
- 3 Select whether to send a single or continuous test page, and then touch **Start**.

## Printer Setup

### Printed page count (mono)

This setting displays the amount of pages printed in mono.

- 1 Enter the Diagnostics menu, and then select **Printer Setup**.
- 2 View the printed page count for mono.

### Permanent page count

This setting displays the total number of pages printed in mono and color. After all the print tests are completed, this value resets to zero.

- 1 Enter the Diagnostics menu, and then select **Printer Setup**.
- 2 View the permanent page count.

### Enable edge-to-edge (printing)

This setting shifts all four margins to the physical edges of the page.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer Setup > Enable edge-to-edge (printing)**

For non-touch-screen printer models, press  to navigate through the settings.

- 2 Select a setting to adjust.

**Note:** This feature does not work in PPDS emulation.

## Processor ID

This setting indicates the ID of the processor on the controller board.

- 1 Enter the Diagnostics menu, and then select **Printer Setup**.
- 2 View the processor ID.

## Serial number

This setting displays a read-only value of the serial number.

- 1 Enter the Diagnostics menu, and then select **Printer Setup**.
- 2 View the serial number.

## Model name

This setting displays the model name of the printer.

- 1 Enter the Diagnostics menu, and then select **Printer Setup**.
- 2 View the model name.

## Engine setting [x]

**Warning—Potential Damage:** Do not change this setting without specific instructions from the next level of support.

This setting allows you to select a printer engine setting. Possible values are 0–255. 0 is the default.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer Setup > Engine setting [x]**
- 2 Select a setting, enter a value, and then press  or touch **OK**.

## EP setup

**Warning—Potential Damage:** Do not change this setting without specific instructions from the next level of support.

This setting allows you to adjust the EP setup of the printer.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer Setup > EP setup**
- 2 Select a setting.

## Printer diagnostics and adjustments

### Sensor tests

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then touch **Printer diagnostics & adjustments**.
- 2 From the Sensor tests section, touch **Start**.  
A dialog listing the sensor tests appears.
- 3 Find, and then manually toggle the sensor.

#### Notes:

- The sensor status on the screen toggles between **1** and **0** when the sensor is properly working.
- If a sensor test fails, the test failure may not indicate a failed sensor. Further troubleshooting may be required. Check the boards and cables for possible issues.
- For the fuser exit sensor actuator, toggle it toward the rear door.

### List of sensor tests

MPF media present
Media out (tray 1)
Pick roller index (tray 1)
Pick (tray 1)
Tray 1 pass-through
Input
Narrow media
Fuser exit
Duplex path
Duplex interlock
Output bin full
Front door interlock
Rear door interlock
Media size (tray [x]) switch [x]

### Motor tests

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer diagnostics & adjustments > Motor tests**
- 2 Select a motor, and then touch **Start**.

**Notes:**

- If the motor is activated, then it is properly working.
- Some motors require automatic deactivation to avoid secondary issues such as possible damage and contamination.
- Some tests require a special action to activate a motor such as removing a major component.
- If the motor fails, the test failure may not indicate a failed motor. Further troubleshooting may be required. Check the boards and cables for possible issues.
- To stop a running motor in non-touch-screen printer models, press .

**List of motor tests**

MPF pick
Pick (tray 1) picking
Pick (tray 1) lifting
Fuser (fusing)
Fuser (retracting)
Duplex
Redrive (forward)
Redrive (reverse)
Imaging unit
K toner add
Fan (main)
Fan (cartridge)

**Registration adjust**

This setting lets you adjust the skew, margins, or perform a Quick Test.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer diagnostics & adjustments > Registration adjust**
- 2 Select a setting to adjust.

**Add-on cards tests**

This setting allows you to test the add-on cards installed on the printer.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer diagnostics & adjustments > Add-on cards tests**
- 2 Select a card.

## Margin Offset

This setting allows you to adjust the margin offset and to print or reset the default settings.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer diagnostics & adjustments > Margin Offset**
- 2 Select a setting.

## Universal Override

This setting allows the user to feed custom media sizes to a Custom Media Tray.

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then navigate to:  
**Printer diagnostics & adjustments > Universal Override**
- 2 Select a setting to adjust.

## Additional input tray diagnostics

### Sensor tests

For non-touch-screen printer models, press  to navigate through the settings.

- 1 Enter the Diagnostics menu, and then touch **Additional input tray diagnostics**.
- 2 From the Sensor tests section, touch **Start**.  
A dialog listing the sensor tests appears.
- 3 Find, and then manually toggle the sensor.

#### Notes:

- The sensor status on the screen toggles between **1** and **0** when the sensor is properly working.
- If a sensor test fails, the test failure may not indicate a failed sensor. Further troubleshooting may be required. Check the boards and cables for possible issues.

### List of sensor tests

Pick roller index (tray [x])
Media out (tray [x])
Pass-through (tray [x])
Media size (tray [x]) switch [x]
Pick (tray [x])

## Motor tests

For non-touch-screen printer models, press  to navigate through the settings.

**1** Enter the Diagnostics menu, and then navigate to:

**Additional input tray diagnostics > Motor tests**

**2** Select a motor, and then press  or touch **Start**.

### Notes:

- If the motor is activated, then it is properly working.
- Some motors require automatic deactivation in order to avoid secondary issues such as possible damage and contamination.
- Some tests require a special action to activate a motor such as removing a major component.
- If the motor fails, the test failure may not indicate a failed motor. Further troubleshooting may be required. Check the boards and cables for possible issues.

## Output device diagnostics

### Sensor tests

For non-touch-screen printer models, press  to navigate through the settings.

**1** Enter the Diagnostics menu, and then navigate to:

**Output device diagnostics > Sensor tests**

**2** Select the output device where the sensor is located.

**3** Find, and then manually toggle the sensor.

### Notes:

- The sensor status on the screen toggles between **1** and **0** when the sensor is properly working.
- If a sensor test fails, the test failure may not indicate a failed sensor. Further troubleshooting may be required. Check the boards and cables for possible issues.

## Config Menu

Menu item	Description
<b>USB Configuration</b> USB PnP 1* 2	Change the USB driver mode of the printer to improve its compatibility with a personal computer.
<b>Note:</b> An asterisk (*) next to a value indicates the factory default setting.	

Menu item	Description
<b>USB Configuration</b> USB Speed Full Auto*	Set the USB port to run at full speed and disable its high-speed capabilities.
<b>Tray Configuration</b> Tray Linking Automatic* Off	Set the printer to link the trays that have the same paper type and paper size settings.
<b>Tray Configuration</b> Show Tray Insert Message Off Only for unknown sizes* Always	Set the printer to show the <b>Tray Insert</b> message.
<b>Tray Configuration</b> A5 Loading Short Edge* Long Edge	Specify the page orientation when loading for A5 paper size.
<b>Tray Configuration</b> Paper Prompts Auto* Multipurpose Feeder Manual Paper Envelope Prompts Auto* Multipurpose Feeder Manual Envelope	Set the paper source that the user will fill when a prompt to load paper or envelope appears.  <b>Note:</b> For Multipurpose Feeder to appear, set Configure MP to Cassette from the Paper menu.
<b>Tray Configuration</b> Action for Prompts Prompt user* Continue Use current	Set the printer to resolve paper- or envelope-related change prompts.
<b>Reports</b> Menu Settings Page Event Log Event Log Summary HealthCheck Statistics	Print reports about printer menu settings, printer events, and event logs.
<b>Supply Usage And Counters</b> Clear Supply Usage History Reset Black Cartridge Counter Reset Black Imaging Unit Counter Reset Black Developer Unit Counter Reset Maintenance Counter	Reset the supply page counter or view the total printed pages.
<b>Note:</b> An asterisk (*) next to a value indicates the factory default setting.	

Menu item	Description
<b>Printer Emulations</b> PPDS Emulation Off* On	Set the printer to recognize and use the PPDS data stream.
<b>Print Configuration</b> Font Sharpening 0–150 (24*)	Set a text point-size value below which the high-frequency screens are used when printing font data. For example, if the value is 24, then all fonts sized 24 points or less use the high-frequency screens.
<b>Print Configuration</b> Print Density 1–5 (3*)	Adjust the toner density when printing or copying documents.
<b>Device Operations</b> Quiet Mode Off* On	Set the amount of noise that the printer produces. <b>Note:</b> Enabling this setting slows the printer performance.
<b>Device Operations</b> Safe Mode Off* On	Set the printer to operate in a special mode, in which it attempts to continue offering as much functionality as possible, despite known issues. For example, when set to On, and the duplex motor is nonfunctional, the printer performs one-sided printing of the documents even if the job is two-sided printing.
<b>Device Operations</b> Clear Custom Status Off On*	Erase user-defined strings for the Default or Alternate custom messages.
<b>Device Operations</b> Clear all remotely-installed messages	Erase messages that were remotely installed.
<b>Device Operations</b> Automatically Display Error Screens On* Off	Show existing error messages on the display after the printer remains inactive on the home screen for a length of time equal to the Screen Timeout setting.
<b>Device Operations</b> Custom Supply Levels Off* On	Let <i>printservice</i> read and edit values from the Embedded Web Server.
<b>Note:</b> An asterisk (*) next to a value indicates the factory default setting.	

## Entering invalid engine mode

This mode is used if the machine has invalid code and needs the correct code loaded. After entering this mode, the firmware code can be updated.

- 1 Turn off the printer.
- 2 Press and hold the **3**, **4**, and **6** buttons simultaneously.
- 3 Turn on the printer.
- 4 Release the buttons after 10 seconds.

## Entering Recovery mode

This mode allows the printer to boot from a secondary set of instructions and flash firmware code. While in this mode, you can only flash firmware code through a USB cable directly connected to a PC.

Depending on your printer model, do any of the following:

### For LED display

- 1 Turn off the printer.
- 2 Open the front door.
- 3 Press and hold the **Stop** button.
- 4 Turn on the printer.
- 5 When all the icons flash, release the button.

### For 2-line display

- 1 Turn off the printer.
- 2 Press and hold the **OK** and **Back** buttons.
- 3 Turn on the printer.
- 4 When the display shows the following icon, release the buttons.

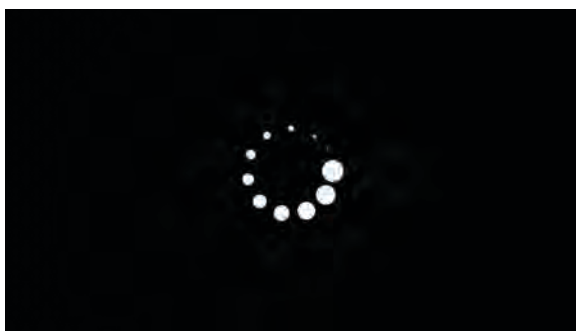

## For 2.4-, 4.3-, 7-, and 10-inch displays

- 1 Turn off the printer.
- 2 Press and hold the **2**, **7**, and **8** buttons.
- 3 Turn on the printer.
- 4 When the display shows the following icon, release the buttons.

## For 2.8-inch display

- 1 Turn off the printer.
- 2 Open tray 1.
- 3 Make sure that paper is loaded in tray 1.
- 4 Turn on the printer.
- 5 When the display shows the following icon, close tray 1.

**Note:** If tray 1 is not closed, then the printer will boot normally.

- 6 A screen with red selection items appears.  
Touch **->** to navigate to Recovery mode.
- 7 Touch **Boot** or **RECOVERY**.

# Service Engineer menu

## Entering the Service Engineer (SE) menu

To access the Service Engineer (SE) menu:

- 1 Turn on the printer.
- 2 When the home screen appears, press \* \* **411** on the control panel.

## General SE Menu

- Capture Logs to USB Drive
  - Note:** This setting allows you to save a log file to a USB drive.
- Code Versions
- Debug Level

## Network SE Menu

Enter the SE menu, and then select **Network SE Menu**.

**Note:** Use these settings as directed by the next level of support.

# Parts removal

## Removal precautions

-  **CAUTION—SHOCK HAZARD:** The low-voltage power supply (LVPS) and the high-voltage power supply (HVPS) may have residual voltage present. To avoid the risk of electrical shock, do not touch their circuit components or the solder side of the board. Only handle them by their outer edges or metal housing.
-  **CAUTION—SHOCK HAZARD:** This product uses a soft power switch. It does not physically disconnect the input AC voltage. To avoid the risk of electrical shock, always remove the power cord from the printer when removal of the input AC voltage is required.
-  **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock and to prevent damage to the printer, remove the power cord from the electrical outlet and disconnect all connections to any external devices before you connect or disconnect any cable, electronic board, or assembly.
-  **CAUTION—HOT SURFACE:** The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.
-  **CAUTION—PINCH HAZARD:** To avoid the risk of a pinch injury, use caution in areas marked with this label. Pinch injuries may occur around moving parts, such as gears, doors, trays, and covers.

## Précautions de retrait

-  **ATTENTION—RISQUE D'ELECTROCUTION :** Une tension résiduelle peut être présente dans le bloc d'alimentation basse tension (LVPS) et le bloc d'alimentation haute tension (HVPS). Pour éviter tout risque d'électrocution, ne touchez pas les composants du circuit ou le côté soudure de la carte. Tenez-les uniquement par leurs extrémités ou le boîtier en métal.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** Ce produit utilise un commutateur d'alimentation logiciel. Il ne déconnecte pas physiquement la tension d'alimentation CA. Pour éviter tout risque d'électrocution, débranchez toujours le cordon d'alimentation de l'imprimante lorsque vous devez déconnecter la tension d'alimentation CA.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** Pour éviter tout risque d'électrocution et éviter d'endommager l'imprimante, débranchez le cordon d'alimentation de la prise électrique et déconnectez toute connexion à tout périphérique externe avant de brancher ou débrancher des câbles ou circuits et assemblages électroniques.
-  **ATTENTION—SURFACE CHAUDE :** L'intérieur de l'imprimante risque d'être brûlant. pour réduire le risque de brûlure, laissez la surface ou le composant refroidir avant d'y toucher.
-  **ATTENTION : RISQUE DE PINCEMENT :** Pour éviter tout risque de blessure par pincement, agissez avec précaution au niveau des zones signalées par cette étiquette. Les blessures par pincement peuvent se produire autour des pièces mobiles telles que les engrenages, portes, tiroirs et capots.

## Precauciones durante la extracción

-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** La fuente de alimentación de bajo voltaje (LVPS) y la fuente de alimentación de alto voltaje (HVPS) pueden presentar voltaje residual. Para evitar el riesgo de descarga eléctrica, no toque los componentes del circuito ni el lateral soldado de la placa. Manipule solo los bordes exteriores o la carcasa metálica.

-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Este producto utiliza un interruptor de corriente de software. No desconecta físicamente la entrada de voltaje de CA. Para evitar el riesgo de descarga eléctrica, desenchufe siempre el cable de alimentación de la impresora cuando sea necesario retirar la entrada de voltaje de CA.
-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Para evitar el riesgo de descargas eléctricas y daños en la impresora, retire el cable de alimentación de la toma eléctrica y desconecte todas las conexiones a dispositivos externos antes de conectar o desconectar cualquier cable, placa electrónica o conjunto.
-  **PRECAUCIÓN: SUPERFICIE CALIENTE:** El interior de la impresora podría estar caliente. Para evitar el riesgo de heridas producidas por el contacto con un componente caliente, deje que la superficie se enfríe antes de tocarlo.
-  **PRECAUCIÓN: PELIGRO DE ATRAPAMIENTO:** Para evitar el riesgo de lesión por atrapamiento, preste atención en las áreas marcadas con esta etiqueta. Las lesiones por atrapamiento se pueden producir en torno a partes móviles, tales como engranajes, puertas, bandejas y cubiertas.

## Vorsichtsmaßnahmen bei der Demontage

-  **VORSICHT – STROMSCHLAGGEFAHR:** Im Niederspannungsnetzteil (LVSP) und Hochspannungsnetzteil (HVPS) liegt unter Umständen Restspannung vor. Um das Risiko eines elektrischen Schlags zu vermeiden, berühren Sie keine umliegenden Bauteile oder die Lötseite der Platine. Fassen Sie sie nur an den Außenkanten oder am Metallgehäuse an.
-  **VORSICHT – STROMSCHLAGGEFAHR:** Dieses Produkt verwendet einen weichen Netzschalter. Er trennt die Eingangswchselspannung nicht physisch. Um das Risiko eines elektrischen Schlags zu vermeiden, ziehen Sie stets das Netzkabel vom Drucker ab, wenn eine Abtrennung der Eingangswchselspannung erforderlich ist.
-  **VORSICHT – STROMSCHLAGGEFAHR:** Um das Risiko eines elektrischen Schlags und Schäden am Drucker zu vermeiden, ziehen Sie das Netzkabel aus der Steckdose und trennen Sie alle Verbindungen zu jeglichen externen Geräten, bevor Sie Kabel, Elektronikplatinen oder Baugruppen einstecken oder abziehen.
-  **VORSICHT – HEISSE OBERFLÄCHE:** Das Innere des Druckers kann sehr heiß sein. Vermeiden Sie Verletzungen, indem Sie heiße Komponenten stets abkühlen lassen, bevor Sie ihre Oberfläche berühren.
-  **VORSICHT – QUETSCHGEFAHR:** Um das Risiko einer Quetschung zu vermeiden, gehen Sie in Bereichen, die mit diesem Etikett gekennzeichnet sind, mit Vorsicht vor. Quetschungen können im Bereich von beweglichen Komponenten auftreten, wie z. B. Zahnrädern, Klappen, Fächern und Abdeckungen.

## Data security notice

### Identifying printer memory

- **Volatile memory**—The printer uses standard random access memory (RAM) to buffer user data temporarily during simple print and copy jobs.
- **Nonvolatile memory**—The printer may use two forms of nonvolatile memory: EEPROM and NAND (flash memory). Both types are used to store the operating system, printer settings, network information, scanner and bookmark settings, and embedded solutions.

- **Hard disk memory**—Some printers have a hard disk drive installed. The hard disk is designed for printer-specific functionality and cannot be used for long-term storage of data that is not print-related. The hard disk does not let users extract information, create folders, create disk or network file shares, or transfer FTP information directly from a client device. The hard disk can retain buffered user data from complex print jobs, form data, and font data.

The following parts can store memory:

- Printer control panel
- User interface controller card (UICC)
- Controller board
- Optional hard disks

**Note:** The printer control panel and controller board contain NVRAM.

## Erasing printer memory

To erase volatile memory, turn off the printer.

To erase nonvolatile memory, do the following:

- 1 From the control panel, navigate to **Settings > Device > Maintenance > Out of Service Erase > Sanitize all information on nonvolatile memory**.
- 2 Select **Sanitize all information on nonvolatile memory**, and then select **ERASE**.
- 3 Follow the instructions on the screen.

To erase hard disk memory, do the following:

- 1 From the control panel, navigate to **Settings > Device > Maintenance > Out of Service Erase > Sanitize all information on hard disk**.
- 2 Select **Sanitize all information on hard disk**, and then select **ERASE**.
- 3 Follow the instructions on the screen.

**Note:** This process can take from several minutes to more than an hour, making the printer unavailable for other tasks.

If a hard disk is replaced, then do the following:

- 1 Remove the hard disk, and then return it to the customer.
- 2 Request the customer to sign the *Customer Retention* form.
 

**Note:** You can get printed copies of the form from your Lexmark partner manager.
- 3 Take a photo of the signed form, and then upload it to the Service Request debrief tool.
- 4 Fax or e-mail the signed form to the number or e-mail address shown at the bottom of the form.

## Handling ESD-sensitive parts

Many electronic products use parts that are known to be sensitive to electrostatic discharge (ESD). To prevent damage to ESD-sensitive parts, do the following:

- Turn off the printer before removing logic boards.
- Keep the parts in their original packing material until you are ready to install them into the printer.

- Make the least possible movements with your body to prevent an increase of static electricity from clothing fibers, carpets, and furniture.
- Put the ESD wrist strap on your wrist. Connect the wrist band to the system ground point. This action discharges any static electricity in your body to the printer.
- Hold the parts by their edge connector shroud. Do not touch its pins. If you are removing a pluggable module, then use the correct tool.
- If possible, keep all parts in a grounded metal cabinet.
- Do not place the parts on the printer cover or on a metal table. If you need to put down the parts, then put them into their packing material.
- Prevent parts from being accidentally touched by other personnel. Cover the printer when you are not working on it.
- Be careful while working with the parts when cold-weather heating is used. Low humidity increases static electricity.

## Critical information for controller board or control panel replacement

 **CAUTION—POTENTIAL INJURY:** The lithium battery in this product is not intended to be replaced. There is a danger of explosion if a lithium battery is incorrectly replaced. Do not recharge, disassemble, or incinerate a lithium battery. Discard used lithium batteries according to the manufacturer's instructions and local regulations.

 **ATTENTION—RISQUE DE BLESSURE :** La batterie lithium de ce produit n'est pas destinée à être remplacée. Il existe un risque d'explosion si une batterie lithium est placée de façon incorrecte. Ne rechargez pas, ne démontez pas et n'incinerez pas une batterie lithium. Mettez les batteries lithium usagées au rebut selon les instructions du fabricant et les réglementations locales.

 **PRECAUCIÓN: POSIBLES DAÑOS PERSONALES:** La batería de litio de este producto no debe reemplazarse. Existe riesgo de explosión si se sustituye incorrectamente una batería de litio. No recargue, desmonte ni incinere una batería de litio. Deseche las baterías de litio según las instrucciones del fabricante y las normativas locales.

 **VORSICHT – MÖGLICHE VERLETZUNGSGEFAHR** Die Lithiumbatterie in diesem Produkt darf nicht ausgetauscht werden. Wird eine Lithiumbatterie nicht ordnungsgemäß ausgetauscht, besteht Explosionsgefahr. Lithiumbatterien dürfen auf keinen Fall wieder aufgeladen, auseinander genommen oder verbrannt werden. Befolgen Sie zum Entsorgen verbrauchter Lithiumbatterien die Anweisungen des Herstellers und die örtlichen Bestimmungen.

**Warning—Potential Damage:** Observe all precautions when handling ESD sensitive parts. See [“Handling ESD-sensitive parts” on page 399](#).

**Warning—Potential Damage:** Carefully remove cables and connectors. Make sure they are not damaged.

**Note:** Some models have eSF solutions, it is recommended to back up the eSF solutions and settings before replacing the controller board. See [“Backing up eSF solutions and settings” on page 406](#).

**Warning—Potential Damage:** To avoid damaging the part or experience NVRAM mismatch issues, replace only one of the following components at a time:

- Control panel
- Controller board

To replace a component and to test whether the problem is resolved:

- 1 Replace the affected component.

**Warning—Potential Damage:** Do not perform a Power-On Reset (POR) until the problem is resolved. If a POR is performed at this point, then the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 2 Enter the Diagnostics Menu. The Diagnostics Menu allows you to temporarily use the replacement part.

**Warning—Potential Damage:** Some printers will perform a POR automatically if the Diagnostics Menu is not opened within five seconds. If a POR is performed at this point, then the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 3 Use the Diagnostics Menu to test the replacement part. Do a feed test to check if the problem is resolved.

- If the problem is not resolved—Turn off the printer, and then reinstall the old part.
- If the problem is resolved—Perform a POR.
- If NVRAM error occurs during the replacement, go to [“NVRAM mismatch failure service check” on page 361](#)

## Restoring the printer configuration after replacing the controller board

Restore the printer to its correct configuration to complete the replacement service. Use the Service Restore Tool to download the software bundle, and then flash the printer settings and embedded solutions.

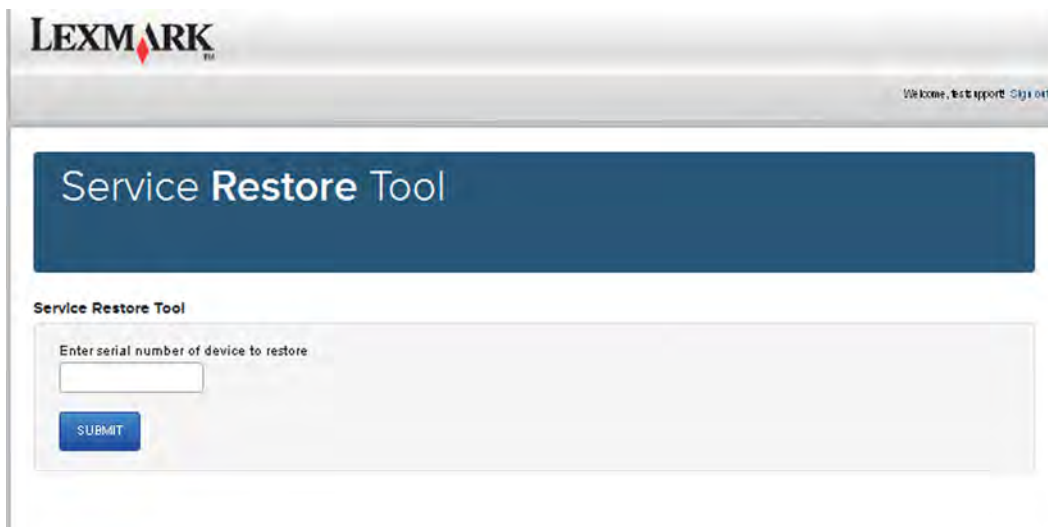

**Note:** Perform this procedure only if the printer has an eSF application that is installed from the Virtual Solution Center, during manufacturing, or through customization. If you do not have access to Service Restore Tool, then contact your next level of support.

**Note:** The software bundle contains the latest version of the firmware, applications, and software licenses from the Lexmark Virtual Solutions Center (VSC). The printer firmware may be at a different level from what was used before replacing the controller board.

### Using the Service Restore Tool

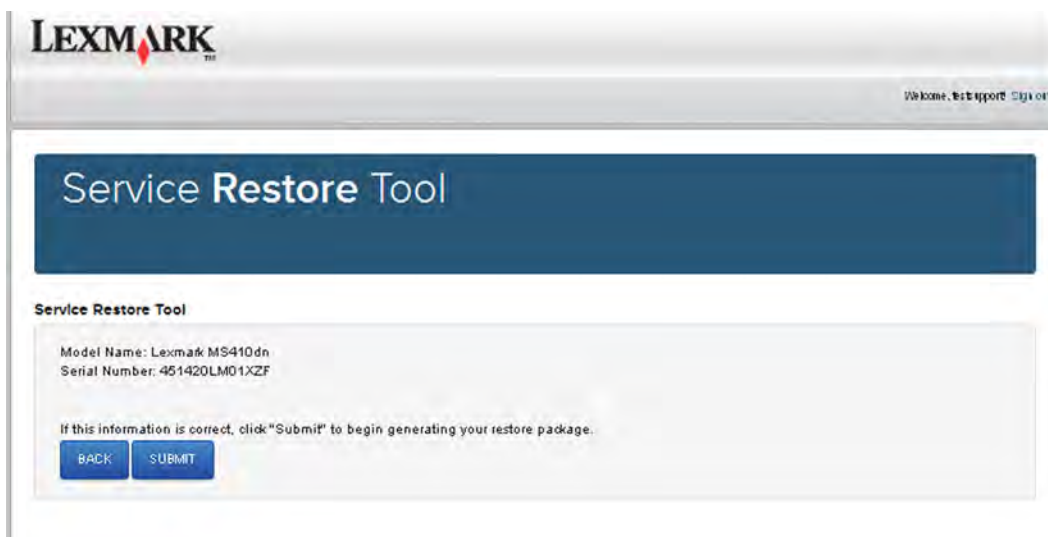

- 1 Go to <https://cdp.lexmark.com/service-restore-tool/> to access the tool.
- 2 Log in using your Lexmark or partner login.  
If your login fails, then contact your next level of support.

- 3 Enter the printer serial number, and then submit the information.

The screenshot shows the Lexmark Service Restore Tool interface. At the top left is the Lexmark logo. At the top right, there is a navigation bar with the text "Welcome, test support" and a "Sign out" link. Below this is a large blue header with the text "Service Restore Tool". Underneath the header, the text "Service Restore Tool" is repeated. A form area contains the instruction "Enter serial number of device to restore" above a text input field. Below the input field is a blue "SUBMIT" button.

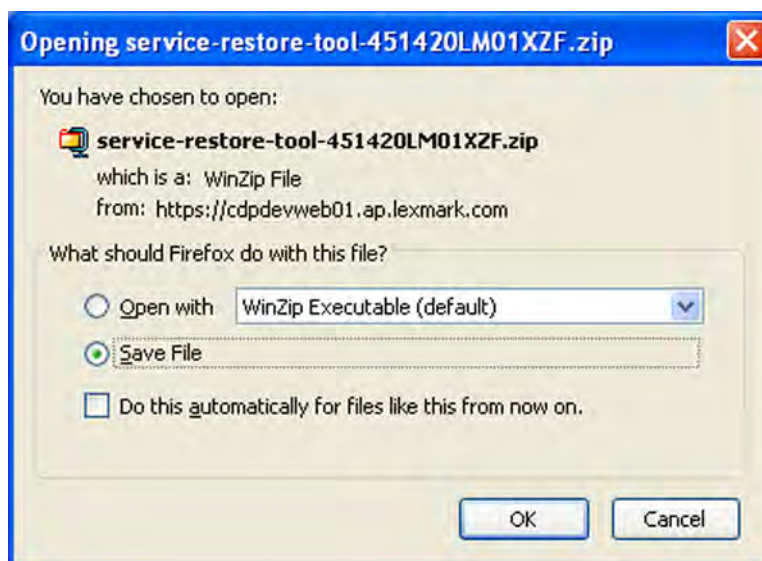

**Note:** Make sure that the serial number that appears on the verification screen is correct.

The screenshot shows the Lexmark Service Restore Tool interface at the verification stage. At the top left is the Lexmark logo. At the top right, there is a navigation bar with the text "Welcome, test support" and a "Sign out" link. Below this is a large blue header with the text "Service Restore Tool". Underneath the header, the text "Service Restore Tool" is repeated. The form area displays the following information: "Model Name: Lexmark MS410dn" and "Serial Number: 451420LM01XZF". Below this information is the instruction "If this information is correct, click 'Submit' to begin generating your restore package." At the bottom of the form area are two blue buttons: "BACK" and "SUBMIT".

- 4 Save the zip file.

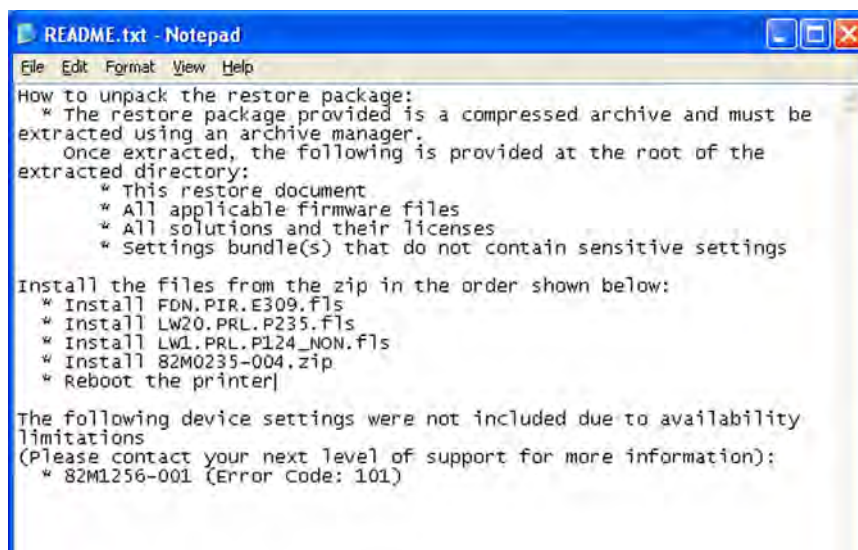

**Note:** Make sure that the serial number in the zip file matches the serial number of the printer being restored.

5 Extract the contents of the zip file, open the *Readme* file, and then follow the instructions in the file.

**Notes:**

- Perform the install instructions on the *Readme* file in the exact order shown. Restart the printer only if the file says so.
- For more information on how to flash the downloaded files, see [“Updating the printer firmware” on page 405](#).
- To load the zip files that are extracted from the Service Restore Tool, see [“Restoring solutions, licenses, and configuration settings” on page 404](#).

6 After performing the installation instructions in the *Readme* file, confirm from the customer if all the eSF apps have been installed.

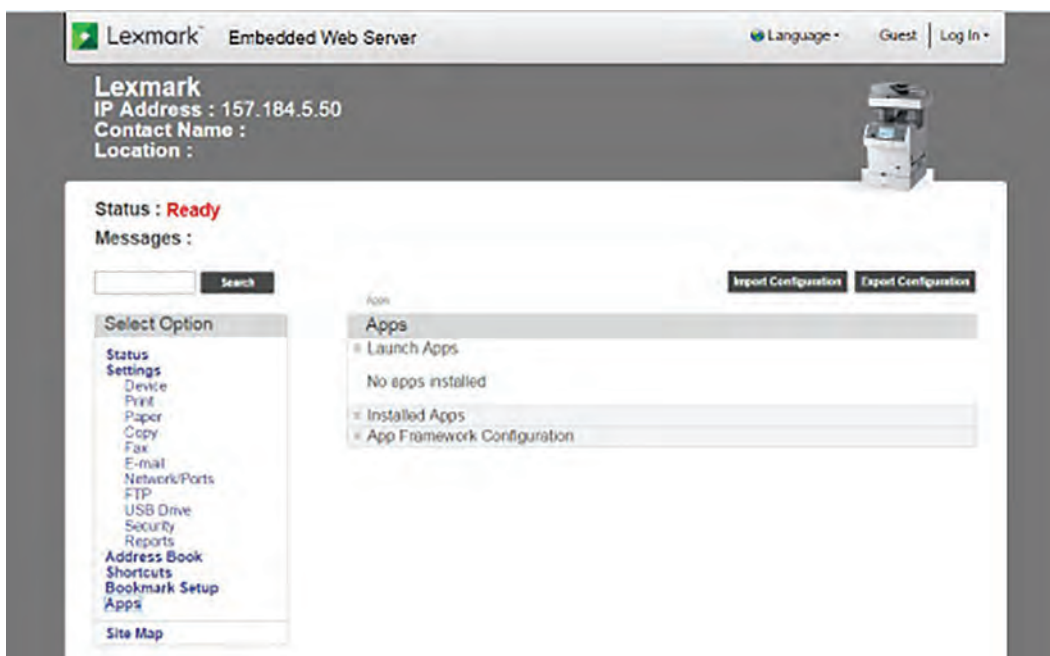

**Notes:**

- If you are unable to access the administrative menus to verify that the printer is restored, then ask the customer for access rights.
- If a 10.00 error appears after you restart the printer, then contact the next level of support.

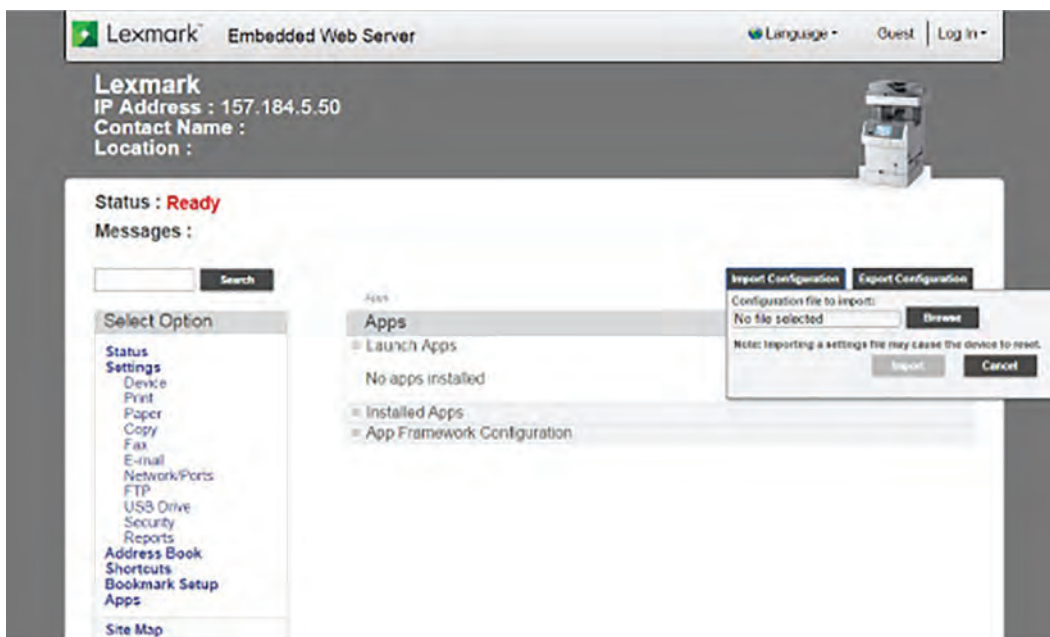

## Restoring solutions, licenses, and configuration settings

To load the zip files that are extracted from the Service Restore Tool, do the following:

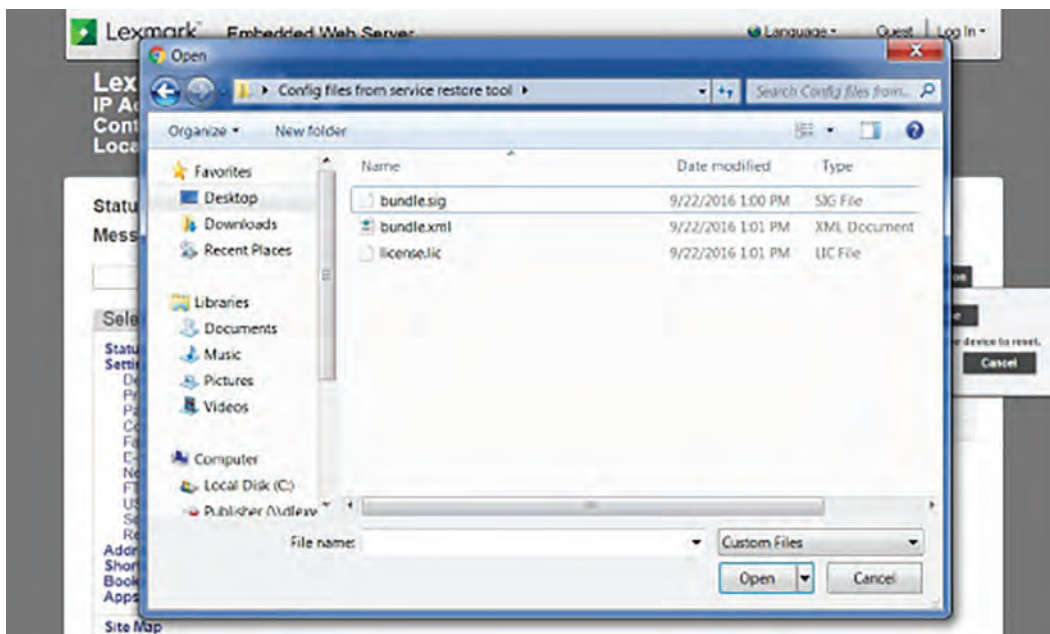

- 1 Open a web browser, and then type the printer IP address.

- 2 Click **Import Configuration**, and then click **Browse**.

- 3 Navigate to the folder where the zip files are extracted from the Service Restore Tool.

- 4 Select the file to import, and then click **Import**.
- 5 Repeat step 2 through step 4 for the other files that are included in the extracted zip file.

## Updating the printer firmware

**Warning—Potential Damage:** Before updating the printer firmware, ask the next level of support for the correct code. Using an incorrect code level may damage the printer.

### Using a flash drive

**Note:** The printer must be in ready state to update the firmware.

This option is available only in printer models with front USB port.

- 1 Insert the flash drive into the USB port.
- 2 Depending on the printer model, do any of the following:
  - From the control panel, navigate to **USB Menu: Print from USB > Accept** or **OK**, and then select the file that you need to flash.
  - Select the firmware file.

**Note:** Do not turn off the printer while the update is going on.

### Using a network computer

#### Using the File Transfer Protocol (FTP)

**Note:** The printer must be in ready state to update the firmware.

- 1 Turn on the printer.
- 2 Obtain the IP address from the home screen.

- 3 From the command prompt of a network computer, open an FTP session to the printer IP address.
- 4 Use a PUT command to place the firmware file on the printer.  
The printer performs a POR sequence and terminates the FTP session.

### Using the Embedded Web Server

**Note:** The printer must be in ready state to update the firmware.

- 1 Open a web browser, and then type the printer IP address.
- 2 Click **Settings > Device > Update Firmware**.
- 3 Select the file to use.  
The printer performs a POR sequence and terminates the EWS session.

### Using a USB cable connection

**Note:** Make sure that the cable is connected to the rear USB port.

#### Using USB Flash Utility

- 1 Go to [support.lexmark.com](http://support.lexmark.com), and then download USB Flash Utility.
- 2 Extract, and then run the utility.
- 3 Click **Browse Files**, and then browse to the firmware file directory.
- 4 Select the firmware file.
- 5 Select the source printer.
- 6 Click **Start**.

#### Using USButil

- 1 Go to [support.lexmark.com](http://support.lexmark.com), and then download USButil.
- 2 Extract, and then drag and drop the firmware file onto the USButil icon.
- 3 A command prompt window appears briefly.  
**Note:** Make sure to disconnect other USB devices when using USButil.

## Backing up eSF solutions and settings

**Note:** Export the eSF solutions and settings from the printer before replacing the controller board.

### Exporting eSF solutions and settings file

- 1 Reset the printer into Invalid engine mode. See [“Entering invalid engine mode” on page 393](#).
- 2 Open a web browser, and then type the printer IP address.  
**Note:** If the web page cannot be accessed or an error occurs when starting the printer into Invalid engine mode, then data backup is not an option. Inform the customer that the data cannot be saved.
- 3 Navigate to **Settings > Solutions > Embedded Solutions**.

4 From the Embedded Solutions page, select the applications that you want to export.

5 Click **Export**.

**Note:** The size limit of the export file is 128 KB.

### Importing eSF solutions and settings file

After replacing the controller board, import back to the printer the eSF solutions and settings that were exported.

1 Reset the printer into Invalid engine mode. See [“Entering invalid engine mode” on page 393](#).

2 Open a web browser, and then type the printer IP address.

**Note:** If the web page cannot be accessed or an error occurs when starting the printer into Invalid engine mode, then data backup is not an option. Inform the customer that the data cannot be saved.

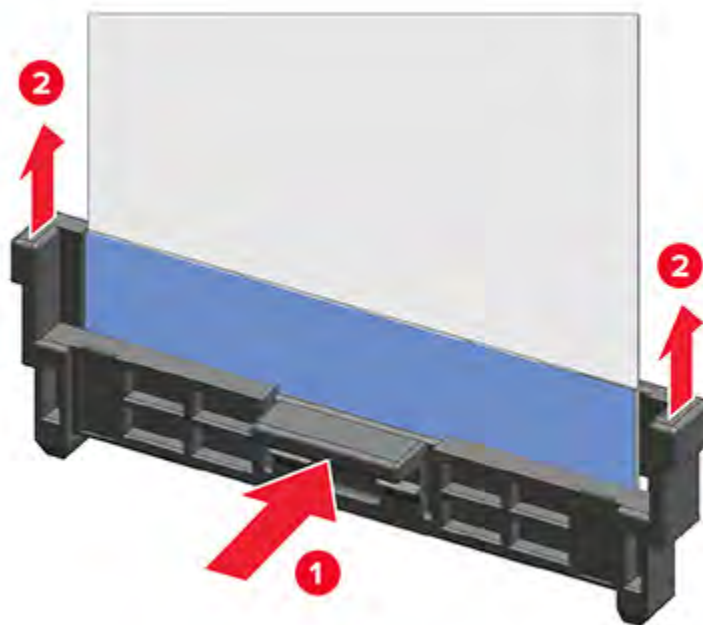

3 Navigate to **Settings > Solutions > Embedded Solutions**.

4 From the Embedded Solutions page, select the applications that you want to import.

5 Click **Import**.

### Disconnecting ribbon cables

**Warning—Potential Damage:** The ribbon cable and its socket may get damaged if it is not properly disconnected. When disconnecting the cable, hold its connector and press its tab before unplugging it.

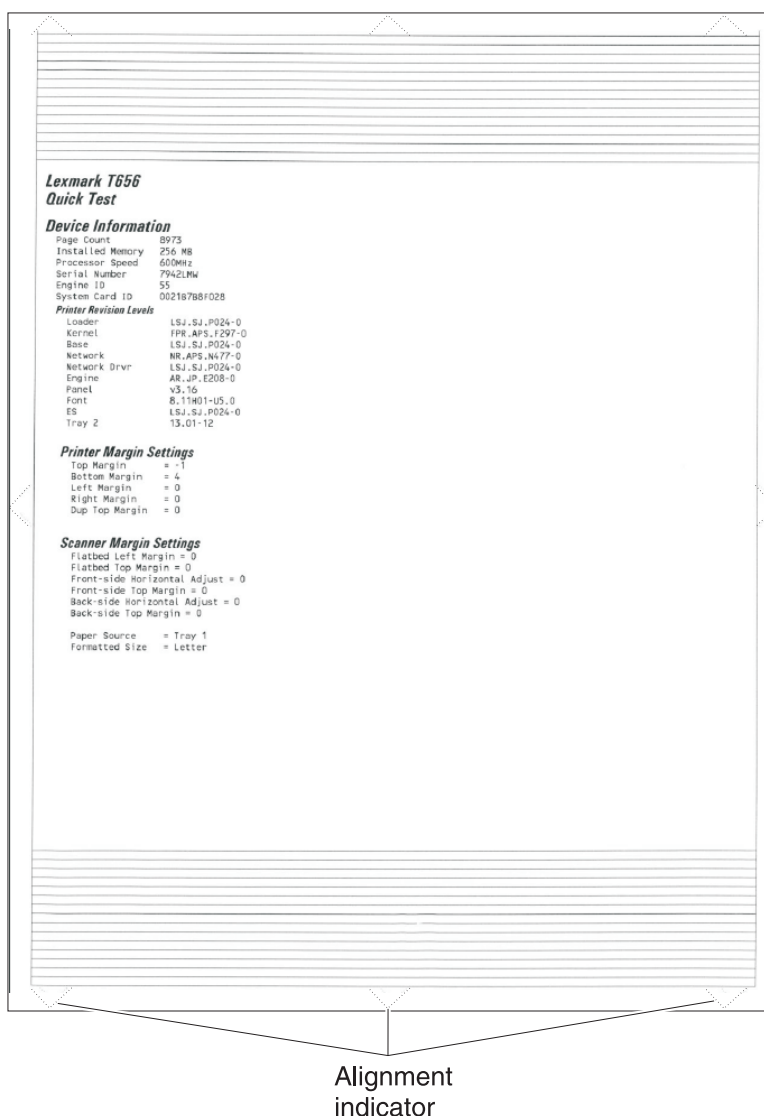

# Adjustments

## Registration adjustment

The allowable image skew on the test page is one dot (0.5 mm) or less delta measured between the left and right alignment indicators for the top and bottom margins.

**Note:** The following sample test page shows the alignment indicators at the bottom margin.

The amount of skew may vary from sheet to sheet, so multiple test pages may need to be printed.

## Generating a test page for margin alignment

**Note:** Before printing a test page, make sure that the paper guides on the source tray are positioned correctly. The test page should be printed only on Letter or A4 paper from tray 1.

**1** From the home screen, press **\*\*36** to enter the Diagnostics menu.

**2** Navigate to:

**Printer diagnostics & adjustments > Registration adjust > Quick test**

A test page showing the margins is generated.

**3** Review the test page to check for skews at the alignment indicators.

- The alignment indicator arrows must be completely visible along the edge.
- The tip of the arrows must point to the edge.

If the top margin is skewed (or if the aligner rollers have been replaced), then see [“Aligner roller adjustment” on page 409](#).

If both the top and bottom margins are skewed (or mostly the bottom margin), then do the following:

- Adjust the aligner roller to make the leading edge parallel with the trailing edge. See [“Aligner roller adjustment” on page 409](#).
- Adjust the printhead to align both margins. See [“Polygon printhead mechanical registration adjustment” on page 412](#).
- The aligner roller may need adjustment again after the bottom skew is aligned.

## Aligner roller adjustment

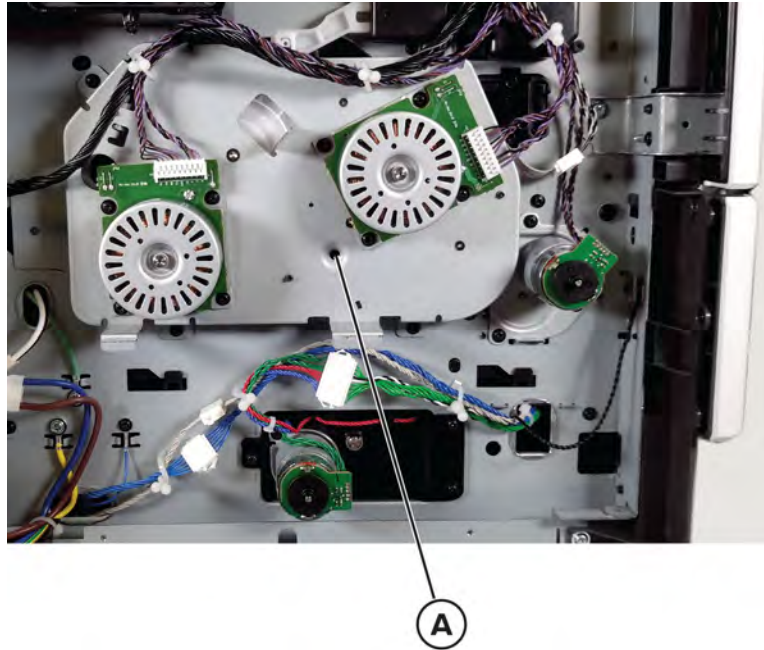

Perform the aligner roller adjustment after replacing the aligner roller. Always print a copy of the Quick Test Page before making any adjustments to the aligner roller.

**Note:** When replacing the aligner roller, unscrew the reference adjustment screw just far enough to remove the old aligner roller and install the new one. It is not necessary to completely remove the screw.

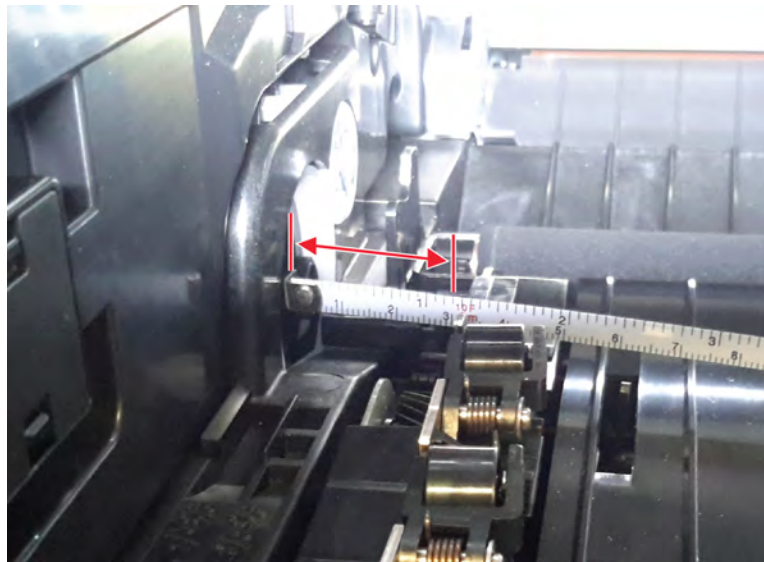

- If you have just replaced the aligner roller, see Step A.
- If you are only correcting the top margin skew, see Step B.
- If you are correcting the bottom margin skew or both top and bottom margin skews, see Step C.

**Step A**

Set the initial position of the aligner roller plate using a 3-mm hex wrench at the aligner roller reference adjustment screw (A).

Adjust the screw until the aligner roller plate is offset by 31 mm as shown in the following image. This setting is the nominal point to minimize the amount of adjustment needed.

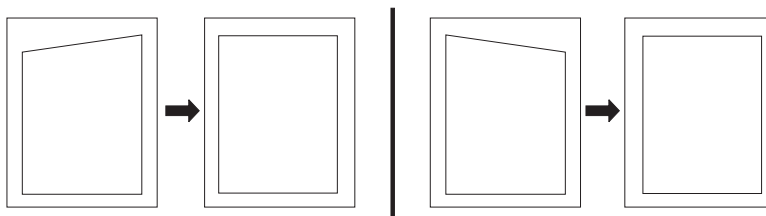

Continue to Step B.

## Step B

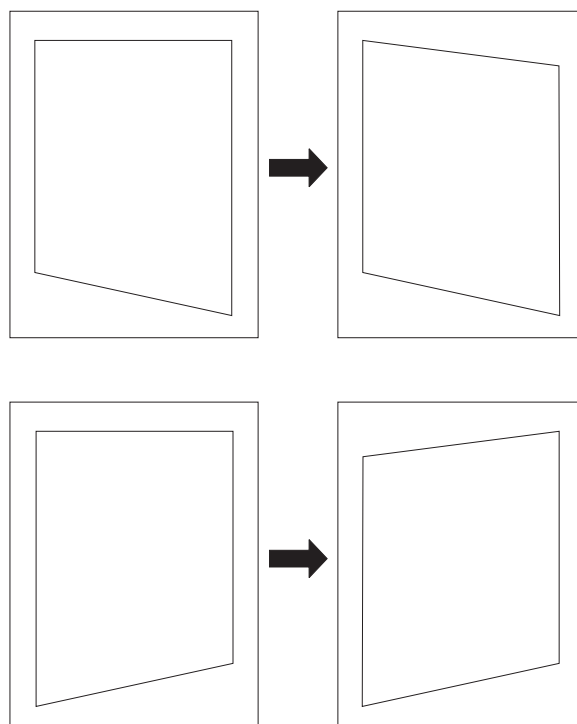

Print a Quick Test Page, and then check the top alignment indicators on the test page. The difference in the print location to the top edge of the paper between the left and right alignment indicators should be 0.5 mm (one dot) or less. Depending on the skew, turn the screw either clockwise or counterclockwise using a 3-mm hex wrench, and print a copy of the Quick Test Page to check the arrow indicators on the top and bottom margins. Continue adjusting the screw as you check the results of each adjustment on a new test page until the top image skew is below 0.5 mm. One full 360-degree turn of the aligner screw changes the top edge skew by roughly 1 mm (2 alignment indicator dots).

Adjustment is typically 0–2 rotations. More than 3–4 turns, in either direction from the 31 mm nominal spot, is not necessary and may indicate other issues with the tray (such as problems with the tray paper guides, pick rollers, or transfer roller). If the top and bottom skew are below 0.5 mm, then the alignment process is complete.

## Step C

Print a Quick Test Page, and then check the top and bottom alignment indicators on the test page. The goal is to make the skew at the top and bottom of the page parallel. Depending on the skew, turn the screw either clockwise or counterclockwise using a 3-mm hex wrench, and print a Quick Test Page to check the arrow indicators on the top and bottom margins. Continue adjusting the screw as you check the results of each adjustment on a new test page until you obtain the results you want. One full 360-degree turn of the aligner adjustment screw changes the leading edge skew by roughly 1 mm (2 alignment indicator dots).

After the aligner roller adjustment is done, perform the polygon printhead mechanical registration adjustment. See [“Polygon printhead mechanical registration adjustment” on page 412](#).

## Polygon printhead mechanical registration adjustment

Perform the printhead mechanical registration adjustment procedure after you remove or replace the printhead, or loosen the mounting screws.

Install the new printhead with the mounting screws lightly tightened before printing the Quick Test Page to see if adjustment is needed.

To perform the printhead mechanical registration adjustment:

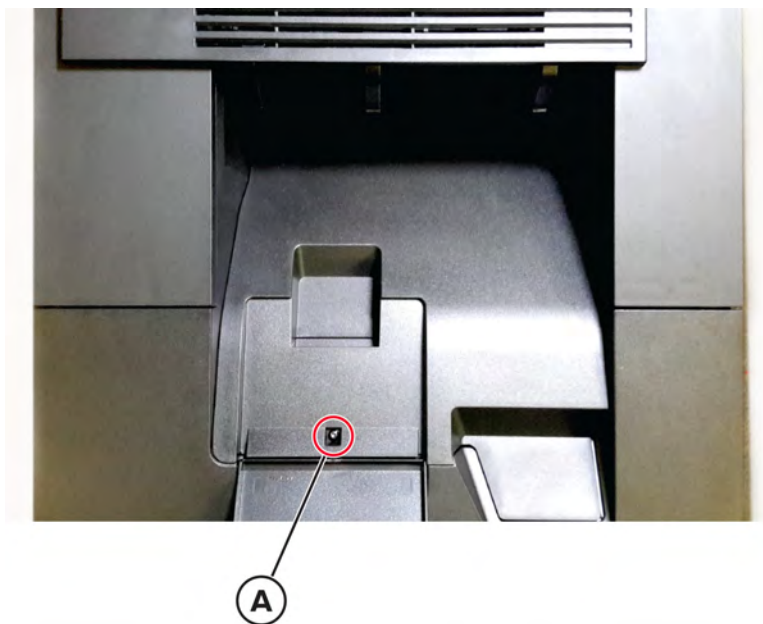

- 1 Print a Quick Test Page.

From the Diagnostics menu, navigate to:

**Printer diagnostics & adjustments > Registration adjust > Quick test**

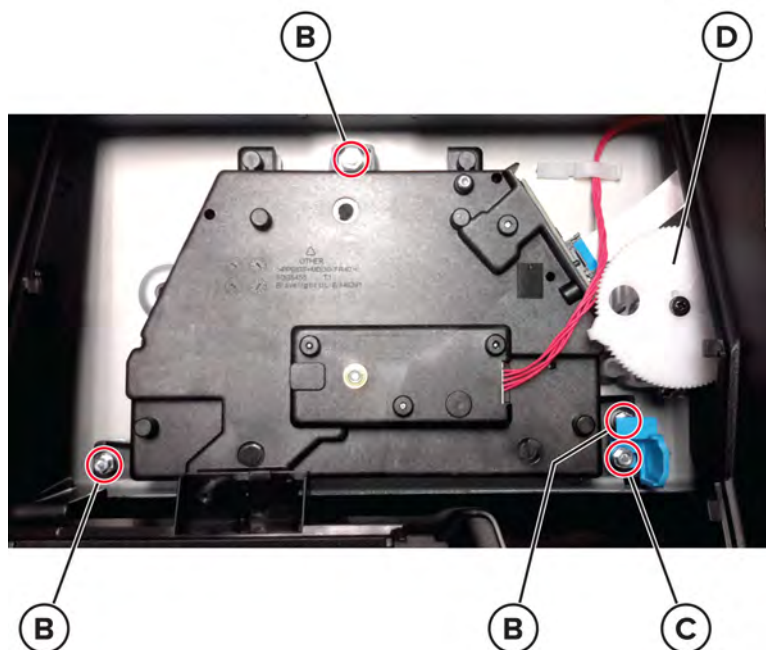

If the skew between the bottom left and bottom right alignment indicators is greater than 0.5 mm (1 dot), then proceed with adjustment. Otherwise, printhead adjustment is not needed.

- 2 Remove the screw (A) under the bin extender, and then remove the cover.

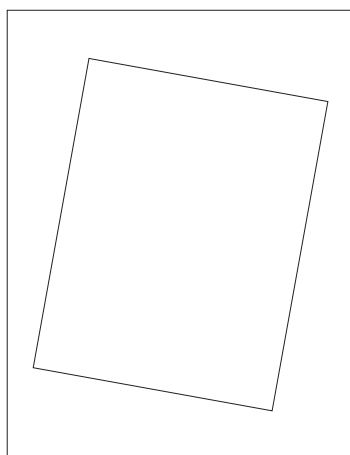

- 3 Loosen, by a half turn, each of the three printhead mounting screws (B) securing the printhead to the printer frame. Use a 5.5-mm hex-socket screwdriver.

- 4** Loosen the printhead alignment lock screw (C). With the printhead unlocked, its alignment can now be adjusted by the printhead adjustment wheel (D).

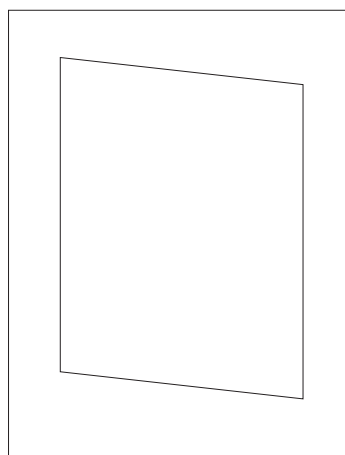

- 5** Check the Quick Test Page for any sign of misalignment by checking the alignment indicators at the bottom left and bottom right of the test page for equal distance from the bottom of the page. If necessary, rotate the printhead adjustment wheel either clockwise (to rotate the image clockwise) or counterclockwise (to rotate the image counterclockwise), and then print another Quick Test Page. You may need to repeat this step two times or more before you get satisfactory bottom skew results.

Paper feed  
skew

Printhead  
misalignment

<b>1</b>	To correct, turn the printhead adjustment wheel clockwise to rotate both edges clockwise.
<b>2</b>	To correct, turn the printhead adjustment wheel counterclockwise to rotate both edges counterclockwise.

**Warning—Potential Damage:** Do not rotate the printhead adjustment wheel at a full clockwise or counterclockwise turn.

**Warning—Potential Damage:** In some cases the adjustment process may take several cycles of tightening and loosening of the printhead mounting screws. Care should be taken to avoid stripping the mounting screw bosses. Use only a manual hex head screwdriver to avoid damage.

- 6 When you have the correct alignment, ensure that the printhead alignment screw is properly tightened, and then print a final Quick Test Page for verification.
- 7 Check the top edge skew and perform the aligner roller adjustment if required. See [“Aligner roller adjustment” on page 409](#).

## Removal procedures

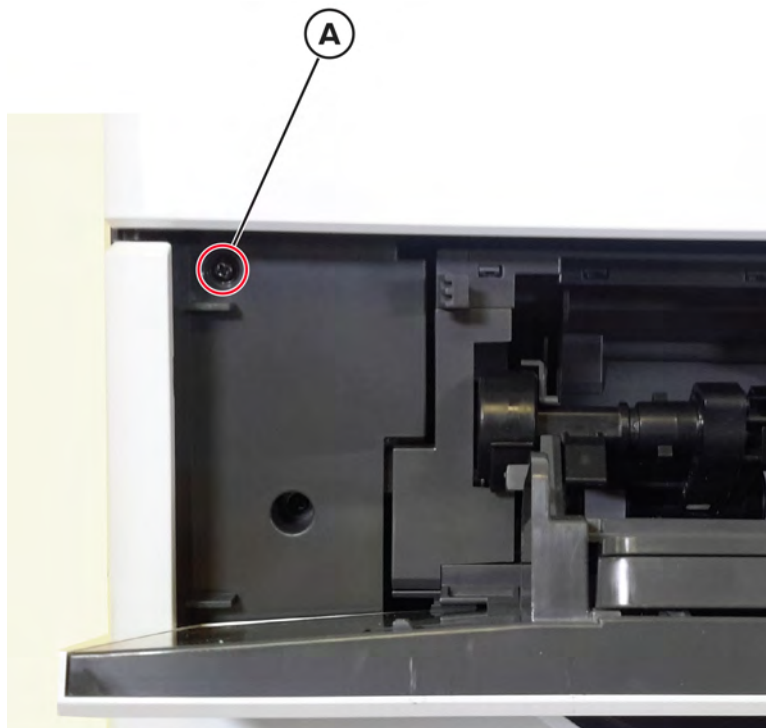

Keep the following tips in mind as you replace parts:

- Some removal procedures require removing cable ties. You must replace cable ties during reassembly to avoid pinching wires, obstructing the paper path, or restricting mechanical movement.
- Remove the toner cartridges, imaging kit, and trays before removing other printer parts. The imaging kit must be carefully set on a clean, smooth, and flat surface. It must also be protected from light while out of the printer.
- Disconnect all external cables from the printer to prevent possible damage during service.
- Unless otherwise stated, reinstall the parts in reverse order of removal.
- When reinstalling a part held with several screws, start all screws before the final tightening.
- For printers that have a soft power switch, make sure to unplug the power cord after powering off.

## Left side removals

### Left cover removal

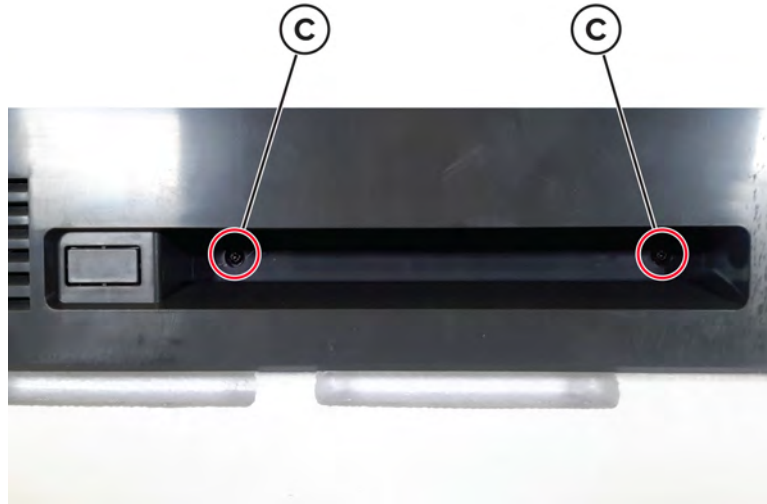

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Open the MPF door, and then remove the screw (A).

- 3 Remove the two upper screws (B).

- 4 Remove the two lower screws (C).

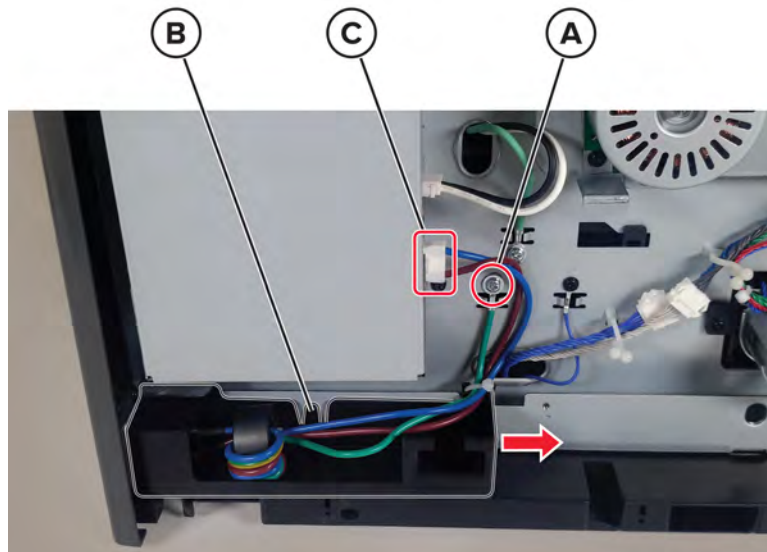

- 5 Remove the cover.

**Note:** For a video demonstration, see [Covers removal](#).

## AC power socket removal

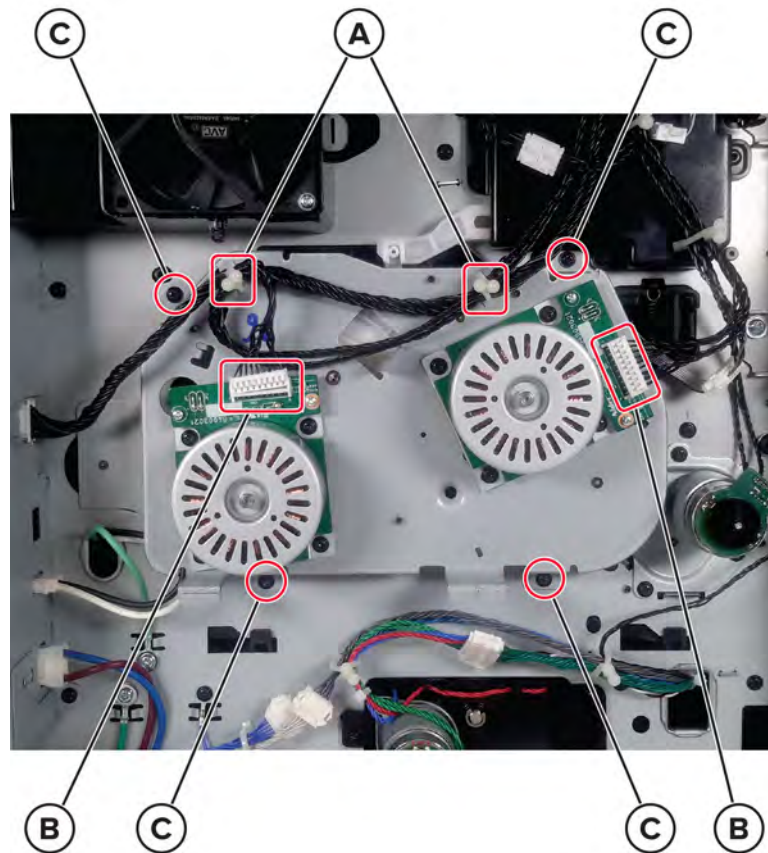

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the left cover. See [“Left cover removal” on page 415](#).
- 3 Remove the ground screw (A), release the latch (B), and then move the power connector to the front.
- 4 Disconnect the cable (C), and then remove the power socket.

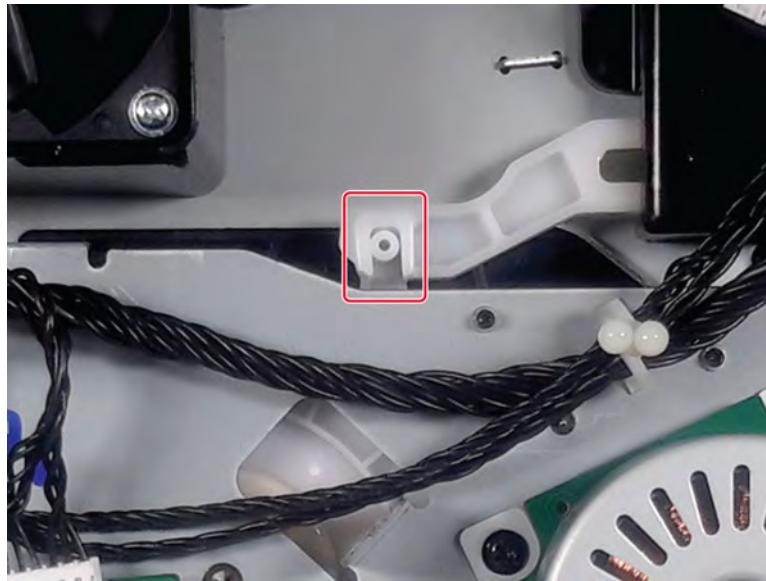

## Main motor drive removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the left cover. See [“Left cover removal” on page 415](#).
- 4 Release the cables from the cable holders (A), and then disconnect the two cables (B).
- 5 Remove the four screws (C), and then remove the motor drive.

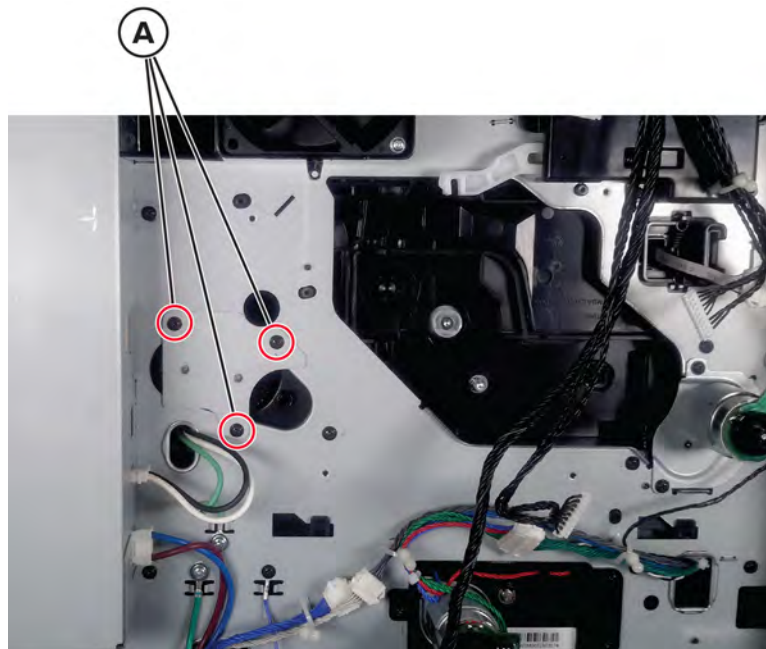

**Installation warning:** Make sure that the imaging unit is not reinstalled before the motor drive.

**Installation warning:** Make sure that the motor actuator and lever are properly engaged.

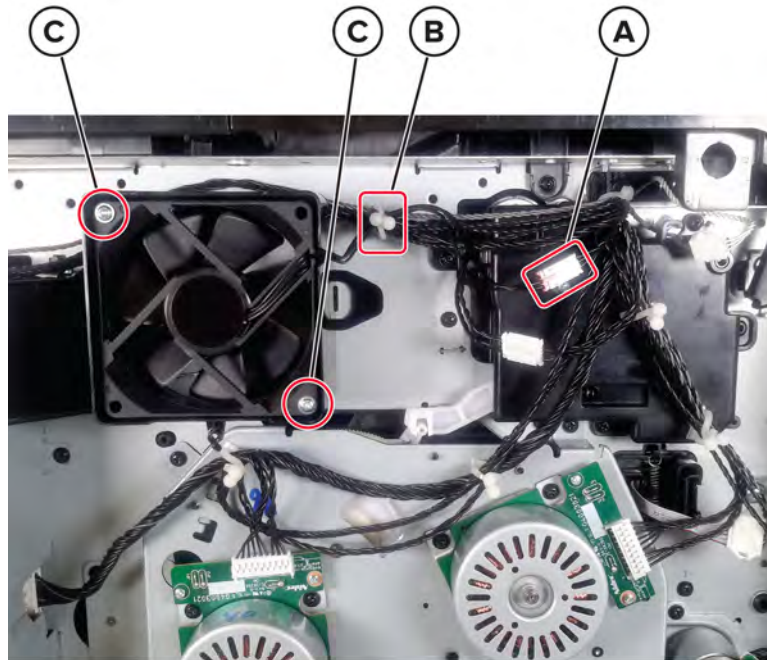

## Fuser drive gears removal

- 1 Remove the fuser. See [“Fuser removal” on page 458.](#)
- 2 Remove the top cover. See [“Top cover removal” on page 461.](#)
- 3 Remove the left cover. See [“Left cover removal” on page 415.](#)
- 4 Remove the main motor drive. See [“Main motor drive removal” on page 417.](#)
- 5 Remove the three screws (A), and then remove the drive gears.

## Main fan removal

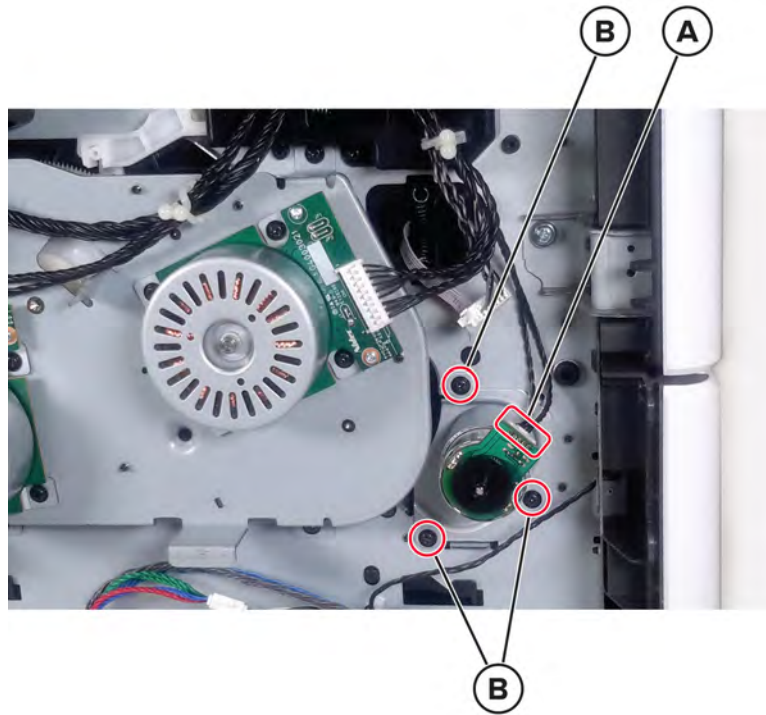

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the left cover. See [“Left cover removal” on page 415](#).
- 3 Disconnect the cable (A), and then release it from its holder (B).
- 4 Remove the two screws (C), and then remove the fan.

## Motor (MPF) removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the left cover. See [“Left cover removal” on page 415](#).

- 3 Disconnect the cable (A), and then remove the three screws (B).

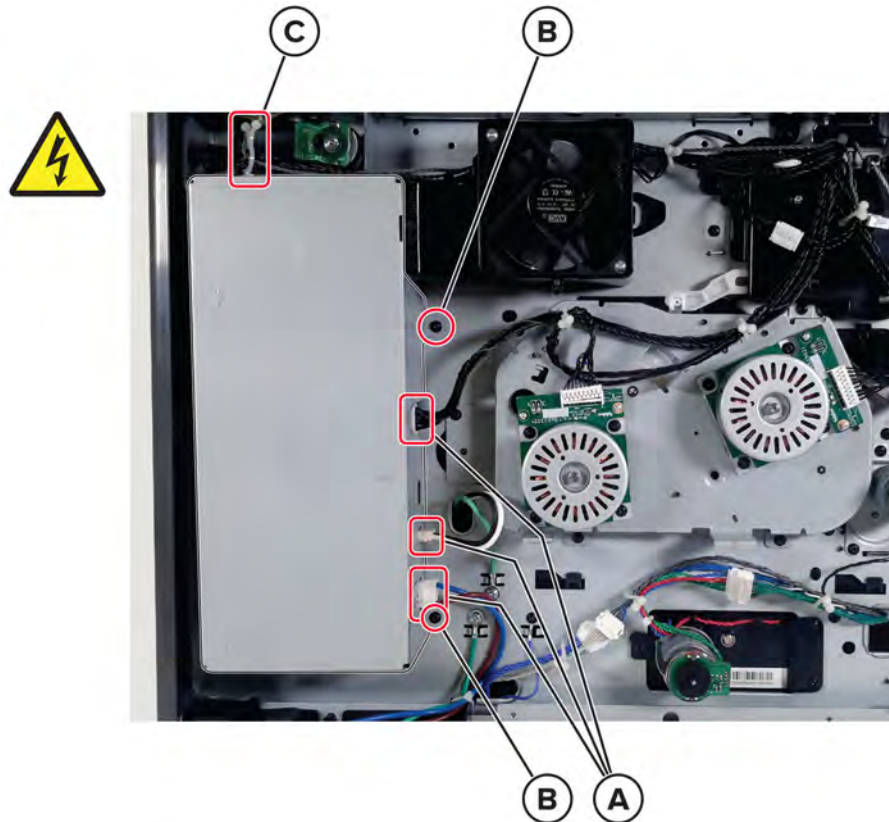

- 4 Remove the motor.

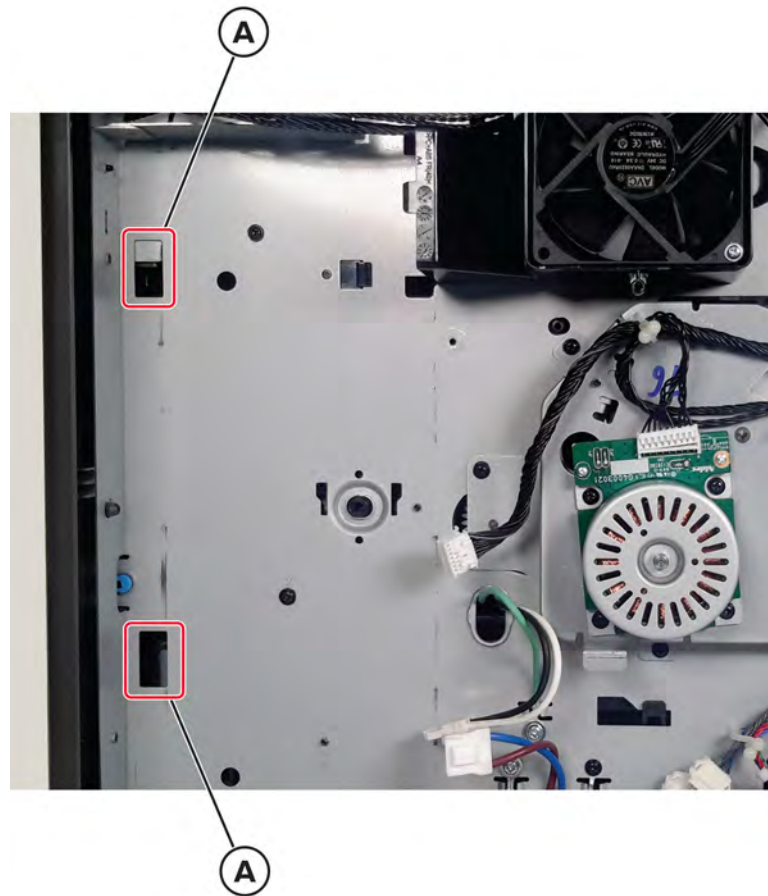

## LVPS removal

- 1 Turn off the printer, and then unplug the power cord from the electrical outlet.
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the left cover. See [“Left cover removal” on page 415](#).
- 4 Disconnect the three cables (A), and then remove the two screws (B).

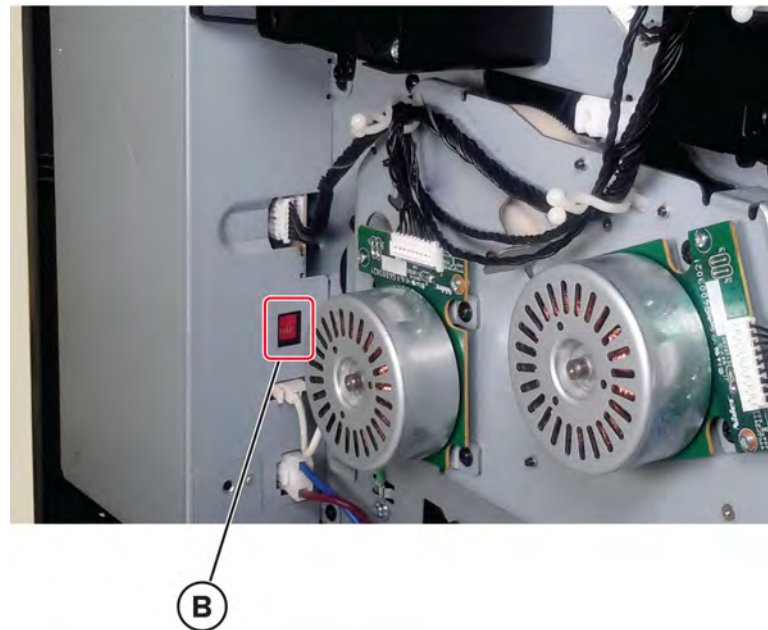

- 5 Release the cables from their holder (C), and then remove the LVPS.

**Installation note:** Make sure that LVPS tabs are properly engaged with their appropriate slots (A) on the printer frame.

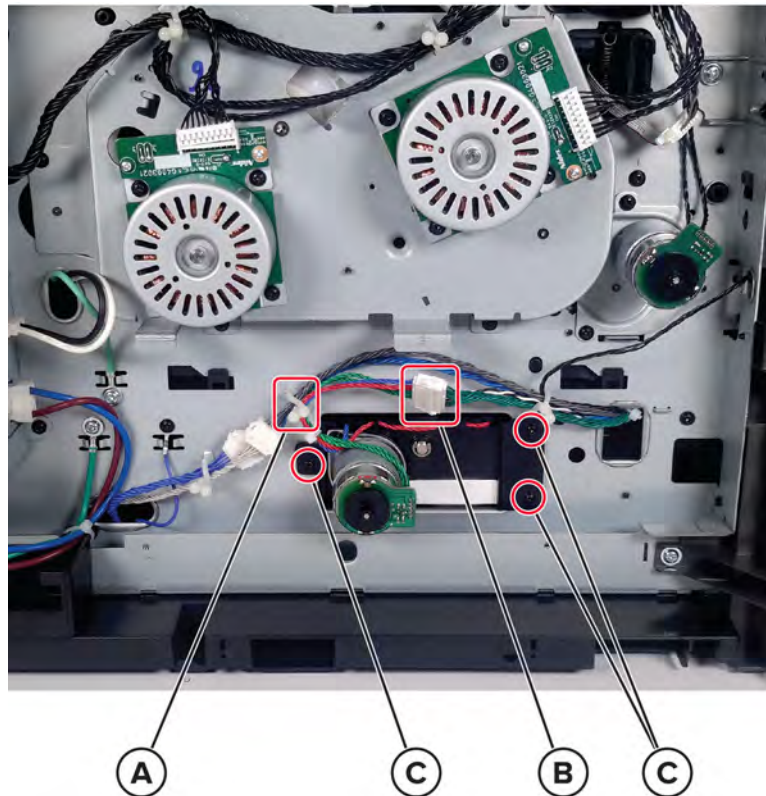

**Installation note:** Make sure that the voltage selector switch (B) is set to the proper voltage.

**Note:** For a video demonstration, see [LVPS removal](#).

## Paper feeder removal

- 1 Remove tray 1, and then remove the pick roller. See [“Pick roller removal” on page 471](#).
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the left cover. See [“Left cover removal” on page 415](#).
- 4 Release the cable holder (A), and then disconnect the cable (B).
- 5 Remove the three screws (C), and then remove the paper feeder.

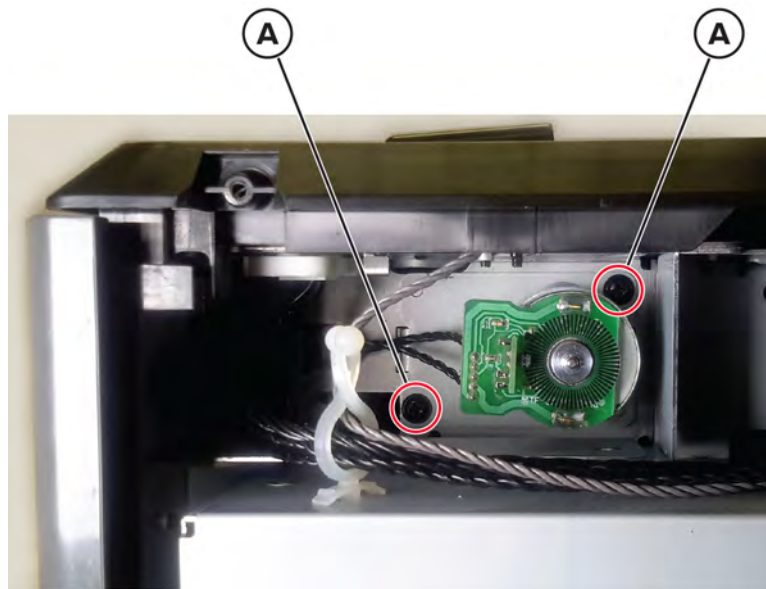

**Note:** For a video demonstration, see [Paper feeder removal](#).

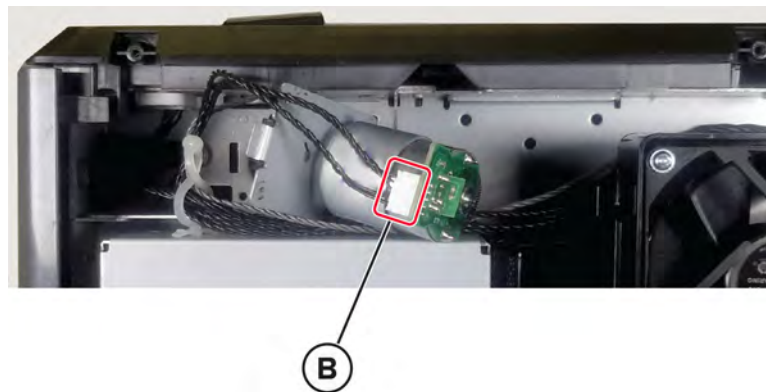

## Motor (redrive) removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the left cover. See [“Left cover removal” on page 415](#).
- 3 Remove the two screws (A), and then release the motor.

**Note:** If the top cover is not removed yet, then the motor cannot be released.

4 Swing the motor to the right, and then disconnect the cable (B).

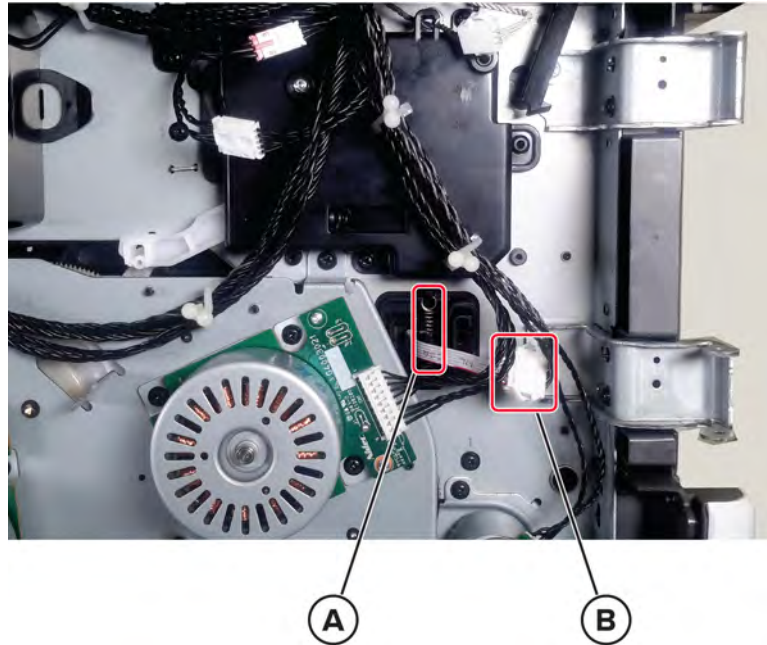

5 Remove the motor.

### Sensor (toner smart chip) removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the top cover. See [“Top cover removal” on page 461.](#)
- 3 Remove the left cover. See [“Left cover removal” on page 415.](#)

- 4 Unhook the toner smart chip spring (A), and then disconnect the sensor cable (B).

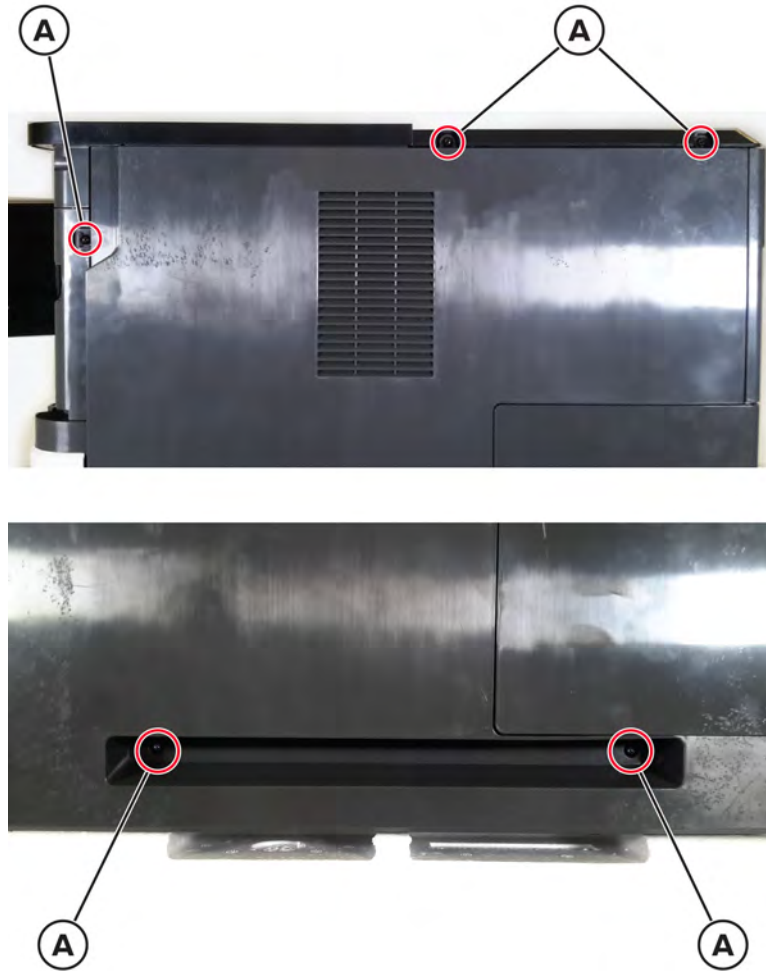

- 5 Remove the sensor.

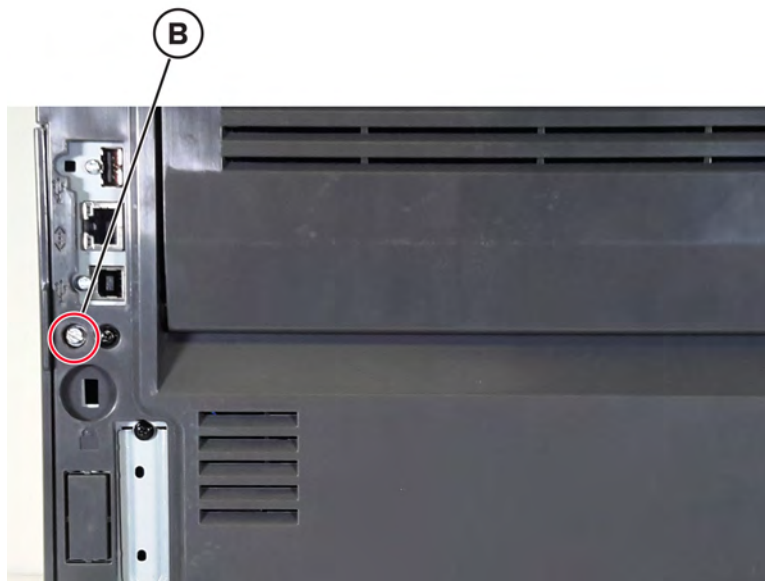

## Right side removals

### Right cover removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the five screws (A).

- 3 From the rear side, remove the screw (B).

- 4 Open the controller board access door, and then remove the screw (C).

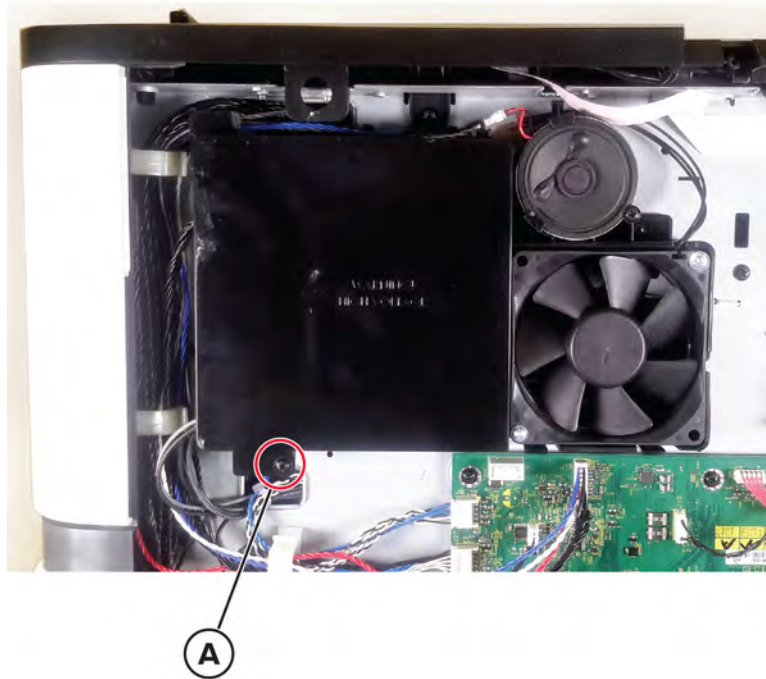

- 5 Remove the right cover.

**Note:** For a video demonstration, see [Covers removal](#).

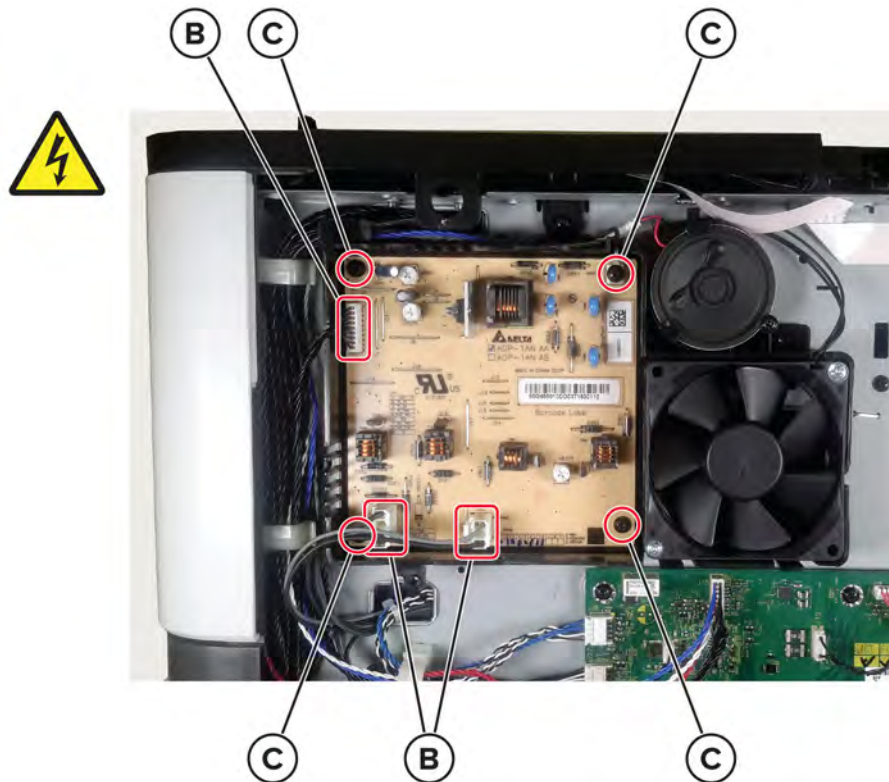

## HVPS removal

- 1 Turn off the printer, and then unplug the power cord from the electrical outlet.
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the right cover. See [“Right cover removal” on page 426](#).

4 Remove the screw (A), and then remove the HVPS shield.

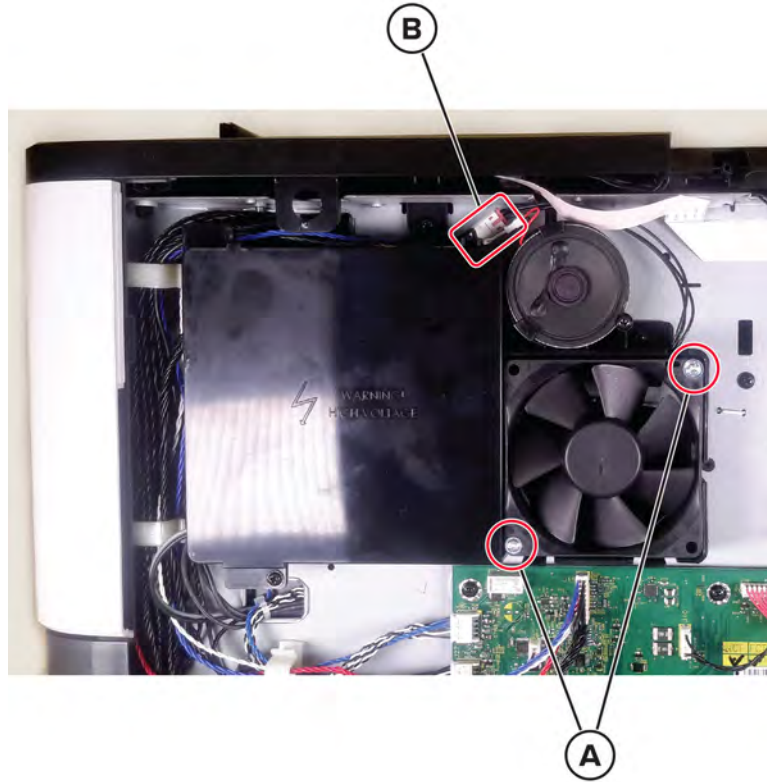

5 Disconnect the three cables (B), remove the four screws (C), and then remove the HVPS.

**Note:** For a video demonstration, see [HVPS removal](#).

## Cartridge fan removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the right cover. See [“Right cover removal” on page 426](#).
- 3 Remove the two screws (A), and then disconnect the cable (B).

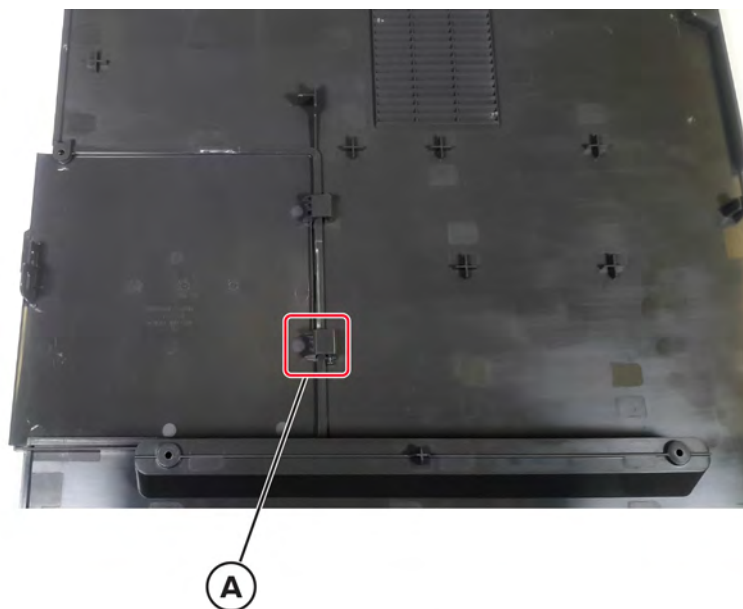

- 4 Remove the fan.

## Controller board access door removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the right cover. See [“Right cover removal” on page 426](#).

- 3 Release the hinge pivot (A), and then remove the door.

## Controller board removal

### Critical information for controller board or control panel replacement

**Warning—Potential Damage:** Replace only one of the following components at a time:

- Control panel
- Controller board

To replace a component, and to test whether the problem is resolved:

- 1 Replace the affected component.

**Warning—Potential Damage:** Do not perform a POR (Power-On Reset) until the problem is resolved. If a POR is performed at this point, the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 2 Enter the Diagnostics Menu. The Diagnostics Menu allows you to temporarily use the replacement part.

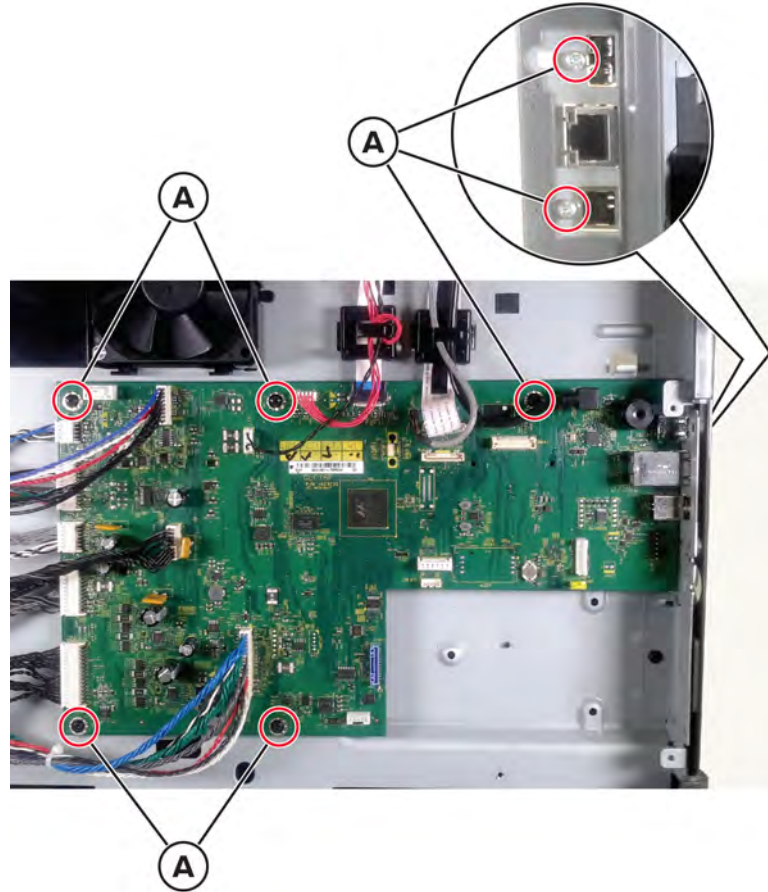

**Warning—Potential Damage:** Some printers will automatically perform a POR if the Diagnostics Menu is not opened within five seconds. If a POR is performed at this point, the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 3 Use the Diagnostics Menu to test the replacement part. Do a feed test to check if the problem is resolved.
  - If the problem is not resolved—Turn off the printer, and then reinstall the old part.
  - If the problem is resolved—Perform a POR.

### Removal procedure

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the right cover. See [“Right cover removal” on page 426](#).

- 3 Disconnect all the cables from the controller board, and then remove the seven screws (A).

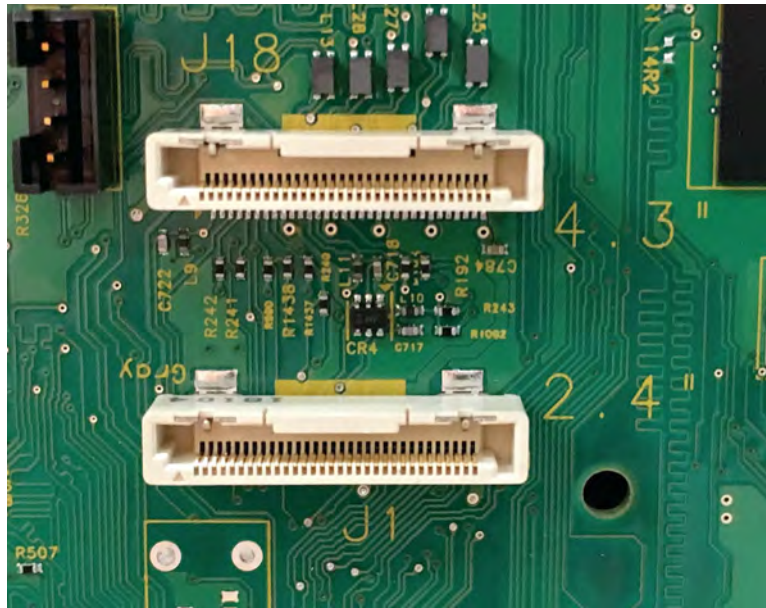

- 4 Remove the board.

**Installation note:** Make sure that all the cables are connected and properly routed.

**Note:** For a video demonstration, see [Controller board removal](#).

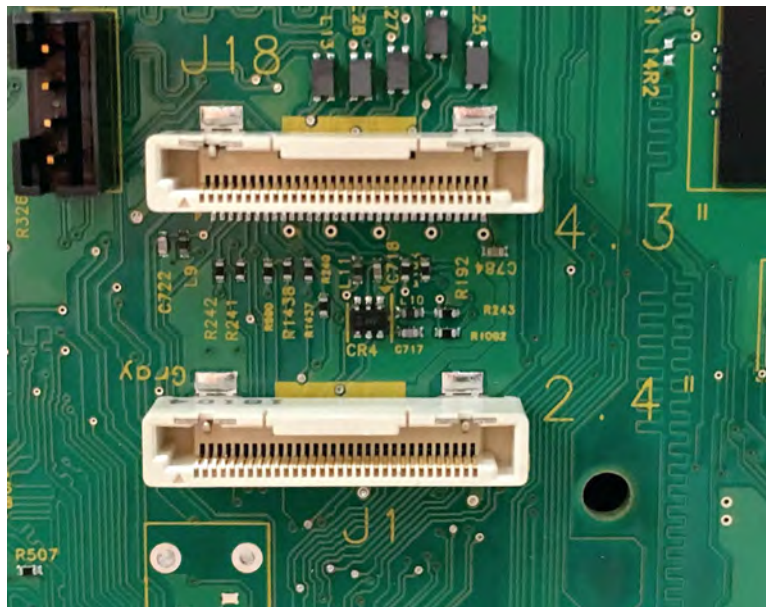

### Installation for printers with 4.3-inch displays

- Install the appropriate controller board (PN 41X1127).
- Connect the control panel cable to socket J18 (labeled with 4.3") on the controller board.

### Installation for printers with 2.4-inch displays

- Install the appropriate controller board (PN 41X2606).
- Connect the control panel cable to socket J1 (labeled with 2.4") on the controller board.

**Note:** The controller board (PN 41X1127) may also be installed with the 2.4-inch displays by doing the following:

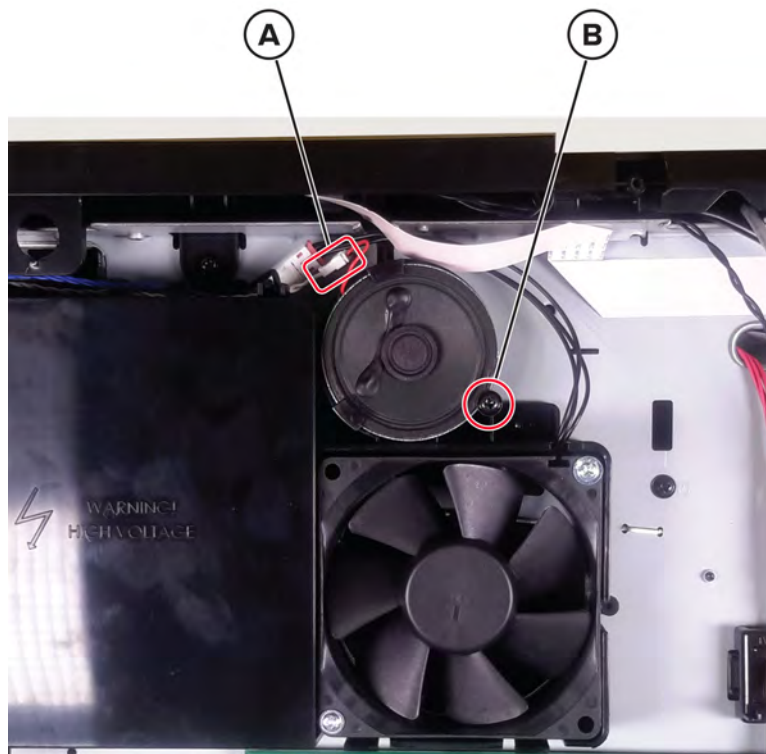

- 1 Connect the control panel cable to socket J1 (labeled with 2.4") on the controller board.
- 2 Download the appropriate firmware (non-touch version).

- 3 With a USB cable, connect the printer to a PC.
- 4 To update the firmware, flash the code through recovery mode. See [“Entering Recovery mode” on page 393](#).

## Speaker removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the right cover. See [“Right cover removal” on page 426](#).
- 3 Disconnect the cable (A), and then remove the screw (B).

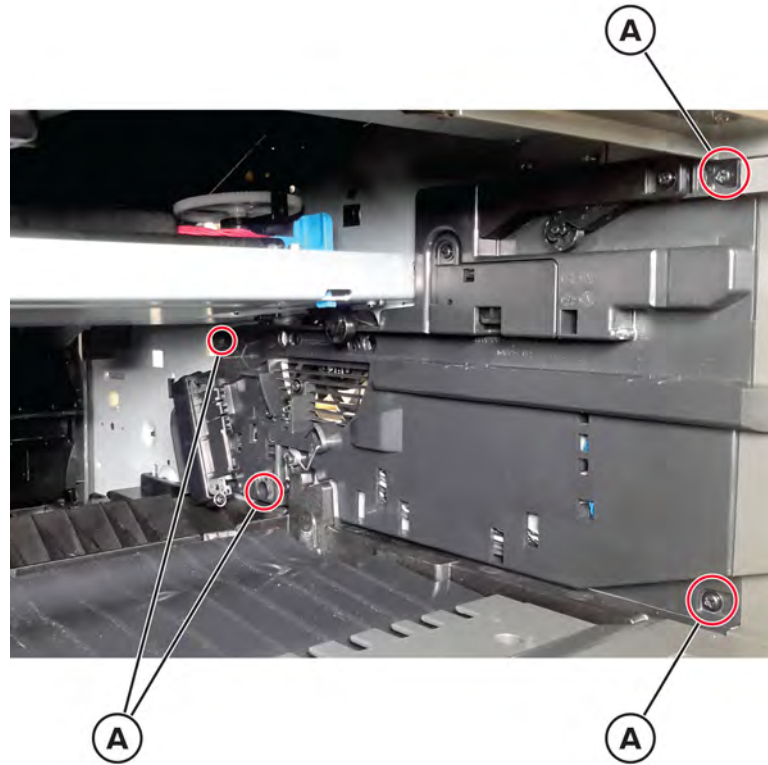

- 4 Remove the speaker.

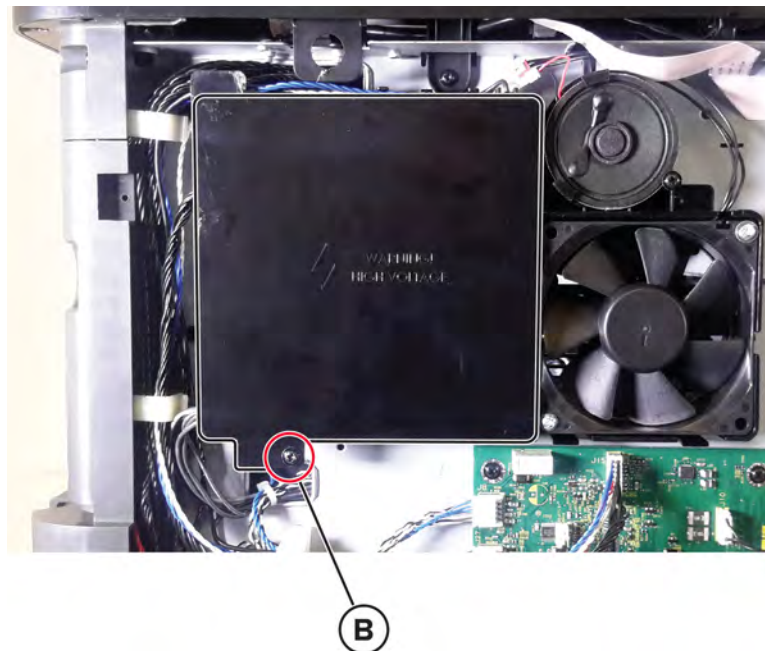

## High voltage contacts guide removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the right cover. See [“Right cover removal” on page 426](#).

4 Remove the four screws (A).

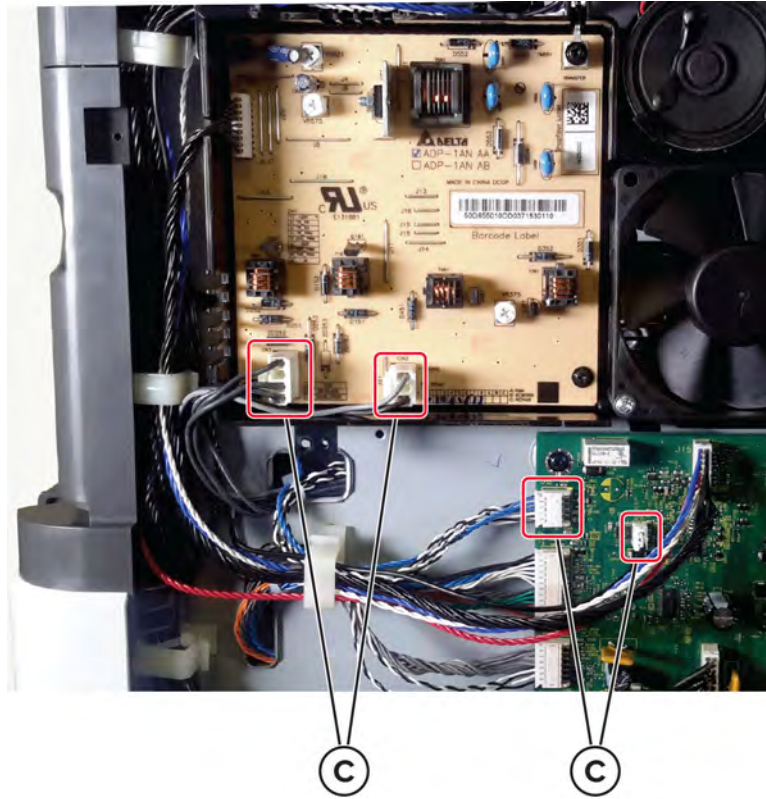

5 Remove the screw (B), and then remove the HVPS shield.

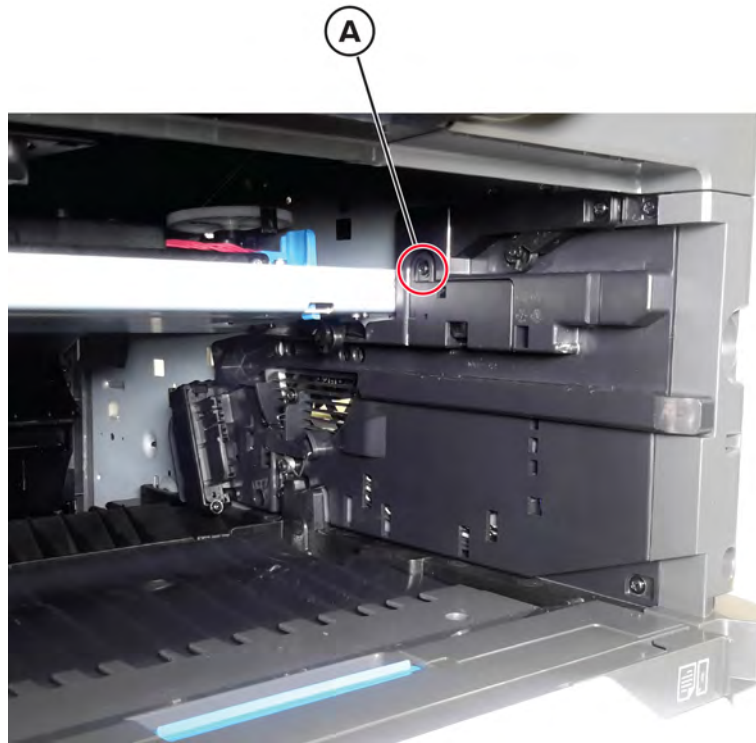

Parts removal

6 Disconnect the four cables (C), and then remove the high voltage contacts guide.

## Toner cartridge shutter actuator removal

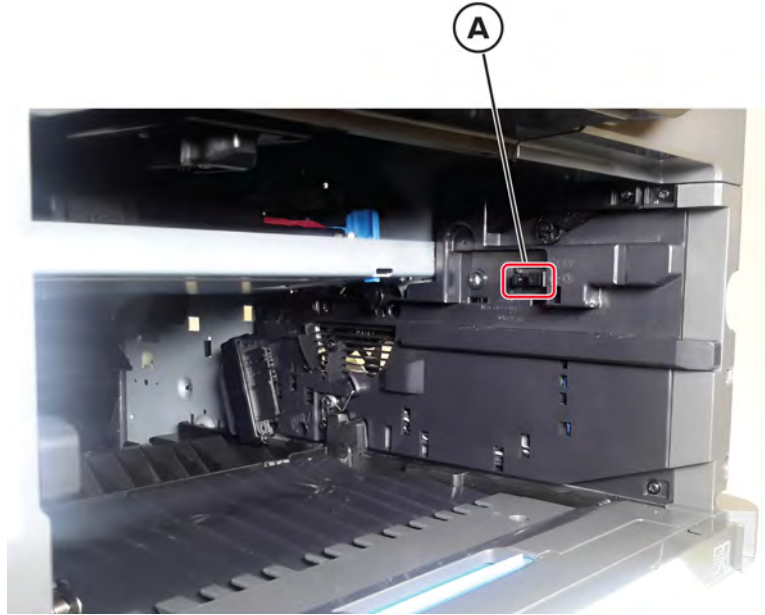

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the screw (A), and then remove the actuator.

## Sensor (toner cartridge shutter) removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the toner cartridge shutter actuator. See [“Toner cartridge shutter actuator removal” on page 436](#).

- 3 Release the sensor (A) from the inner side, and then disconnect its cable.

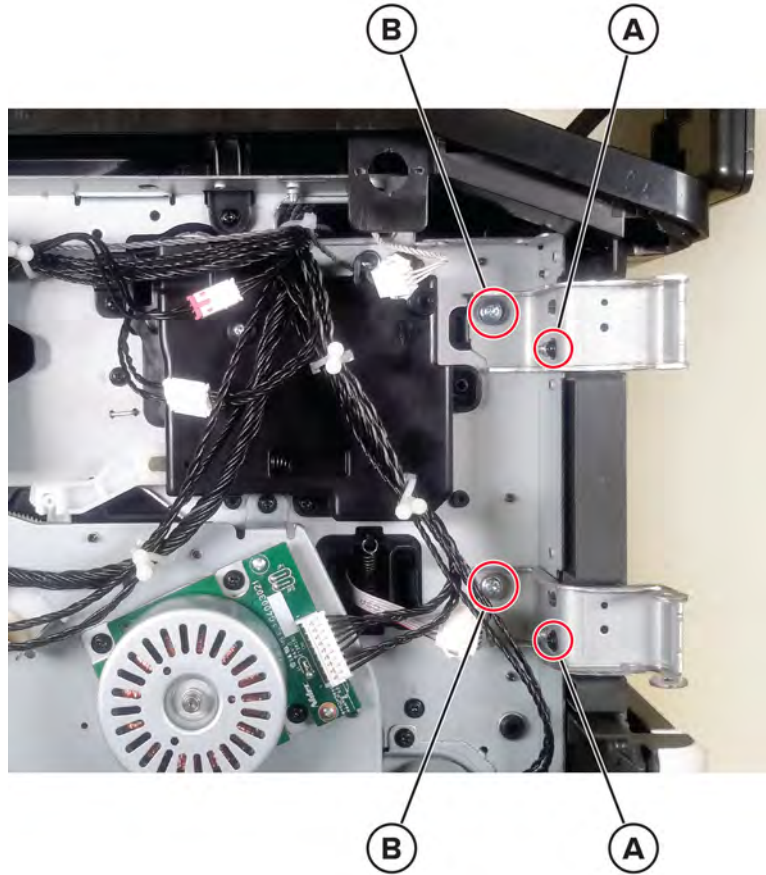

- 4 Remove the sensor.

## Front side removals

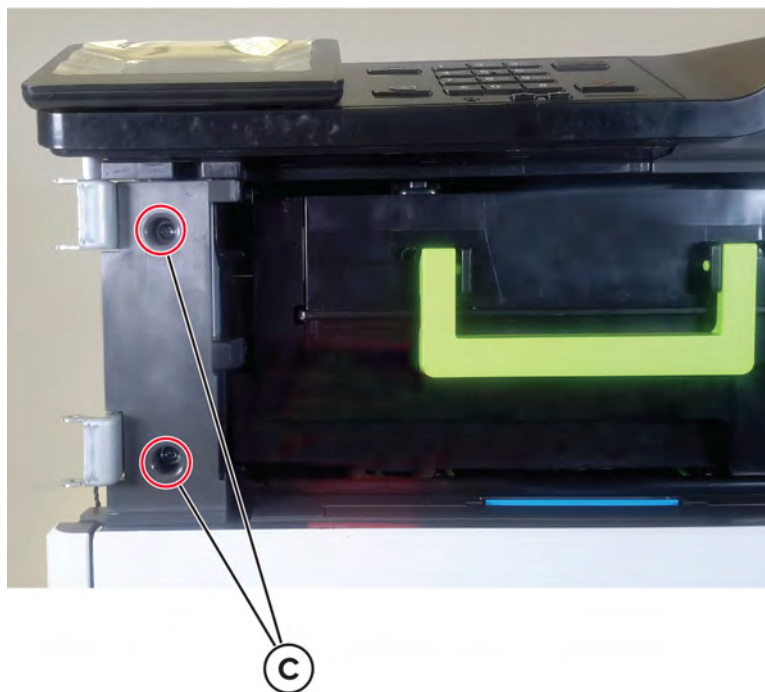

### Front door bracket removal

- 1 Remove the top cover. See [“Top cover removal” on page 461.](#)
- 2 Remove the left cover. See [“Left cover removal” on page 415.](#)

3 Loosen the two screws (A), and then remove the two screws (B).

- 4 Remove the two screws (C).

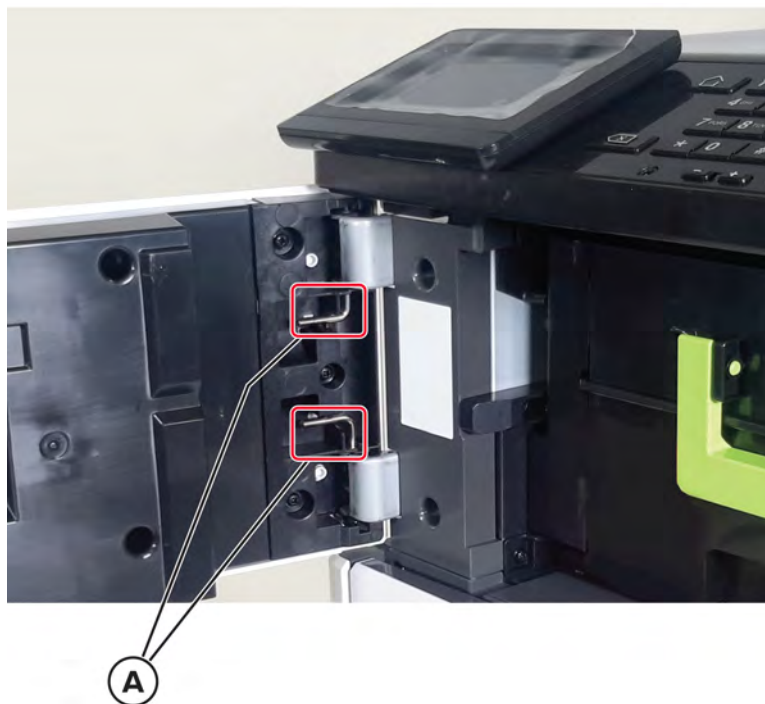

- 5 Remove the bracket.

**Installation warning:** Make sure that the screws are not overtightened.

## Front door removal

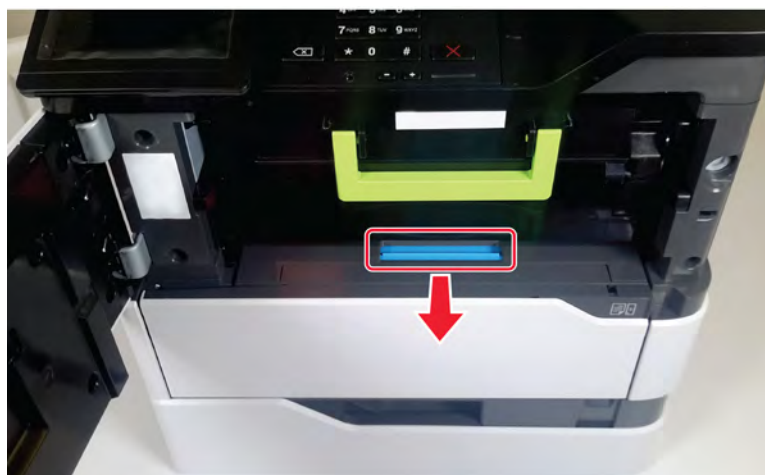

- 1 Open the front door.
- 2 Swing the front door pins (A) inward to release, and then remove them.

- 3 Remove the door.

## Duplex/MPF tray removal

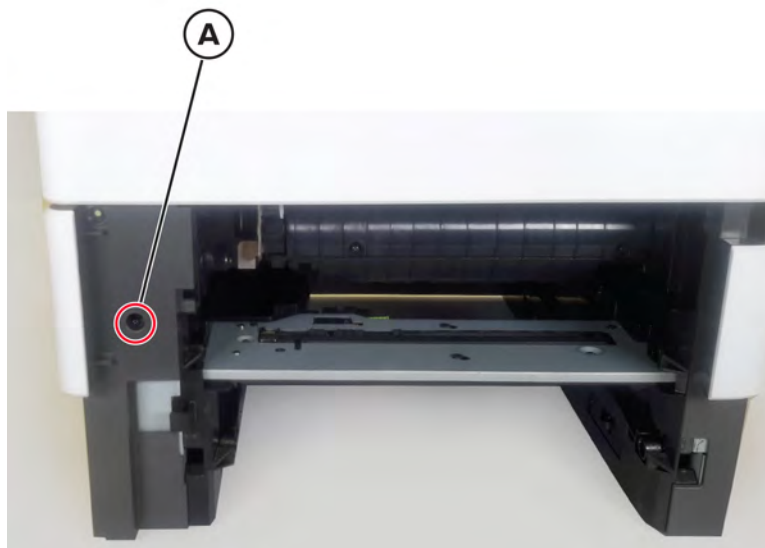

- 1 Open the front door.
- 2 Press the handle, and then pull out the duplex/MPF tray.

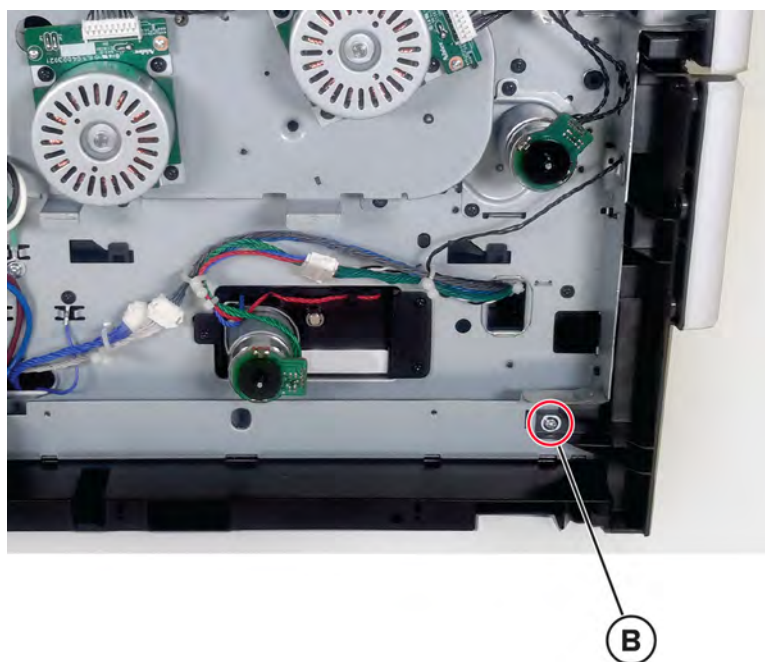

## Inner left cover removal

- 1 Remove tray 1.
- 2 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440.](#)
- 3 Remove the top cover. See [“Top cover removal” on page 461.](#)
- 4 Remove the left cover. See [“Left cover removal” on page 415.](#)
- 5 Remove the screw (A).

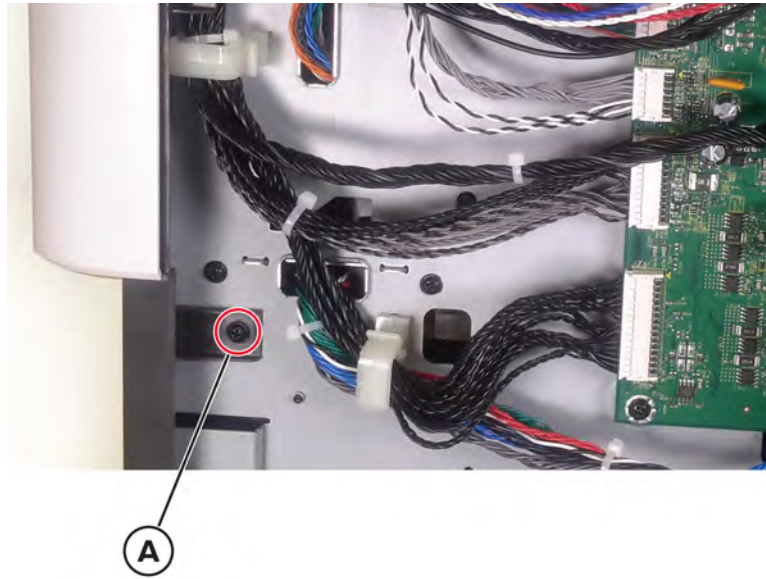

- 6 Remove the screw (B) from the left side, and then remove the cover.

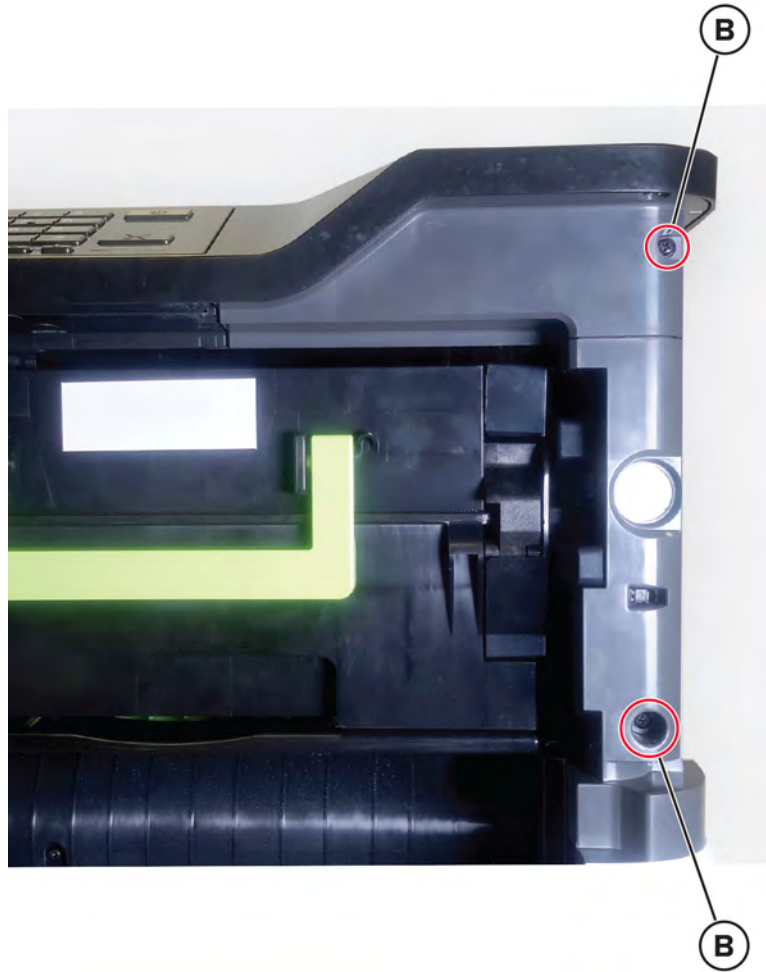

## Inner right cover removal

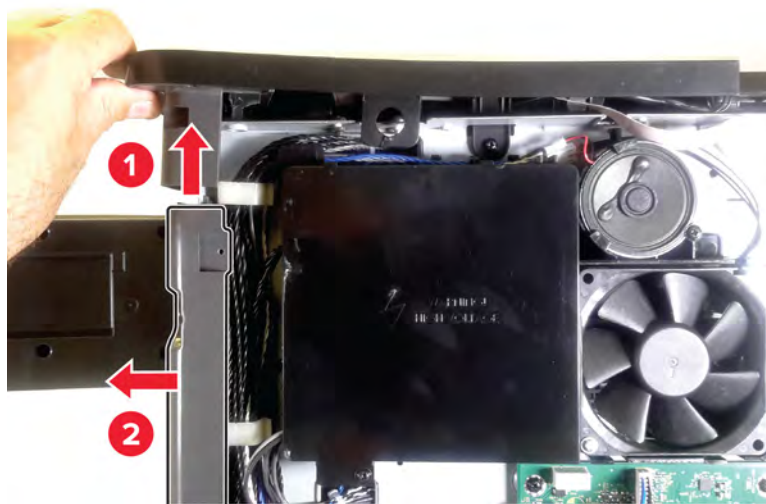

- 1 Remove tray 1.
- 2 Remove the top cover. See [“Top cover removal” on page 461.](#)
- 3 Remove the right cover. See [“Right cover removal” on page 426.](#)
- 4 Remove the screw (A).

5 From the front side, remove the two screws (B).

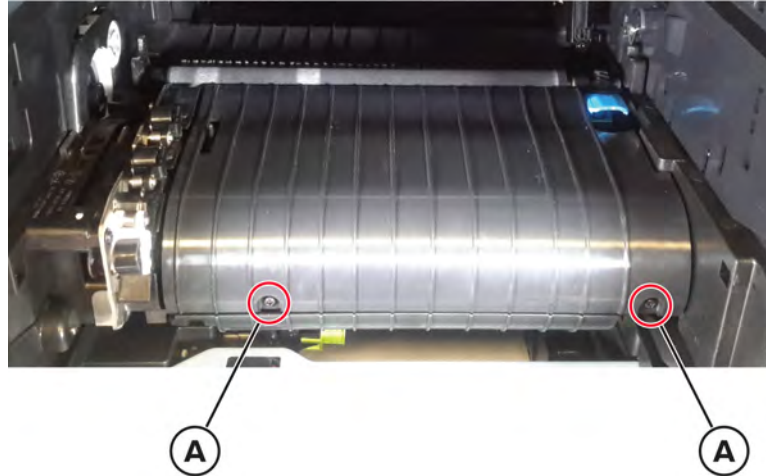

6 Slightly lift the top cover to release, and then remove the inner right cover.

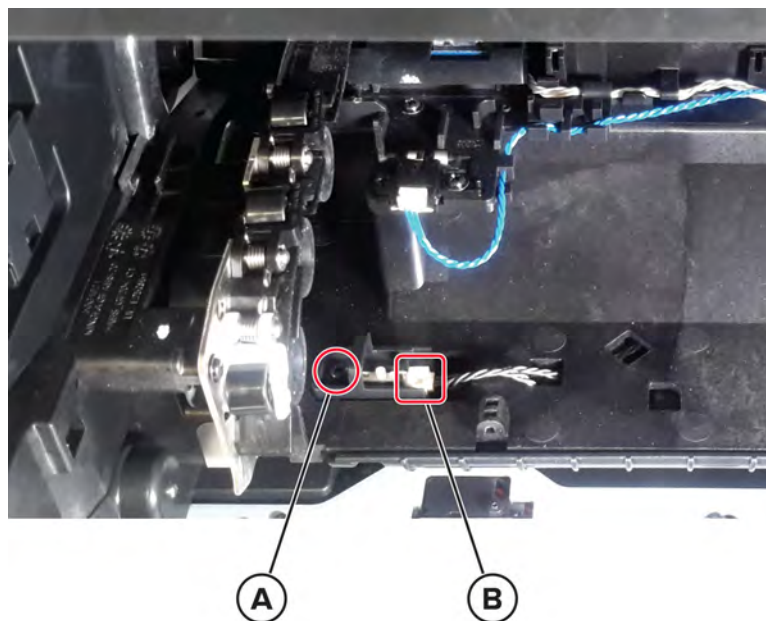

## Inner guide deflector removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440.](#)
- 3 Remove the two screws (A), and then remove the deflector.

## Sensor (duplex interlock) removal

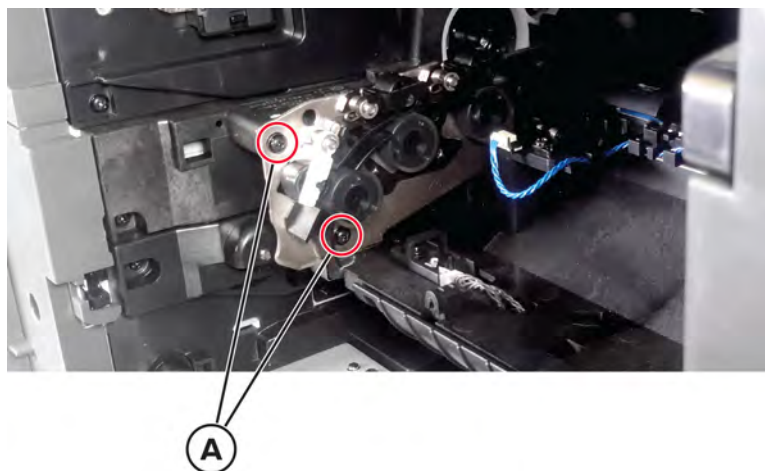

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440.](#)
- 3 Remove the inner guide deflector. See [“Inner guide deflector removal” on page 444.](#)
- 4 Remove the screw (A), and then disconnect the sensor cable (B).

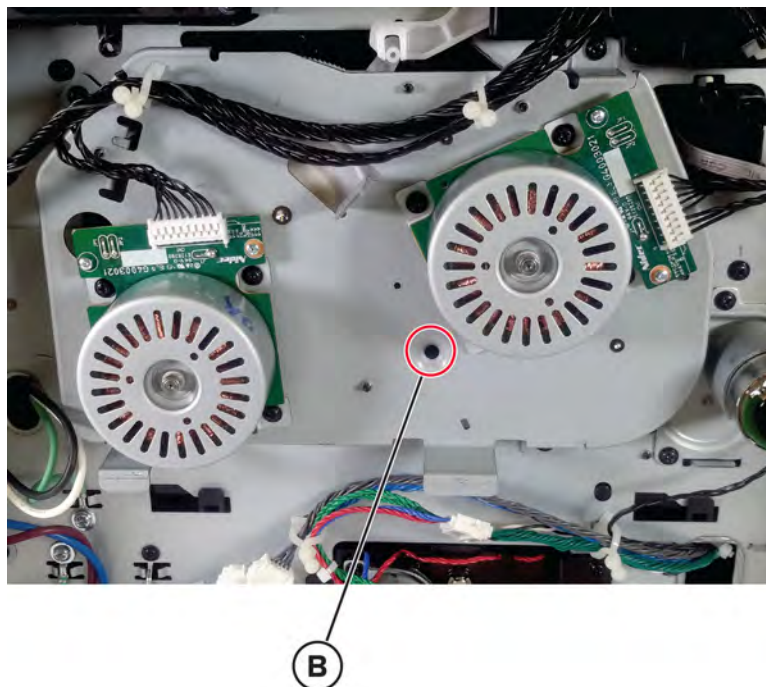

- 5 Remove the sensor.

## Aligner removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove tray 1.
- 3 Remove the top cover. See [“Top cover removal” on page 461.](#)
- 4 Remove the left cover. See [“Left cover removal” on page 415.](#)
- 5 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440.](#)
- 6 Remove the inner guide deflector. See [“Inner guide deflector removal” on page 444.](#)
- 7 Remove the two screws (A).

- 8 Remove the aligner screw (B).

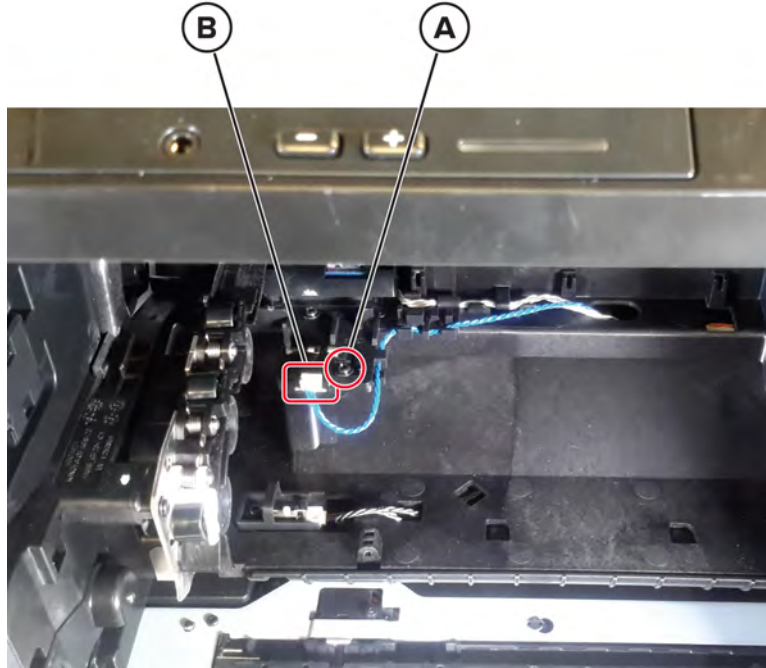

- 9 Remove the aligner.

**Installation note:** Make sure that the aligner roller adjustment is performed to avoid paper skews. See [“Aligner roller adjustment” on page 409](#).

## Sensor (input) removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440](#).
- 3 Remove the inner guide deflector. See [“Inner guide deflector removal” on page 444](#).

**4** Remove the screw (A), and then disconnect the sensor cable (B).

**5** Remove the sensor.

## MPF pick roller removal

- 1 Open the MPF door.
- 2 Press the latch to release, and then remove the pick roller.

## Control panel (4.3-inch display) removal

### Critical information for controller board or control panel replacement

**Warning—Potential Damage:** Replace only one of the following components at a time:

- Control panel
- Controller board

To replace a component, and to test whether the problem is resolved:

- 1 Replace the affected component.

**Warning—Potential Damage:** Do not perform a POR (Power-On Reset) until the problem is resolved. If a POR is performed at this point, the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 2 Enter the Diagnostics Menu. The Diagnostics Menu allows you to temporarily use the replacement part.

**Warning—Potential Damage:** Some printers will automatically perform a POR if the Diagnostics Menu is not opened within five seconds. If a POR is performed at this point, the replacement part can no longer be used in another printer and must be returned to the manufacturer.

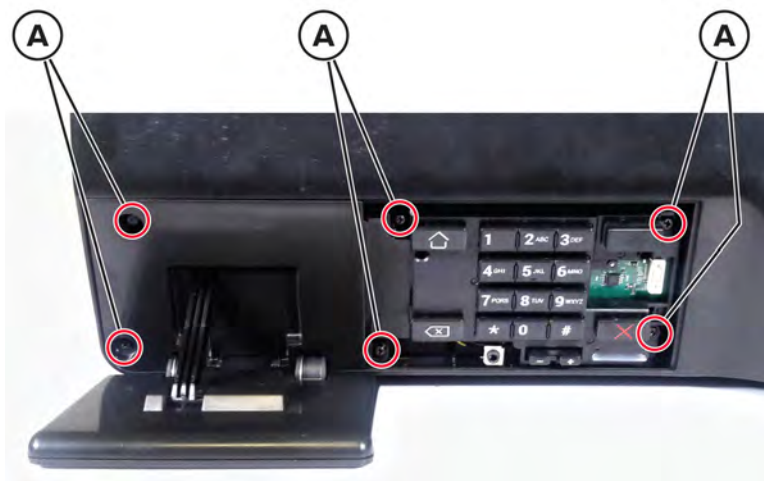

- 3** Use the Diagnostics Menu to test the replacement part. Do a feed test to check if the problem is resolved.
- If the problem is not resolved—Turn off the printer, and then reinstall the old part.
  - If the problem is resolved—Perform a POR.

### Removal procedure

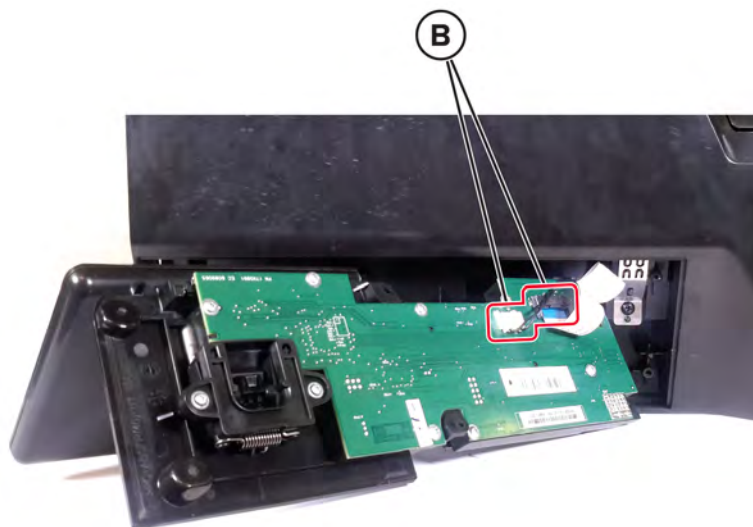

- 1** Swing the control panel away from the printer.
- 2** Release the control panel (4.3-inch display) cover using a flat screwdriver, and then remove it.

- 3** Remove the six screws (A), and then lift the control panel.

4 Disconnect the two cables (B), and then remove the control panel.

### Control panel (2.4-inch) cover removal

Pry the cover to release, and then remove it.

### Control panel (2.4-inch) board and display removal

#### Critical information for controller board or control panel replacement

**Warning—Potential Damage:** Replace only one of the following components at a time:

- Control panel
- Controller board

To replace a component, and to test whether the problem is resolved:

- 1 Replace the affected component.

**Warning—Potential Damage:** Do not perform a POR (Power-On Reset) until the problem is resolved. If a POR is performed at this point, the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 2 Enter the Diagnostics Menu. The Diagnostics Menu allows you to temporarily use the replacement part.

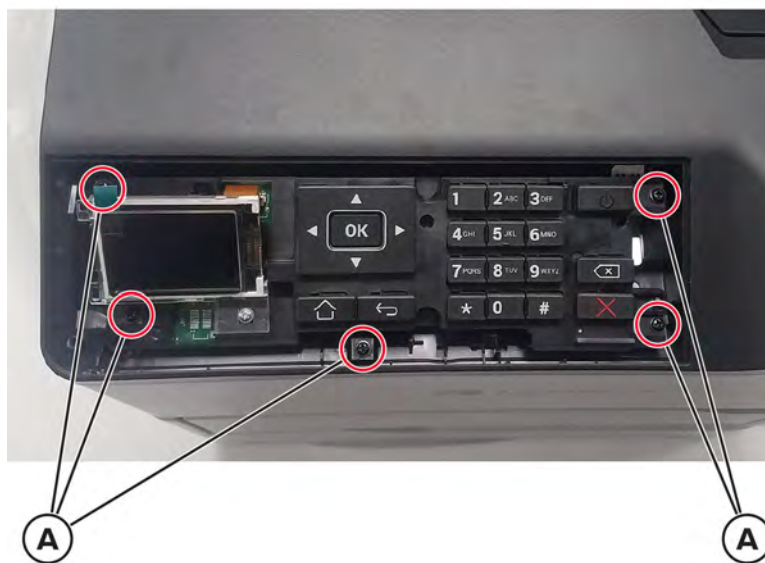

**Warning—Potential Damage:** Some printers will automatically perform a POR if the Diagnostics Menu is not opened within five seconds. If a POR is performed at this point, the replacement part can no longer be used in another printer and must be returned to the manufacturer.

- 3 Use the Diagnostics Menu to test the replacement part. Do a feed test to check if the problem is resolved.

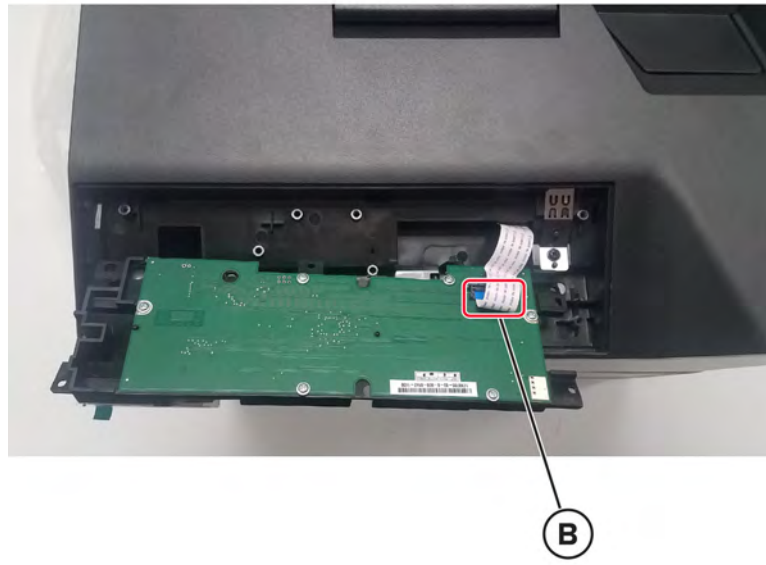

- If the problem is not resolved—Turn off the printer, and then reinstall the old part.
- If the problem is resolved—Perform a POR.

## Removal procedure

- 1 Remove the control panel (2.4-inch) cover. See [“Control panel \(2.4-inch\) cover removal” on page 450](#).
- 2 Remove the five screws (A), and then pull the control panel.

- 3 Behind the control panel, disconnect the cable (B).

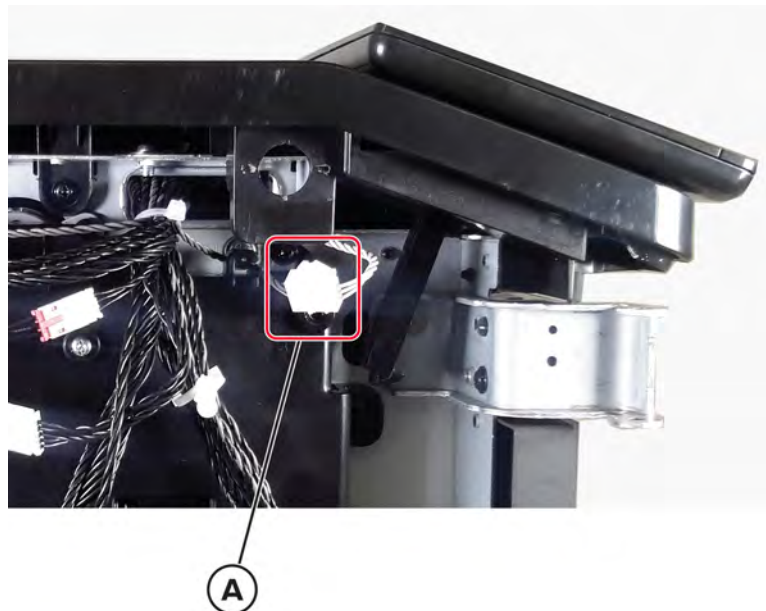

- 4 Remove the control panel.

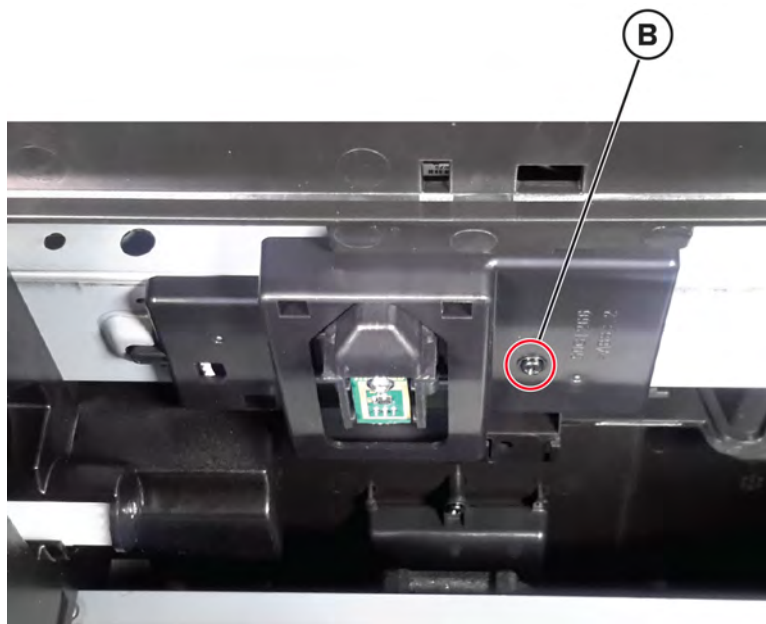

**Note:** For a video demonstration, see [Control panel \(2.4-inch\) board and display removal](#).

## Sensor (toner low) removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the left cover. See [“Left cover removal” on page 415](#).
- 4 Disconnect the sensor cable (A).

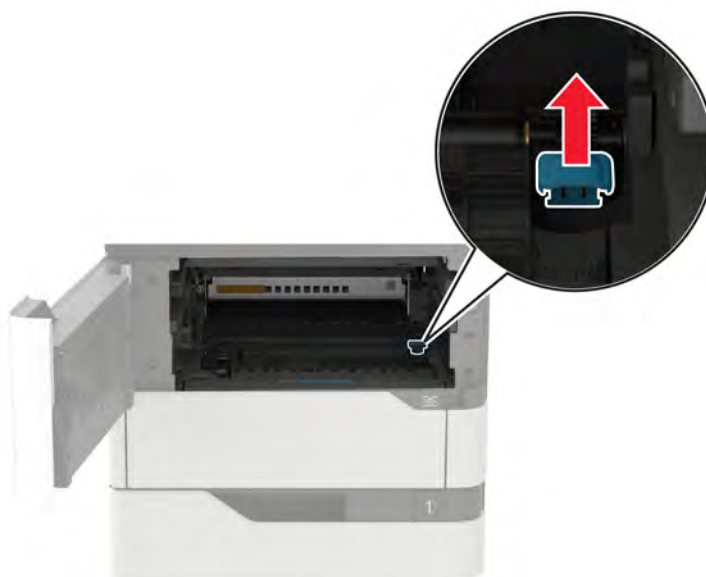

- 5 Inside the printer from the front side, remove the screw (B).

- 6 Remove the sensor.

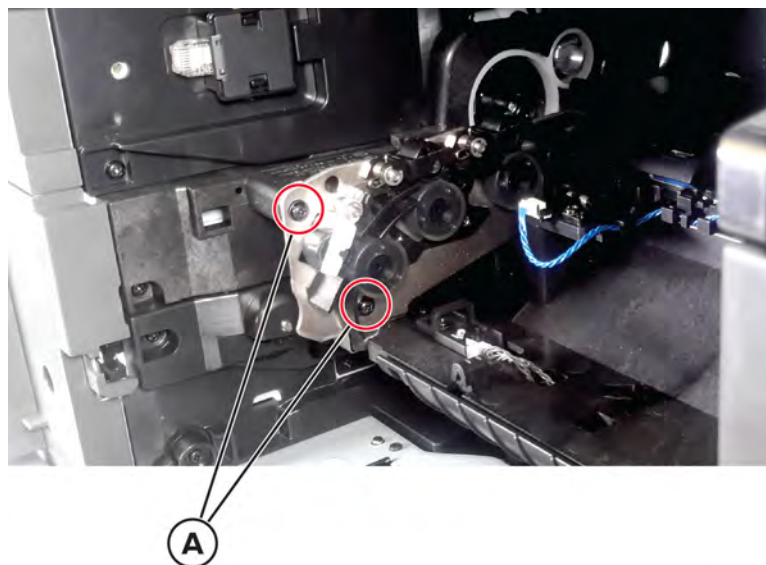

## Transfer roller removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Release the latch, and then remove the transfer roller.

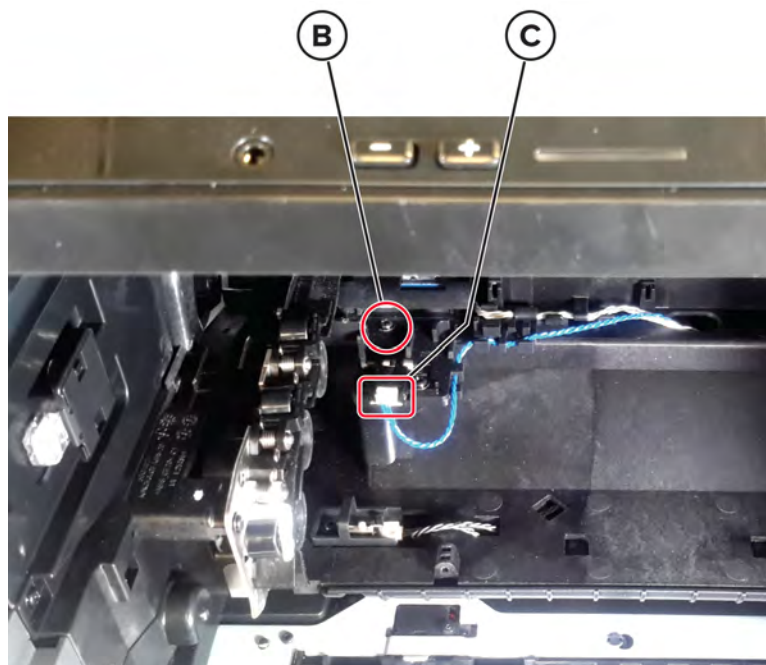

## Sensor (toner density) removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440.](#)
- 3 Remove the inner guide deflector. See [“Inner guide deflector removal” on page 444.](#)
- 4 Loosen the two aligner screws (A) to allow space for the sensor removal.

- 5 Remove the screw (B), and then disconnect the sensor cable (C).

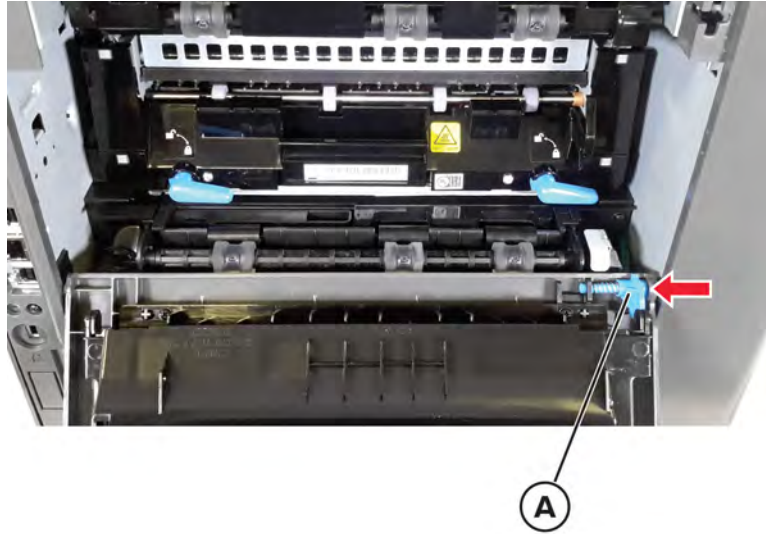

- 6 Remove the sensor.

**Installation note:** Make sure that the aligner screws are properly screwed back.

## Rear side removals

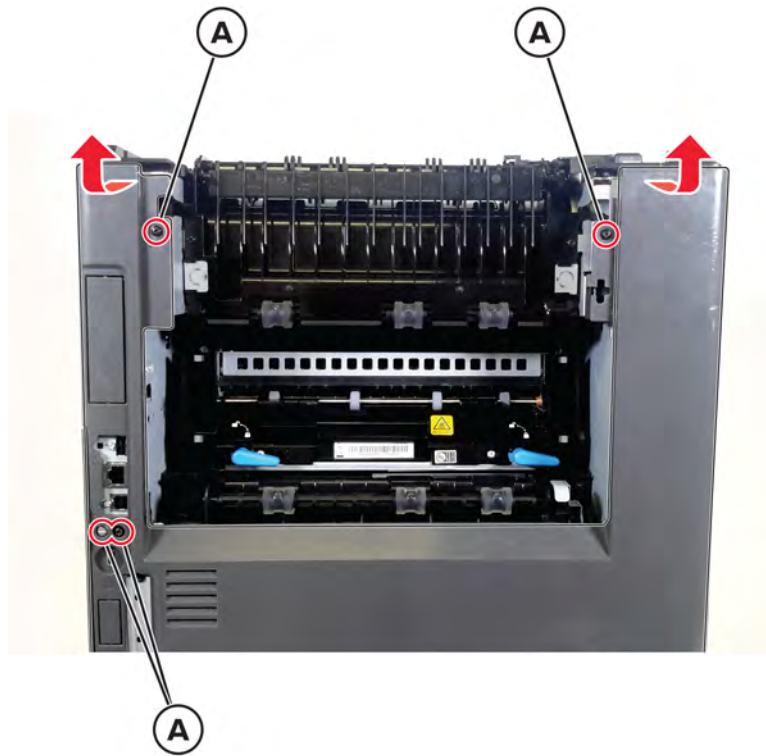

### Rear door removal

- 1 Open the rear door.
- 2 Press the latch (A) to release the hinge, and then remove the door.

## Rear cover removal

- 1 Remove the rear door. See [“Rear door removal” on page 455](#).
- 2 Remove the four screws (A).

- 3 Gently pull the top and middle section of the cover to release, and then remove the cover.

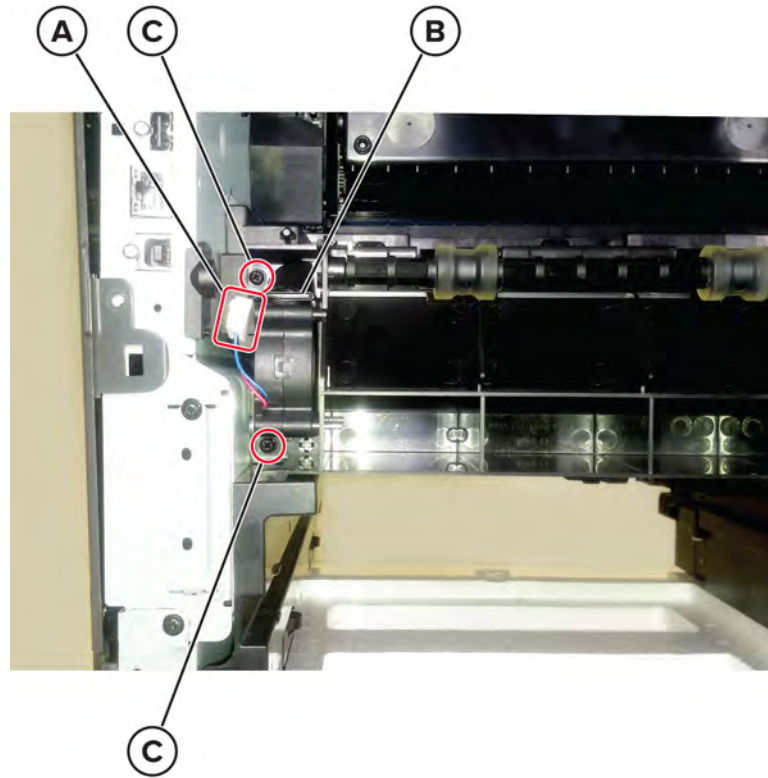

**Note:** For a video demonstration, see [Covers removal](#).

## Motor (duplex) removal

- 1 Remove the rear door. See [“Rear door removal” on page 455](#).
- 2 Remove the rear cover. See [“Rear cover removal” on page 456](#).
- 3 Disconnect the cable (A), and then release it from its holder (B).

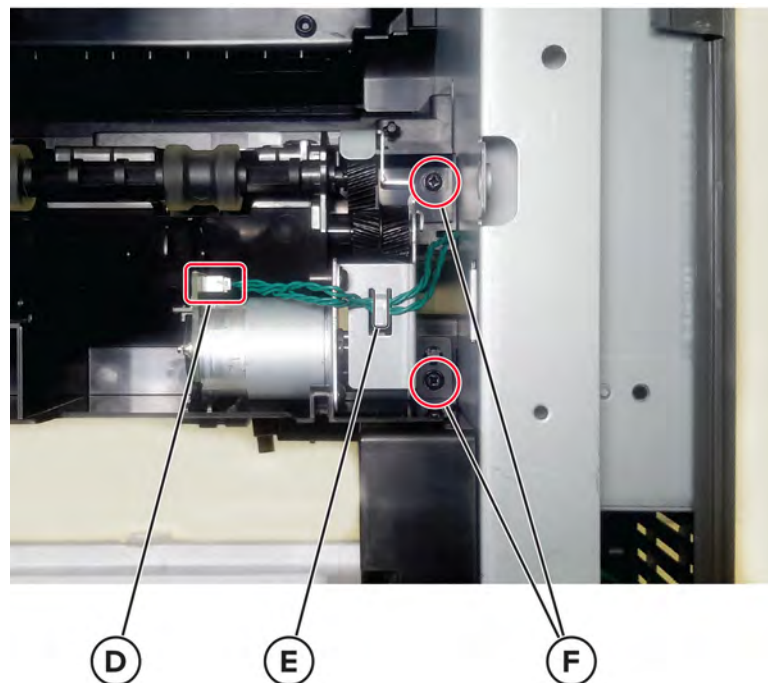

4 Remove the two screws (C).

5 Disconnect the cable (D), and then release it from its guide (E).

6 Remove the two screws (F), and then remove the motor.

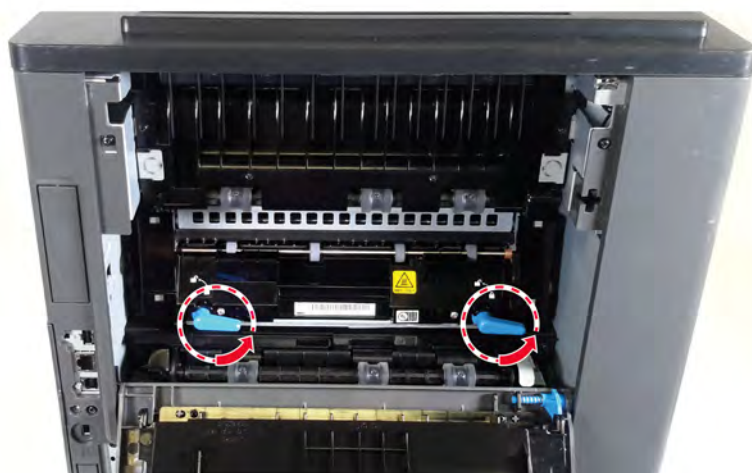

**Warning—Potential Damage:** Make sure that the motor cables are disconnected before removing the motor.

Parts removal

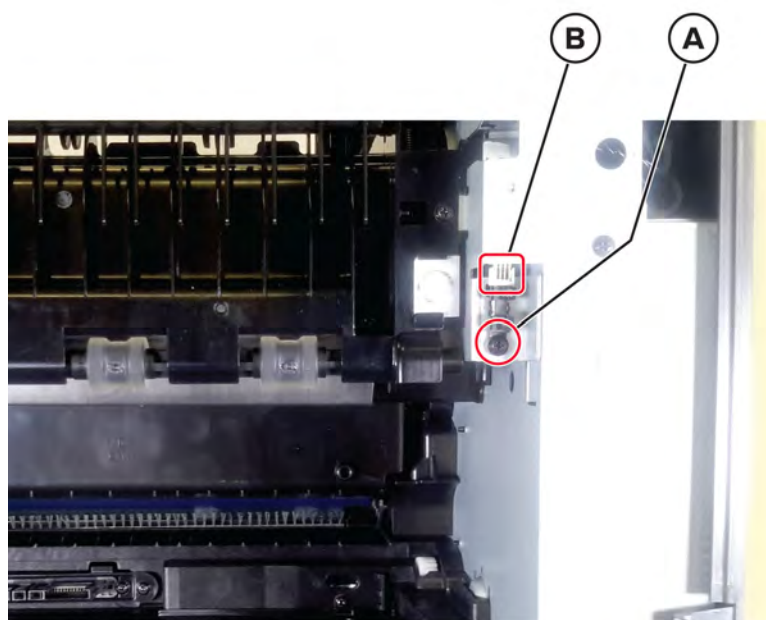

## Fuser removal

- 1 For models using a hot roll type of fuser, remove the printhead access cover. See [“Printhead removal” on page 461.](#)
- 2 Open the rear door.
- 3 Rotate the latches to release, and then remove the fuser.

## Sensor (rear door interlock) removal

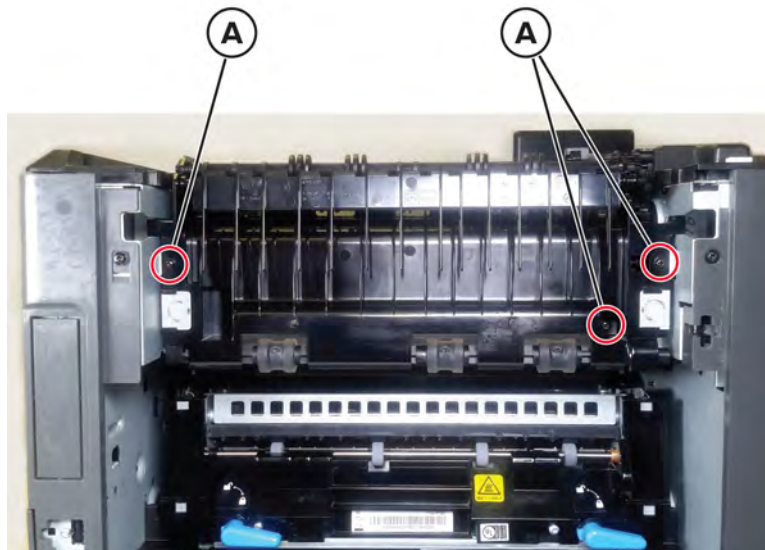

- 1 Remove the rear door. See [“Rear door removal” on page 455.](#)
- 2 Remove the rear cover. See [“Rear cover removal” on page 456.](#)
- 3 Remove the screw, and then disconnect the sensor cable (B).

- 4 Remove the sensor.

## Upper redrive removal

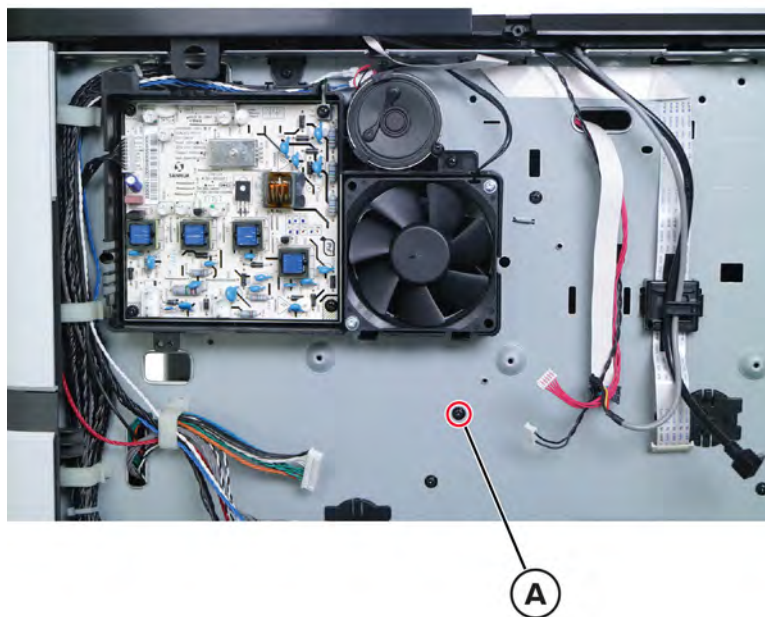

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Open the rear door.
- 3 Remove the three screws (A), and then remove the upper redrive.

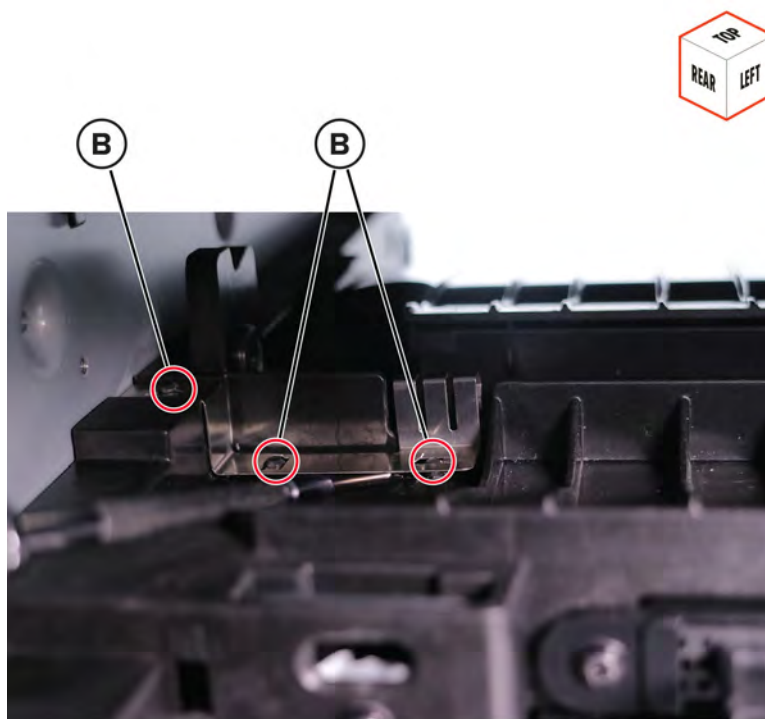

## Transfer roller contact removal

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Remove the transfer roller. See [“Transfer roller removal” on page 453](#).
- 3 Remove the top cover. See [“Top cover removal” on page 461](#).
- 4 Remove the right cover. See [“Right cover removal” on page 426](#).
- 5 Remove the fuser. See [“Fuser removal” on page 458](#).
- 6 Remove the high voltage contacts guide. See [“High voltage contacts guide removal” on page 433](#).
- 7 Remove the controller board. See [“Controller board removal” on page 430](#).

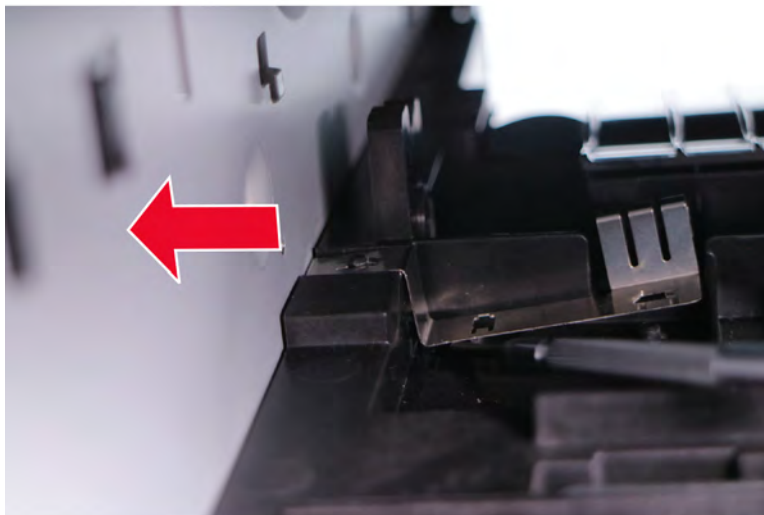

8 Remove screw 5 (A) from the right side frame.

9 Inside the printer, release the contact from its posts (B) using a prying tool.

**Note:** If necessary, push the frame to loosen the contact.

**Installation note:** Make sure the contact is properly engaged with its posts.

## Top side removals

### Top cover removal

- 1 Lift the cover to release.

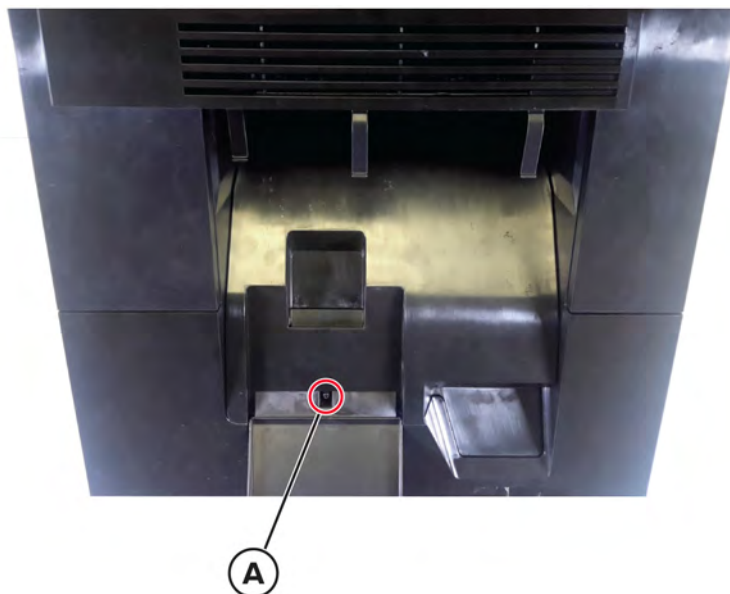

- 2 Remove the cover.

**Note:** For a video demonstration, see [Covers removal](#).

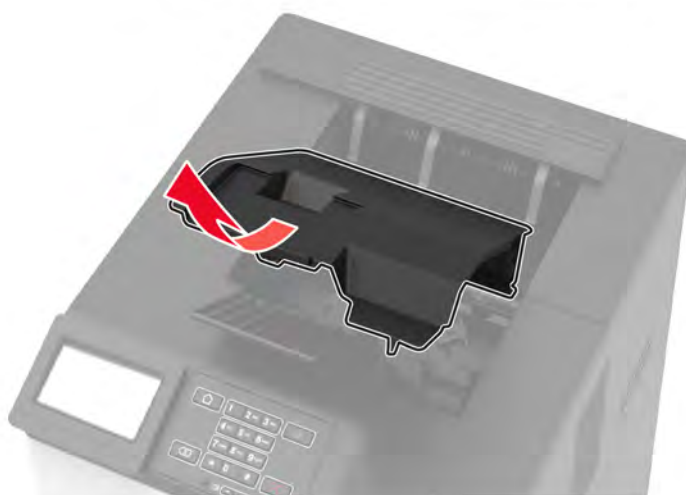

### Printhead removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the right cover. See [“Right cover removal” on page 426](#).

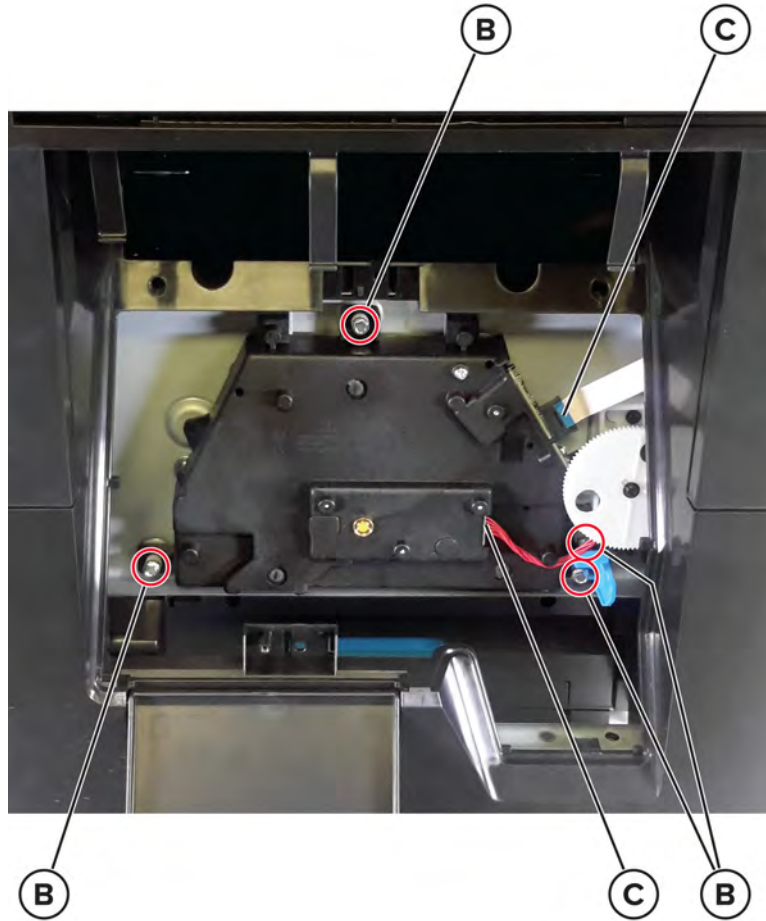

- 3 Remove the screw (A) under the bin extender, and then remove the printhead access cover.

**Note:** For models using a hot roll type of fuser, remove the printhead access cover as shown.

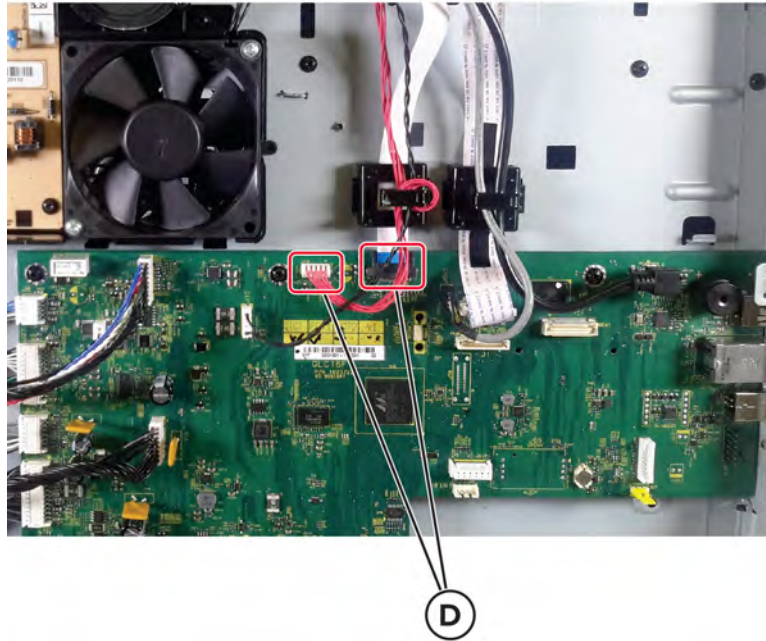

4 Remove the four screws (B), and then disconnect the two cables (C).

Parts removal

- 5 Disconnect the two cables (D) from the controller board.

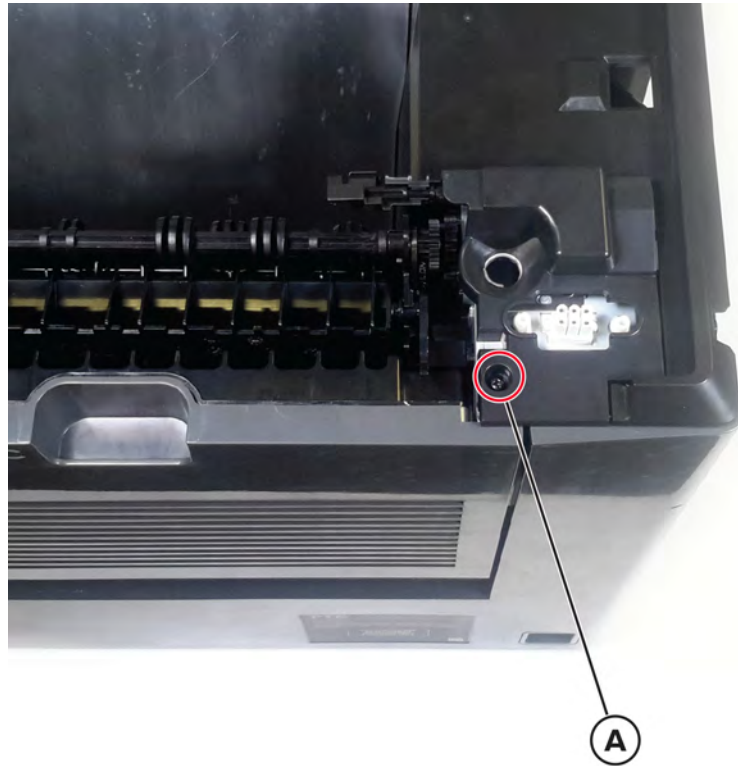

- 6 Remove the printhead.

**Installation note:** Make sure that the printhead is aligned first before tightening the screws. See [“Polygon printhead mechanical registration adjustment” on page 412.](#)

**Note:** For a video demonstration, see [Printhead removal.](#)

## Bin full sensor cover removal

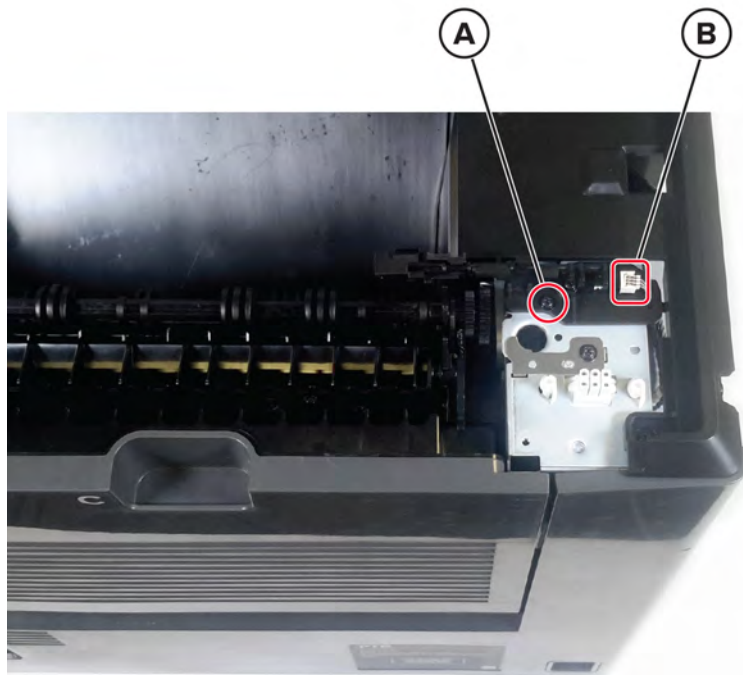

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the screw (A), and then remove the cover.

## Sensor (standard bin full) removal

- 1 Remove the top cover. See [“Top cover removal” on page 461](#).
- 2 Remove the bin full sensor cover. See [“Bin full sensor cover removal” on page 466](#).

- 3 Remove the screw (A), and then disconnect the sensor cable (B).

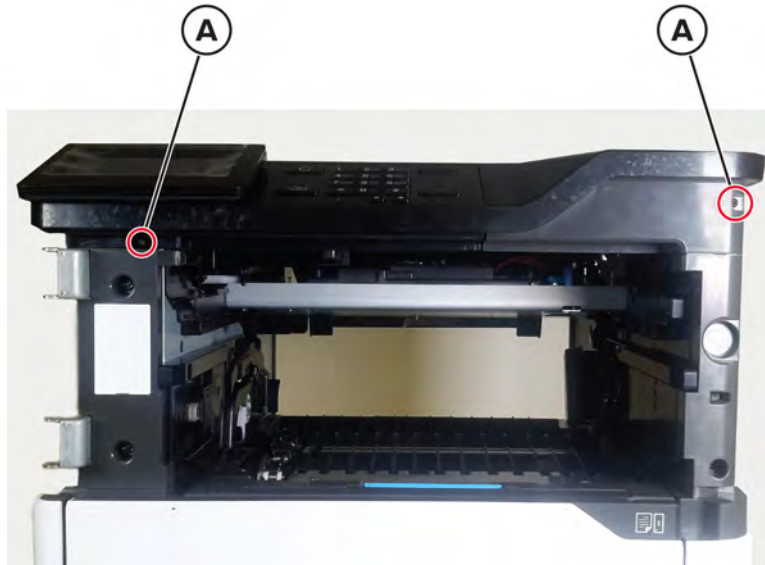

- 4 Remove the sensor.

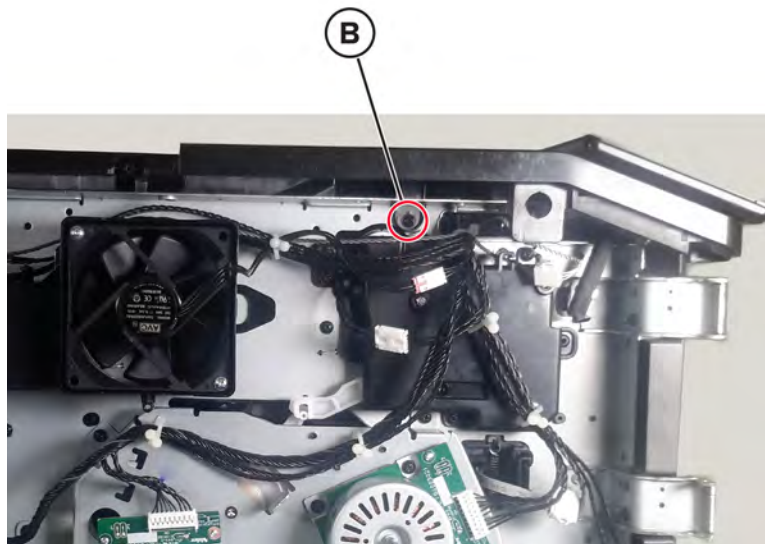

## Bin cover removal

- 1 Remove the control panel (4.3-inch display). See [“Control panel \(4.3-inch display\) removal” on page 448](#).
- 2 Remove the top cover. See [“Top cover removal” on page 461](#).
- 3 Remove the left cover. See [“Left cover removal” on page 415](#).
- 4 Remove the right cover. See [“Right cover removal” on page 426](#).
- 5 Remove the rear door. See [“Rear door removal” on page 455](#).
- 6 Remove the redrive. See [“Upper redrive removal” on page 459](#).
- 7 Remove the bin full sensor cover. See [“Bin full sensor cover removal” on page 466](#).
- 8 Remove the sensor (standard bin full). See [“Sensor \(standard bin full\) removal” on page 466](#).

9 Remove the two screws (A).

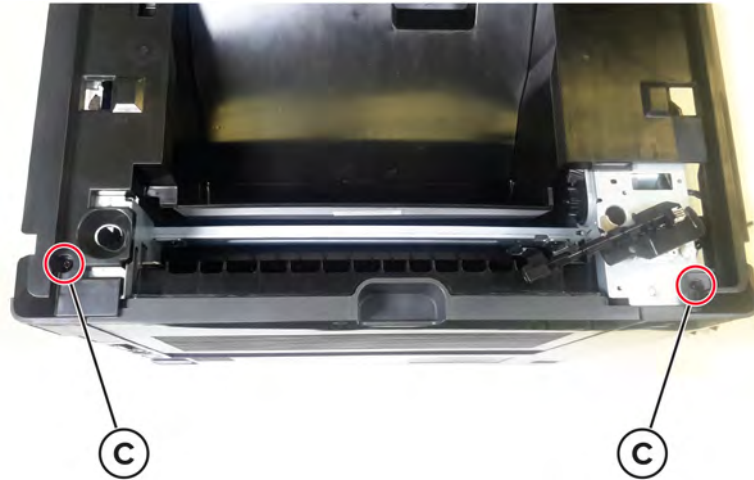

10 From the left side, remove the screw (B).

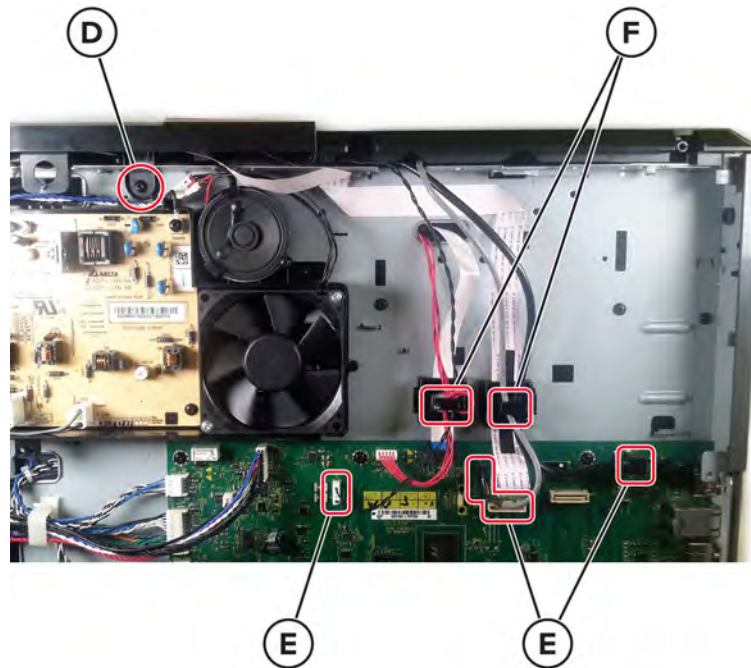

Parts removal

**11** From the top side, remove the two screws (C).

**12** From the right side, remove the screw (D).

**13** Disconnect the four cables (E), and then release them from their guides (F).

**14** Remove the cover.

**Warning—Potential Damage:** Be careful not to damage the cables.

## Bottom side removals

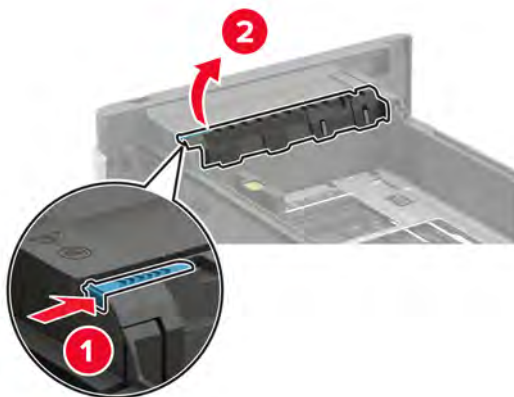

### Tray insert removal

Pull out, and then remove the tray.

### Separator pad removal

- 1 Remove the tray insert. See [“Tray insert removal” on page 470](#).
- 2 Release, and then remove the separator pad.

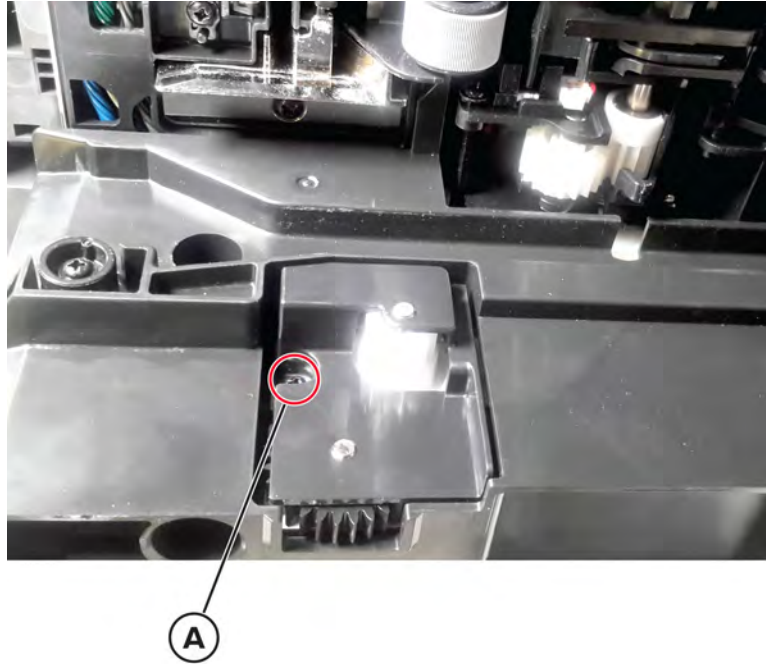

## Pick roller removal

- 1 Remove tray 1.
- 2 Remove the pick roller.

## Optional tray drive gear removal

- 1 Remove tray 1.
- 2 Remove the screw (A), and then remove the drive gear and cover.

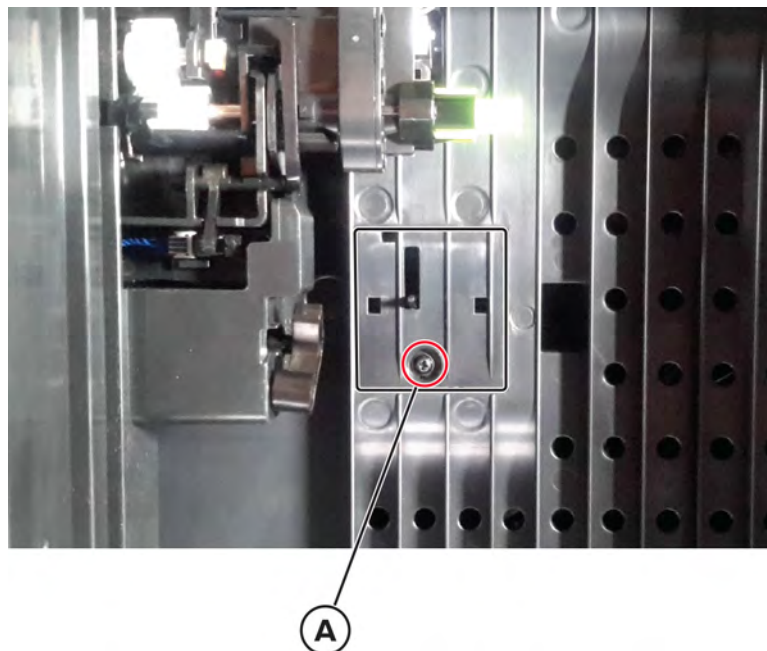

- 3 Remove the gears from the gear cover.

## Sensor (duplex path) with cover removal

- 1 Remove all optional trays from the printer.
- 2 Remove tray 1.
- 3 Remove the duplex/MPF tray. See [“Duplex/MPF tray removal” on page 440](#).
- 4 To access the bottom, lay the printer on its back on a sturdy surface.

- 5 Remove the screw (A), and then disconnect the sensor cable.

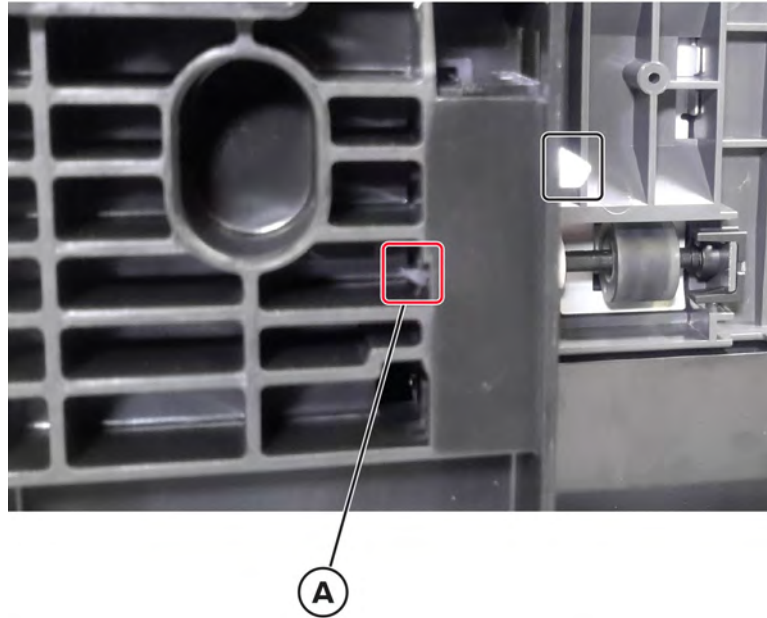

- 6 Remove the sensor and cover.

### Sensor (paper size) removal

- 1 Remove all optional trays from the printer.
- 2 Remove tray 1.
- 3 To access the bottom, lay the printer on its back on a sturdy surface.
- 4 Release the paper size sensor cover using a flat screwdriver, and then remove it.

- 5 Release the sensor latch (A), and then release the sensor from the frame.

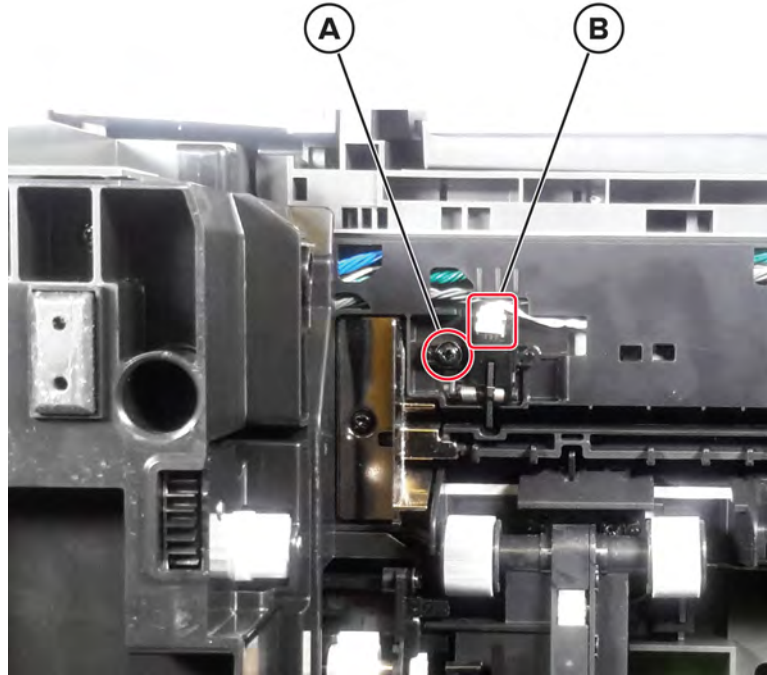

- 6 Disconnect the sensor cable, and then remove the sensor.

### **Sensor (tray 1 pass-through) removal**

- 1 Remove all optional trays from the printer.
- 2 Remove tray 1.
- 3 To access the bottom, lay the printer on its back on a sturdy surface.

- 4 Remove the screw (A), and then disconnect the sensor cable (B).

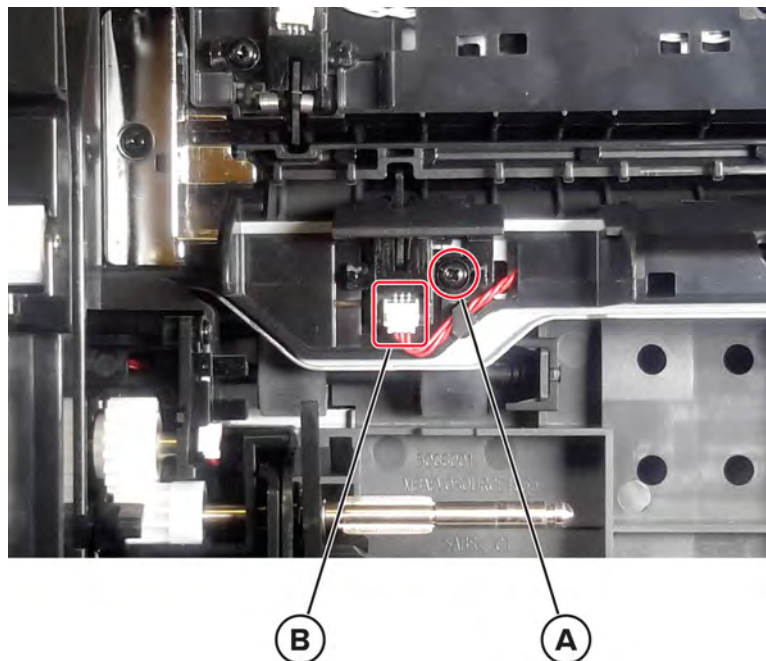

- 5 Remove the sensor.

### **Sensor (tray 1 pick) removal**

- 1 Remove all optional trays from the printer.
- 2 Remove tray 1.
- 3 To access the bottom, lay the printer on its back on a sturdy surface.

- 4 Remove the screw (A), and then disconnect the sensor cable (B).

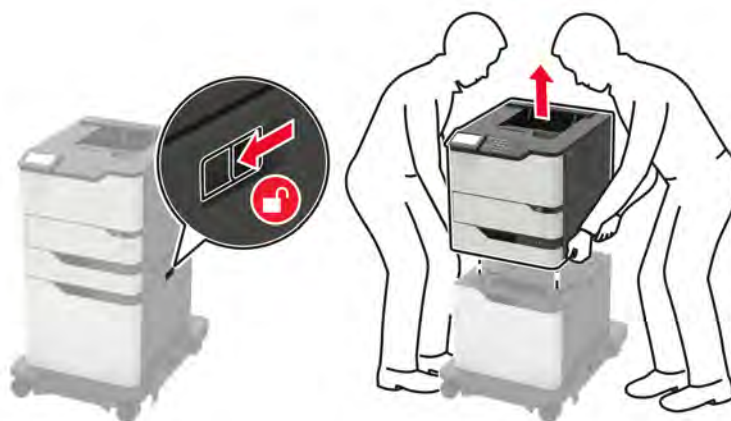

- 5 Remove the sensor.

## Optional 2100-sheet tray removals

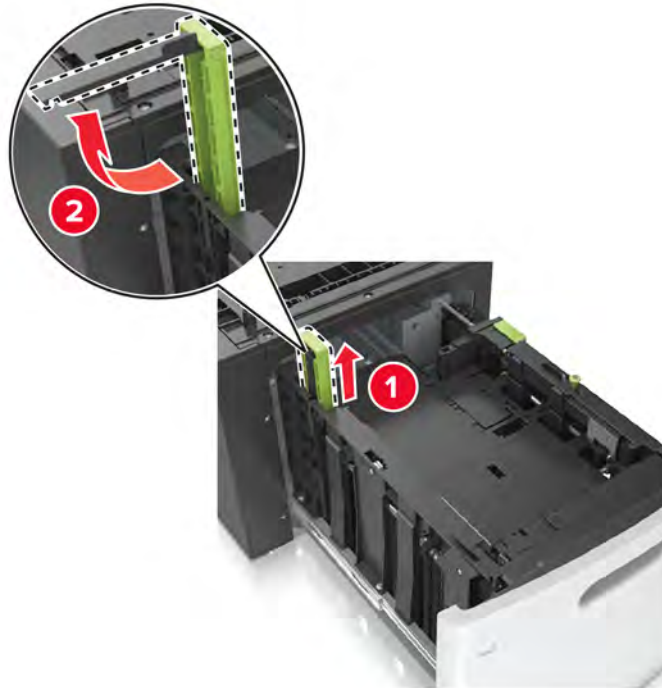

### Optional 2100-sheet tray removal

- 1 Press the latch to unlock.
- 2 Lift the printer or optional tray above the 2100-sheet tray, and then separate the 2100-sheet tray.

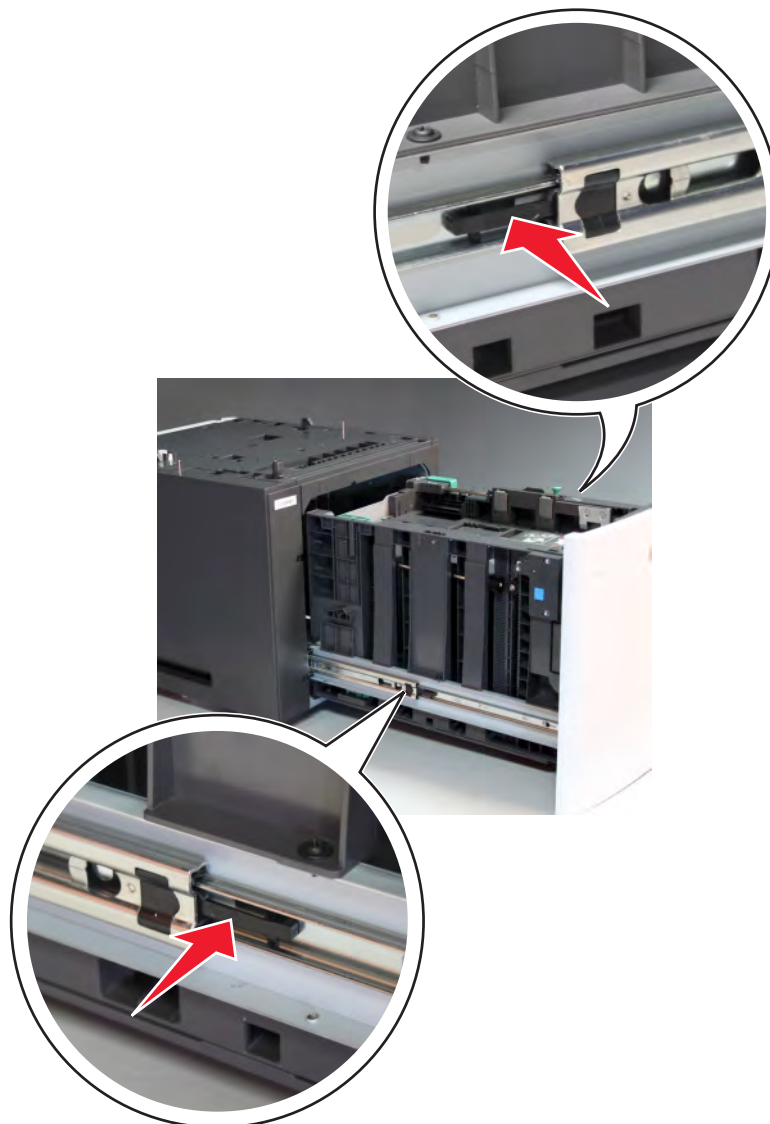

## A5 length guide removal

- 1 Pull the guide out of the tray.
- 2 Remove the guide.

## 2100-sheet tray insert removal

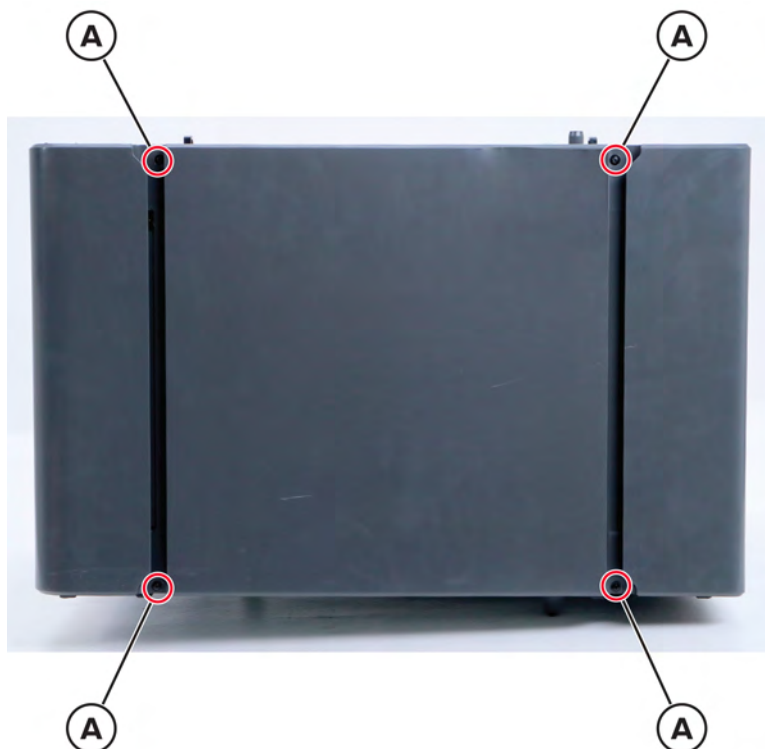

- 1 Fully extend the tray, and then press the left and right latches to release it.

- 2 Remove the tray insert.

## 2100-sheet tray rear cover removal

- 1 Remove the four screws (A).

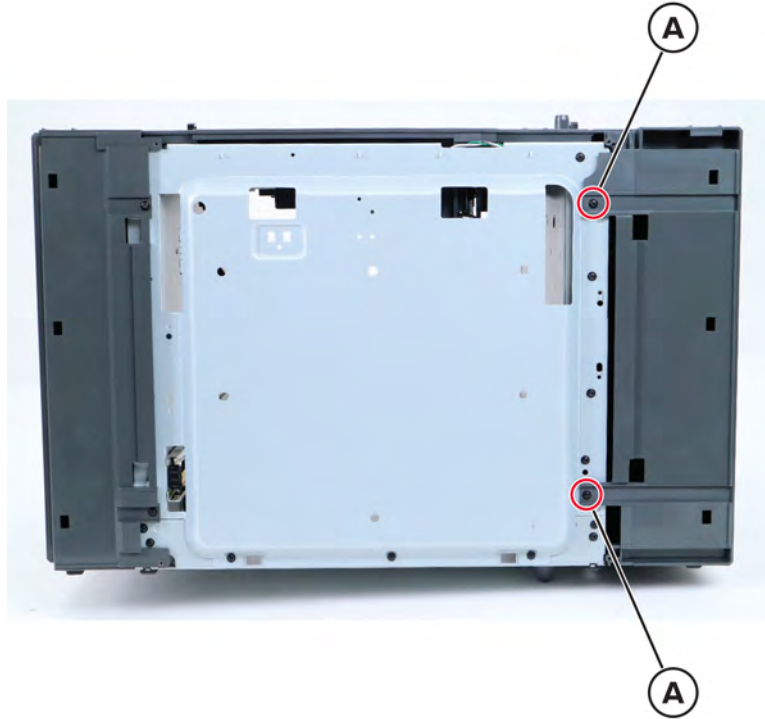

- 2 Remove the cover.

## 2100-sheet tray left cover removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479](#).

3 From the rear side, remove the two screws (A).

Parts removal

**480**

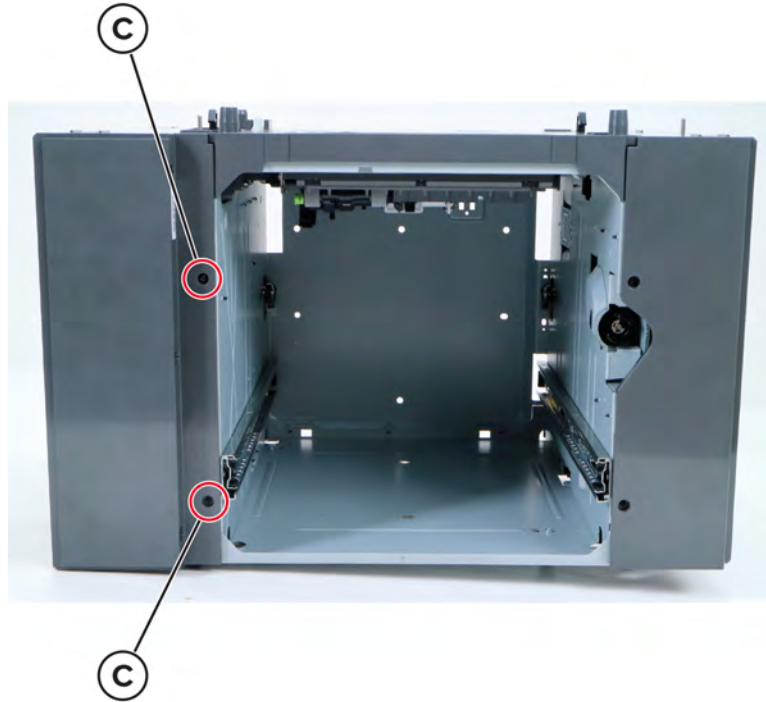

4 From the top side, remove the two screws (B).

Parts removal

**481**

5 From the front side, remove the two screws (C).

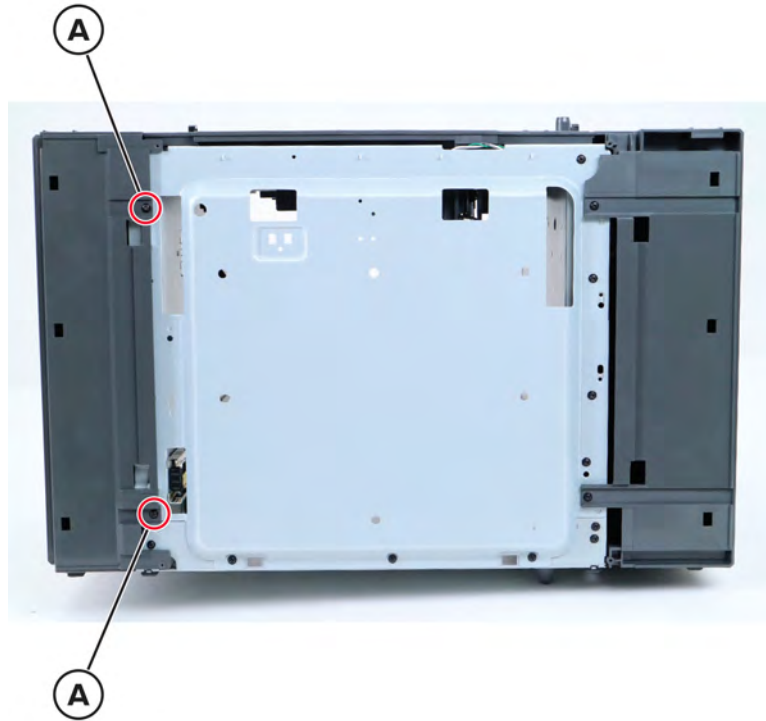

6 Remove the cover.

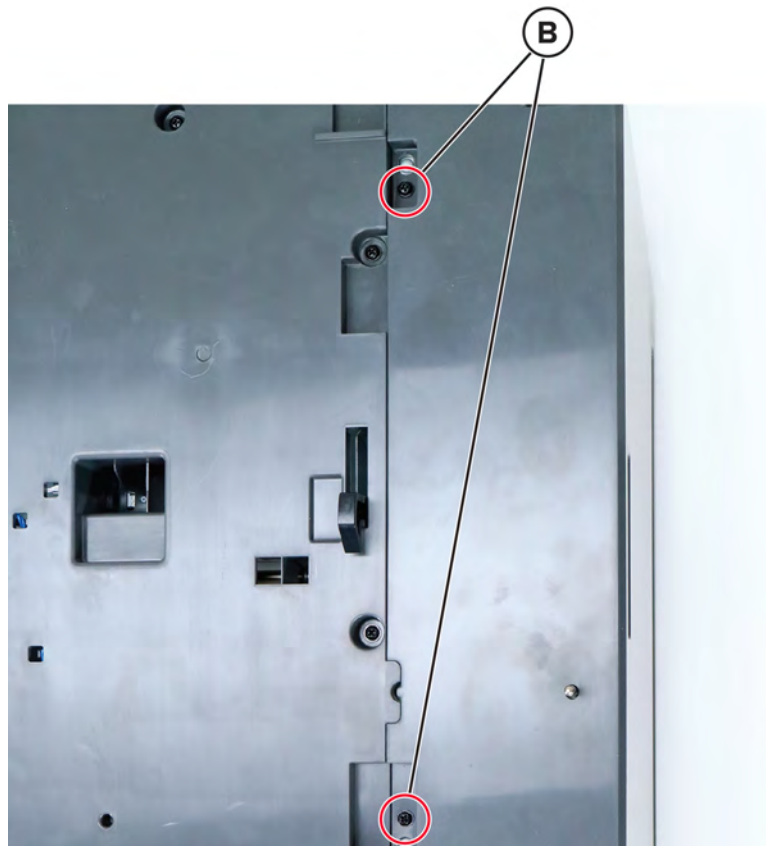

## 2100-sheet tray right cover removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478.](#)
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479.](#)

**3** From the rear side, remove the two screws (A).

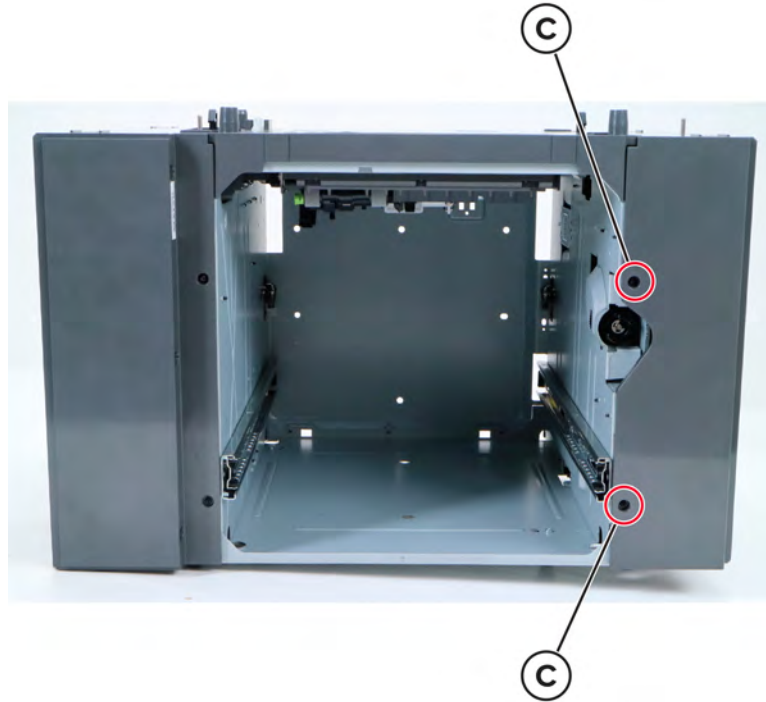

**4** From the top side, remove the two screws (B).

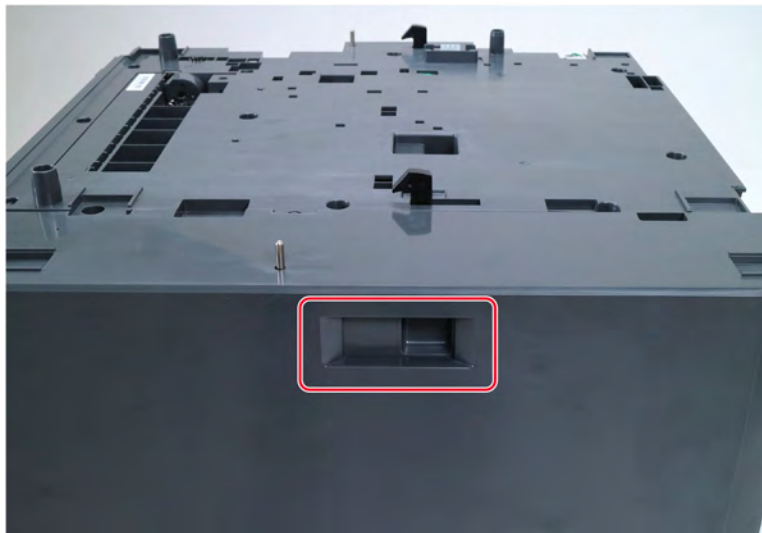

Parts removal

**5** From the front side, remove the two screws (C).

**6** Remove the cover.

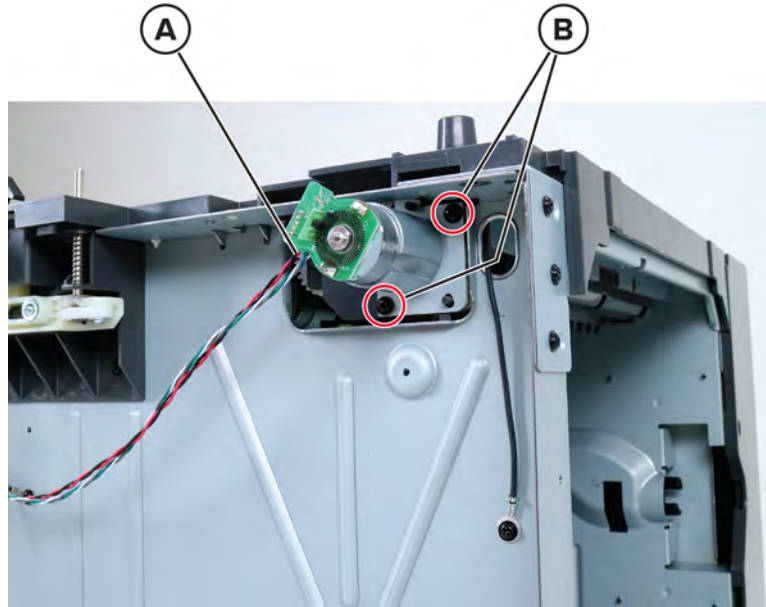

**Installation note:** When installing the right cover, make sure that the latch is positioned as shown.

## Motor (2100-sheet tray transport) removal

- 1** Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2** Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479](#).
- 3** Remove the 2100-sheet tray left cover. See [“2100-sheet tray left cover removal” on page 479](#).

- 4 Disconnect the cable (A), and then remove the two screws (B).

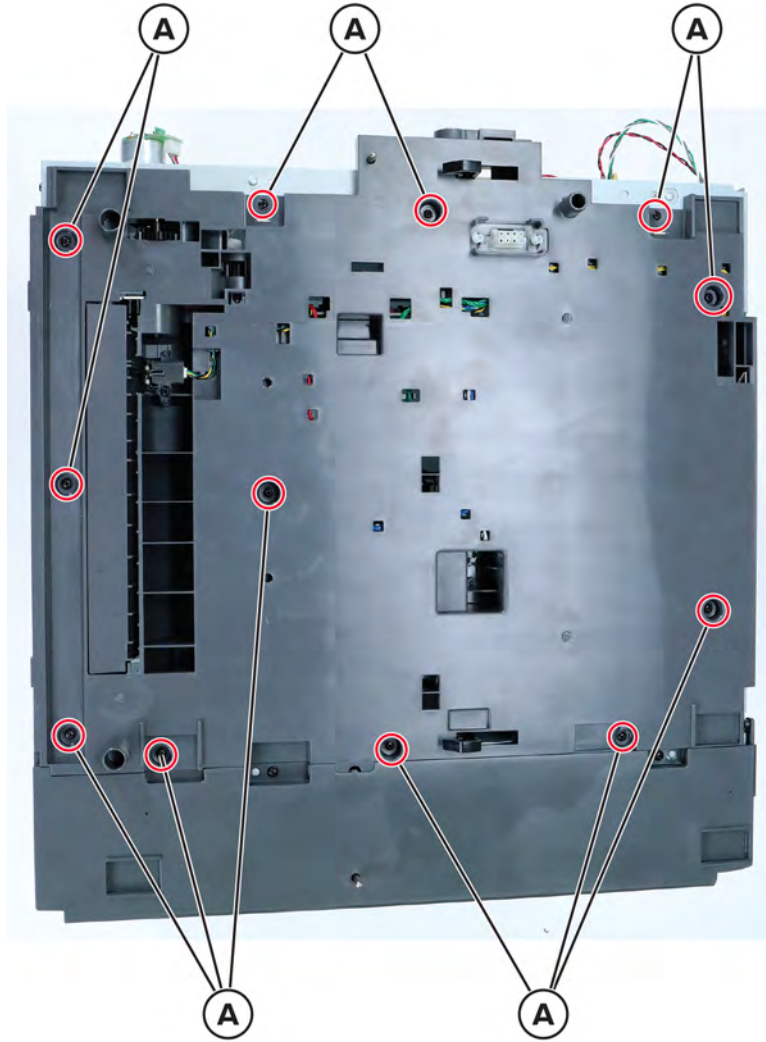

- 5 Remove the motor.

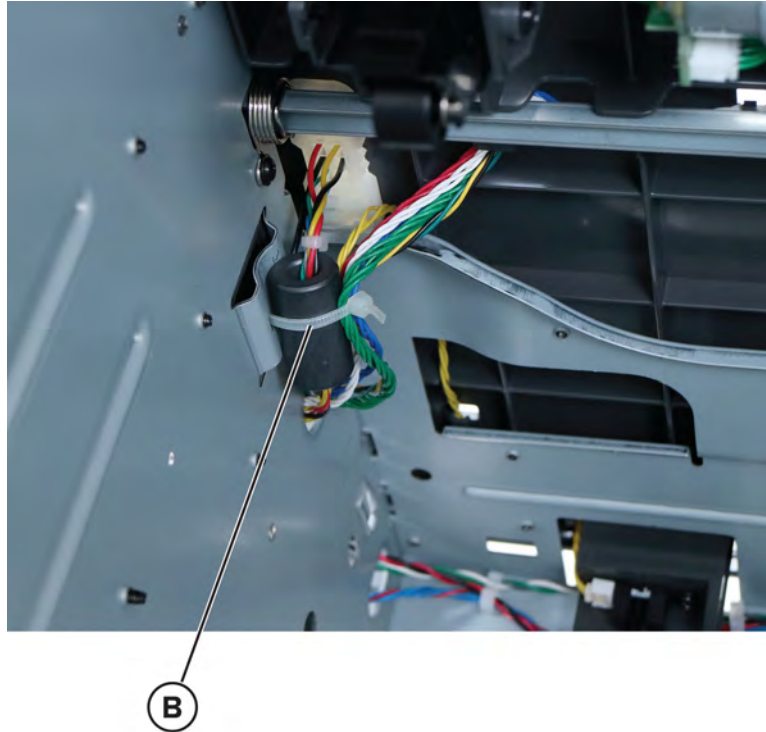

## 2100-sheet tray top cover removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479](#).
- 3 Remove the 2100-sheet tray left cover. See [“2100-sheet tray left cover removal” on page 479](#).
- 4 Remove the 2100-sheet tray right cover. See [“2100-sheet tray right cover removal” on page 482](#).
- 5 Remove the motor (2100-sheet tray transport). See [“Motor \(2100-sheet tray transport\) removal” on page 484](#).

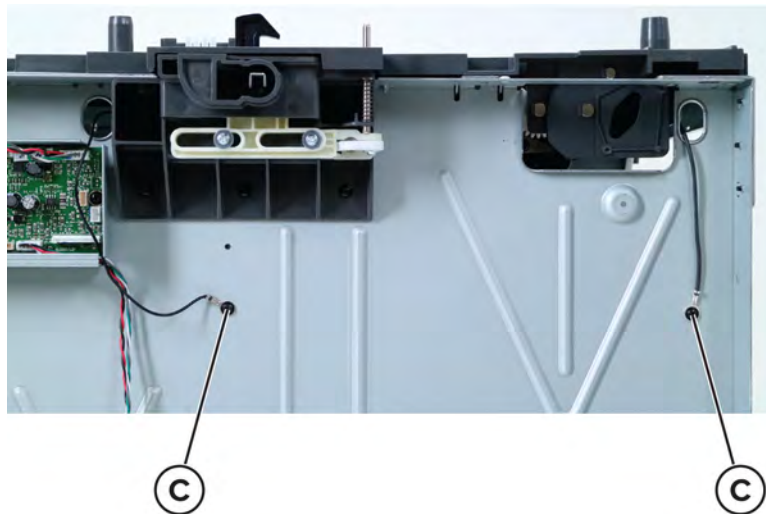

6 Remove the 12 screws (A).

- 7** Cut the cable tie, and then disconnect the motor cables from the controller board.

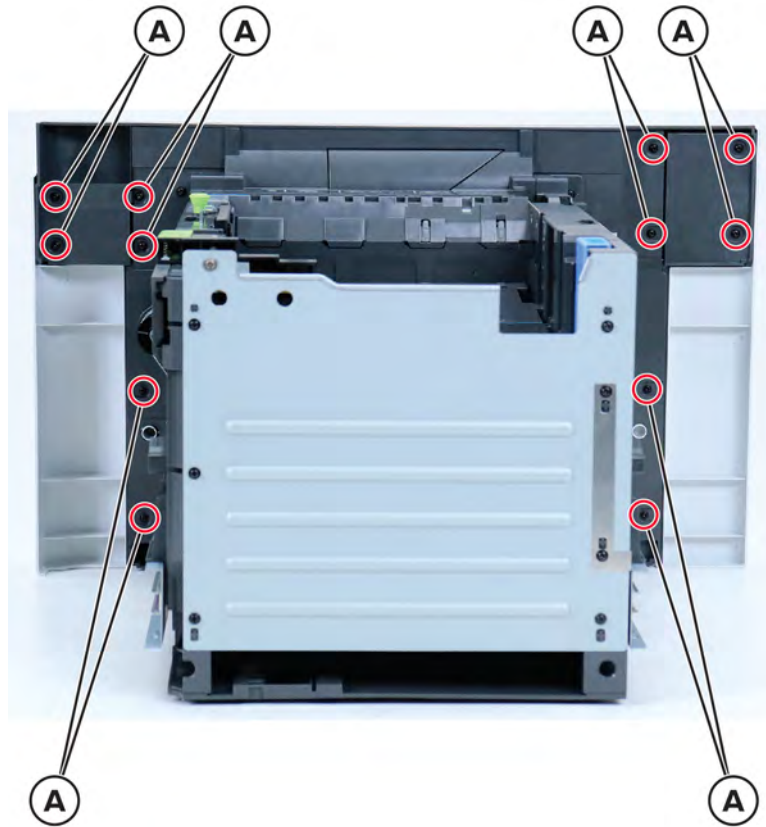

- 8** Remove the two screws (C) from the ground cables.

- 9** Remove the cover.

## 2100-sheet tray front cover removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Behind the front cover, remove the 12 screws (A).

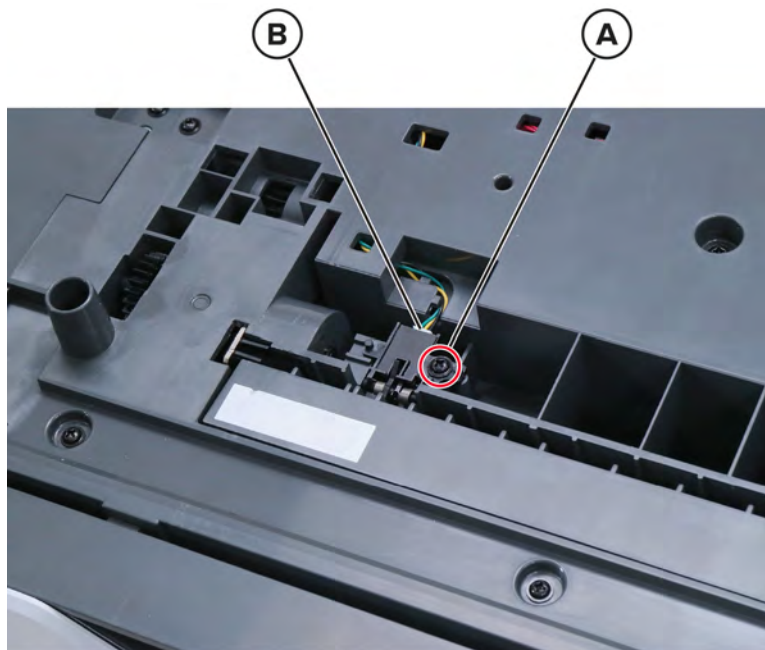

- 3 Remove the cover.

## Sensor (2100-sheet tray pick) removal

- 1 Remove the screw (A), and then disconnect the cable (B).

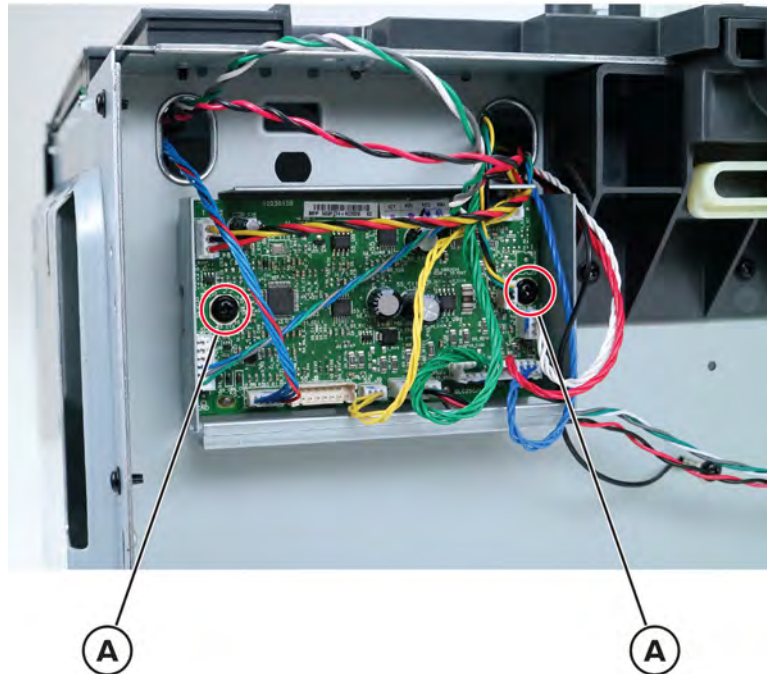

- 2 Remove the sensor.

## 2100-sheet tray controller board removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479](#).
- 3 Remove the 2100-sheet tray left cover. See [“2100-sheet tray left cover removal” on page 479](#).

- 4 Disconnect all the board cables, and then remove the two screws (A).

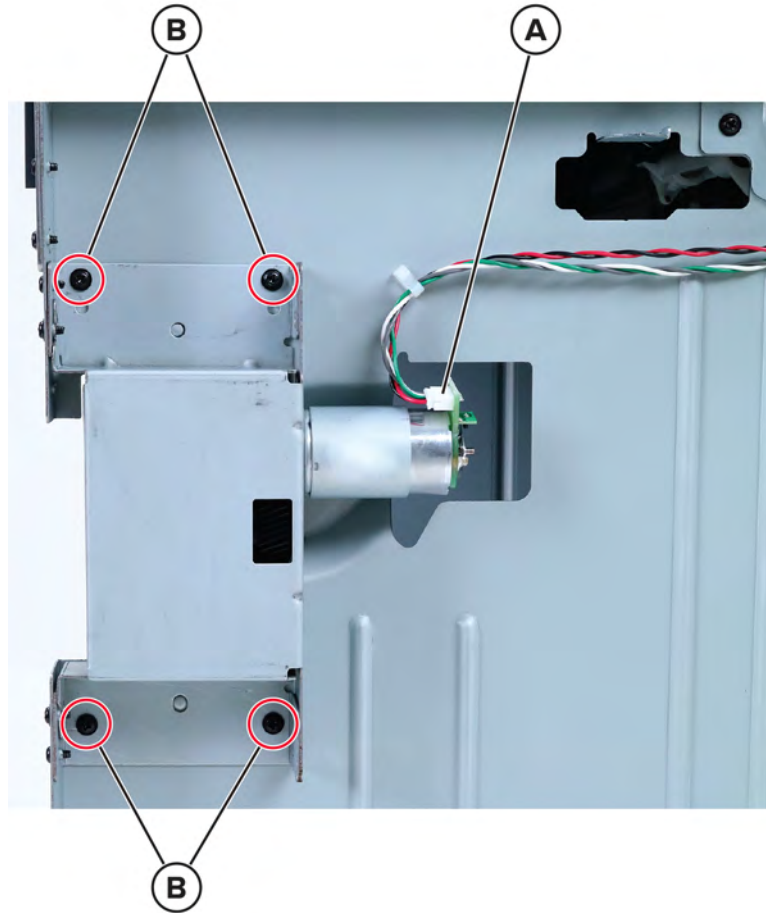

- 5 Remove the board.

## 2100-sheet tray elevator drive removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479](#).
- 3 Remove the 2100-sheet tray right cover. See [“2100-sheet tray right cover removal” on page 482](#).

- 4 Disconnect the cable (A), and then remove the four screws (B).

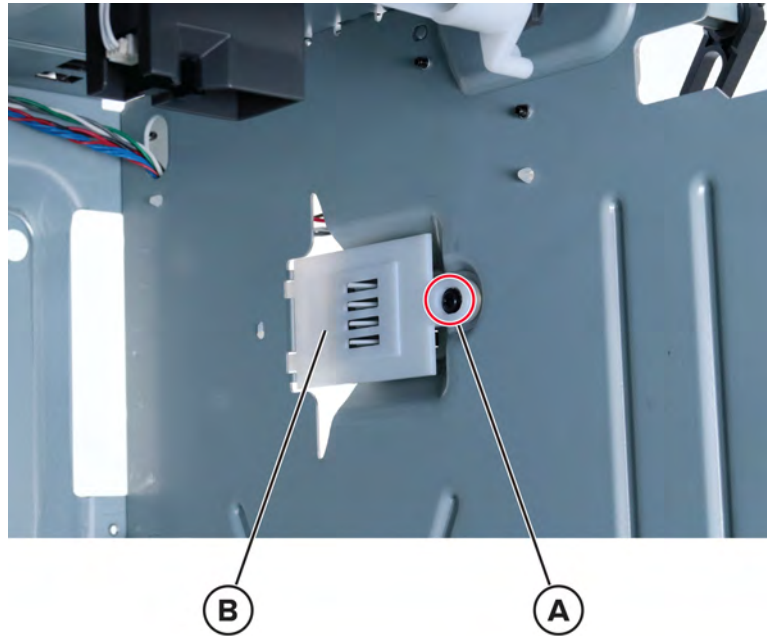

- 5 Remove the elevator drive.

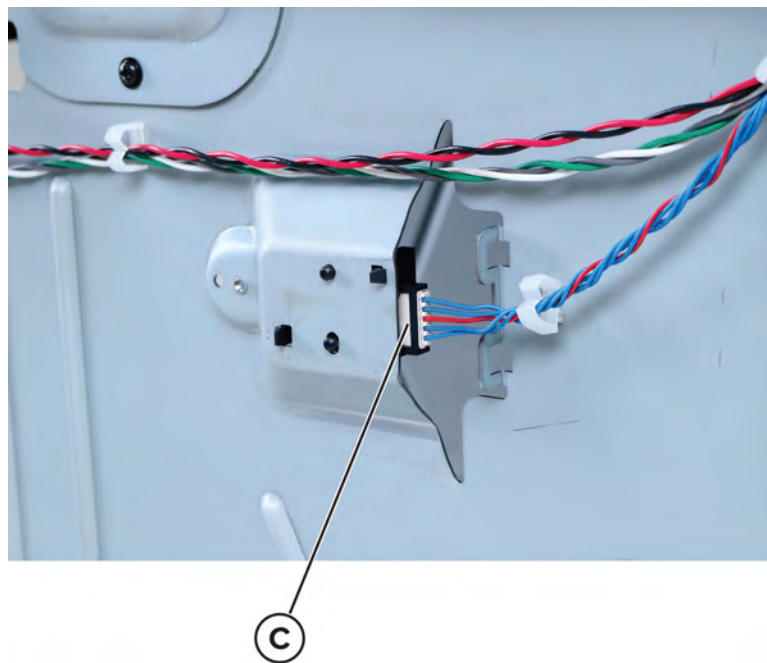

### Sensor (2100-sheet tray paper size) removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478.](#)
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479.](#)
- 3 Remove the 2100-sheet tray right cover. See [“2100-sheet tray right cover removal” on page 482.](#)

- 4 Remove the screw (A), and then remove the cover (B).

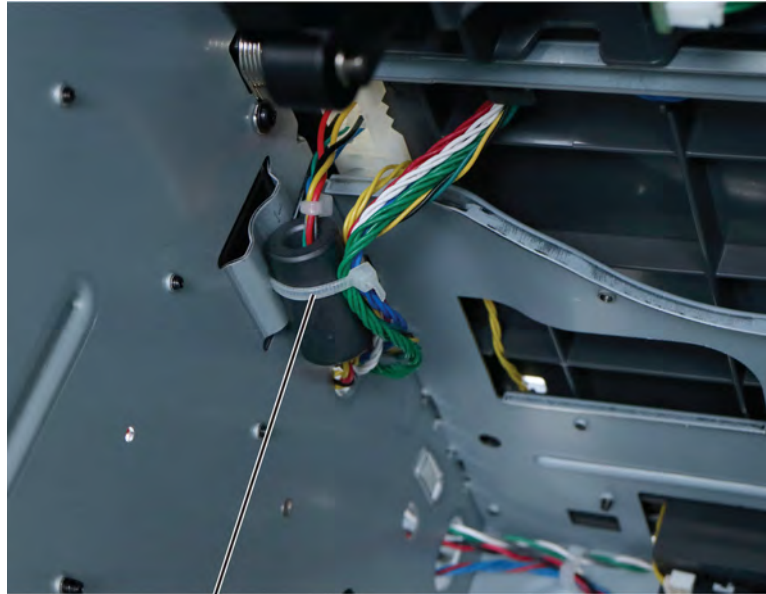

- 5 Disconnect the sensor cable (C), and then remove the sensor.

## 2100-sheet tray interface cable removal

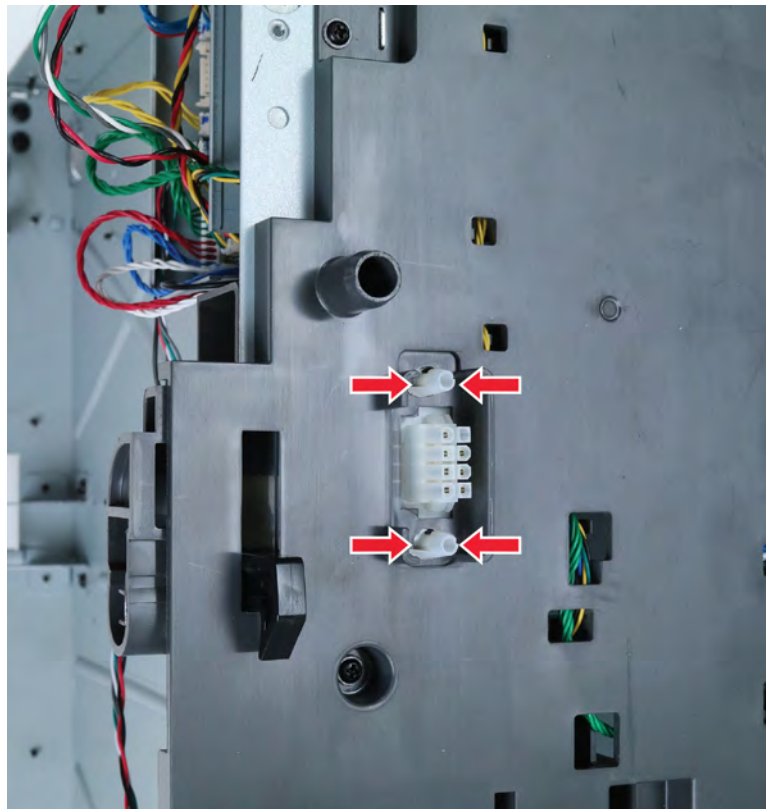

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the 2100-sheet tray rear cover. See [“2100-sheet tray rear cover removal” on page 479](#).
- 3 Remove the 2100-sheet tray left cover. See [“2100-sheet tray left cover removal” on page 479](#).

- 4 Cut the cable tie, and then disconnect the interface cable from the controller board.

A

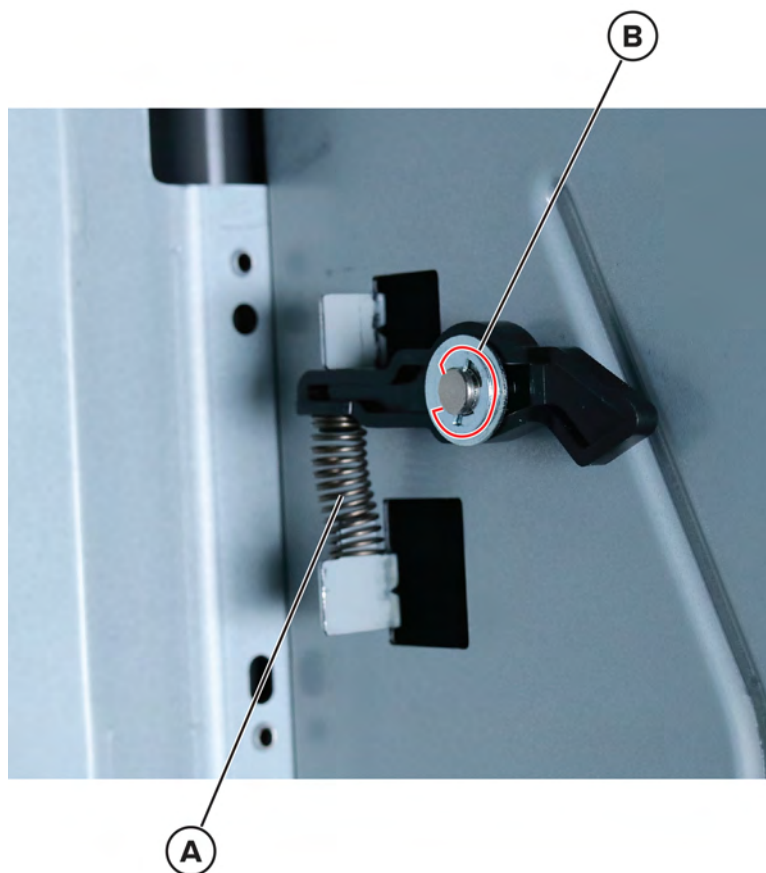

- 5 Release, and then dislodge the connector from the cover.

- 6 Remove the cable.

## 2100-sheet tray bellcrank removal

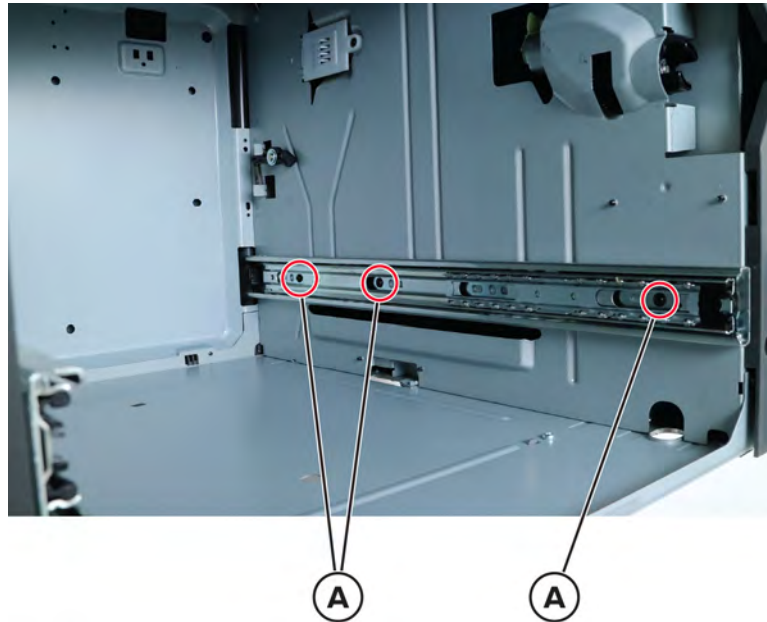

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the spring (A), and then remove the E-clip (B).

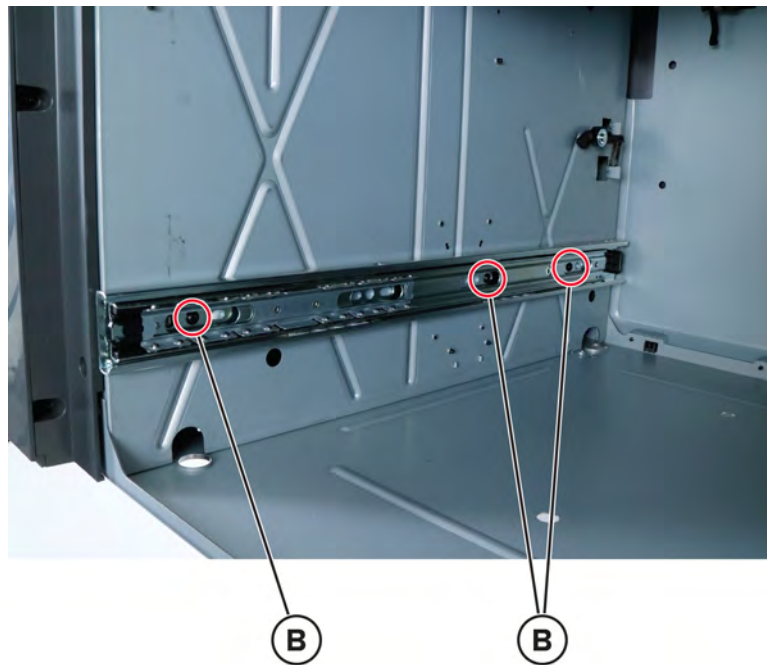

- 3 Remove the bellcrank.

## 2100-sheet tray rails removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the three screws (A) from the inner right side of the tray.

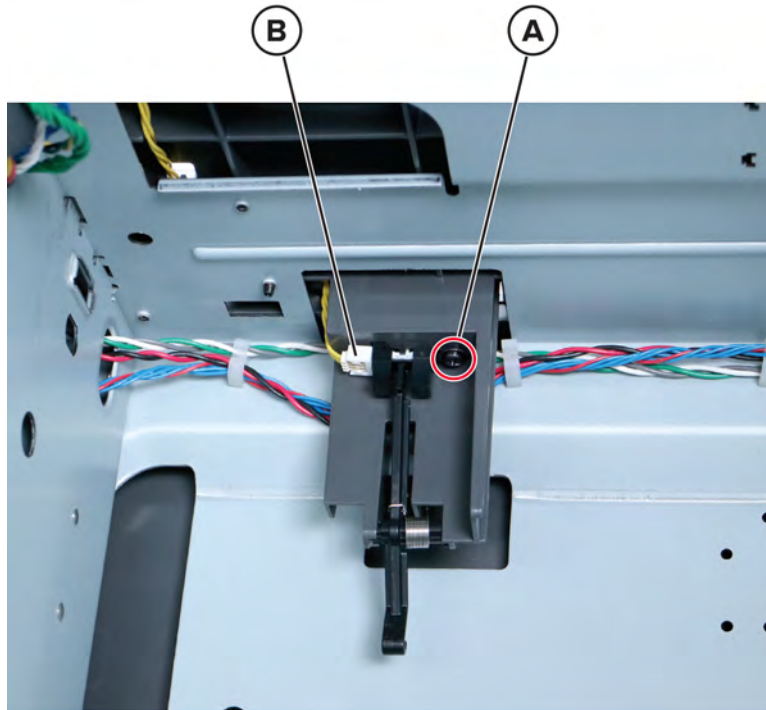

- 3 Remove the three screws (B) from the inner left side of the tray.

- 4 Remove the rails.

## Sensor (2100-sheet tray near empty) removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478](#).
- 2 Remove the screw (A), and then disconnect the sensor cable (B).

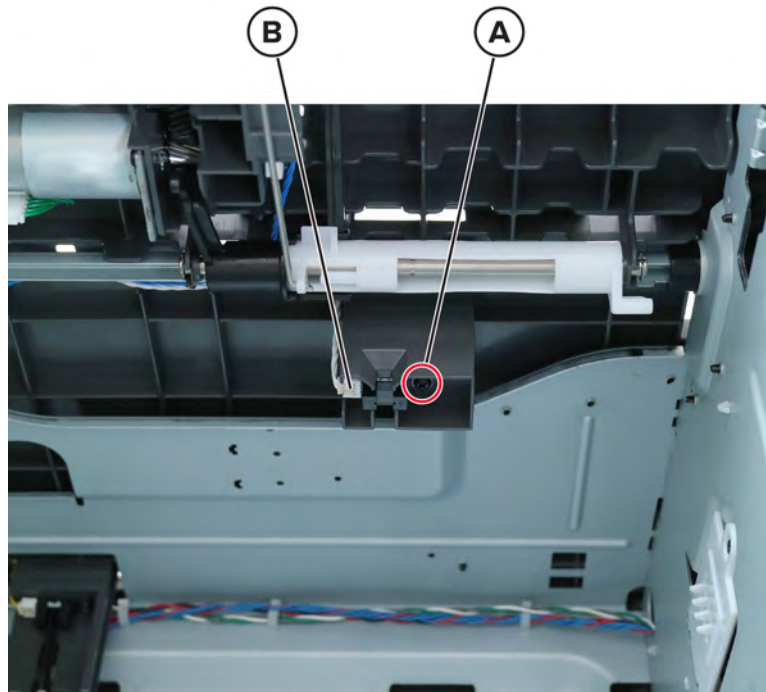

- 3 Remove the sensor.

## Sensor (2100-sheet tray A5 length guide) removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478.](#)
- 2 Remove the screw (A), and then disconnect the sensor cable (B).

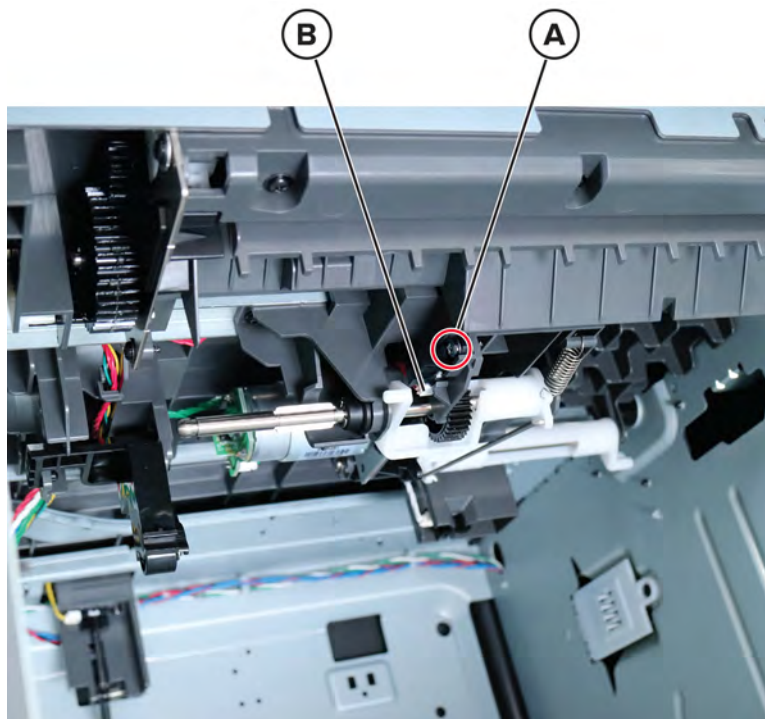

- 3 Remove the sensor.

## Sensor (2100-sheet tray pick roller index) removal

- 1 Remove the 2100-sheet tray insert. See [“2100-sheet tray insert removal” on page 478.](#)
- 2 Remove the 2100-sheet tray pick roller.

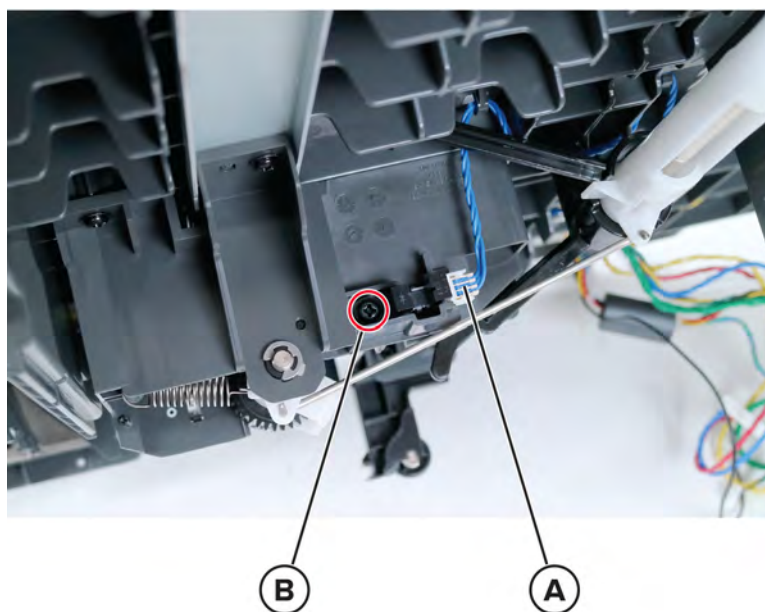

- 3** Remove the screw (A), and then disconnect the sensor cable (B).

- 4** Remove the sensor.

### Sensor (2100-sheet tray paper present) removal

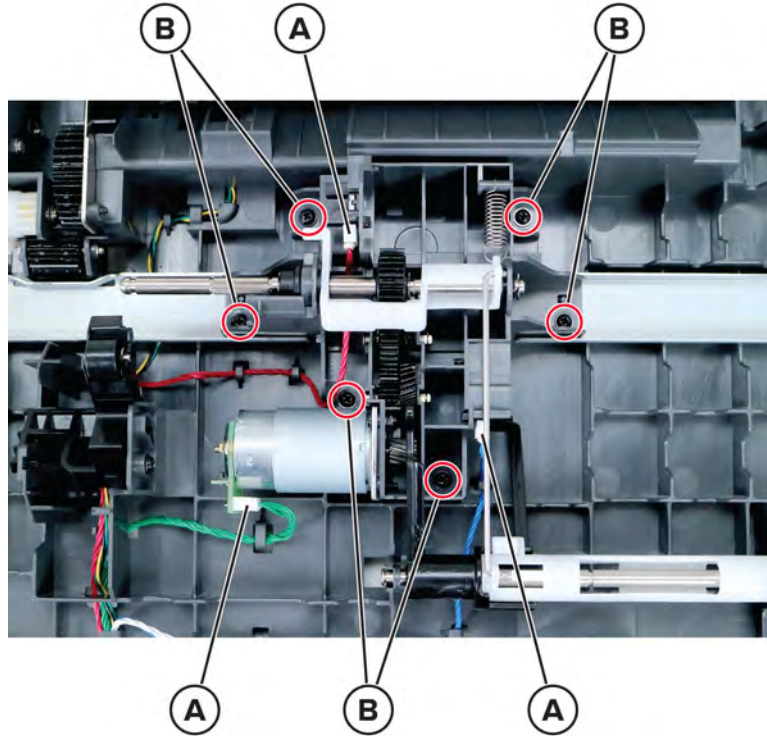

- 1** Remove the top cover. See [“2100-sheet tray top cover removal” on page 485.](#)
- 2** Disconnect the sensor cable (A), and then remove the screw (B).

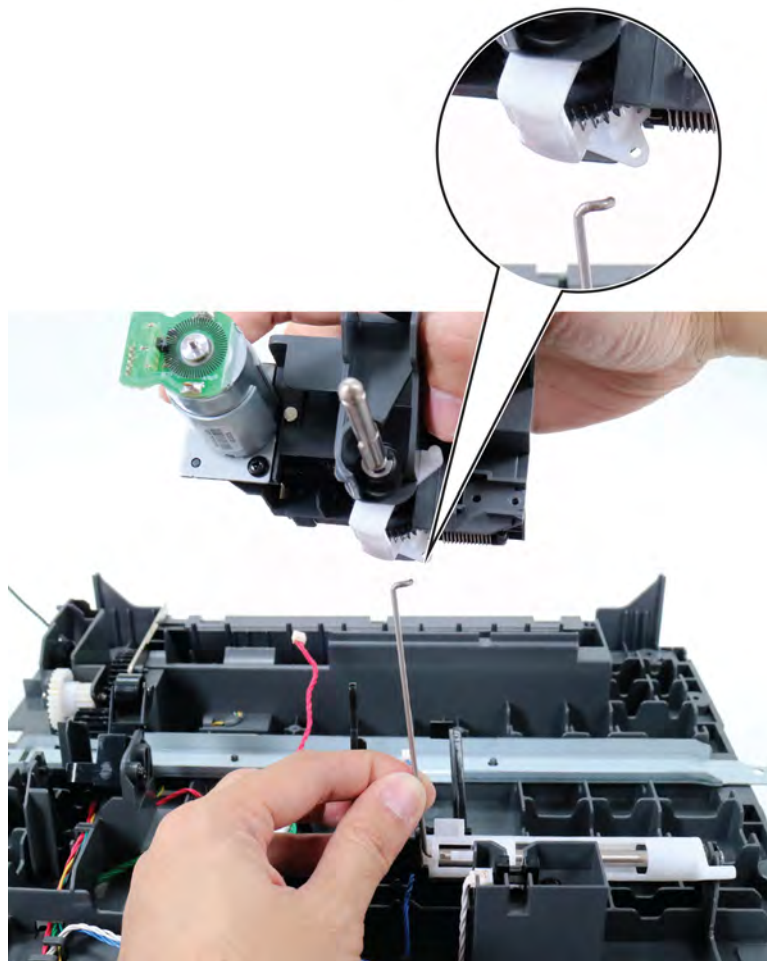

- 3** Remove the sensor.

## 2100-sheet tray paper feeder removal

- 1 Remove the 2100-sheet tray top cover. See [“2100-sheet tray top cover removal” on page 485](#).
- 2 Remove the 2100-sheet tray pick roller.
- 3 Disconnect the cables (A), and then remove the six screws (B).

4 Release the rod.

5 Remove the paper feeder.

## Optional 250- and 550-sheet tray removals

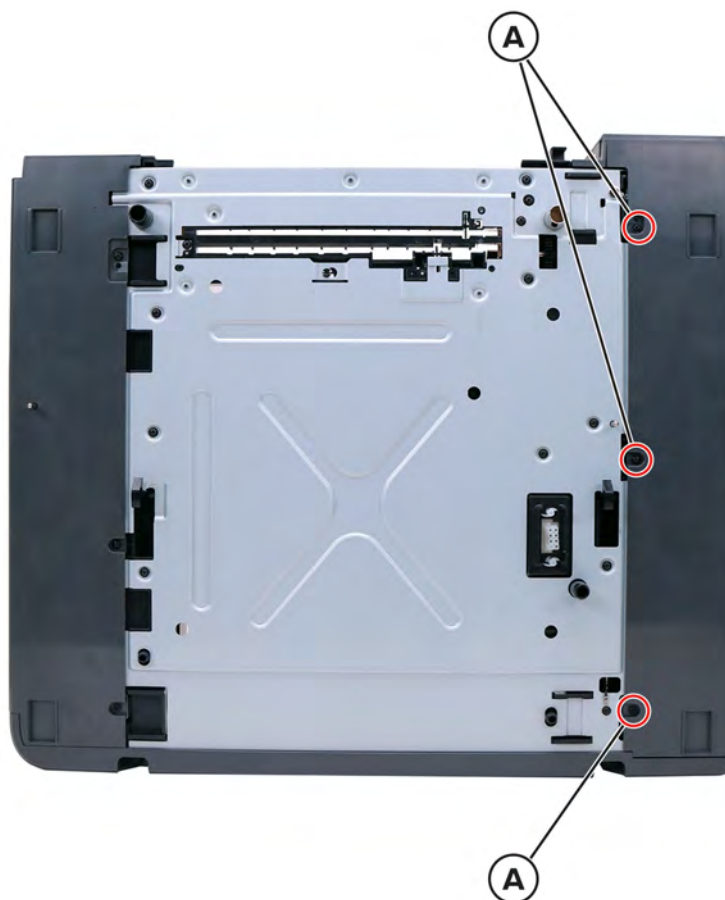

### Optional 250- and 550-sheet tray removal

- 1 Press the latch to unlock.
- 2 Lift the printer or optional tray above the 250- or 550-sheet tray, and then separate the 250- or 550-sheet tray.

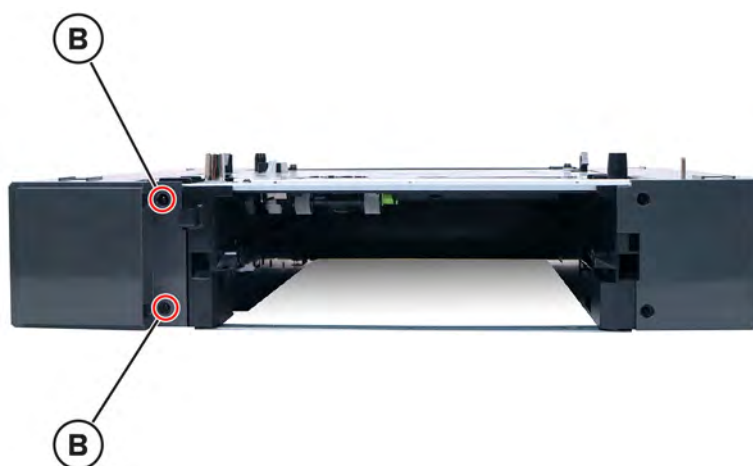

## 250- and 550-sheet tray left cover removal

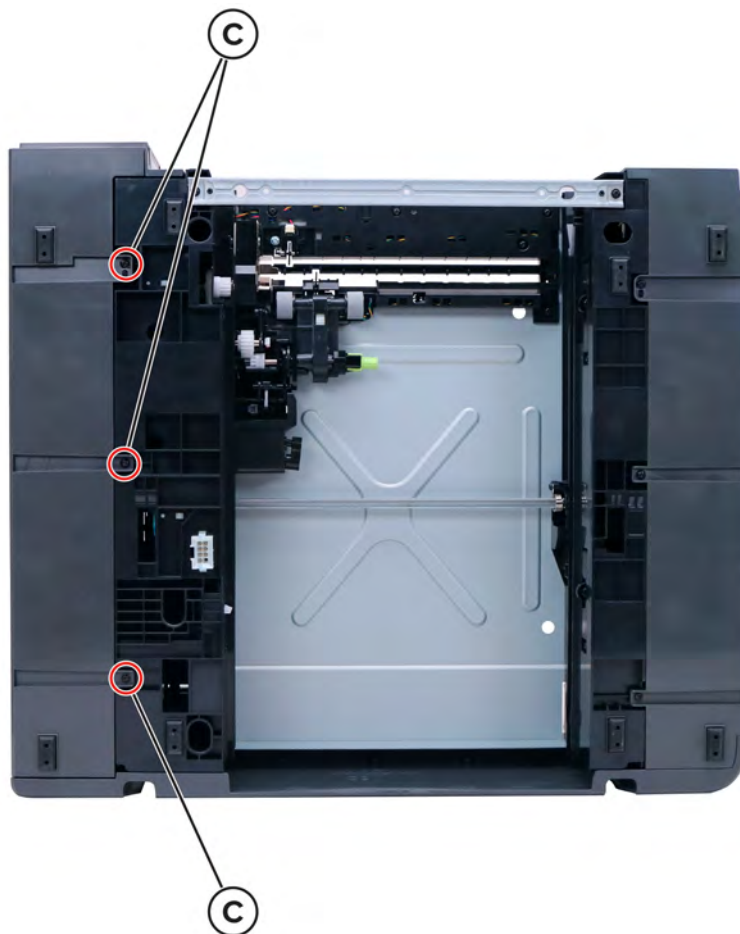

- 1 Remove the tray insert.
- 2 From the top side, remove the three screws (A).

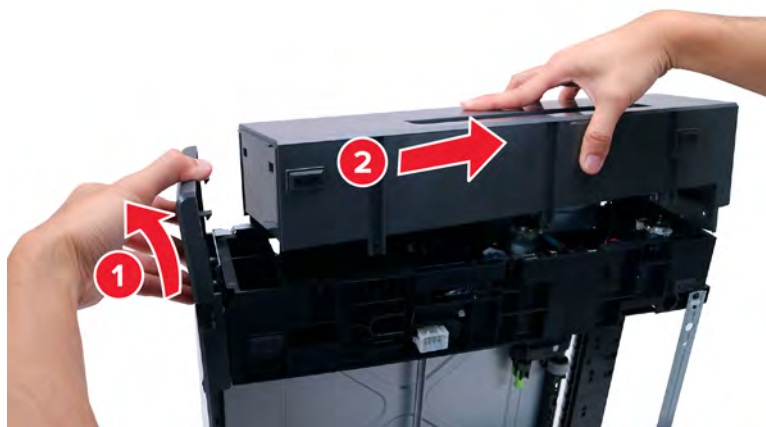

- 3 From the front side, remove the two screws (B).

4 From the bottom side, remove the three screws (C).

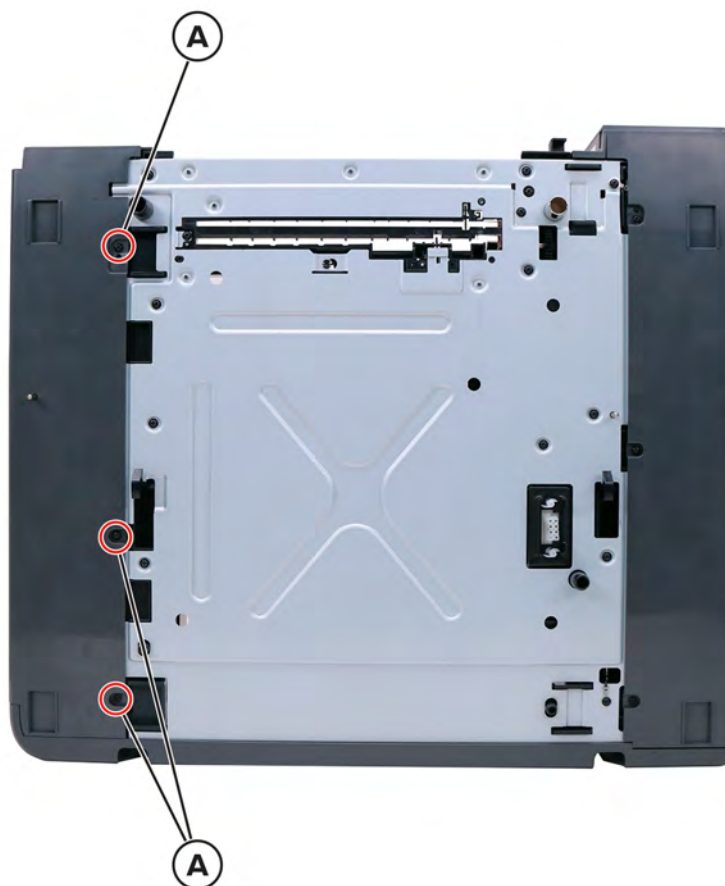

5 Slightly pull the rear cover to release, and then remove the left cover.

## 250- and 550-sheet tray right cover removal

- 1 Remove the tray insert.
- 2 From the top side, remove the three screws (A).

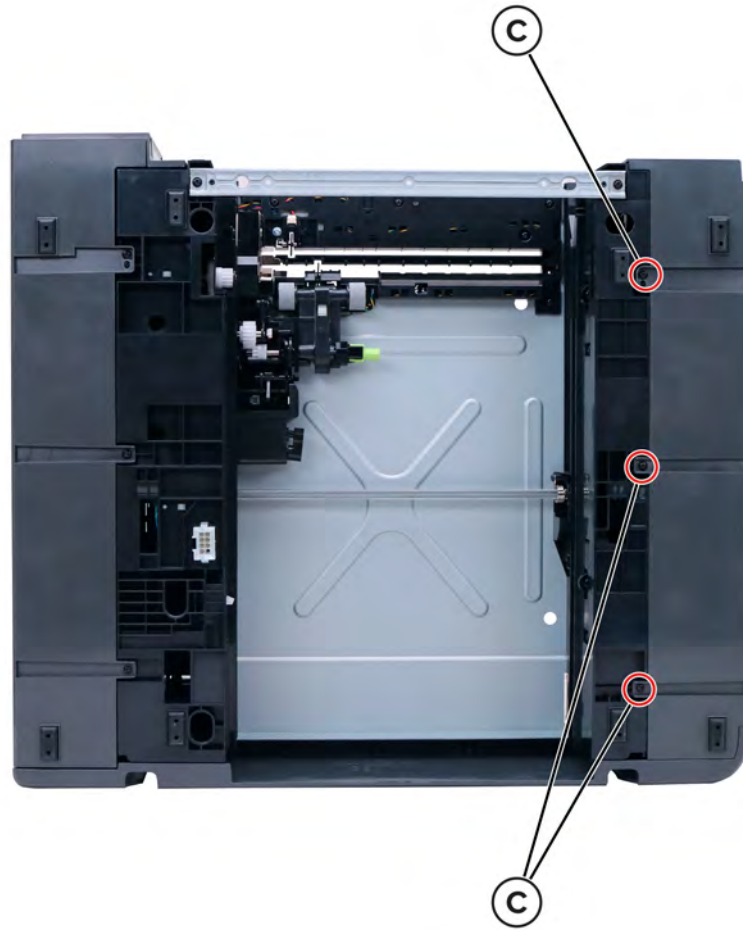

- 3 From the front side, remove the two screws (B).

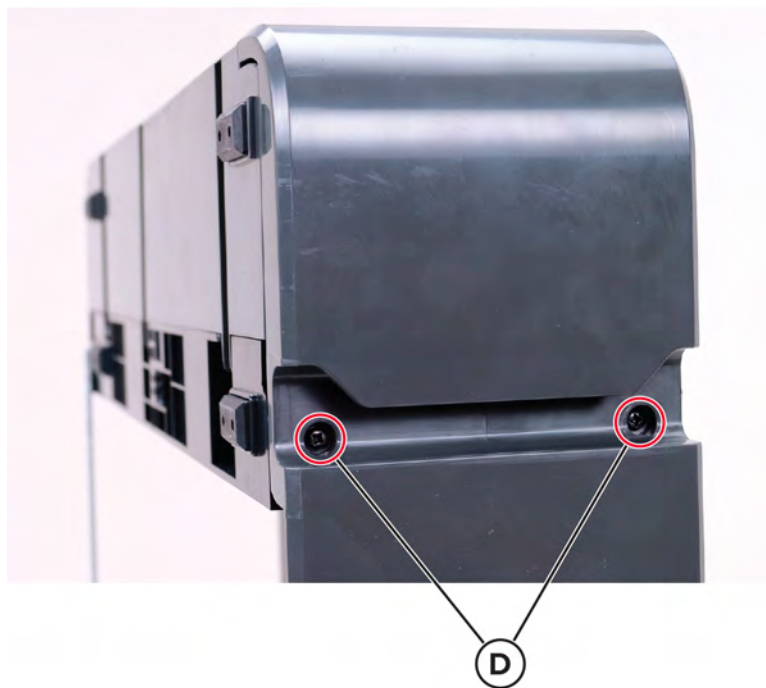

4 From the bottom side, remove the three screws (C).

Parts removal

**505**

**5** From the rear side, remove the two screws (D).

**6** Pry the top and bottom tabs to release the cover.

7 Slightly pull the rear cover to release, and then remove the right cover.

**Installation note:** When installing the right cover, make sure that the latch is positioned as shown. After installation, make sure that the latch is working.

## 250- and 550-sheet tray rear cover removal

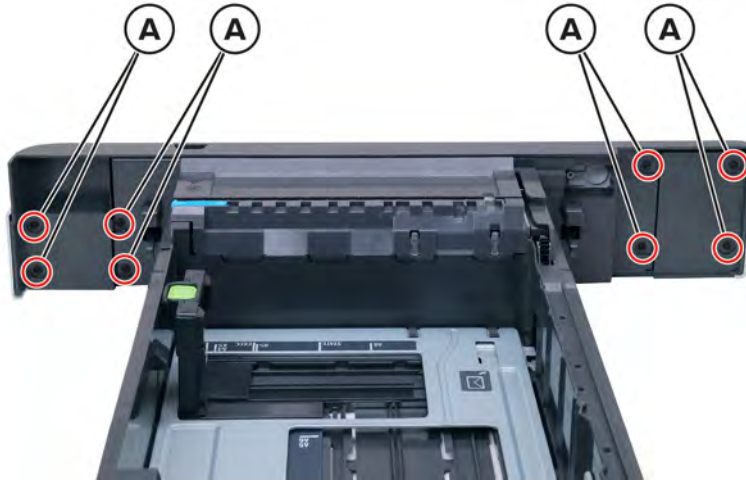

- 1 Remove the tray insert.
- 2 Remove the four screws (A), and then remove the cover.

Parts removal

## 250- and 550-sheet tray insert front cover removal

- 1 Remove the tray insert.
- 2 Behind the cover, remove the eight screws (A).

- 3 Remove the cover.

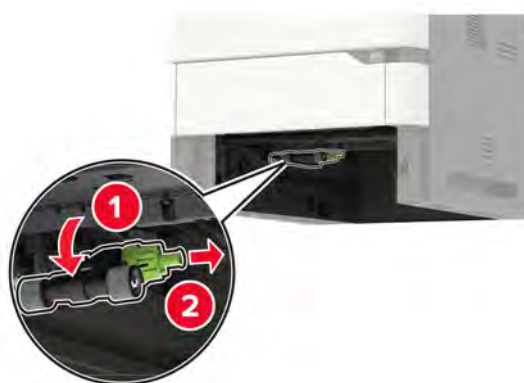

## Tray level indicator removal

- 1 Pull out the tray.
- 2 Remove the indicator.

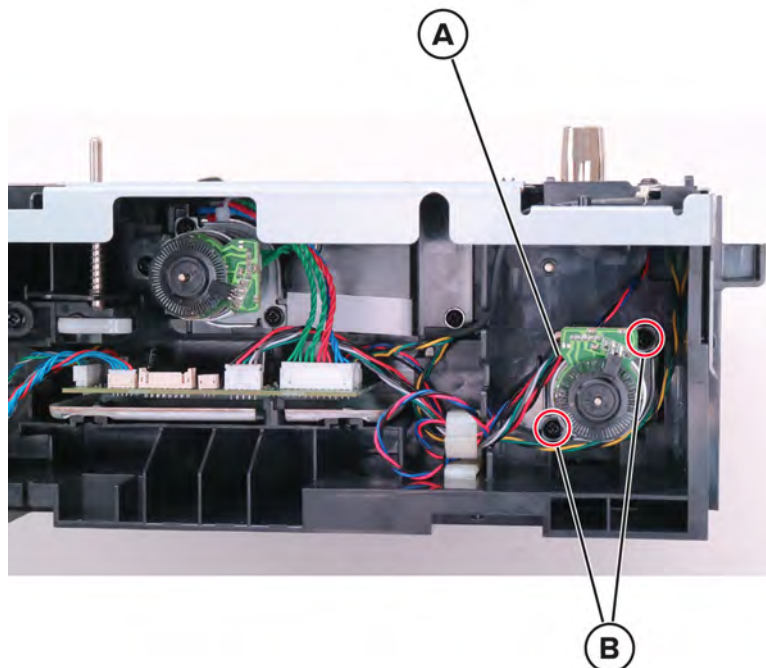

## Pick roller removal

- 1 Remove the tray insert.
- 2 Remove the pick roller.

## Motor (250- and 550-sheet tray transport) removal

- 1 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 2 Disconnect the cable (A), and then remove the two screws (B).

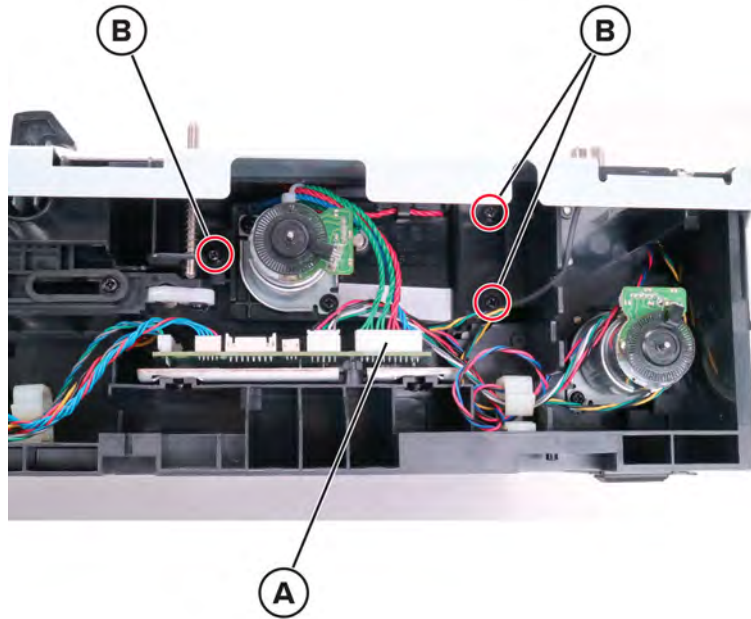

- 3 Remove the motor.

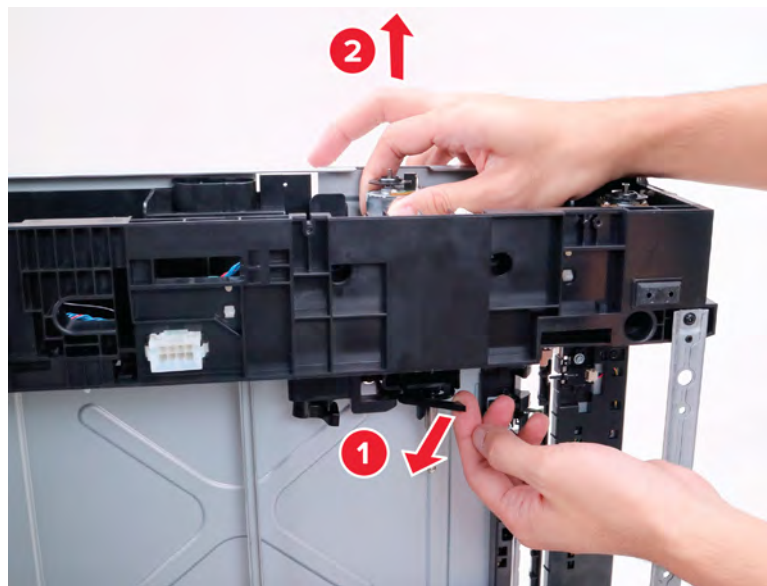

## 250- and 550-sheet tray paper feeder removal

- 1 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 2 Remove the pick roller. See [“Pick roller removal” on page 509.](#)

- 3 Disconnect the cable (A), and then remove the three screws (B).

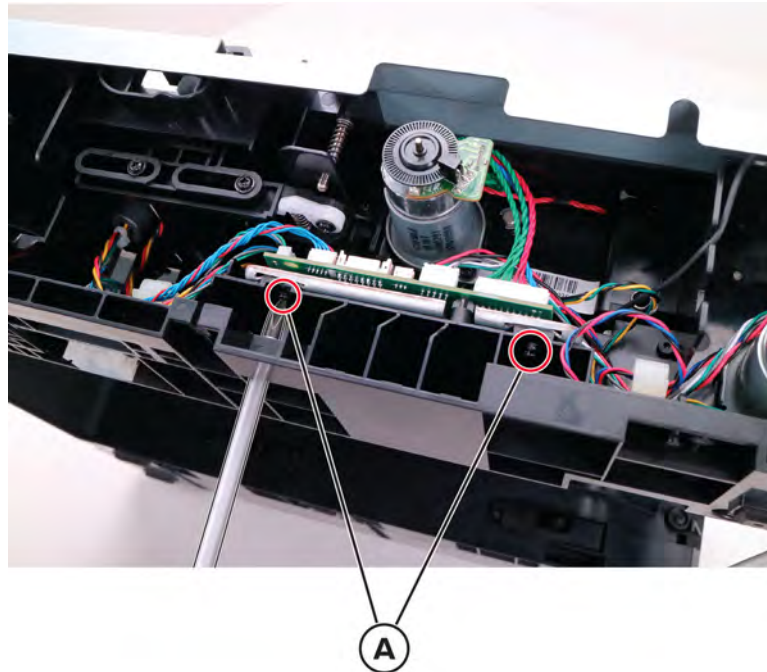

- 4 Slightly pull the flag to release, and then remove the paper feeder.

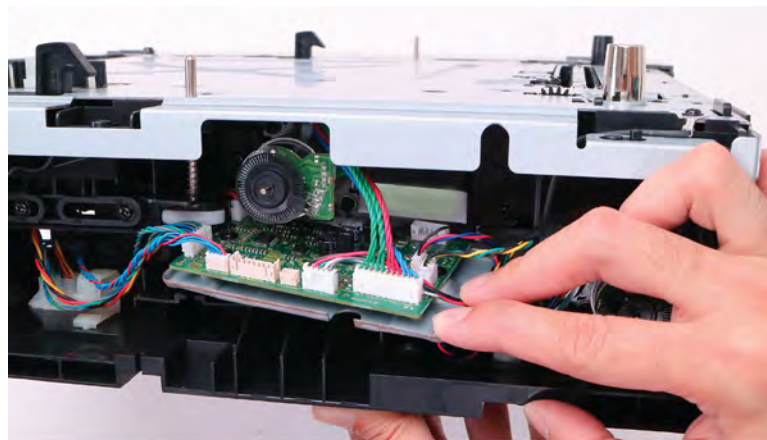

## 250- and 550-sheet tray controller board removal

- 1 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 2 Remove the two screws (A), and then release the controller board bracket.

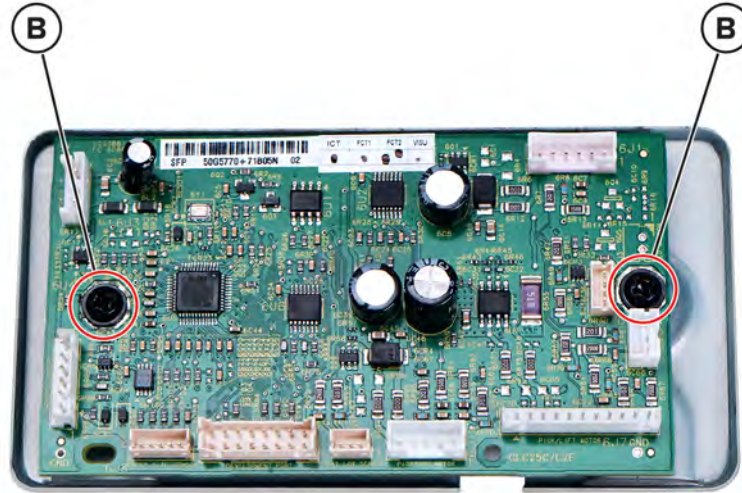

- 3 Disconnect all the cables from the controller board.

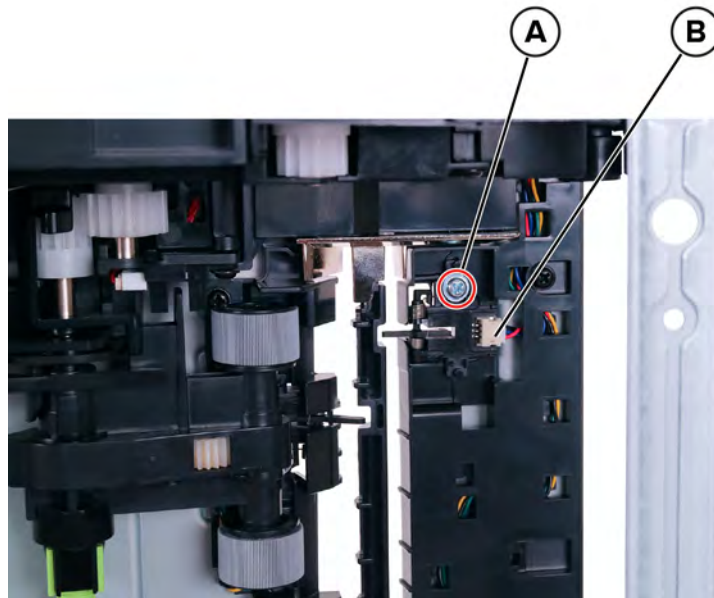

- 4 Remove the two screws (B), and then remove the controller board.

### Sensor (250- and 550-sheet tray pass-through) removal

- 1 Remove the tray insert.
- 2 Remove the screw (A), and then disconnect the sensor cable (B).

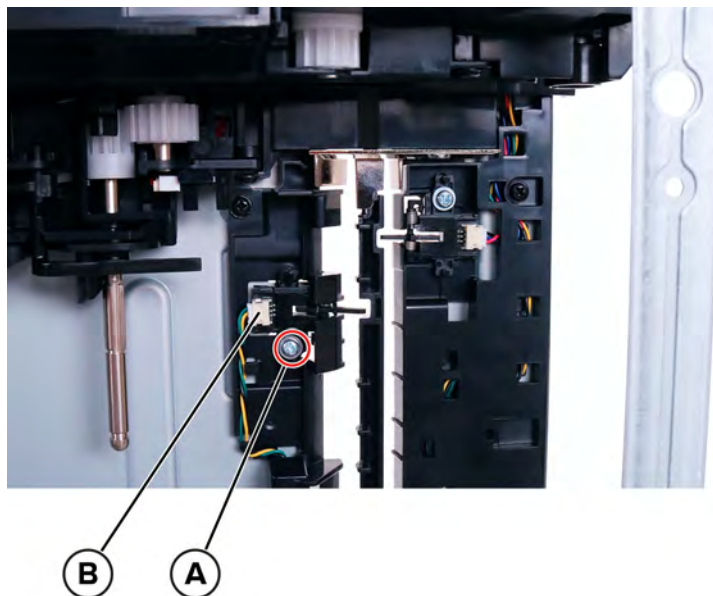

- 3 Remove the sensor.

### Sensor (250- and 550-sheet tray pick) removal

- 1 Remove the tray insert.
- 2 Remove the pick roller. See [“Pick roller removal” on page 509](#).

- 3 Remove the screw (A), and then disconnect the sensor cable (B).

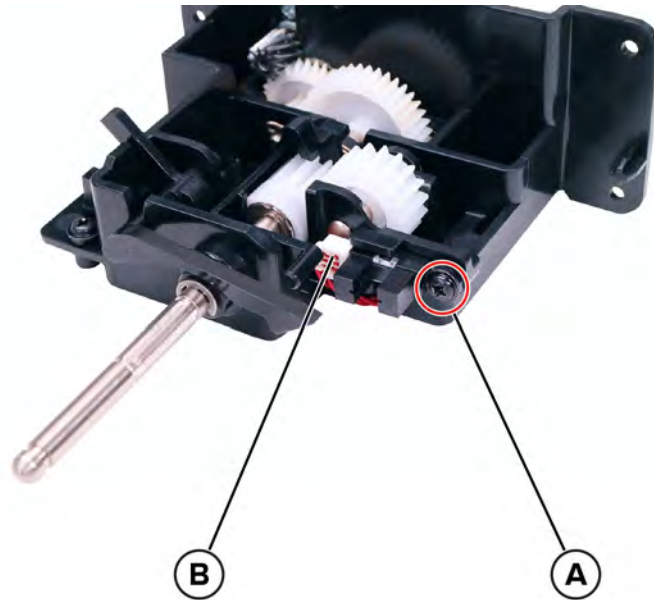

- 4 Remove the sensor.

### **Sensor (250- and 550-sheet tray pick roller index) removal**

- 1 Remove the tray insert.
- 2 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 3 Remove the pick roller. See [“Pick roller removal” on page 509.](#)
- 4 Remove the 250- and 550-sheet tray paper feeder. See [“250- and 550-sheet tray paper feeder removal” on page 510.](#)

- 5 Remove the screw (A), and then disconnect the sensor cable (B).

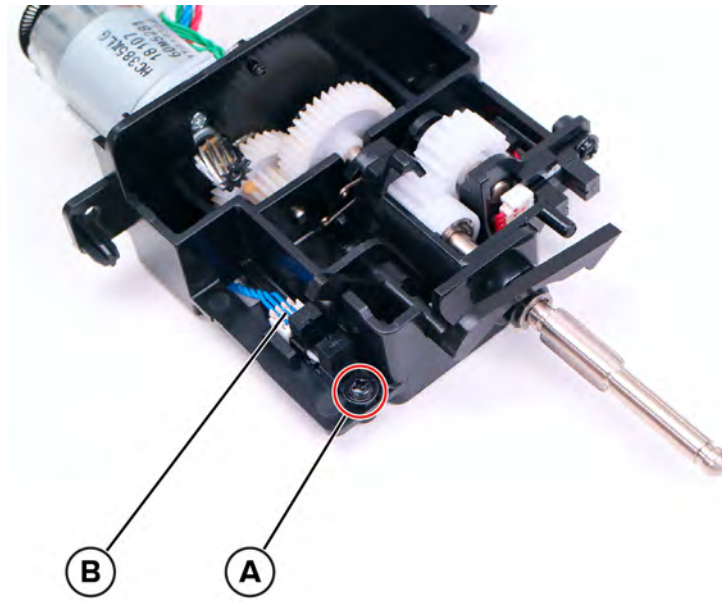

- 6 Remove the sensor.

### Sensor (250- and 550-sheet tray paper present) removal

- 1 Remove the tray insert.
- 2 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 3 Remove the pick roller. See [“Pick roller removal” on page 509.](#)
- 4 Remove the 250- and 550-sheet tray paper feeder. See [“250- and 550-sheet tray paper feeder removal” on page 510.](#)

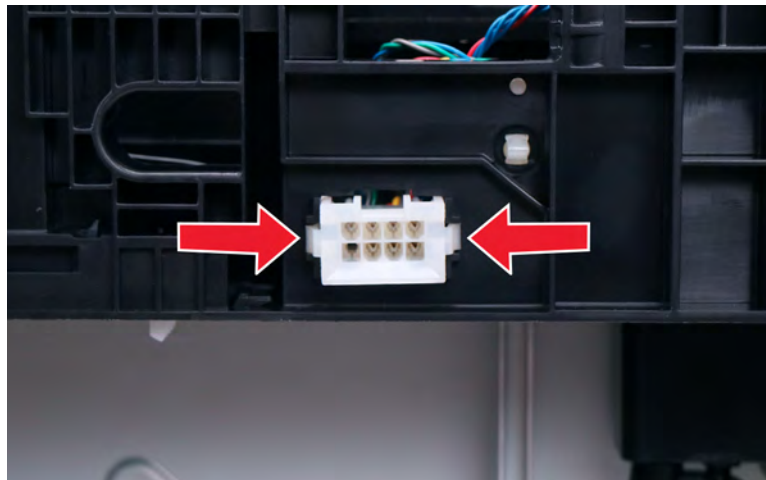

- 5 Remove the screw (A), and then disconnect the sensor cable (B).

- 6 Remove the sensor.

## 250- and 550-sheet tray interface cable removal

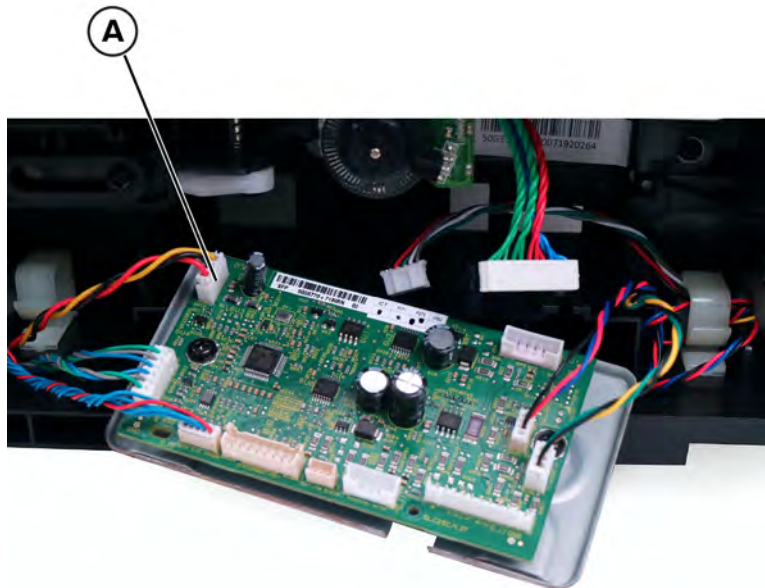

- 1 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 2 Release the controller board bracket. See [“250- and 550-sheet tray controller board removal” on page 512.](#)
- 3 Press the latches to release, and then dislodge the connector from the bottom side.

4 Pinch the latches to release, and then dislodge the connector from the top side.

5 Disconnect the cable (A), and then remove it.

## Sensor (250- and 550-sheet tray paper size) removal

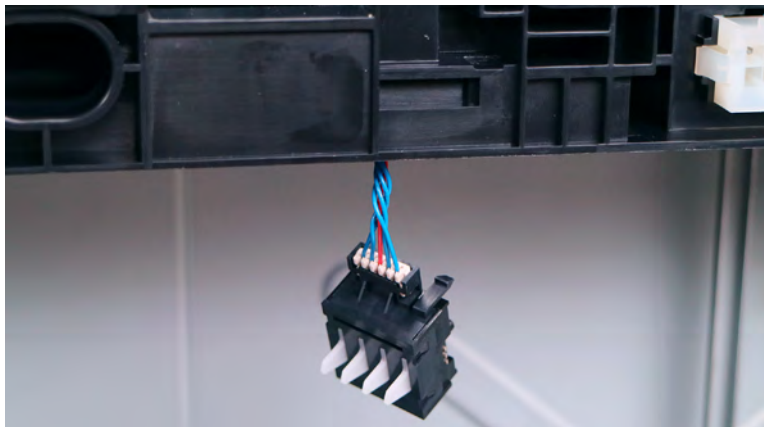

- 1 Remove the 250- and 550-sheet tray left cover. See [“250- and 550-sheet tray left cover removal” on page 502.](#)
- 2 From the left side, pry the latch to release the sensor cover.

- 3 From the bottom side, press the latch to release the sensor.

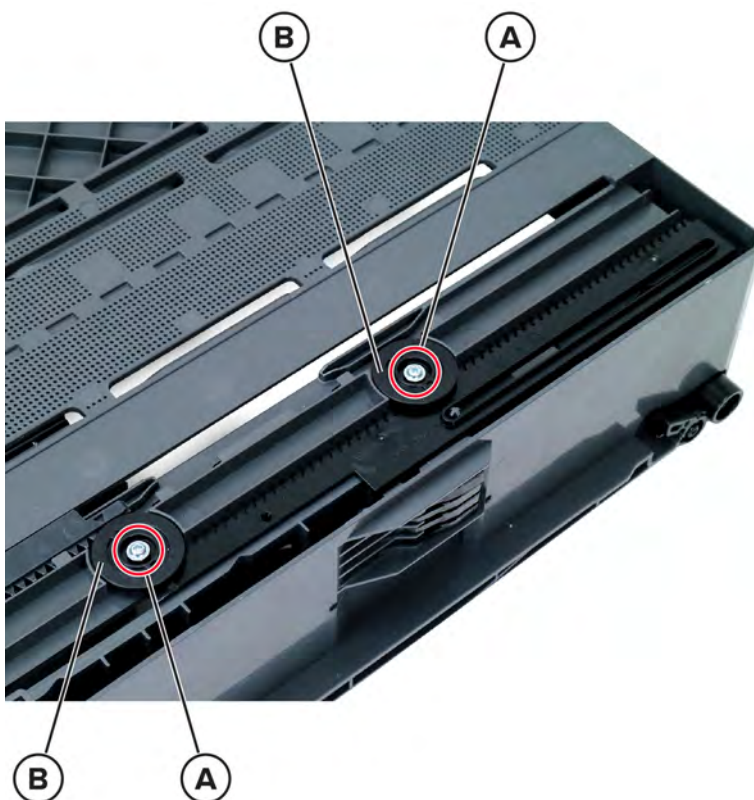

- 4 Disconnect the cable, and then remove the sensor.

## 250- and 550-sheet tray paper size sensor actuator removal

- 1 Remove the tray insert.
- 2 On the tray insert, move the paper guide to the front side.
- 3 Under the tray insert, position the racks and pinions as shown.  
Remove the two screws (A), and then remove the two pinions (B).

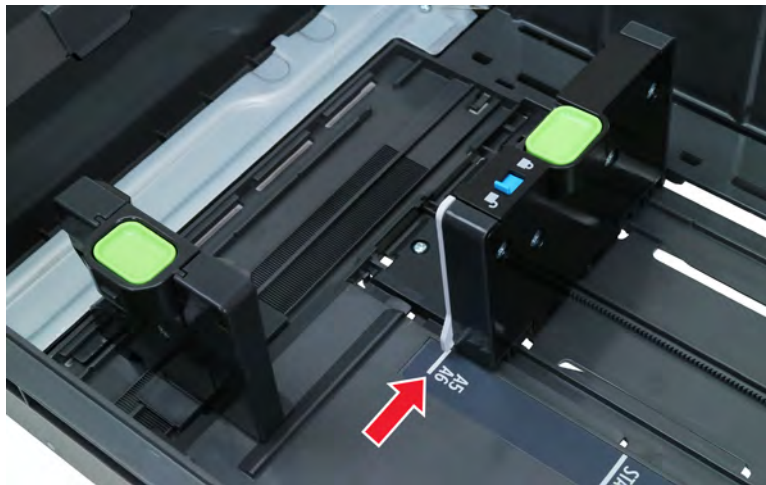

- 4 Slightly pull the left cover to release, and then pry the rack to release.

- 5 Remove the rack.

**Installation notes:**

- a Make sure that the white indicator on the paper guide is aligned with the A5 and A6 label.

- b** Move the paper guide all the way to the front side of the tray to match the positions of the racks and pinions shown. Align the triangle and square icons on the pinions to the corresponding triangle and square icons on the racks.

- c** Make sure that the screws are not too tight so that the gears can still move.

- 6** Release the latch, and then remove the actuator.

## Optional output expander removals

### Optional output expander removal

- 1 Press the latches to release.
- 2 Lift the expander off the printer.

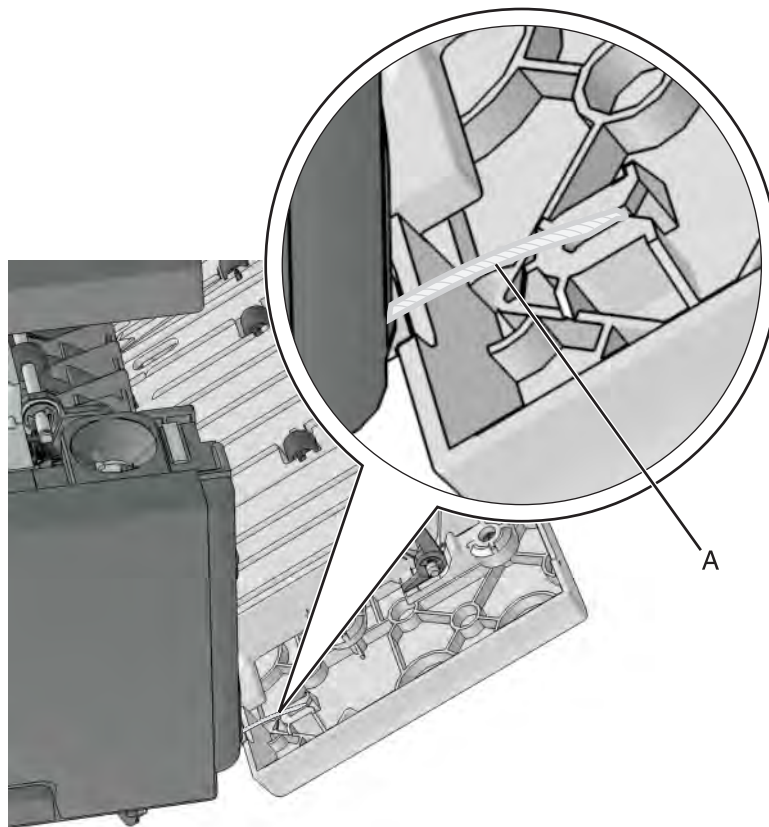

### Output expander top cover removal

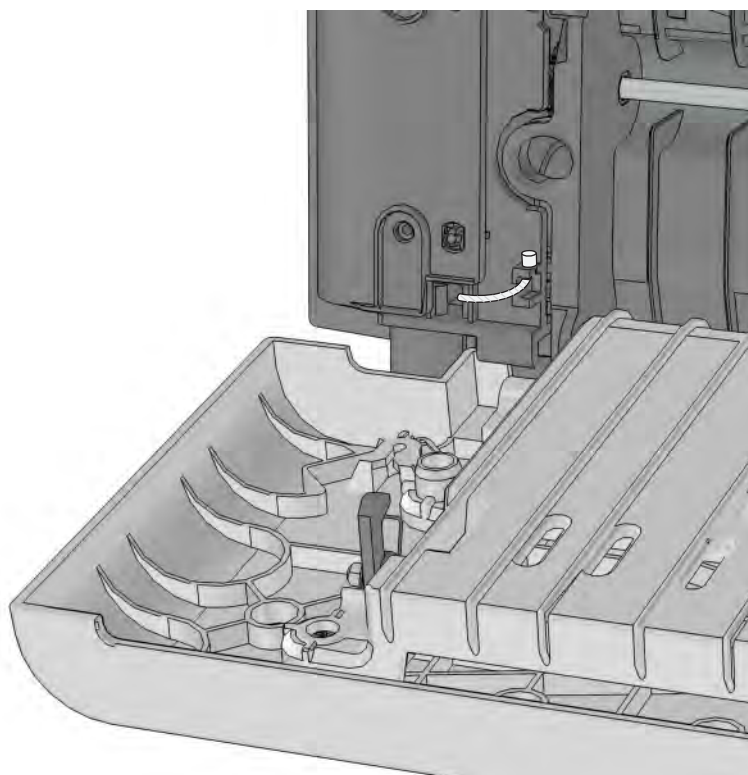

Lift the top cover off the expander, and remove.

## Output expander rear door removal

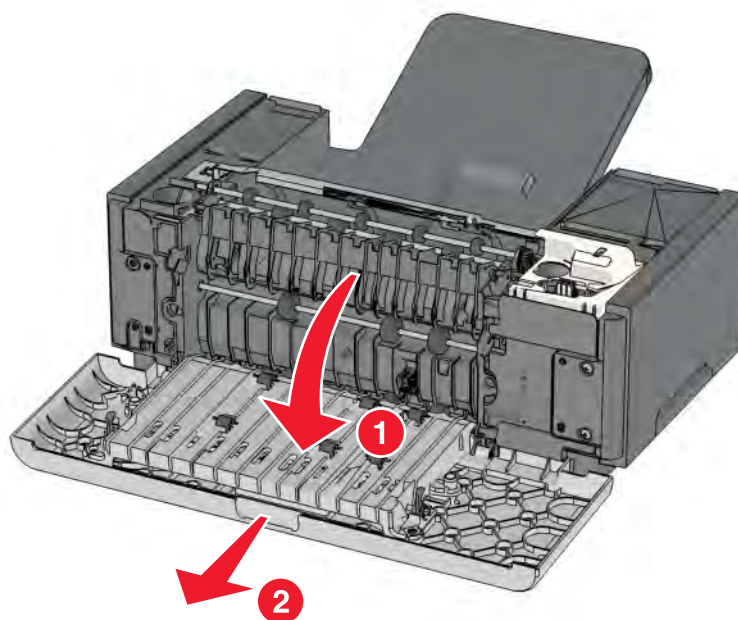

- 1 Open the rear door, and detach the string (A) from the door.

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the expander.

**2** Position the door at an angle approximately 90 degrees from the expander, then remove.

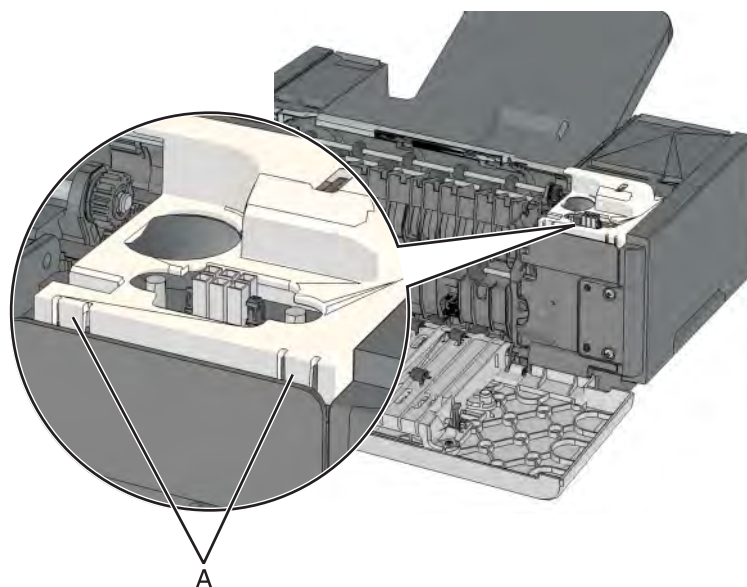

Parts removal

**524**

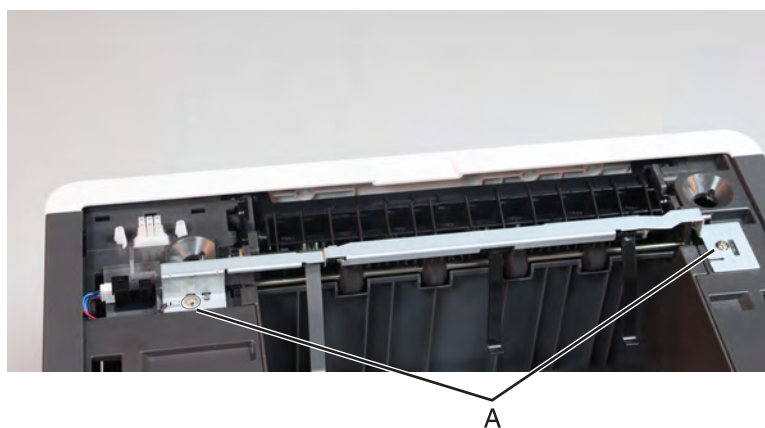

## Output expander sensor cover removal

- 1 Remove the output expander top cover. See [“Output expander top cover removal” on page 522.](#)
- 2 Push the latches (A) to release, then remove the sensor cover.

## Output expander bin full flag removal

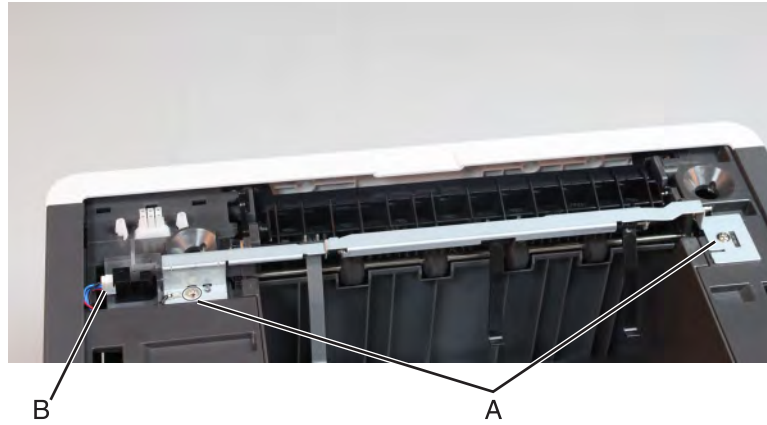

- 1 Remove the output expander top cover. See [“Output expander top cover removal” on page 522.](#)
- 2 Remove the output expander sensor cover. See [“Output expander sensor cover removal” on page 525.](#)
- 3 Remove the two screws (A), and then remove the bin full flag.

## Sensor (OE bin full) with flag removal

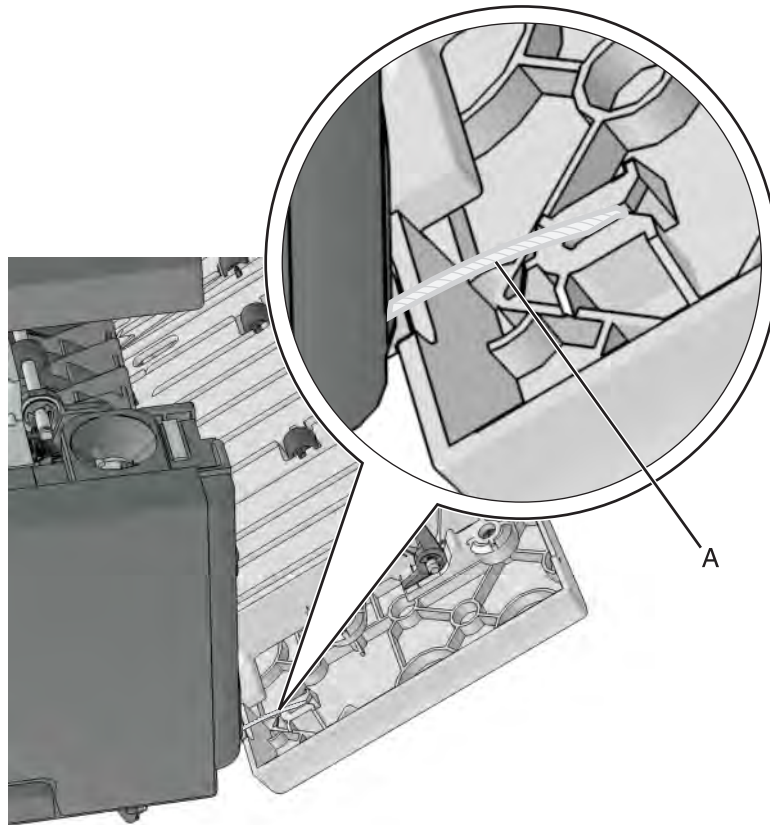

- 1 Remove the output expander top cover. See [“Output expander top cover removal” on page 522.](#)
- 2 Remove the output expander sensor cover. See [“Output expander sensor cover removal” on page 525.](#)
- 3 Remove the two screws (A), and then remove the bracket.

- 4 Disconnect the sensor cable (B), and then remove the sensor.

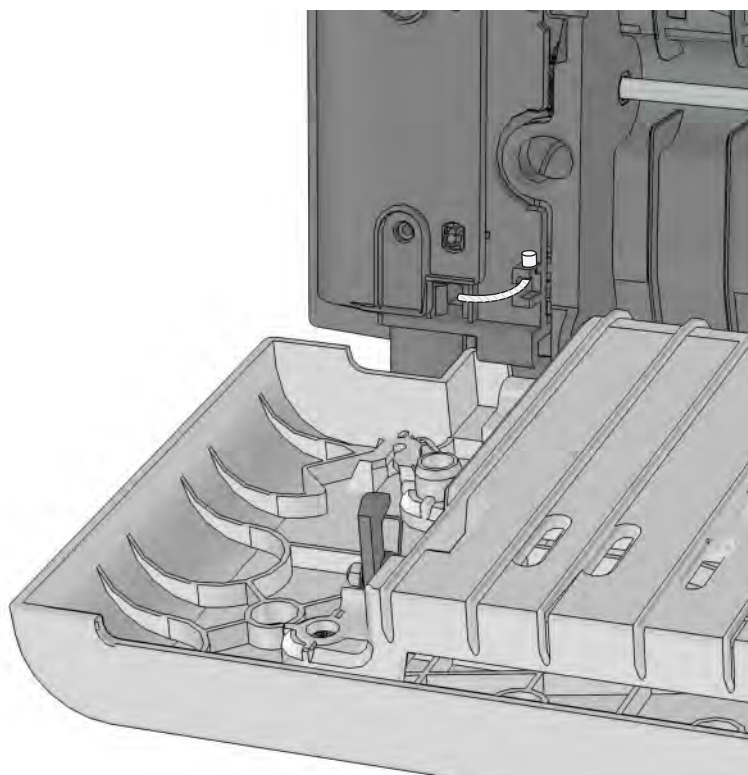

## Output expander right cover removal

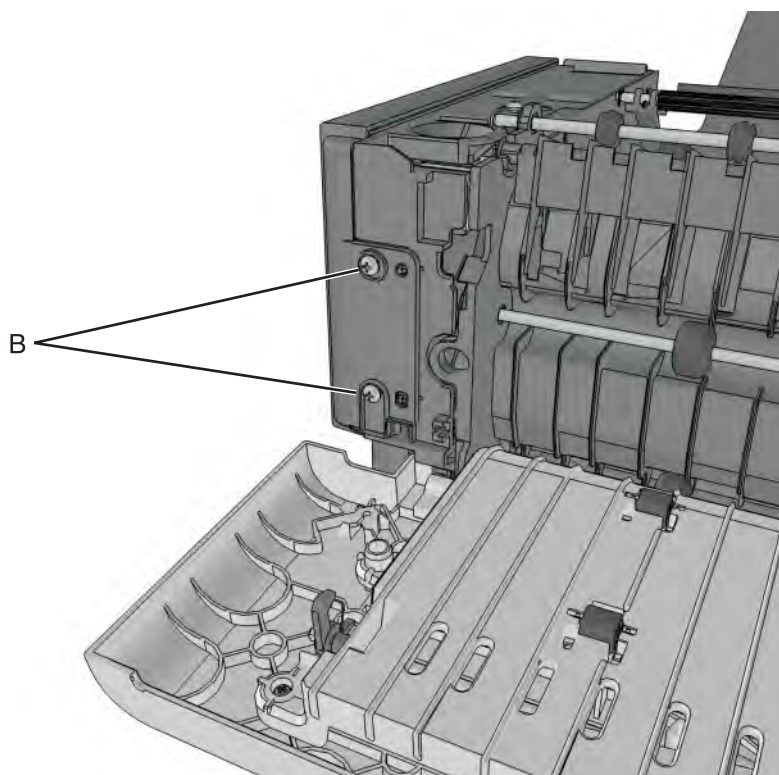

- 1 Open the rear door, then detach the string (A) from the rear door.

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the expander.

**2** Remove the two screws (B), then remove the right cover.

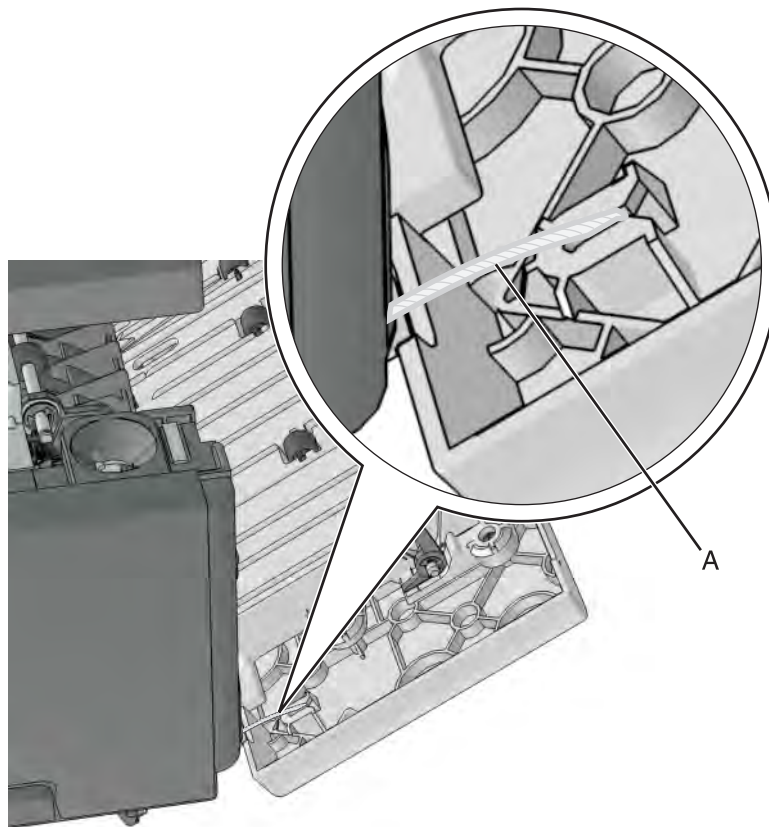

Parts removal

**527**

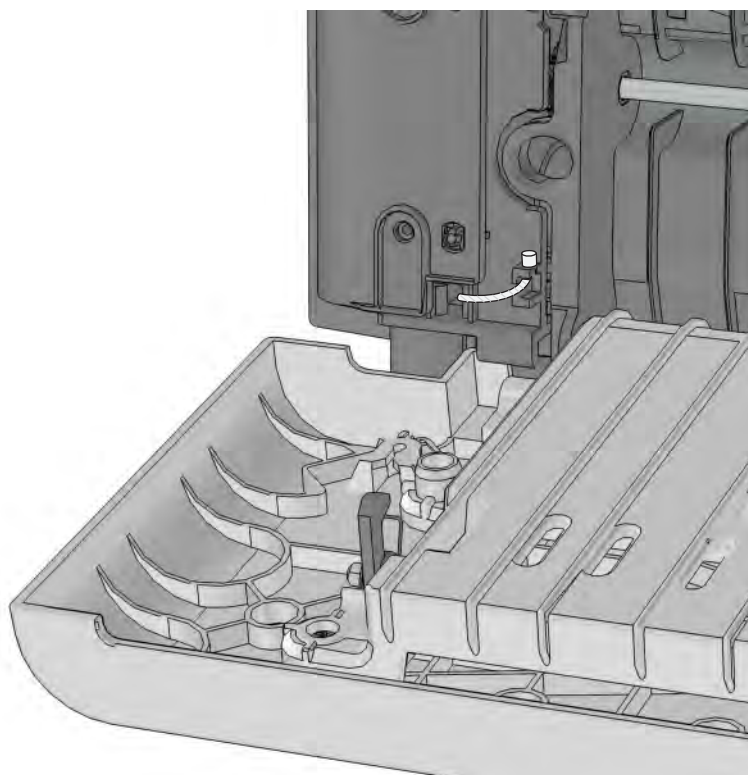

## Output expander left cover removal

- 1 Open the rear door, then detach the string (A) from the rear door.

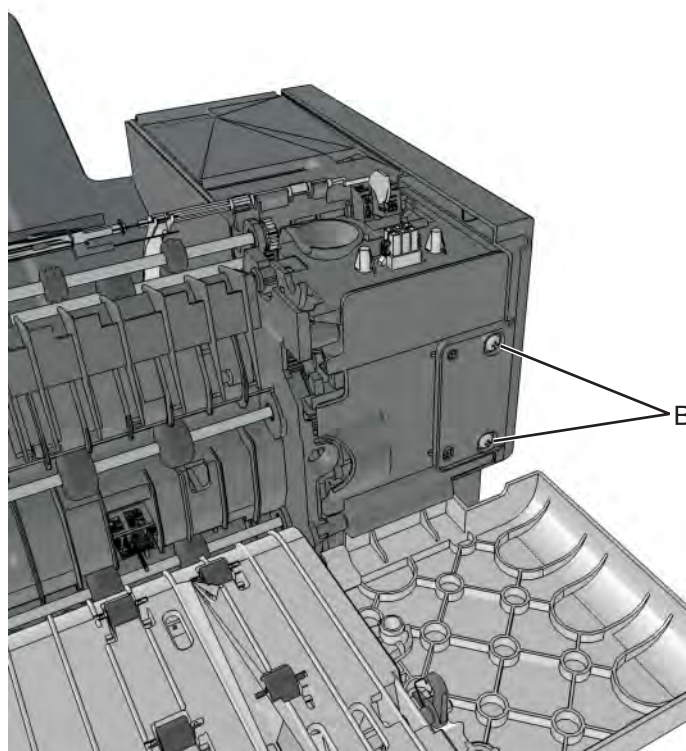

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the expander.

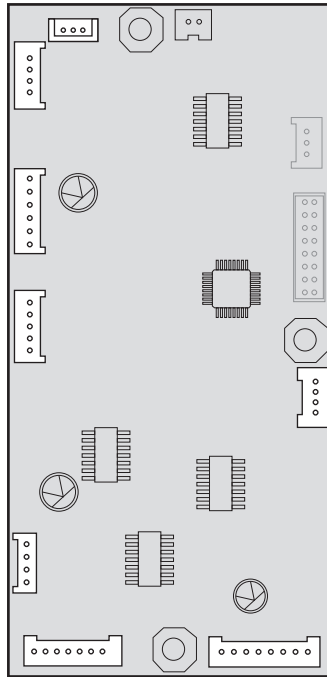

**2** Remove the two screws (B), then remove the left cover.

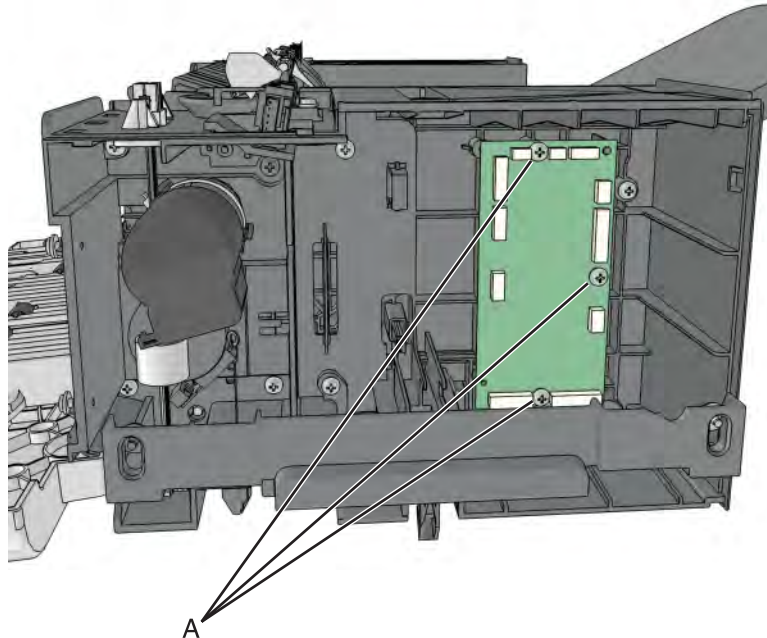

## Output expander controller board removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528](#).
- 2 Disconnect all the cables from the controller board.

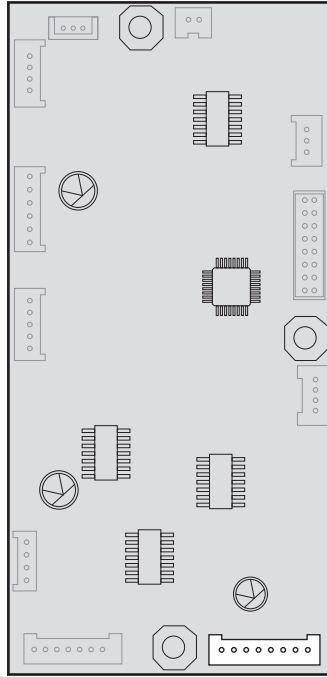

- 3 Remove the three screws (A), and then remove the controller board.

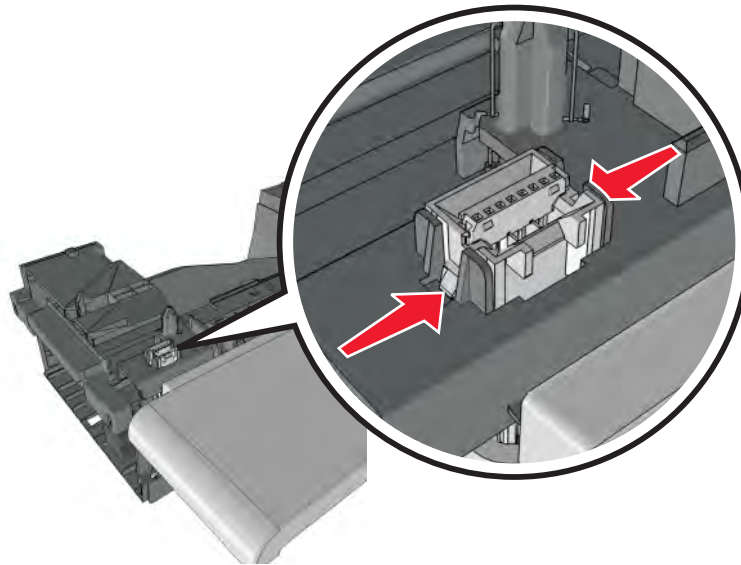

## Output expander lower interface cable removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Disconnect the cable J1 from the controller board.

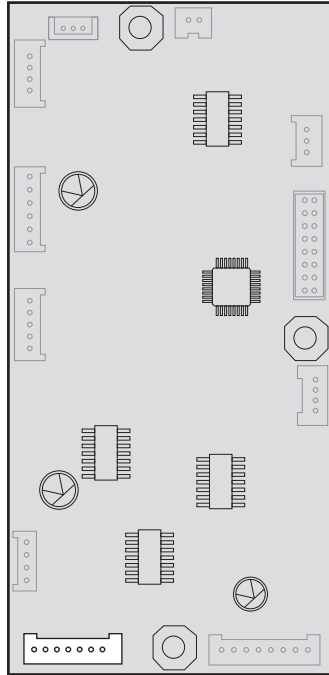

- 3 Push the latches to release, and then remove the cable.

## Output expander upper interface cable removal

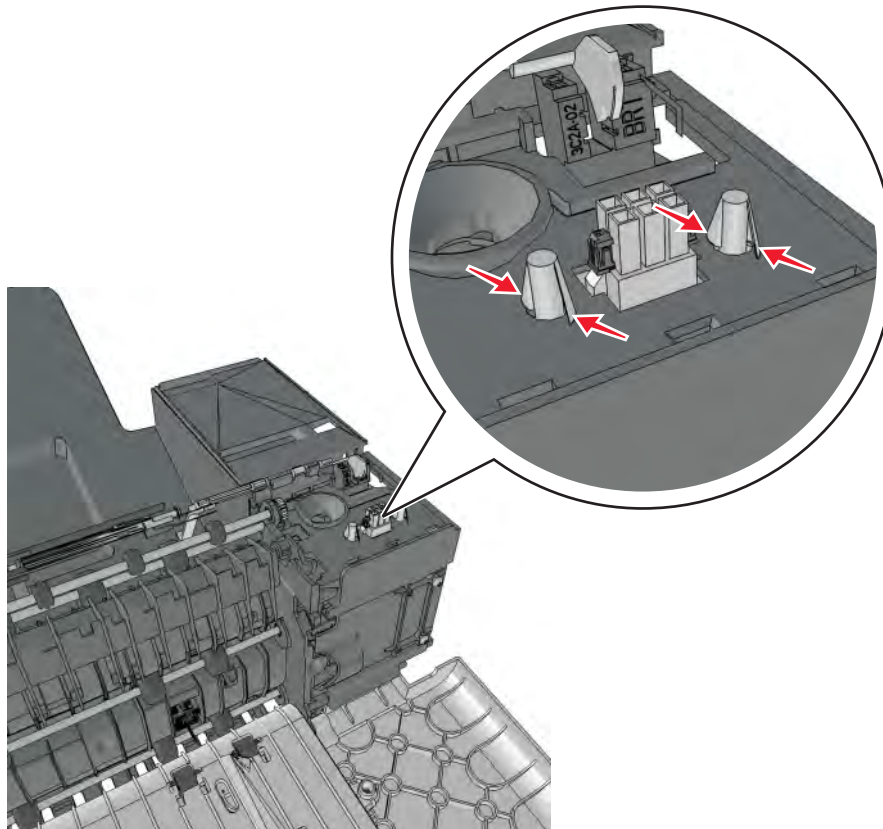

- 1 Remove the output expander sensor cover. See [“Output expander sensor cover removal” on page 525.](#)
- 2 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)

- 3 Disconnect the cable J2 from the controller board.

- 4 Release, and then dislodge the connector from its slot.

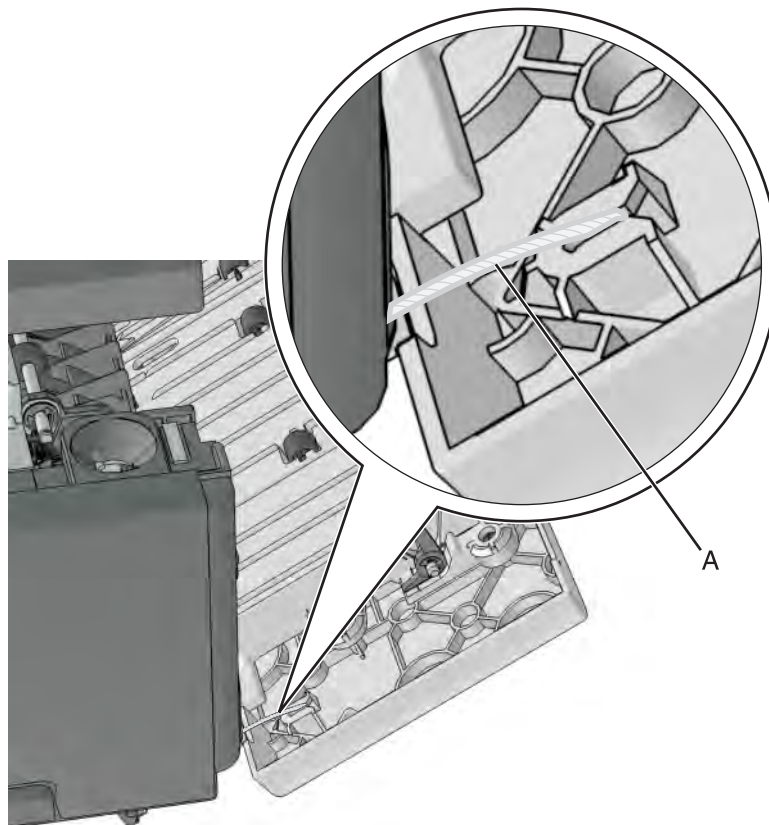

**Note:** Use a pliers to fit the pins to the holes.

- 5 Remove the cable.

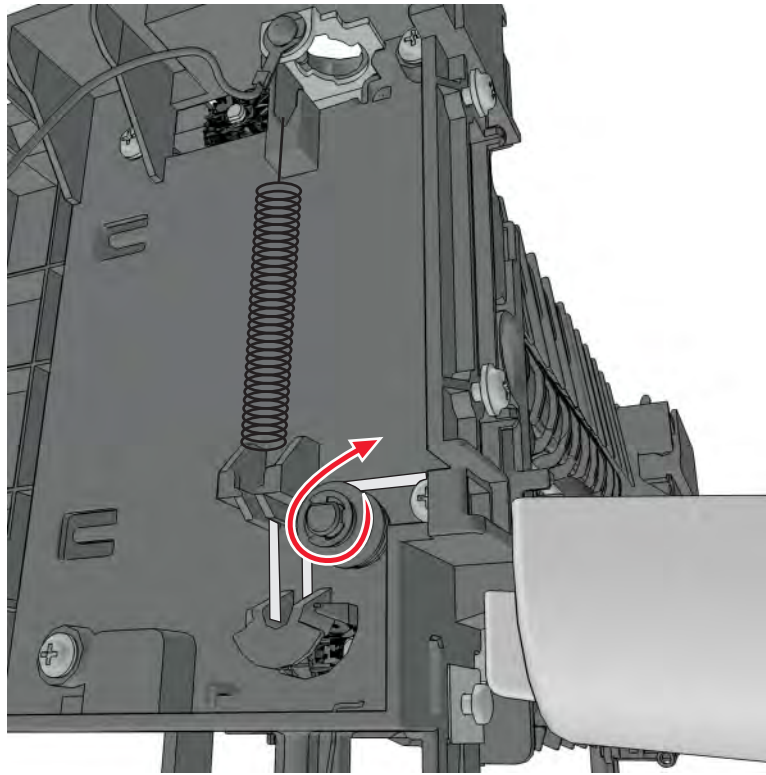

## Output expander spring with string removal

- 1 Open the rear door, and detach the string (A).

- 2 Remove the output expander right cover. See [“Output expander right cover removal” on page 526](#).
- 3 Remove the spring with string.

**Note:** Pay attention to the original position of the string. The string on the pulley is wound clockwise.

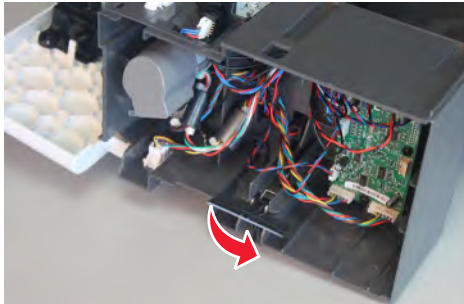

## Output expander latch removal

- 1 Remove the output expander left cover or output expander right cover.

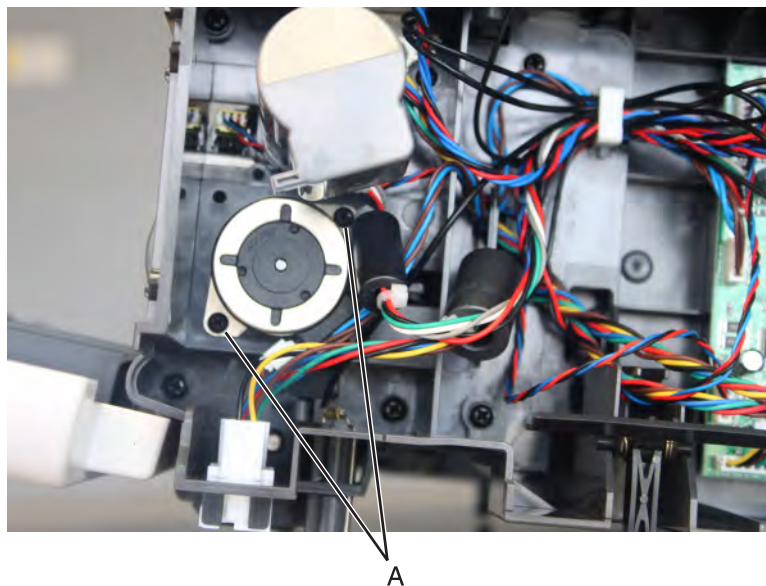

See [“Output expander left cover removal” on page 528](#) or [“Output expander right cover removal” on page 526](#).

- 2 Pull the latch off the expander.

## Motor (OE diverter) removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Disconnect the motor cable, and then remove the two screws (A).

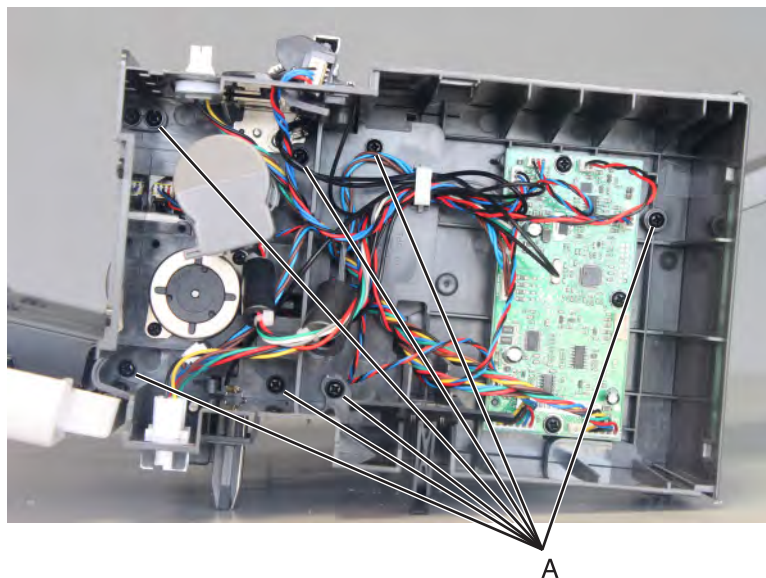

- 3 Remove the motor.

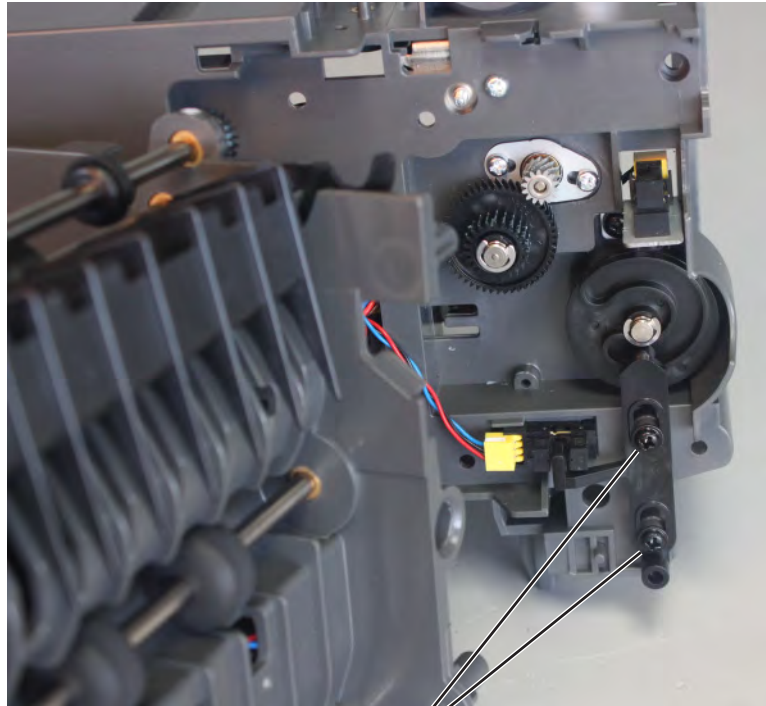

## Output expander diverter plunger assembly removal

### Diverter plunger removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A) from the frame.

- 3 Pull away the frame to access the parts underneath. Remove the two screws (B), and then remove the plunger.

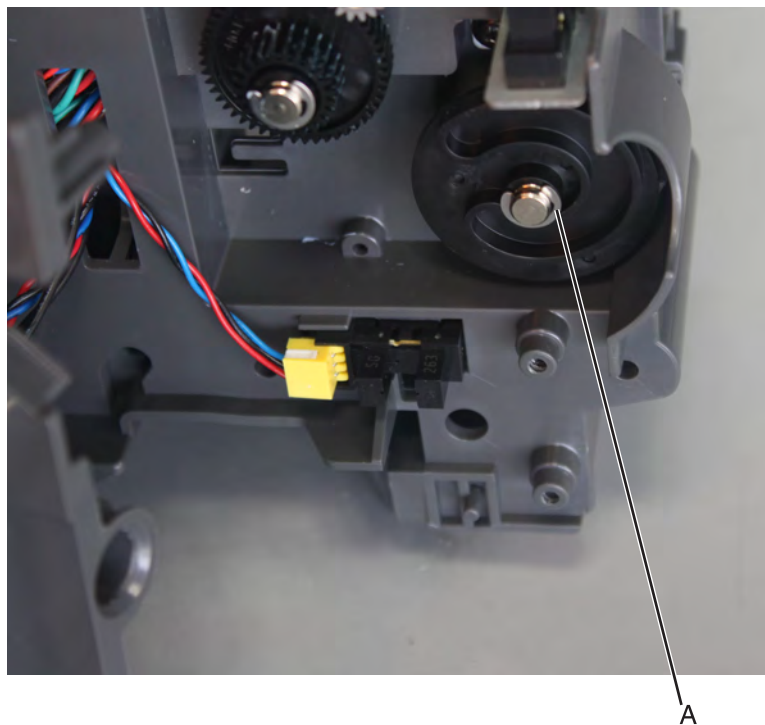

B

### Diverter cam removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the output expander diverter plunger. See preceding removal.

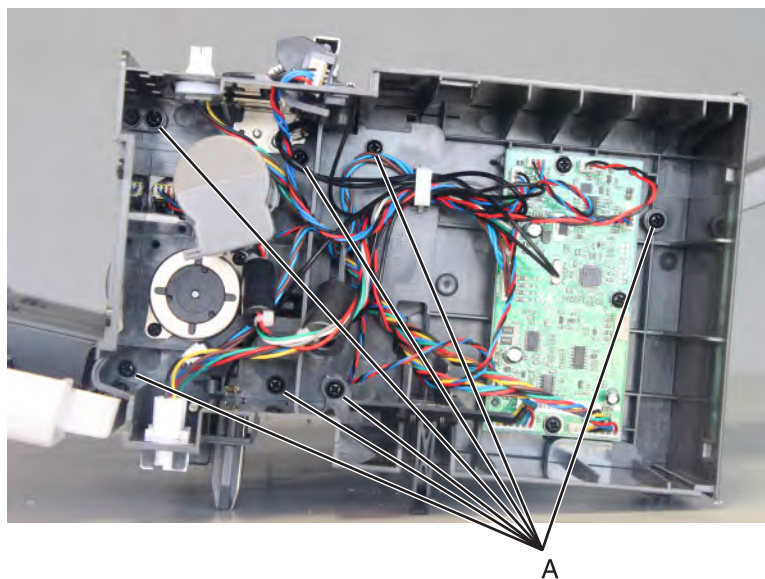

- 3 Remove the E-clip (A), and then remove the cam.

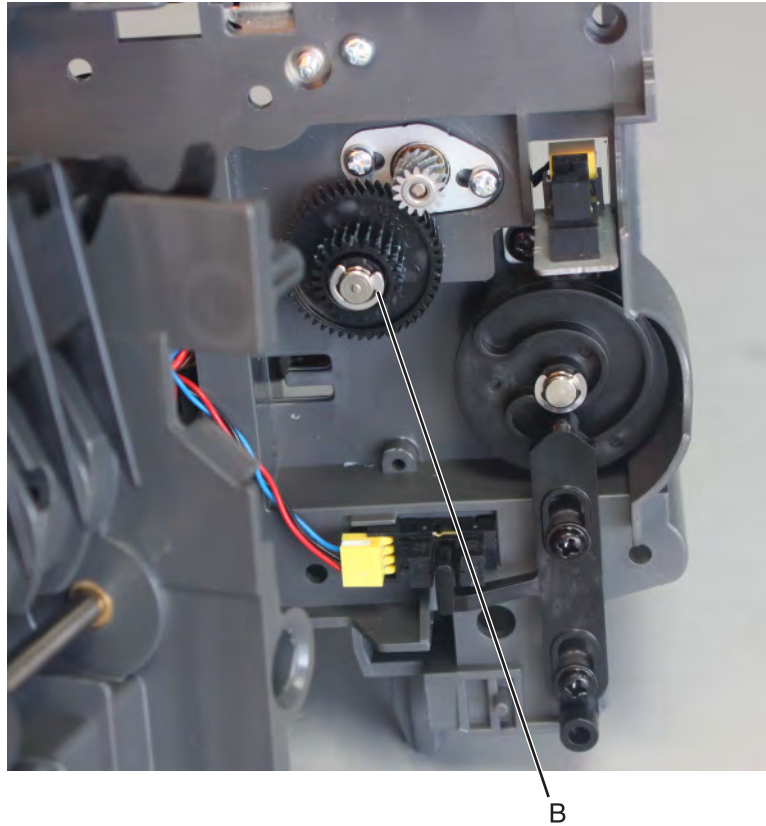

## Output expander drive gear removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A) from the frame.

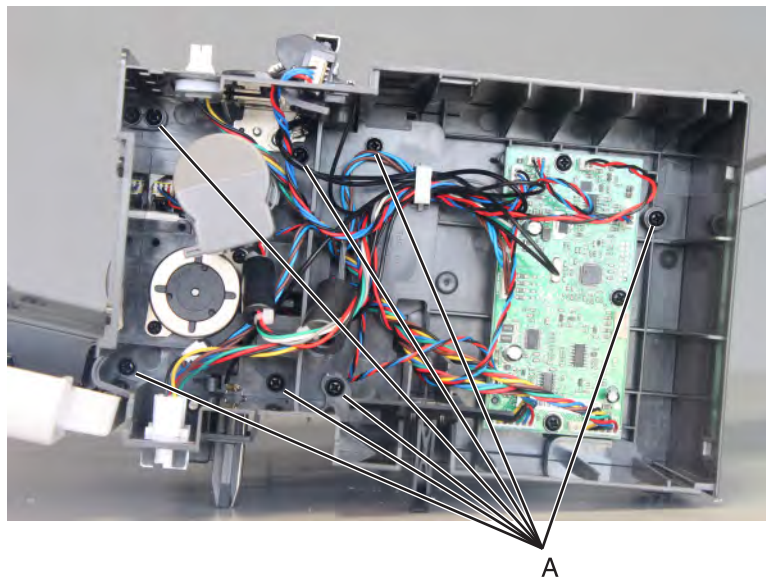

- 3 Pull away the frame to access the parts underneath. Remove the E-clip (B), and pull the gear off its shaft.

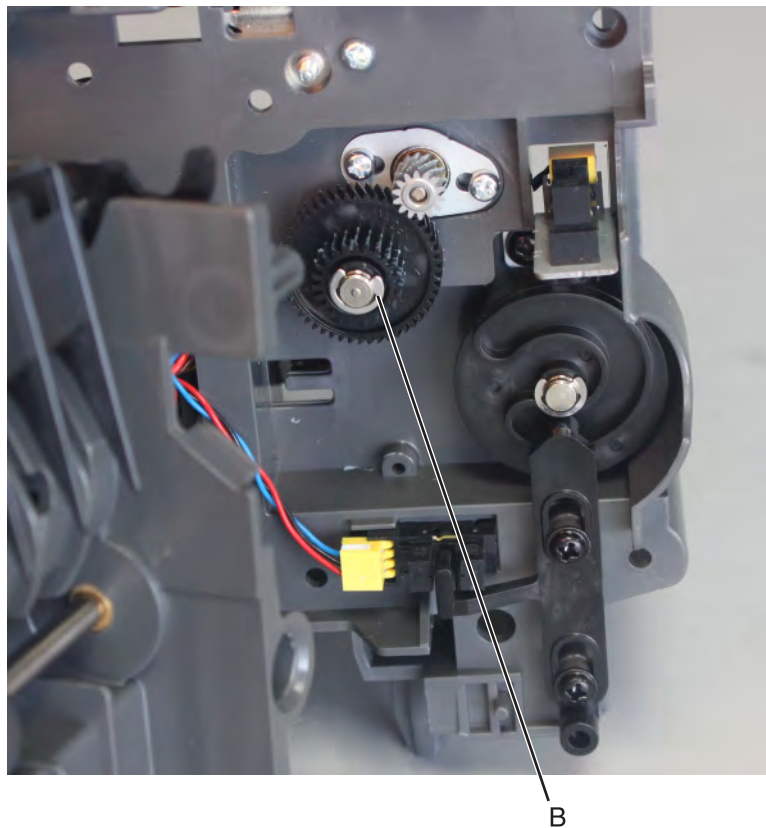

### Motor (OE transport) removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A).

Parts removal

- 3 Slightly pull the frame to access the parts underneath it. Remove the E-clip (B), and then remove the gear.

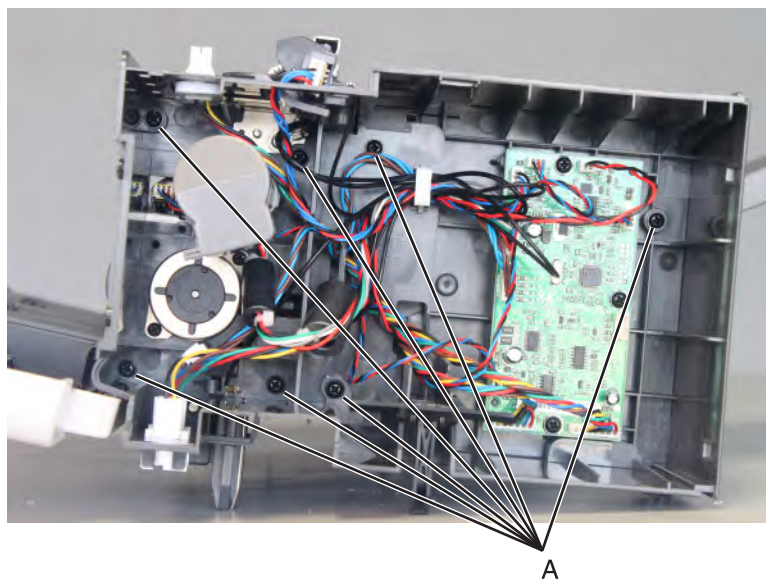

- 4 Remove the two screws (C), and then remove the motor.

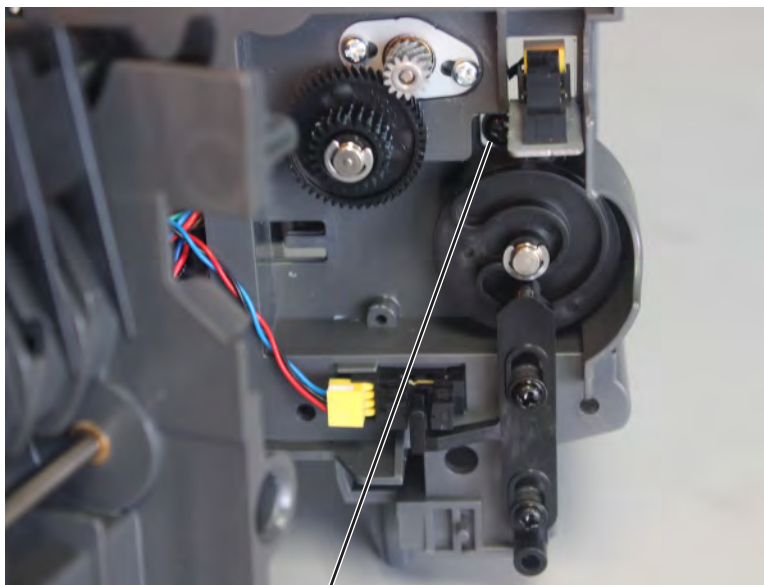

### Sensor (OE rear door interlock) removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A).

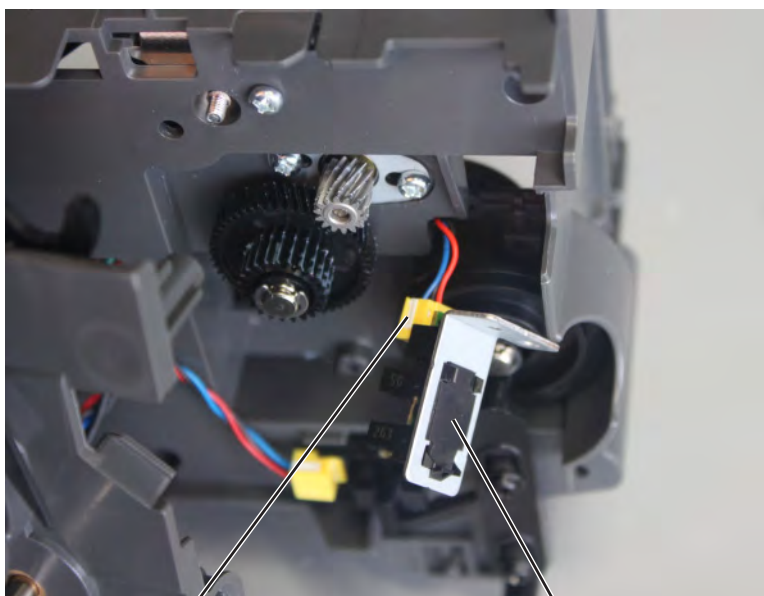

- 3** Slightly pull the frame to access the parts underneath it. Remove the screw (B), and then release the sensor bracket.

B

- 4** Remove the sensor retainer (C), disconnect the cable (D), and then remove the sensor.

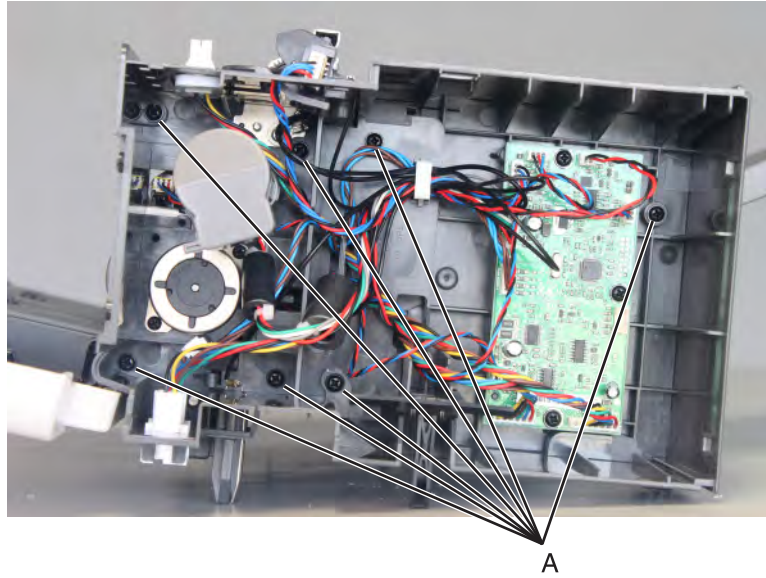

D

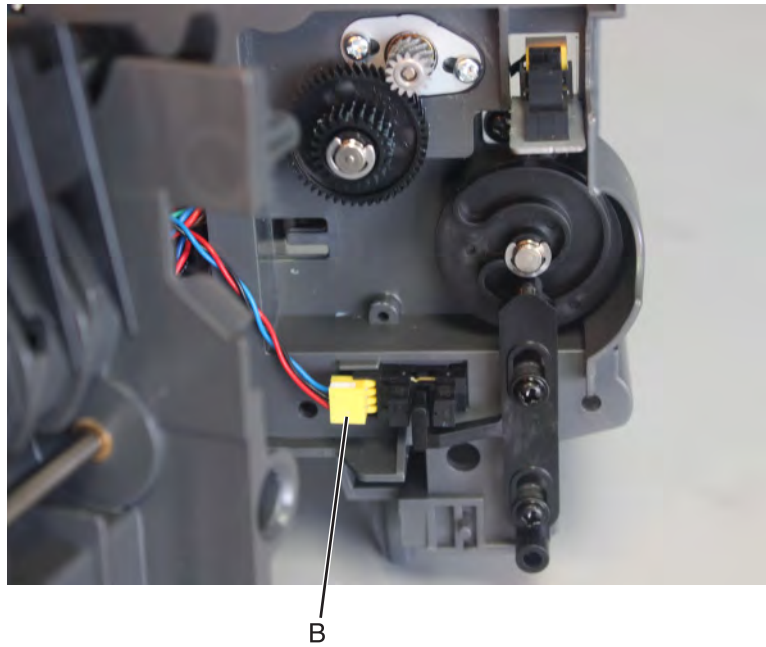

C

## Sensor (OE diverter plunger) removal

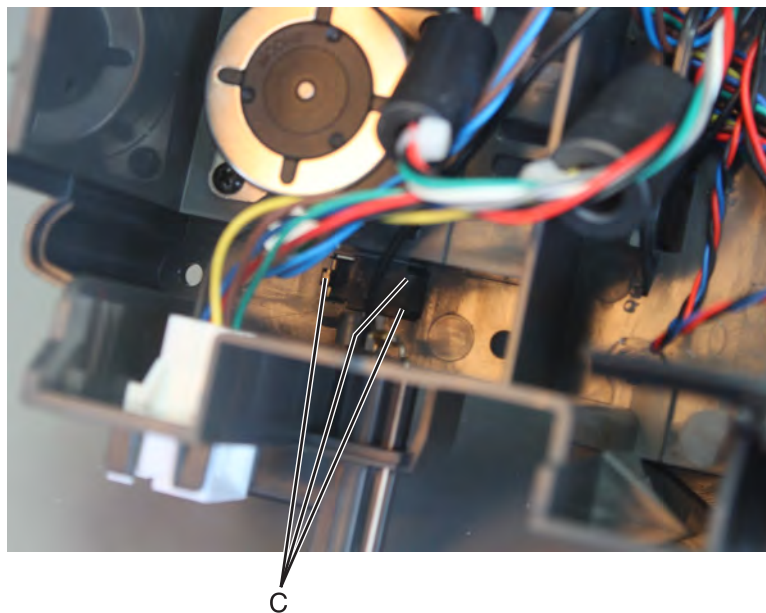

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A).

- 3 Slightly pull the frame to access the parts underneath it. Disconnect the cable (B).

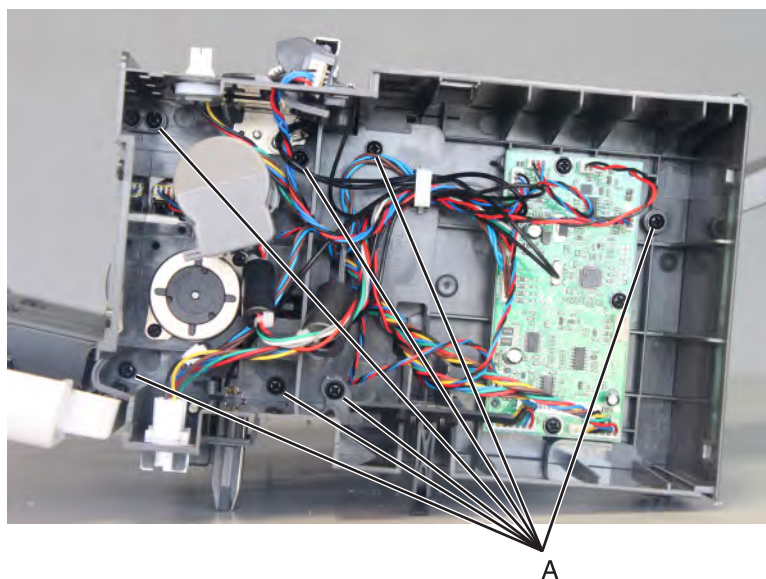

- 4 Pry the latches (C) to release, and then remove the sensor.

## Output expander diverter spring removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A) from the frame.

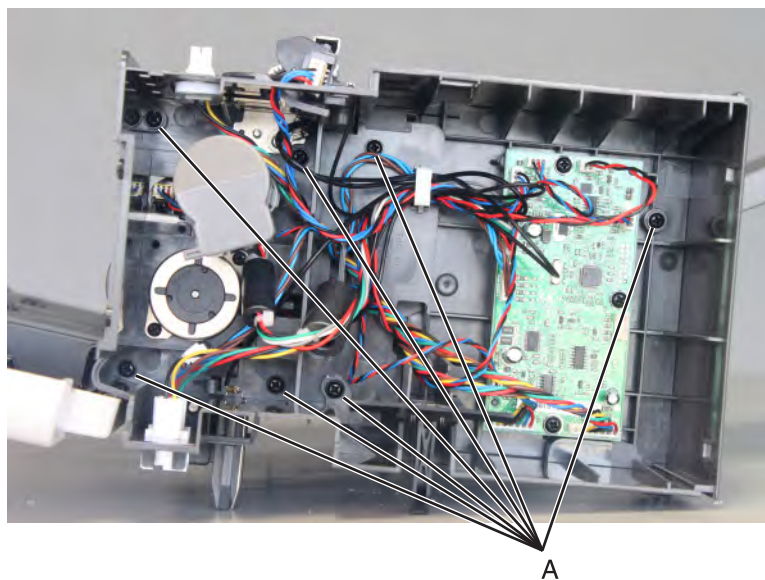

- 3 Pull away the frame to access the parts underneath. Release the hook (B), and then remove the spring.

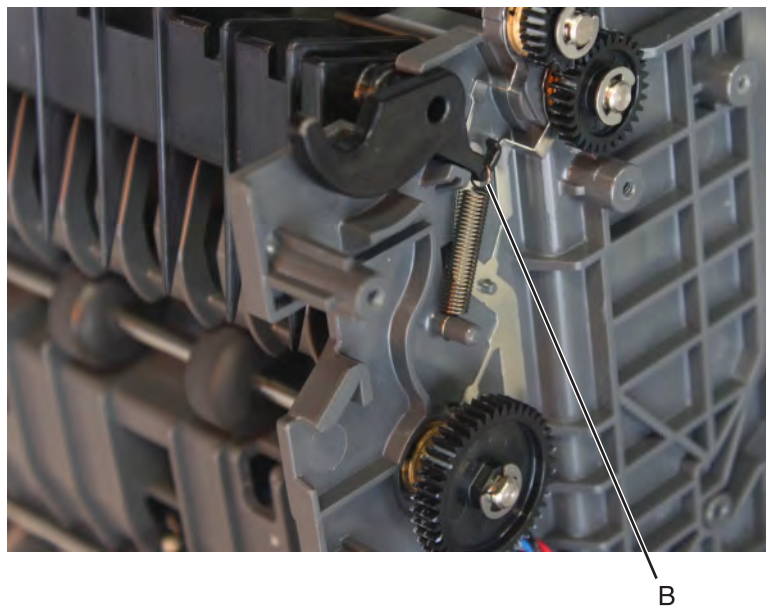

## Output expander diverter removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the seven screws (A) from the frame.

**3** Pull away the frame to access the parts underneath. Release the hook (B) from the diverter.

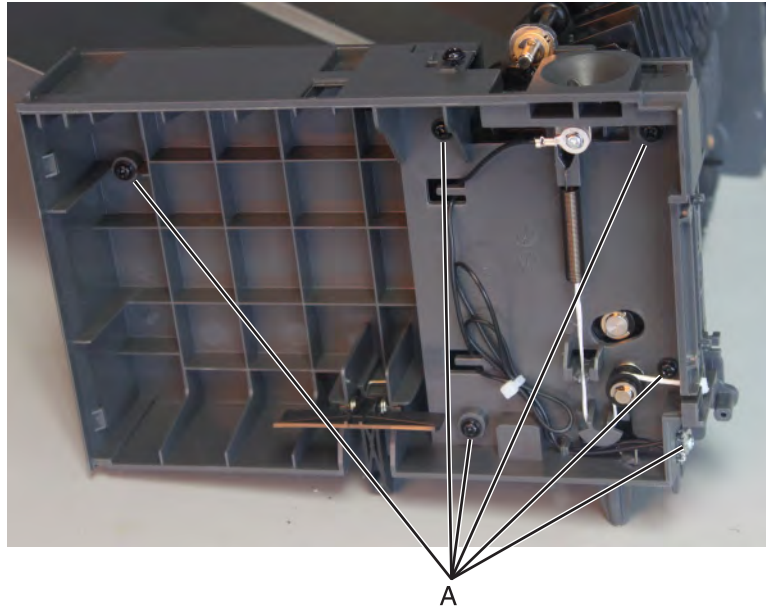

**4** Pry the diverter to release, and then remove.

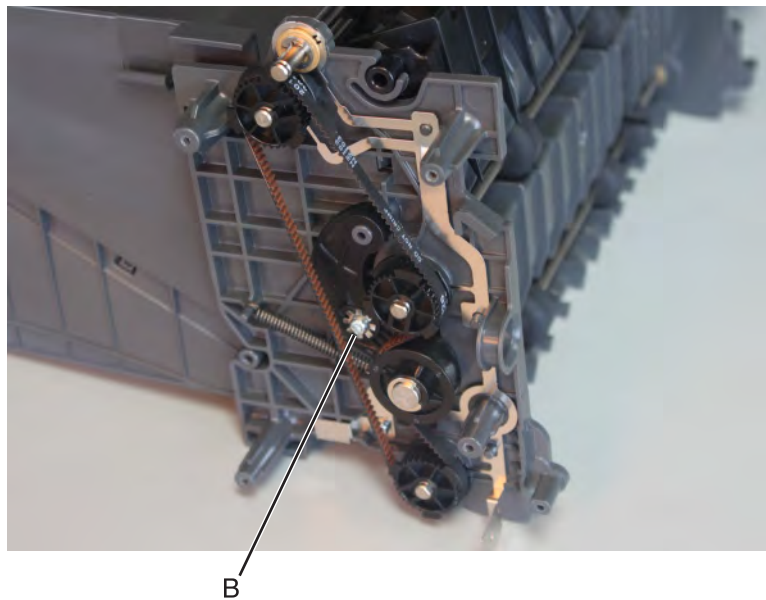

## Output expander drive belt removal

- 1 Remove the output expander right cover. See [“Output expander right cover removal” on page 526](#).
- 2 Remove the six screws (A) securing the frame. Pull away the frame, and remove.

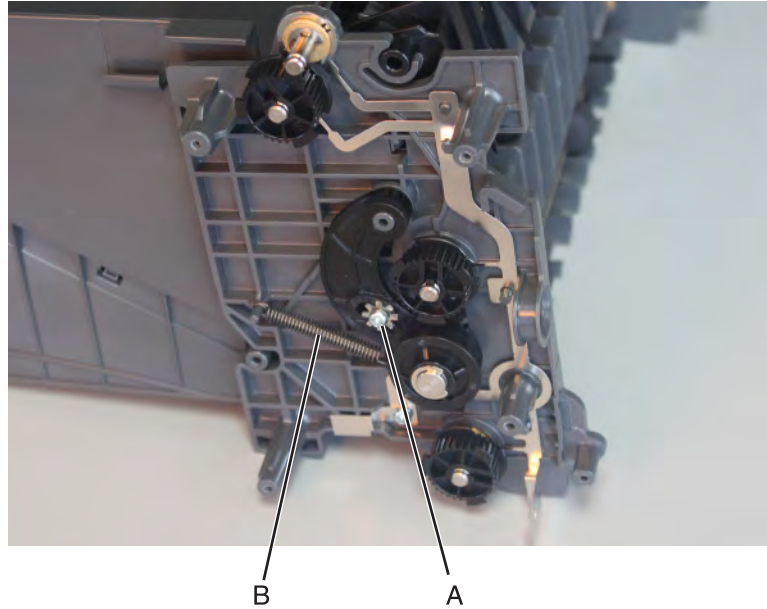

- 3 Loosen the screw (B) to unlock and allow more slack on the mechanism, and then remove the belt.

## Output expander belt tensioner removal

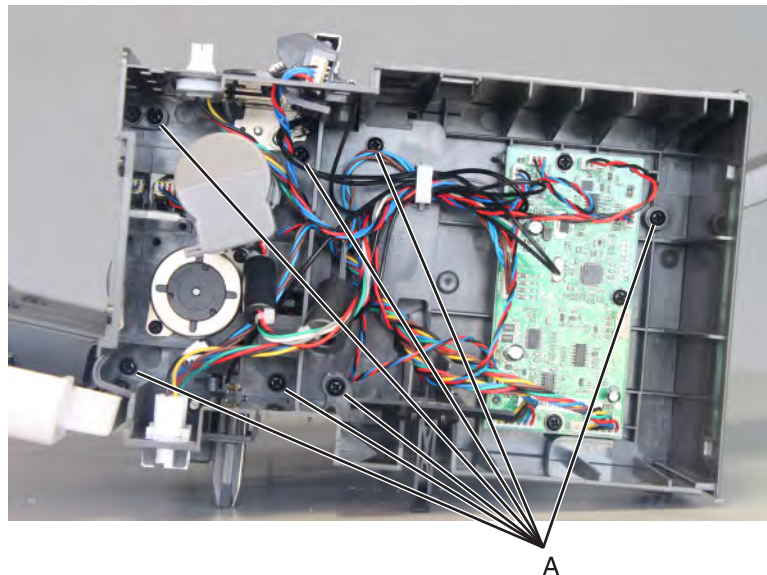

- 1 Remove the output expander right cover. See [“Output expander right cover removal” on page 526](#).
- 2 Remove the output expander drive belt. See [“Output expander drive belt removal” on page 546](#).
- 3 Remove the screw (A) from the tensioner.

- 4 Unhook the spring (B) from the frame, and then remove the tensioner from the frame.

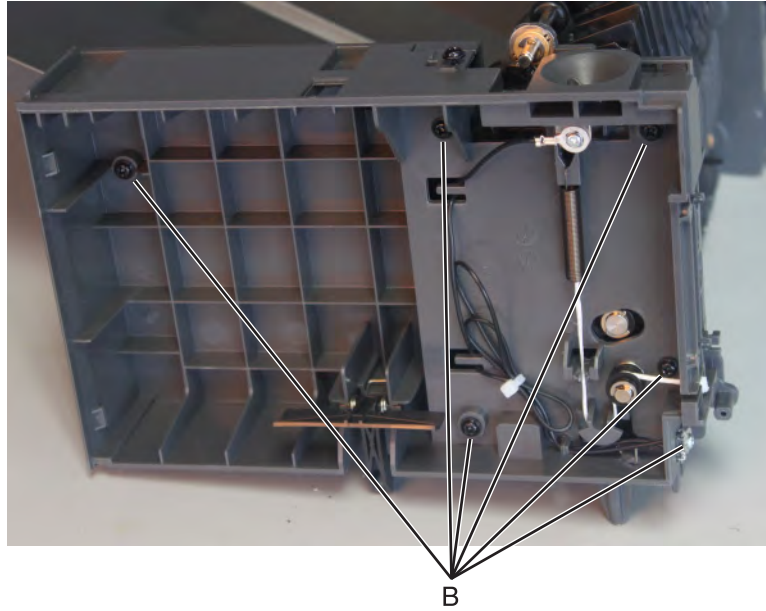

## Output expander bin removal

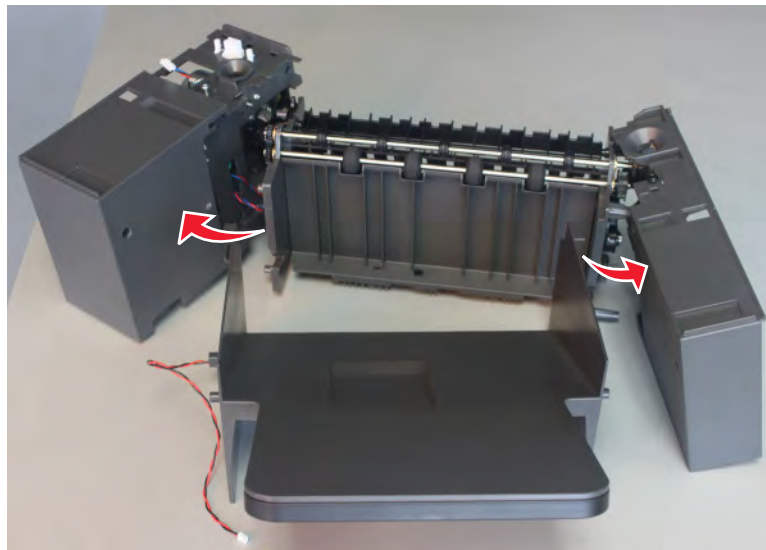

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the output expander right cover. See [“Output expander right cover removal” on page 526.](#)
- 3 Disconnect the cable J10 from the controller board.
- 4 Remove the seven screws (A), to release the left inner frame.

- 5 Remove the six screws (B), to release the right inner frame.

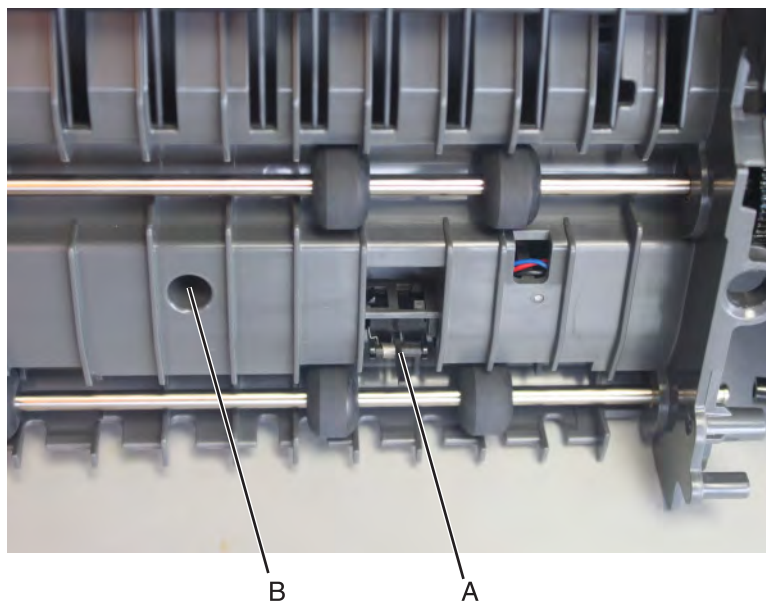

- 6 Move away the left and right inner frames, and then pull away the bin.

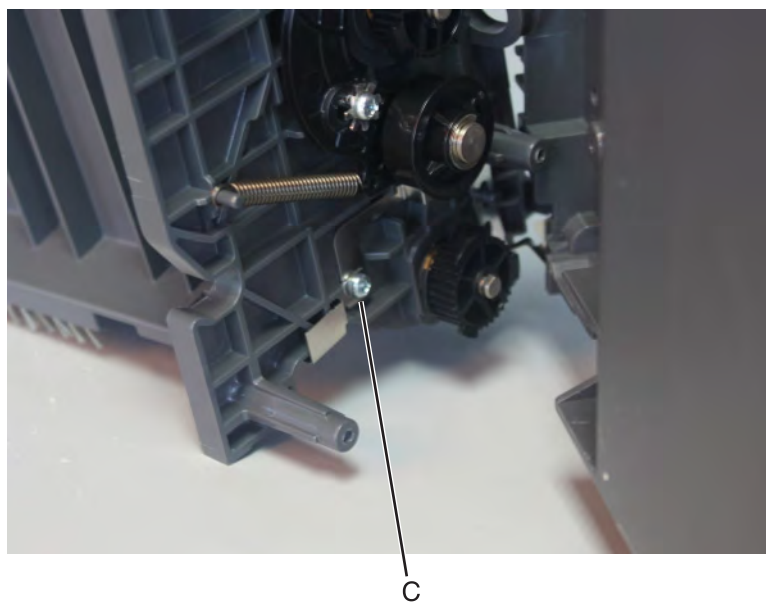

## Sensor (OE pass-through) removal

- 1 Remove the output expander left cover. See [“Output expander left cover removal” on page 528.](#)
- 2 Remove the output expander right cover. See [“Output expander right cover removal” on page 526.](#)
- 3 Remove the output expander bin. See [“Output expander bin removal” on page 547.](#)
- 4 Disconnect the sensor cable J3 from the controller board.

- 5** Release the latches holding the sensor (A) to the rear side, and then remove the screw (B).

- 6** Remove the screw (C) to release the ground plate.

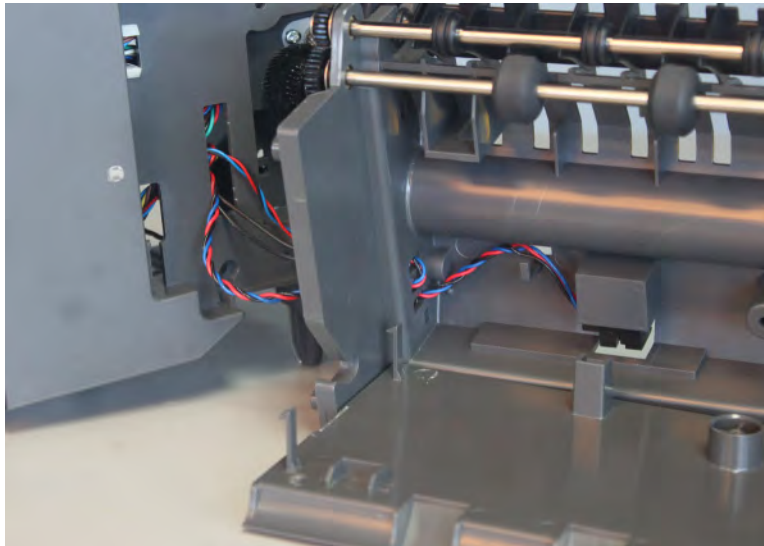

- 7 Pull the cover to access the sensor underneath it.

- 8 Release the cables from their guides, and then carefully remove the sensor with cable off the expander.

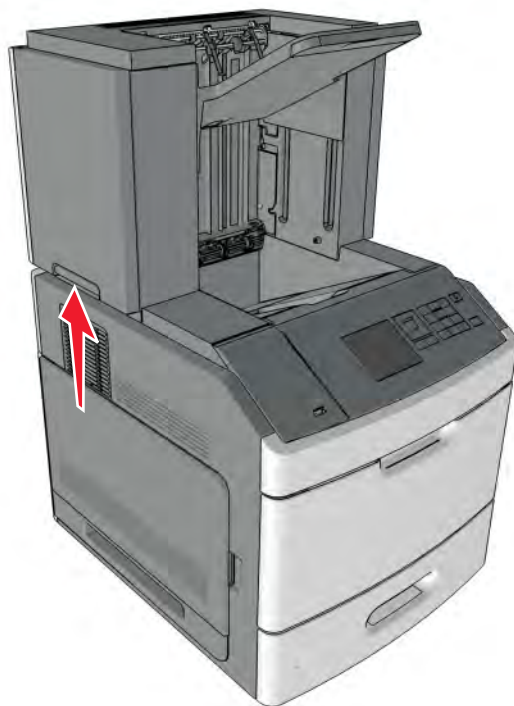

**Note:** Pay attention to the original route of the cables.

## Optional high capacity output expander removals

### Optional high capacity output expander removal

- 1 Press the latches to release.

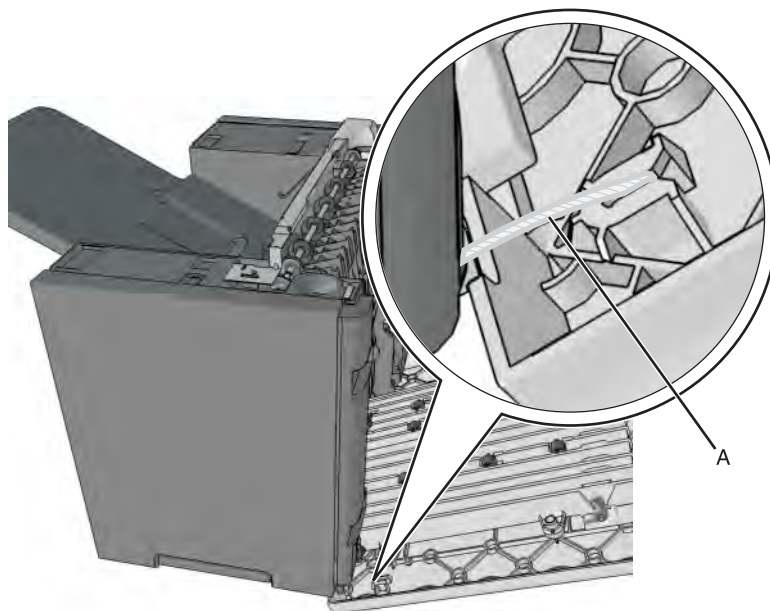

- 2 Lift the expander off the printer.

### HCOE top cover removal

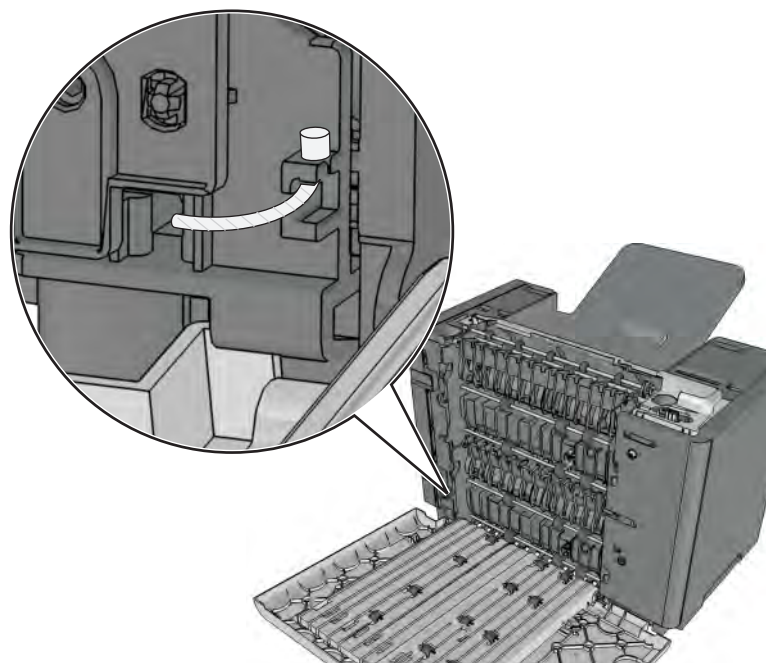

Lift the top cover off the expander, and remove.

## HCOE rear door removal

- 1 Open the rear door, and disconnect the string (A) from the door.

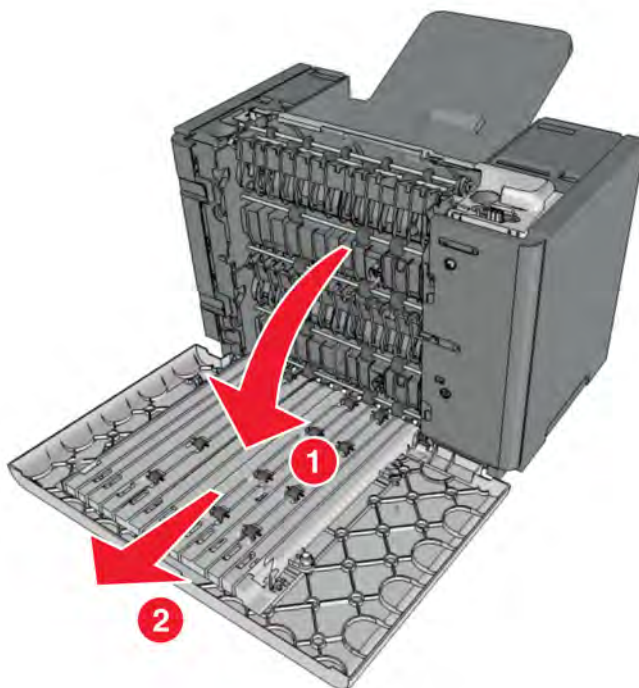

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the HCOE.

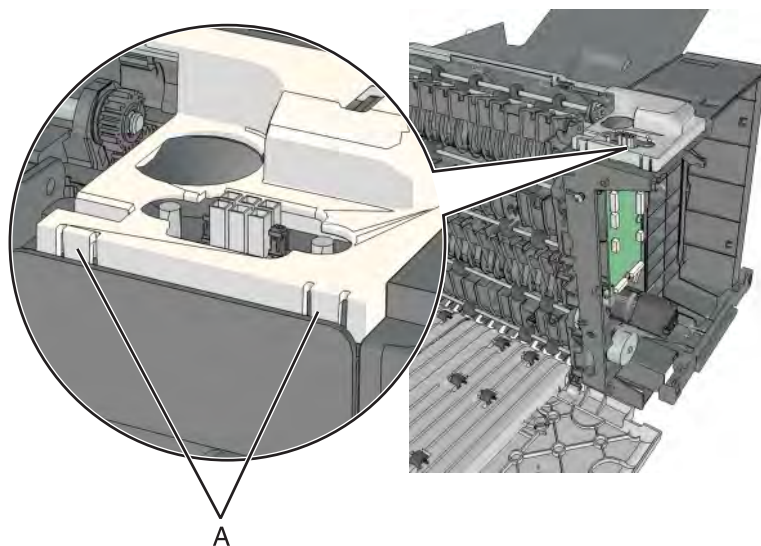

**2** Position the door as shown, and then remove it.

## HCOE sensor cover removal

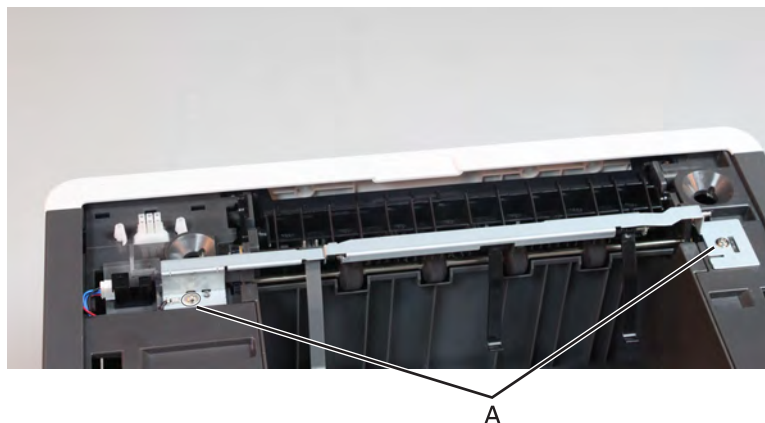

**1** Press the latches (A) to release.

**2** Remove the sensor cover.

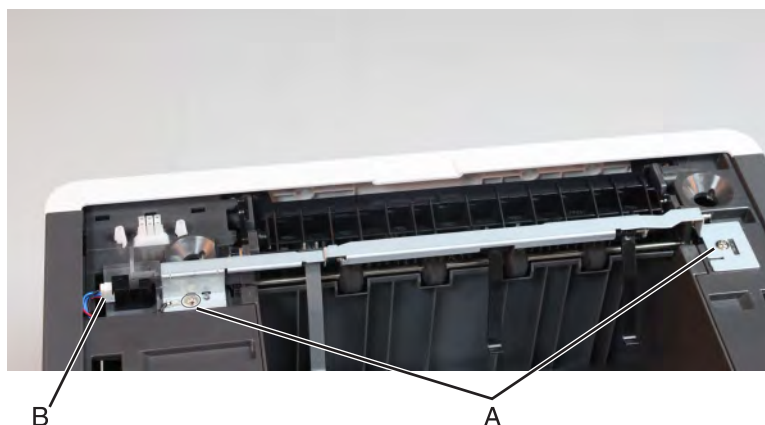

## HCOE bin full flag removal

- 1 Remove the HCOE top cover. See [“HCOE top cover removal” on page 551](#).
- 2 Remove the HCOE sensor cover. See [“HCOE sensor cover removal” on page 553](#).
- 3 Remove the two screws (A), and then remove the bin full flag.

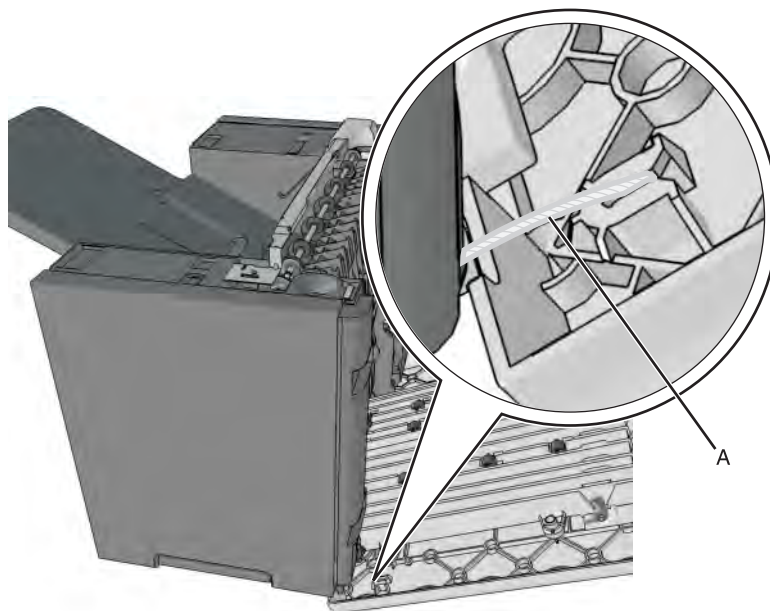

## Sensor (HCOE bin full) with flag removal

- 1 Remove the HCOE sensor cover. See [“HCOE sensor cover removal” on page 553](#).
- 2 Remove the two screws (A), and then release the bracket.
- 3 Disconnect the cable (B), and remove the sensor with flag.

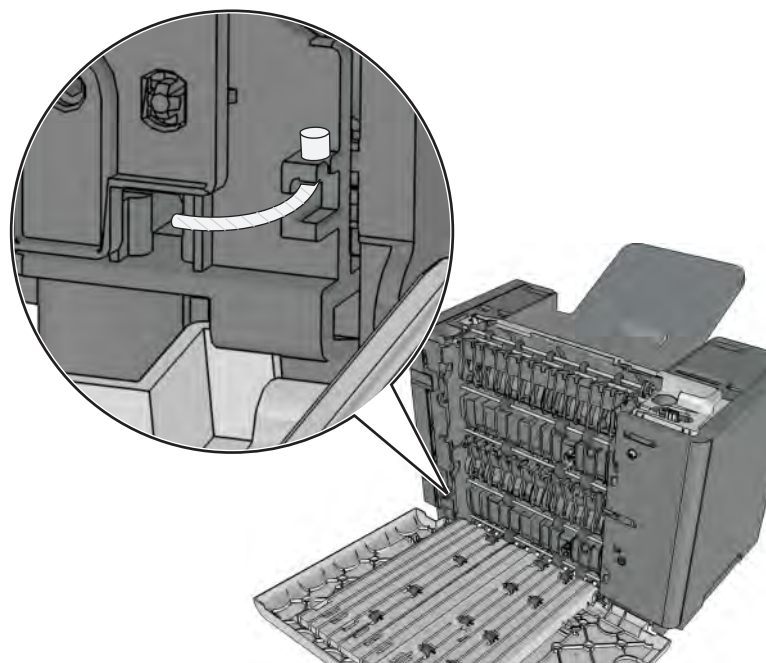

## HCOE right cover removal

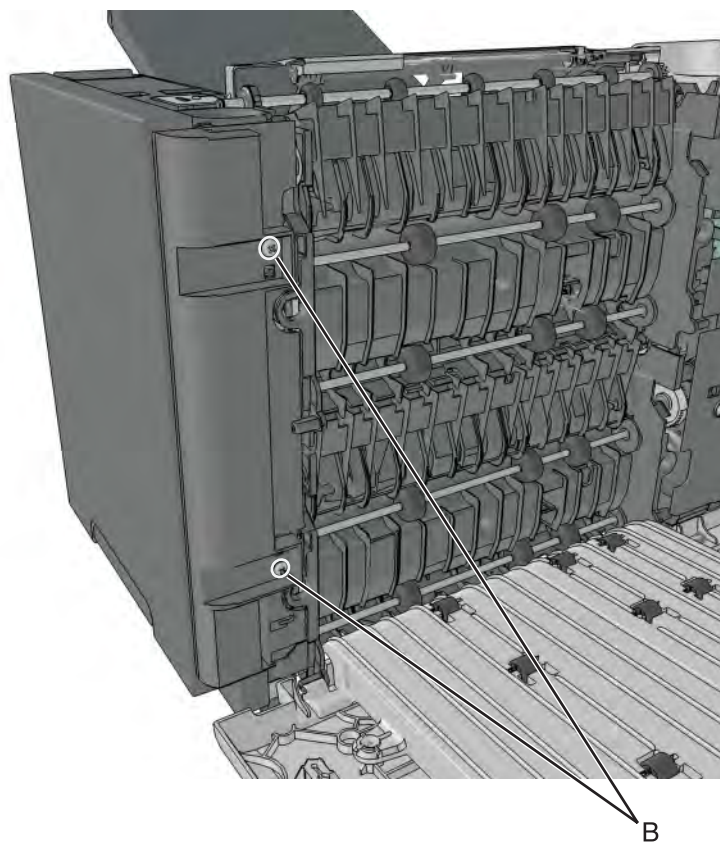

- 1 Open the rear door, then detach the string (A) from the rear door.

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the HCOE.

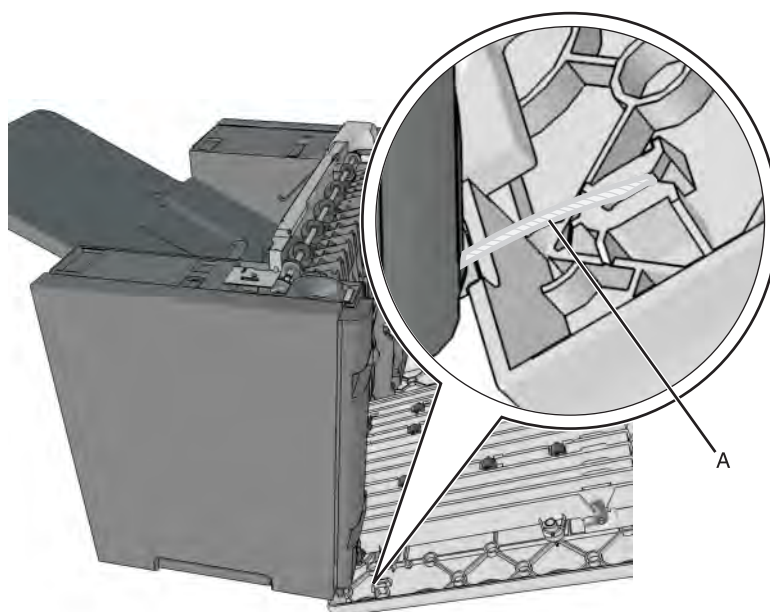

- 2 Remove the two screws (B), then remove the right cover.

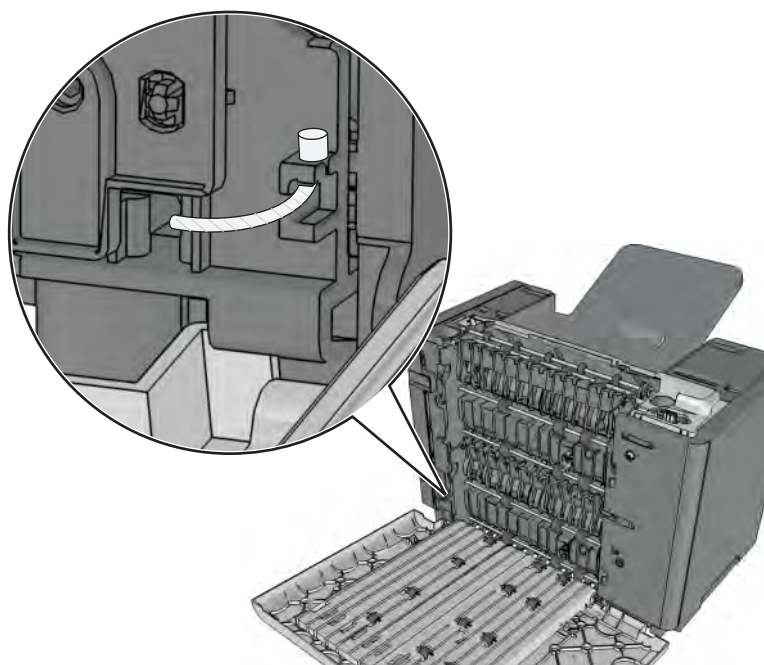

## HCOE left cover removal

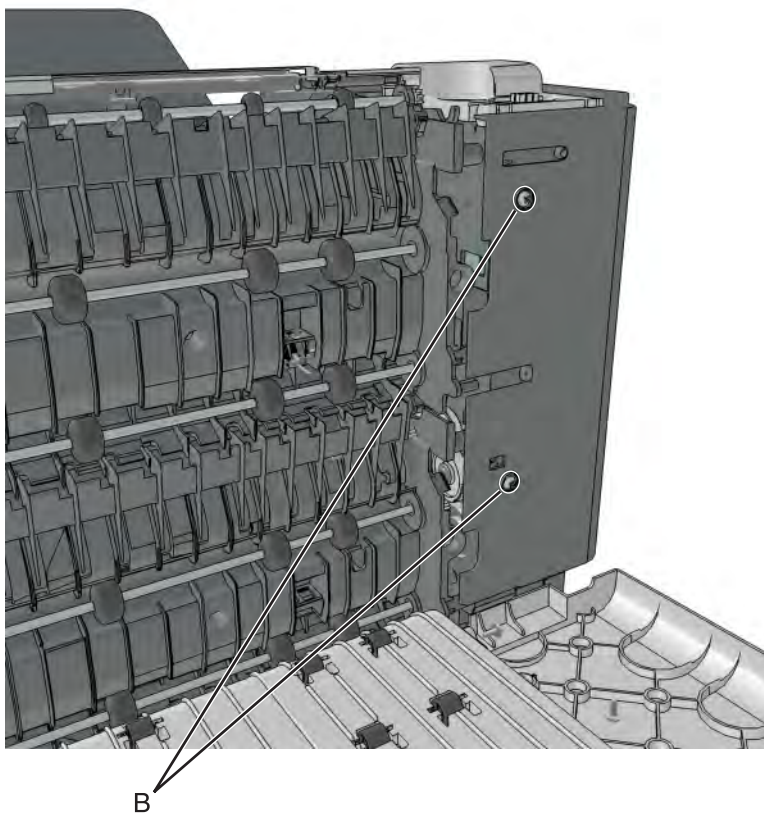

- 1 Open the rear door, then detach the string (A) from the rear door.

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the HCOE.

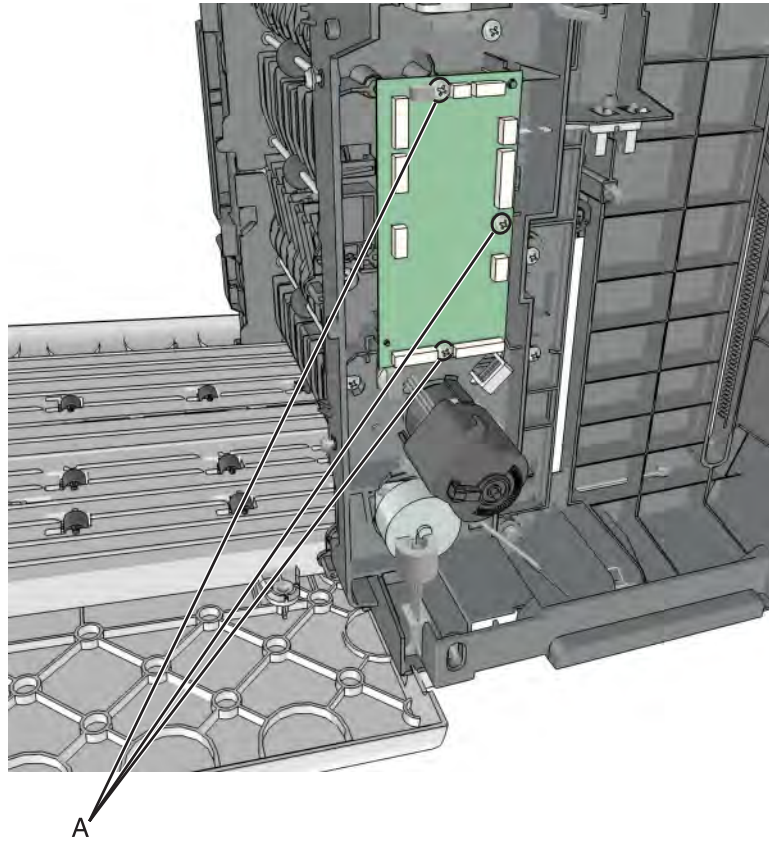

**2** Remove the two screws (B), then remove the left cover.

Parts removal

## HCOE controller board removal

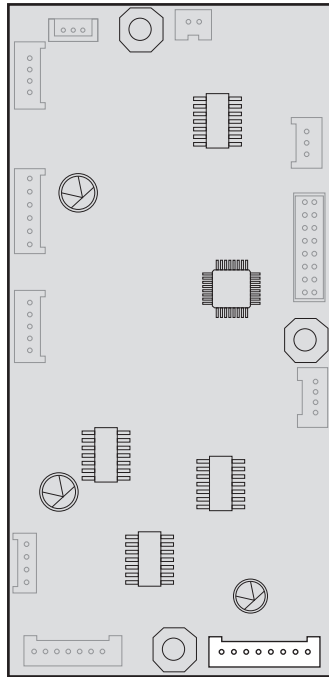

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Disconnect all the cables from the controller board, and then remove the three screws (A).

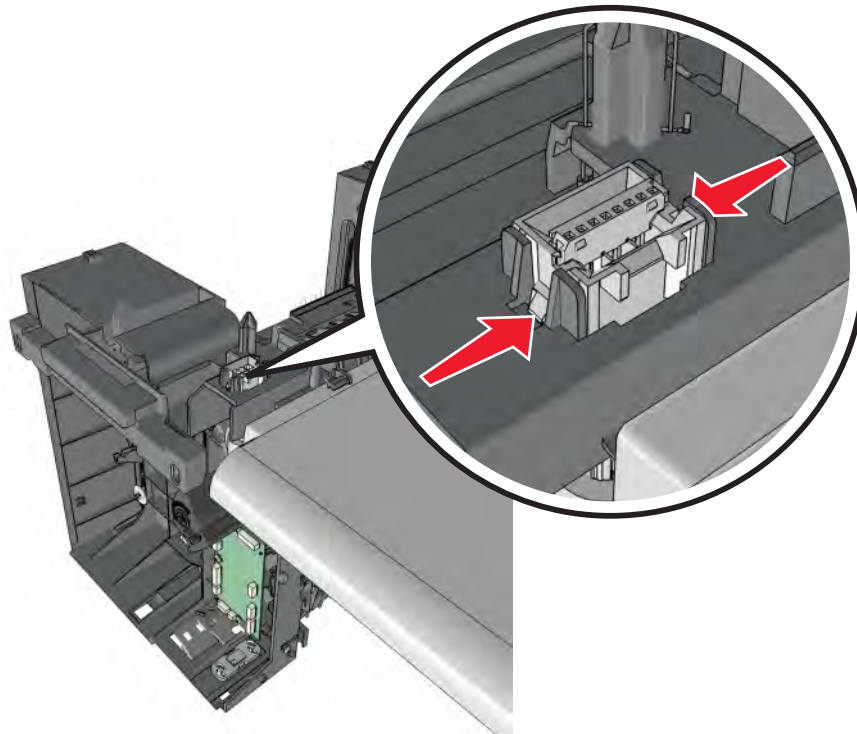

- 3 Remove the controller board.

## HCOE lower interface cable removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Disconnect the lower interface cable J1 from the controller board.

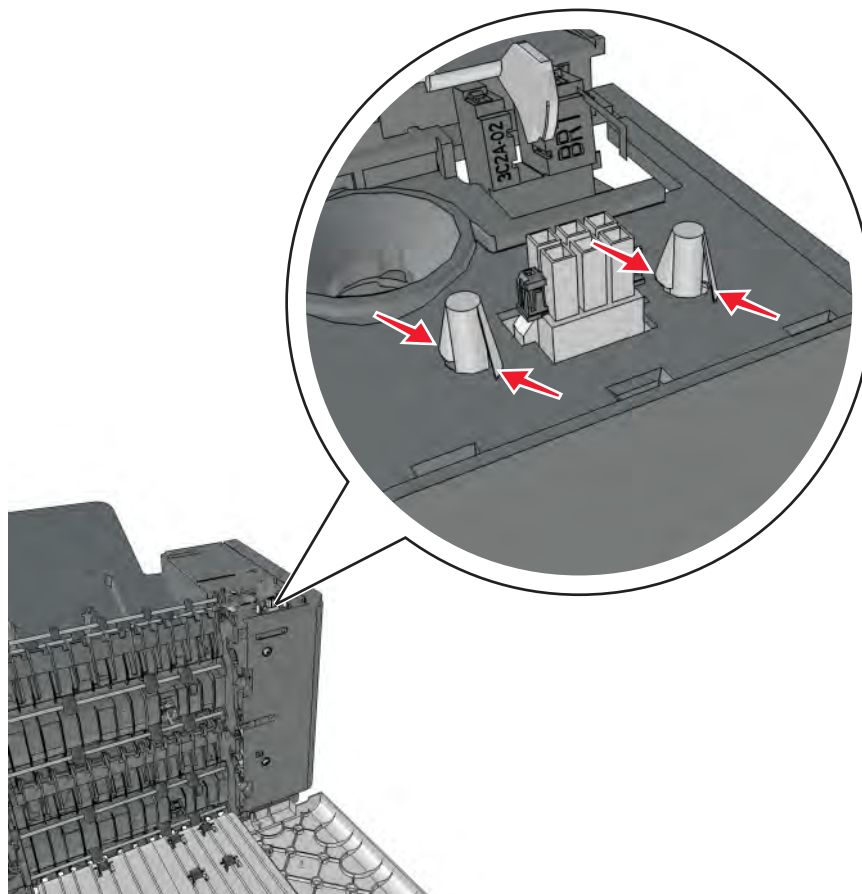

- 3 Push inward to release the latches, then push the connector out of its slot.

- 4 Remove the lower interface cable.

## HCOE upper interface cable removal

- 1 Remove the HCOE sensor cover. See [“HCOE sensor cover removal” on page 553](#).
- 2 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 3 Disconnect the upper interface cable from the controller board.
- 4 Crimp both connector pins using pliers to make them fit through the pin holes. Push the connector out of its slot.

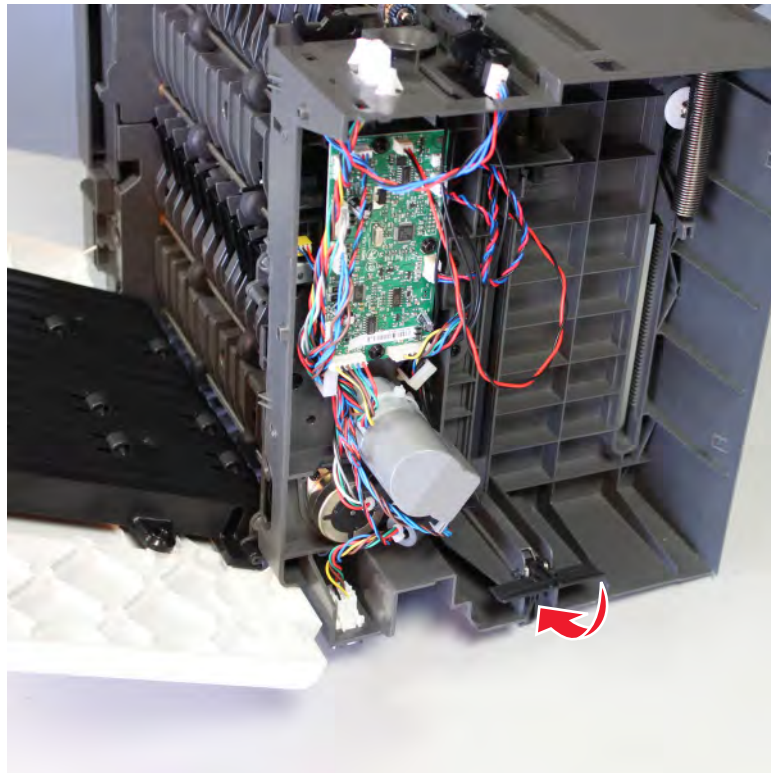

- 5 Remove the upper interface cable.

## HCOE latch removal

- 1 Remove the HCOE left cover or HCOE right cover. See [“HCOE left cover removal” on page 556](#) or [“HCOE right cover removal” on page 555](#).
- 2 Pull the latches off the expander, and then remove.

**Note:** The latch on the opposite side can be removed using the same method shown.

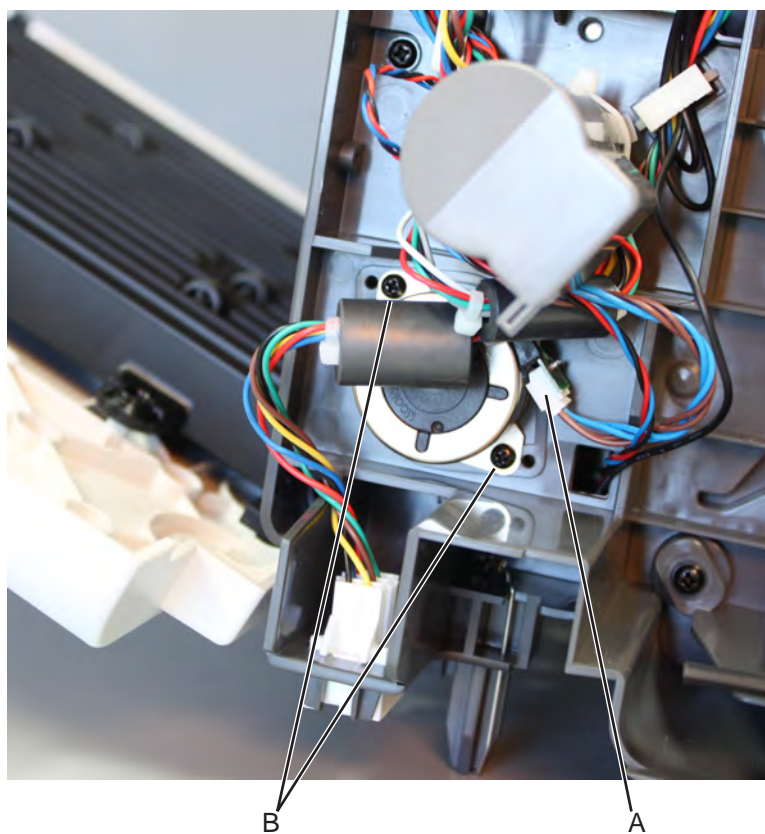

Parts removal

**561**

## Motor (HCOE diverter) removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Disconnect the cable (A), and then remove the two screws (B).

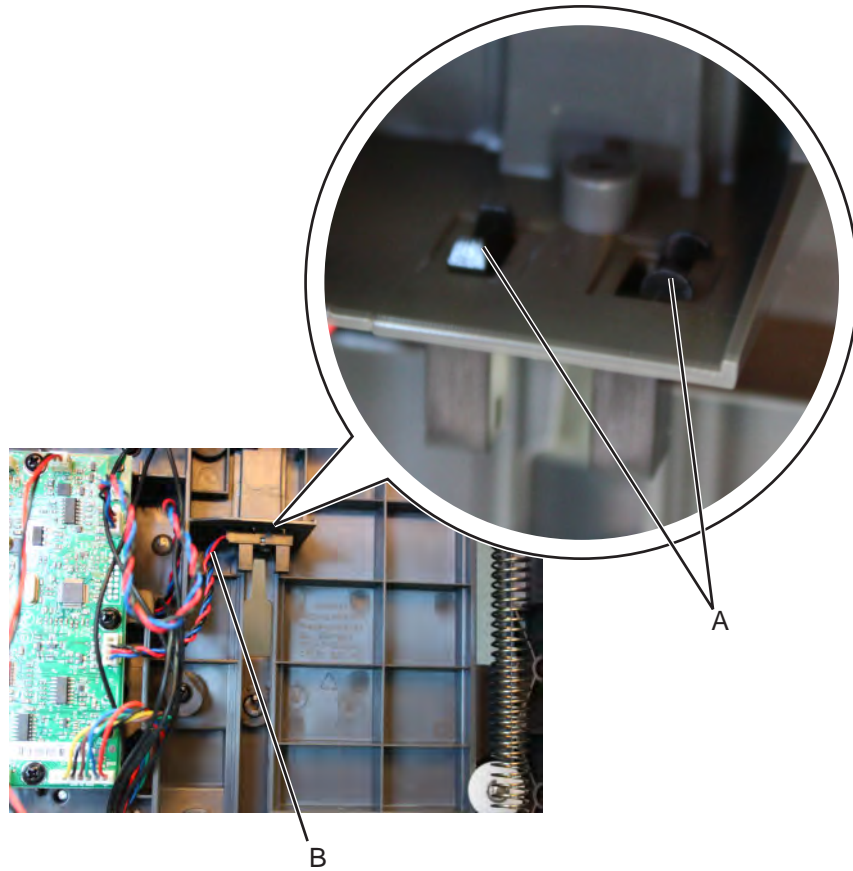

- 3 Remove the motor.

## Sensor (HCOE bin) removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Release the latches (A), and then release the sensor.

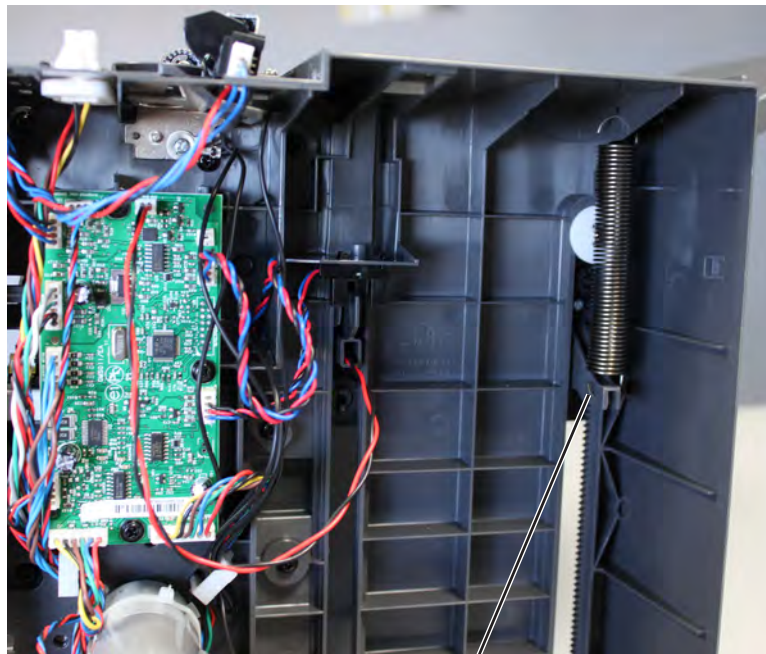

- 3 Disconnect the cable (B), and then remove the sensor.

## HCOE bin spring removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Unhook the spring (A), and then remove.

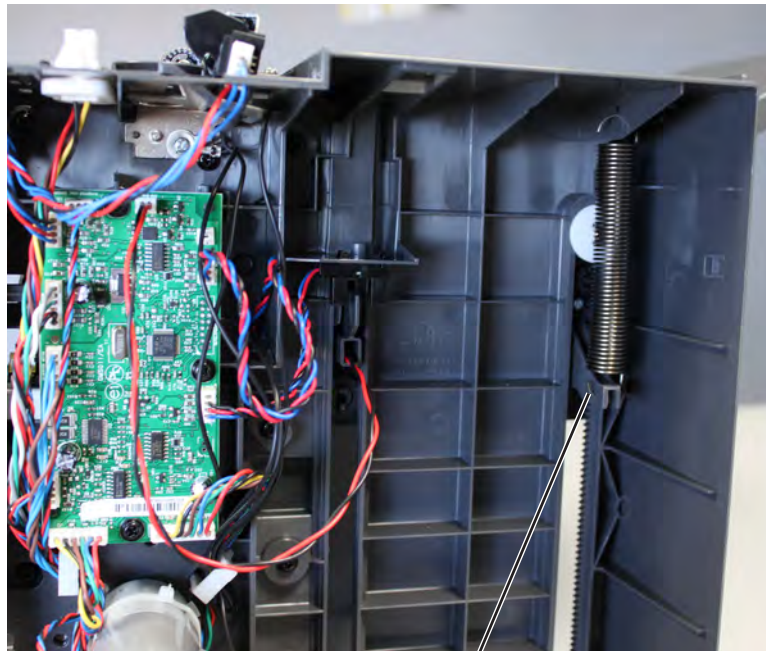

**Note:** The spring on the opposite side can be removed using the same method shown.

A

## HCOE bin pinion removal

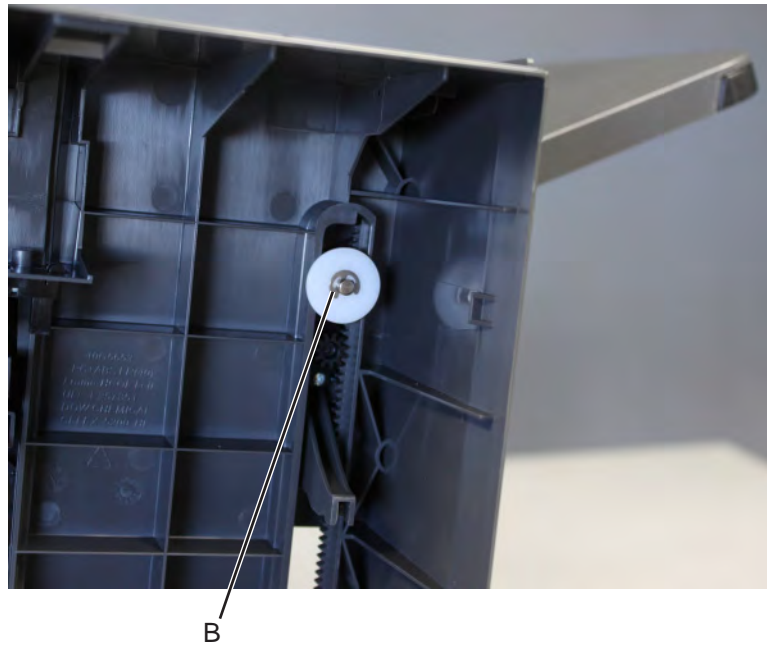

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Unhook the spring (A) to release the HCOE bin.

A

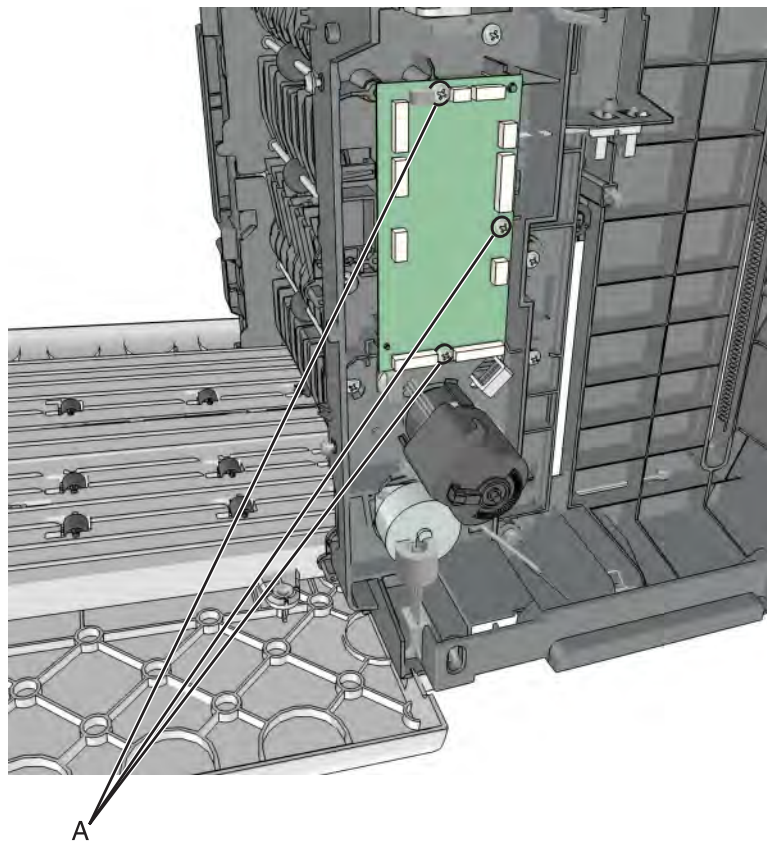

- 3 Dislodge the E-clip (B), and then remove the pinion.

**Note:** The pinion on the opposite side can be removed using the same method shown.

## Sensor (HCOE rear door interlock) removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556](#).
- 2 Remove the three screws (A).

Parts removal

- 3 Slightly move the board to access and remove the screw (B).

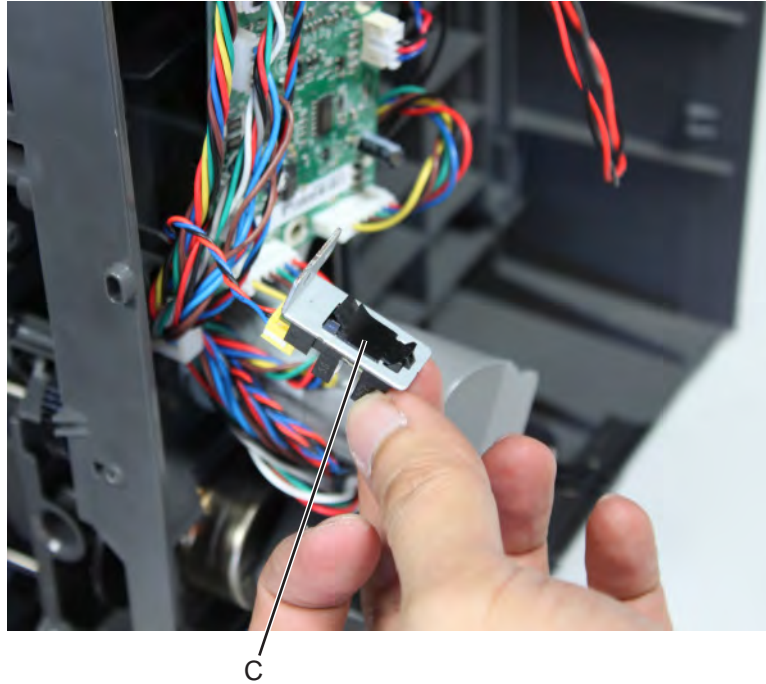

B

- 4 Release the sensor bracket.

- 5 Disconnect the sensor cable, and then remove the sensor retainer (C).

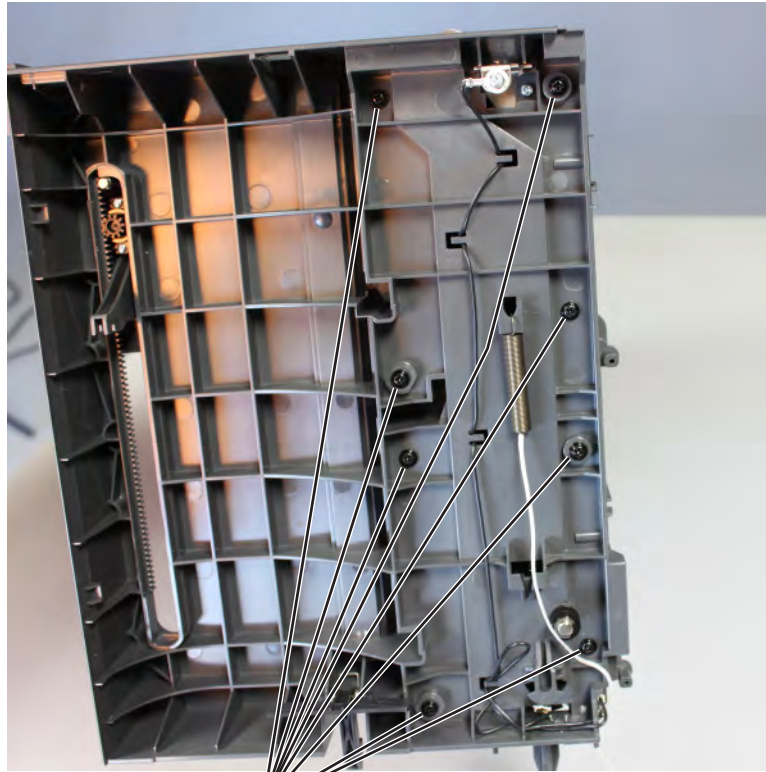

- 6 Remove the sensor.

## HCOE drive belt removal

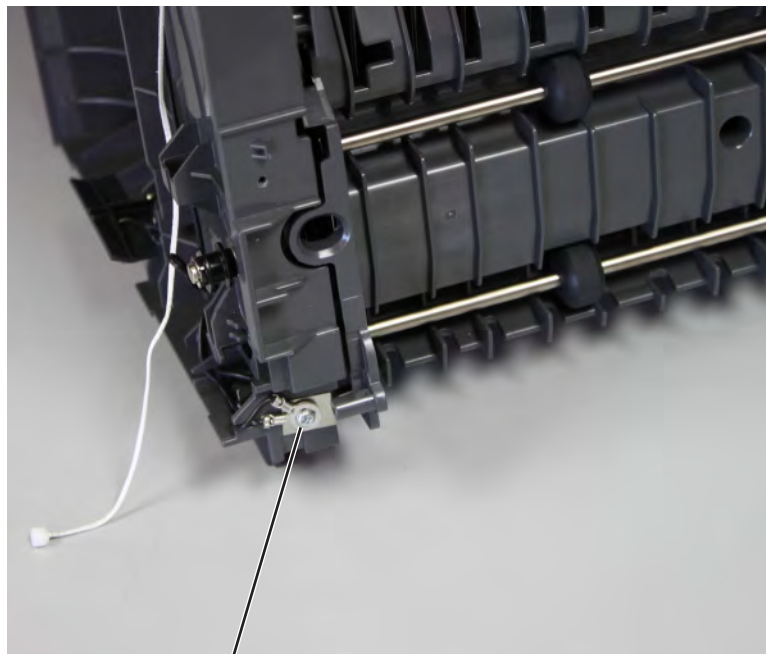

- 1 Remove the HCOE right cover. See [“HCOE right cover removal” on page 555.](#)
- 2 Remove the HCOE latch. See [“HCOE latch removal” on page 560.](#)
- 3 Remove the HCOE bin pinion. See [“HCOE bin pinion removal” on page 564.](#)

**4** Remove the eight screws (A) from the right frame.

A

**5** Remove the screw (B) from the rear side.

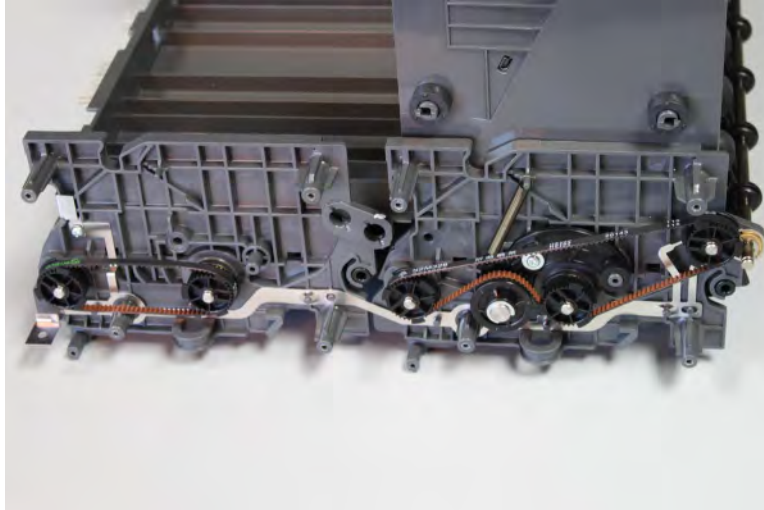

B

**6** Remove the belts from the gear assembly.

Parts removal

**Note:** Pay attention to the original position of the belts.

**Warning—Potential Damage:** Do not lose any dislodged washers.

## HCOE belt tensioner removal

- 1 Remove the HCOE right cover. See [“HCOE right cover removal” on page 555.](#)
- 2 Remove the HCOE latch. See [“HCOE latch removal” on page 560.](#)
- 3 Remove the HCOE bin pinion. See [“HCOE bin pinion removal” on page 564.](#)
- 4 Remove the HCOE drive belt. See [“HCOE drive belt removal” on page 567.](#)

- 5 Remove the screw (A), and then unhook the spring (B).

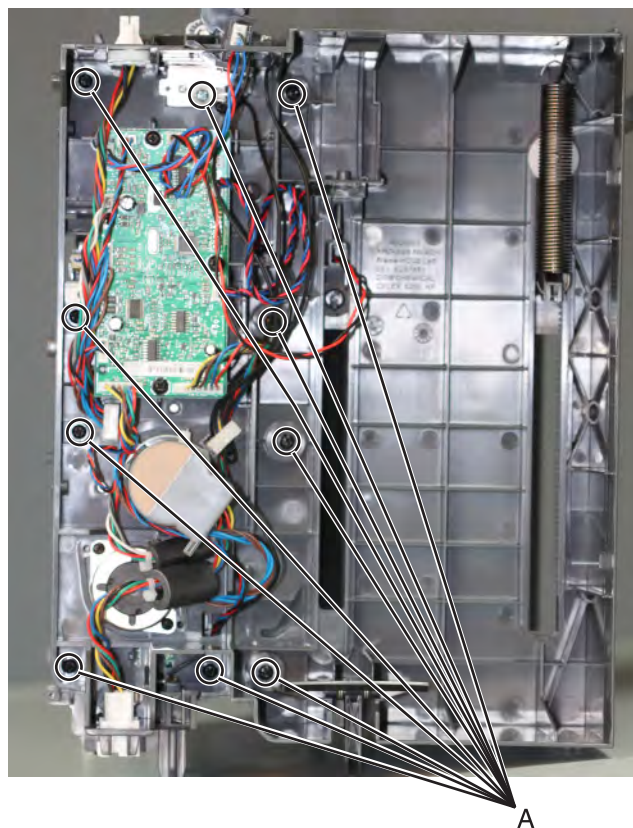

- 6 Remove the belt tensioner.

### HCOE diverter plunger assembly removal

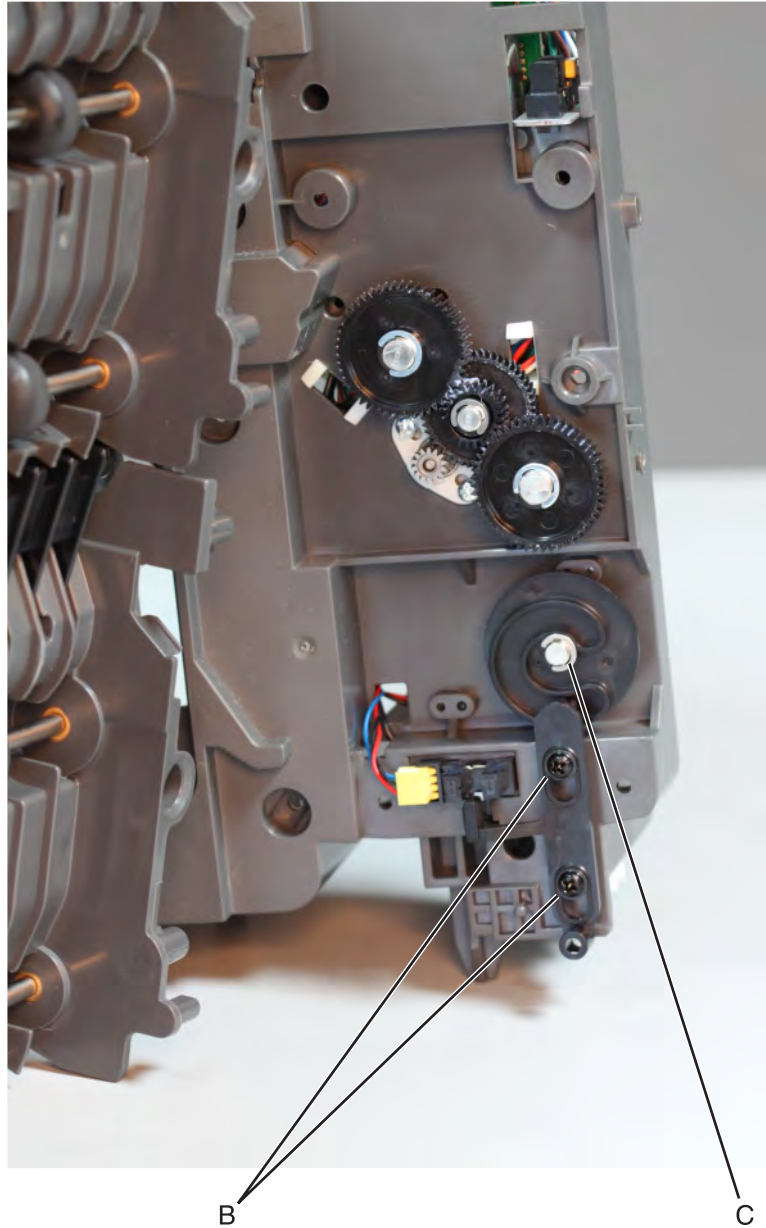

- 1 Remove the HCOE rear door. See [“HCOE rear door removal” on page 552.](#)
- 2 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)

- 3** Remove the 10 screws (A) from the inner left frame.

- 4** Slightly pull away the frame to access the gear assembly underneath it.
- 5** Remove the two screws (B), and then remove the plunger.

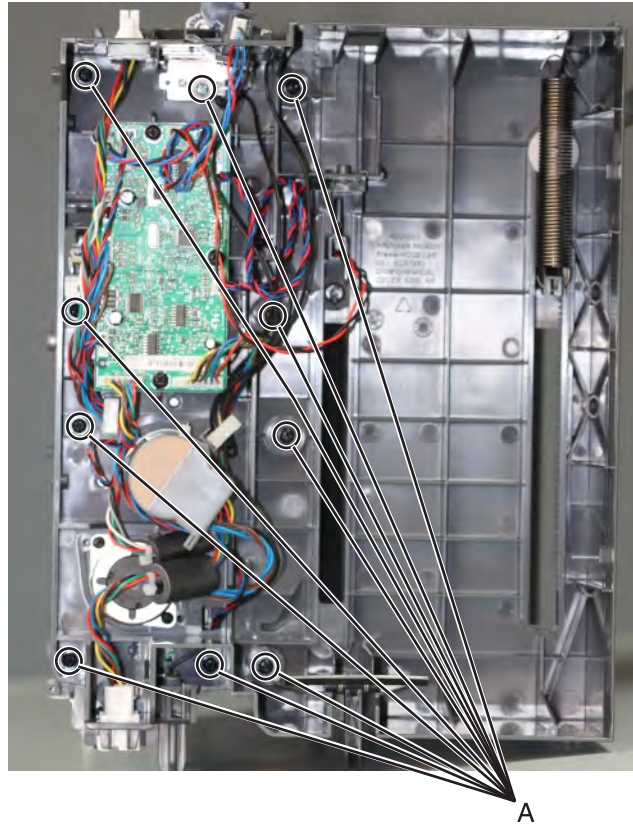

- 6 Remove the E-clip (C), and then remove the diverter cam.

## HCOE drive gear assembly removal

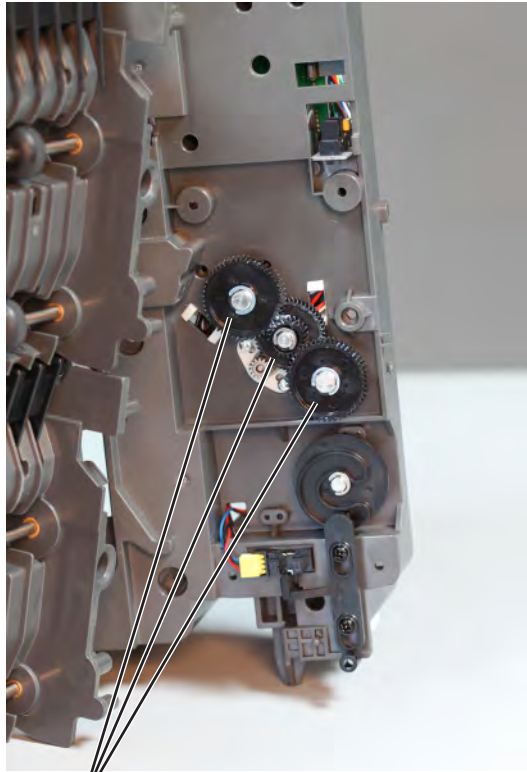

- 1 Remove the HCOE rear door. See [“HCOE rear door removal” on page 552.](#)
- 2 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)

**3** Remove the 10 screws (A) from the inner left frame.

**4** Slightly pull away the frame to access the gear assembly underneath it.

- 5 Remove the three E-clips, and then remove the gears (B).

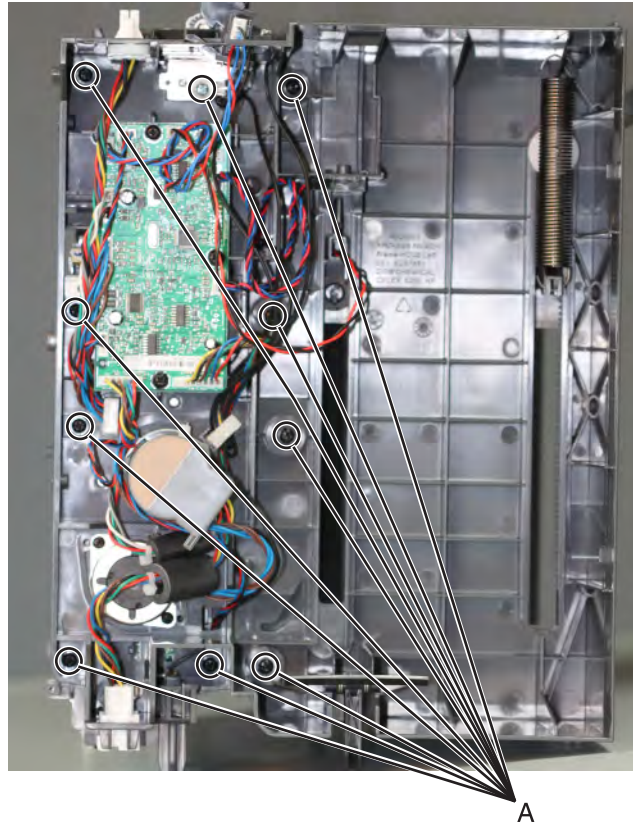

B

### Motor (HCOE transport) removal

- 1 Remove the HCOE rear door. See [“HCOE rear door removal” on page 552.](#)
- 2 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)
- 3 Disconnect the motor cable from the controller board.

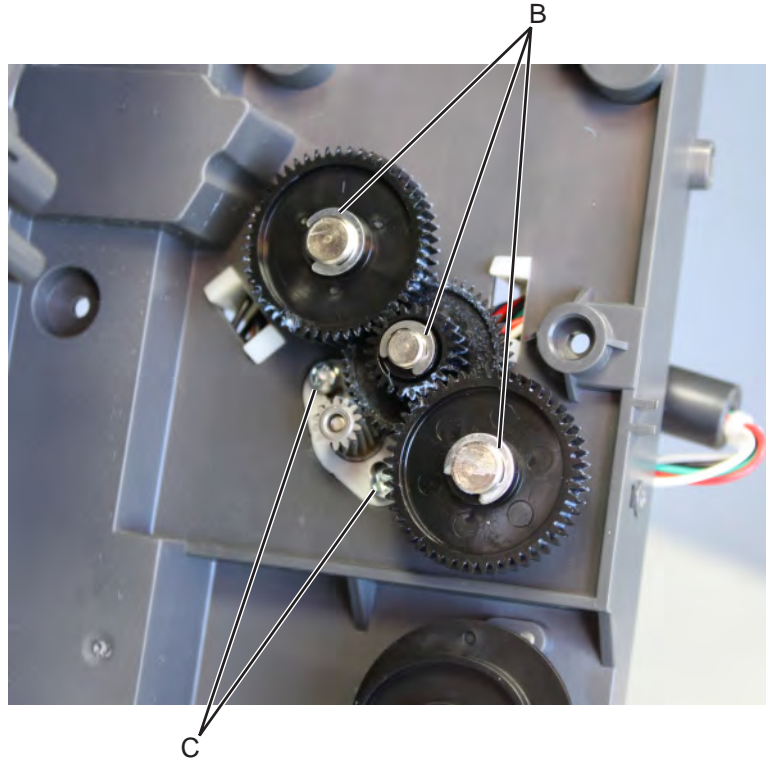

**4** Remove the 10 screws (A) from the inner left frame.

**5** Slightly pull away the frame to access the parts underneath it.

**6** Remove the three E-clips (B), and then remove the gears.

**7** Remove the two screws (C), and then remove the motor.

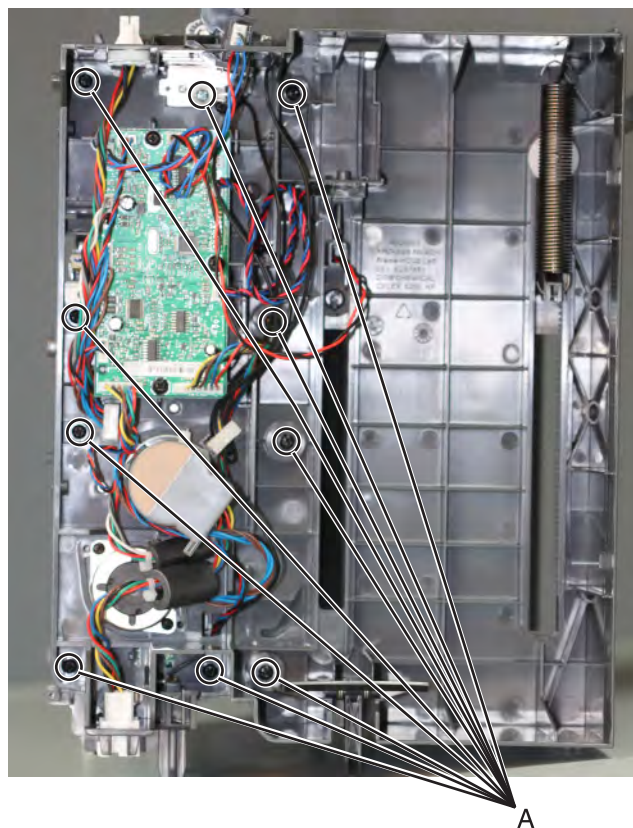

### **Sensor (HCOE diverter) removal**

- 1** Remove the HCOE rear door. See [“HCOE rear door removal” on page 552.](#)
- 2** Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)

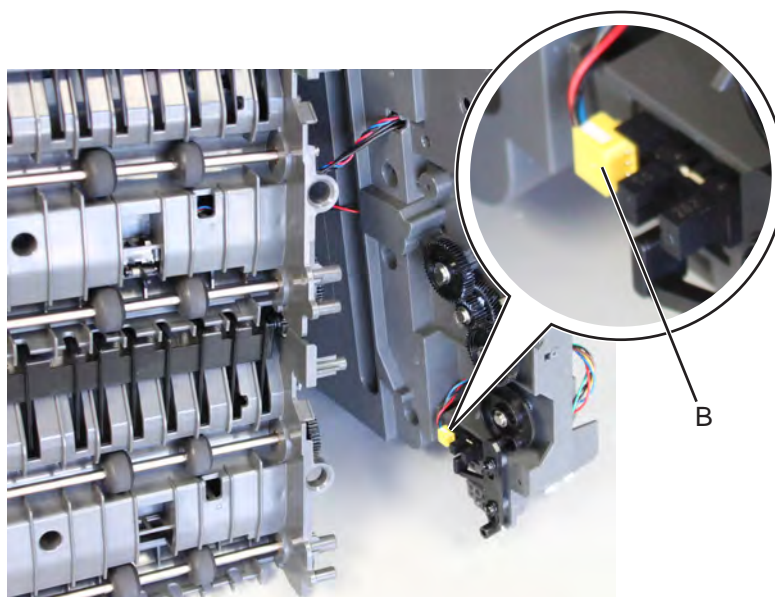

**3** Remove the 10 screws (A) from the inner left frame.

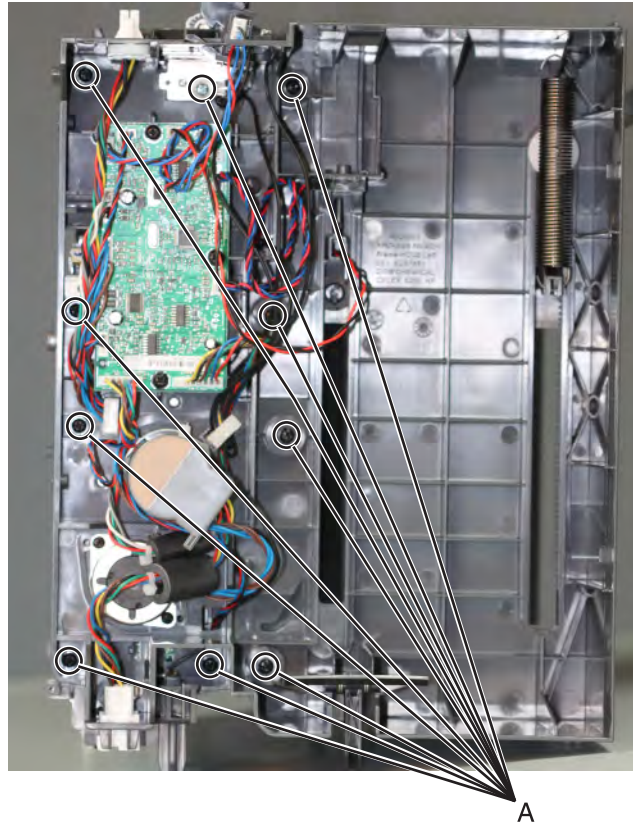

**4** Slightly pull away the frame to access the parts underneath it.

**5** Disconnect the cable (B), and then remove the sensor.

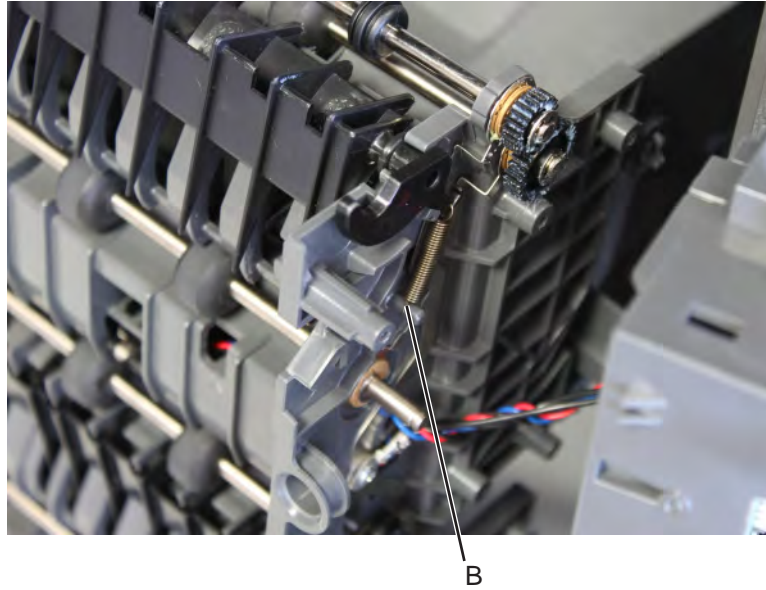

## HCOE top diverter spring removal

- 1 Remove the HCOE rear door. See [“HCOE rear door removal” on page 552.](#)
- 2 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)
- 3 Remove the 10 screws (A) from the inner left frame.

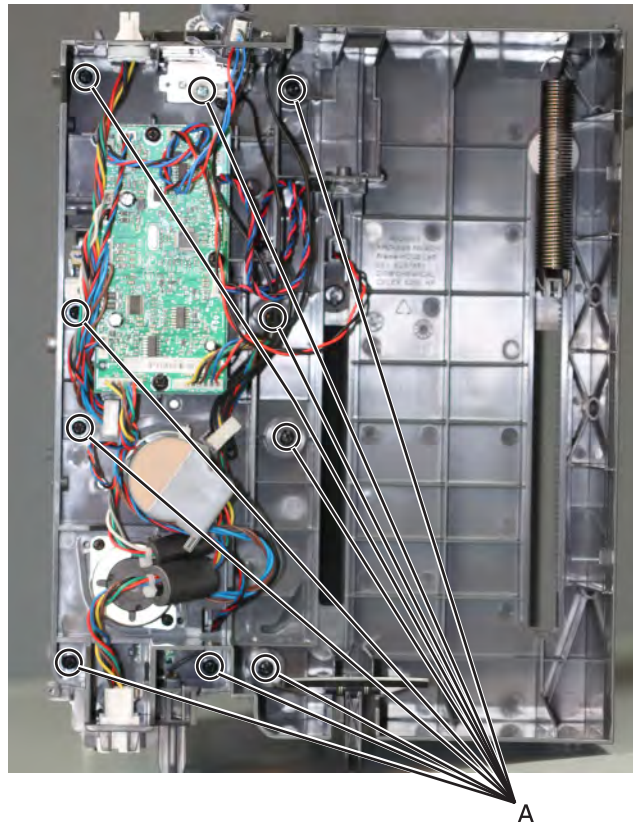

- 4 Slightly pull away the frame to access the parts underneath it.

- 5 Unhook the lower end (B) to release, and then remove the spring.

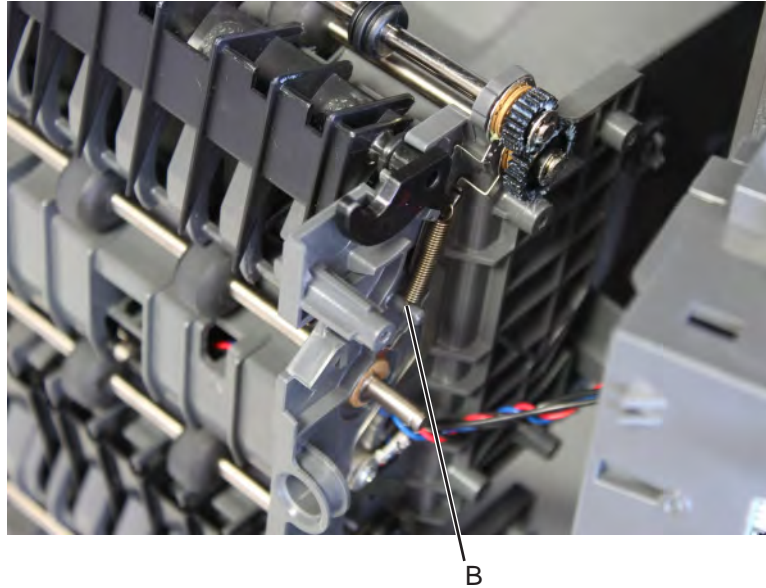

## HCOE top diverter removal

- 1 Remove the HCOE rear door. See [“HCOE rear door removal” on page 552.](#)
- 2 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)
- 3 Remove the 10 screws (A) from the inner left frame.

Parts removal

- 4 Slightly pull away the frame to access the parts underneath it.
- 5 Unhook the lower end (B) of the spring.

- 6 Pry the right side of the diverter to release, and then remove the diverter.

## HCOE bin shaft removal

**Note:** This part is not a FRU.

- 1 Remove the HCOE left cover. See [“HCOE rear door removal” on page 552.](#)
- 2 Remove the HCOE right cover. See [“HCOE left cover removal” on page 556.](#)
- 3 Remove the HCOE bin pinion. See [“HCOE bin pinion removal” on page 564.](#)

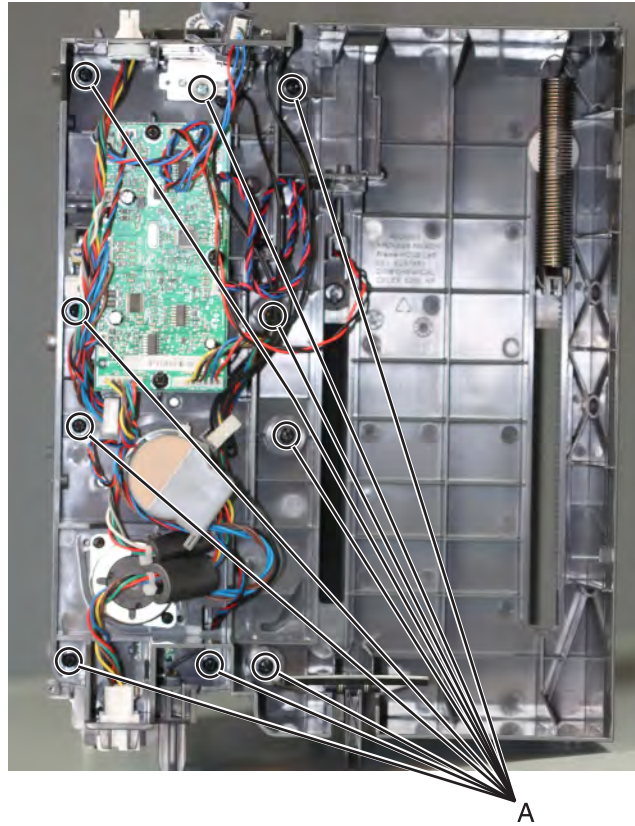

- 4 Pull the shaft off the bin, and remove.

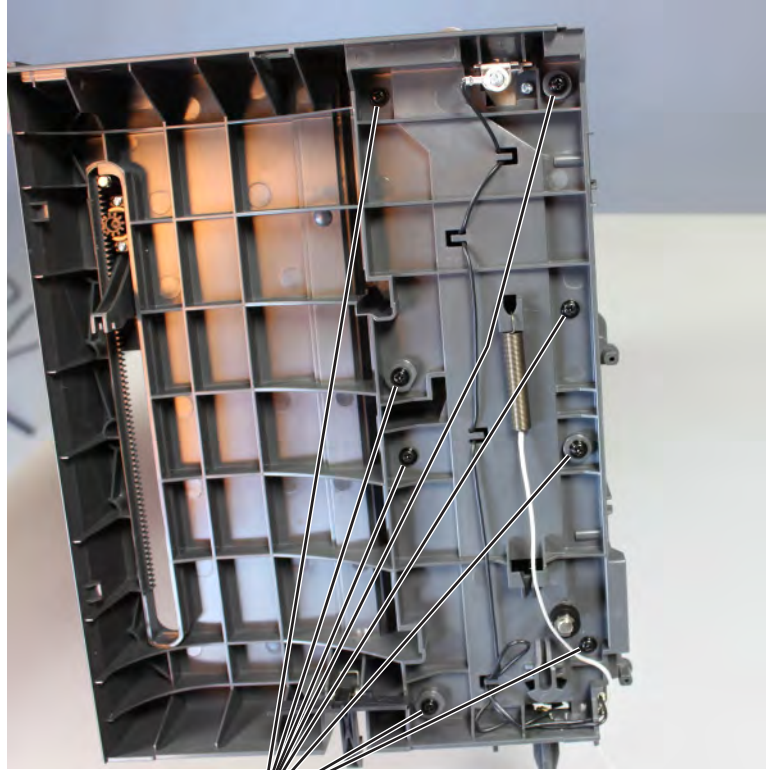

## HCOE bin removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)
- 2 Remove the HCOE right cover. See [“HCOE right cover removal” on page 555.](#)
- 3 Remove the HCOE bin pinion. See [“HCOE bin pinion removal” on page 564.](#)
- 4 Remove the HCOE bin shaft. See [“HCOE bin shaft removal” on page 580.](#)
- 5 Disconnect the cable J10 from the controller board.

- 6 Remove the 10 screws (A), and then remove the inner left frame.

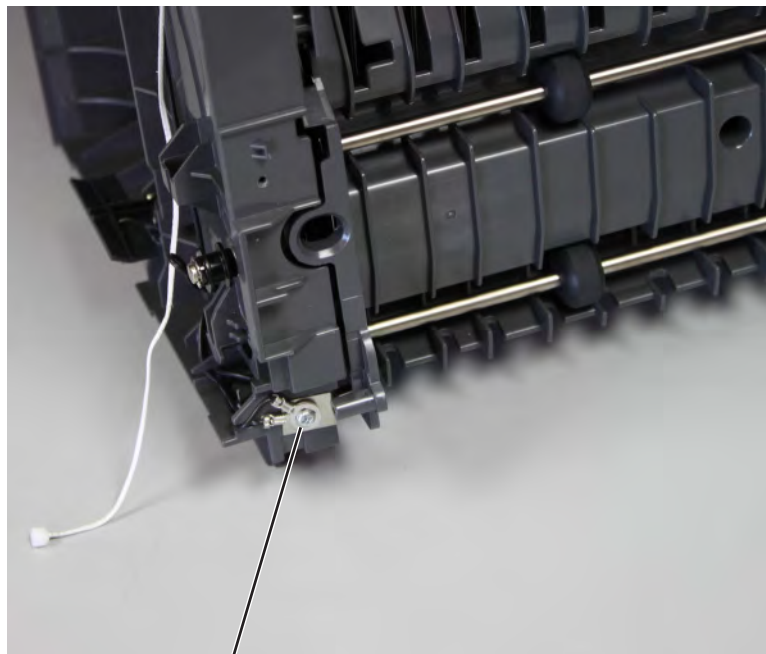

**7** Remove the eight screws (B) from the right frame.

B

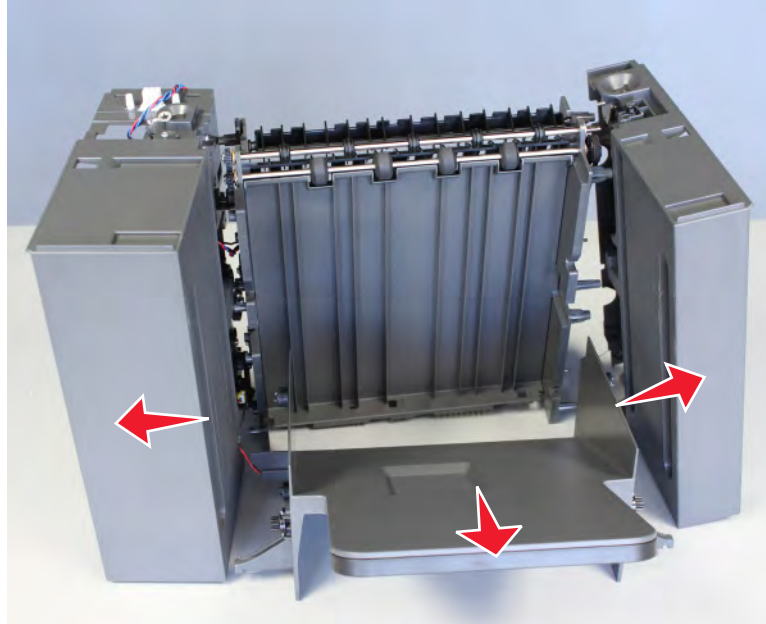

**8** Remove the screw (C) from the rear side, and then remove the frame.

C

Parts removal

- 9 Release the bin from the right and left frames, and then remove it.

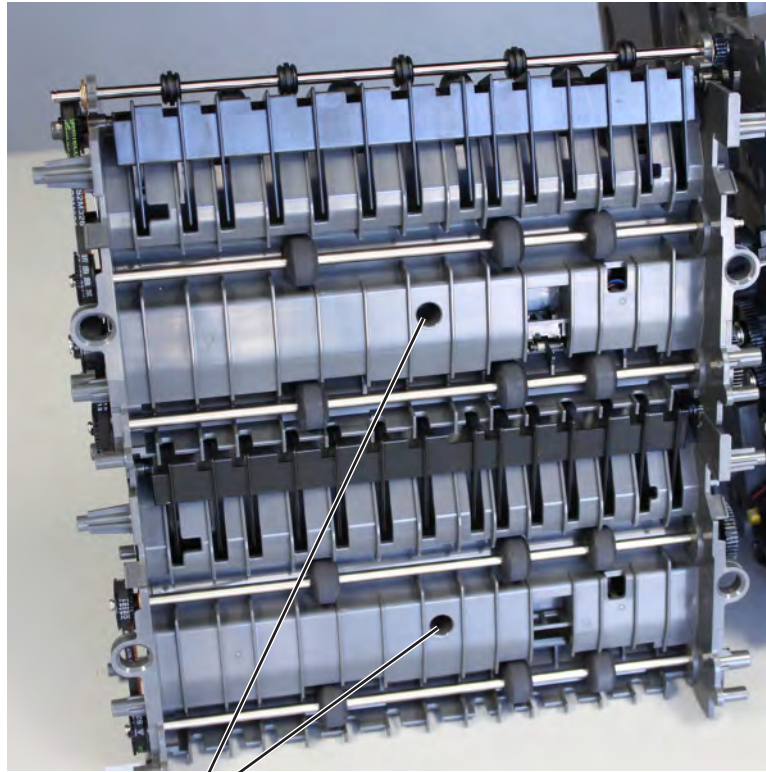

### Sensor (HCOE pass-through) removal

- 1 Remove the HCOE left cover. See [“HCOE left cover removal” on page 556.](#)
- 2 Remove the HCOE right cover. See [“HCOE right cover removal” on page 555.](#)
- 3 Remove the HCOE bin pinion. See [“HCOE bin pinion removal” on page 564.](#)
- 4 Remove the HCOE bin shaft. See [“HCOE bin shaft removal” on page 580.](#)
- 5 Remove the HCOE bin. See [“HCOE bin removal” on page 581.](#)
- 6 Disconnect the sensor cable J3 from the controller board.

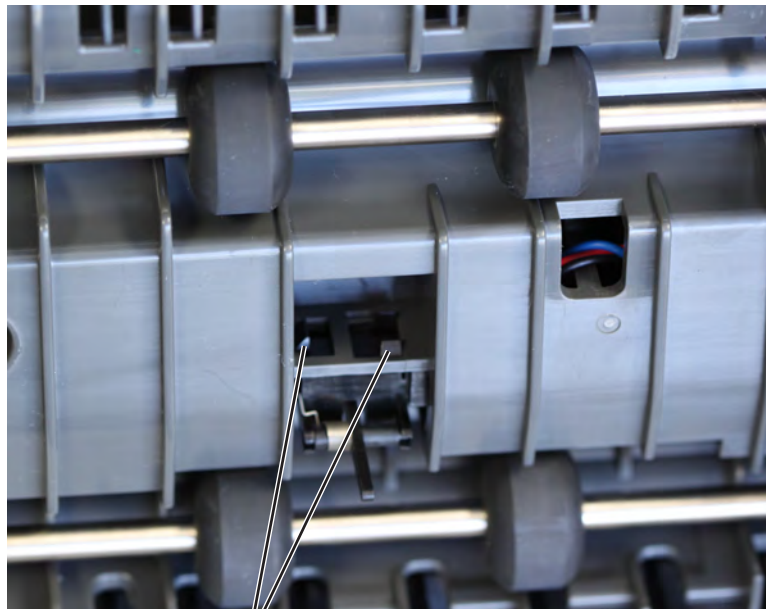

**7** From the rear side, remove the two screws (A).

A

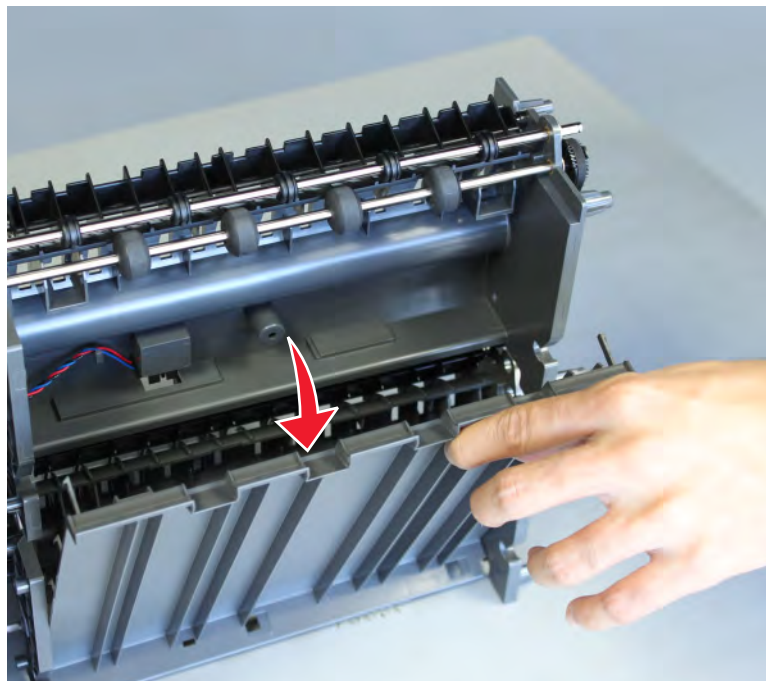

**8** Release the latches (B), and then release the sensor.

B

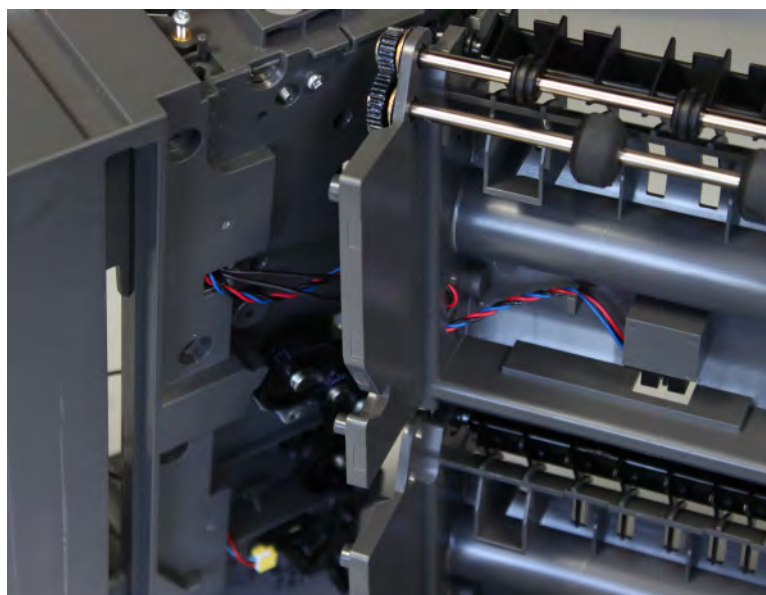

Parts removal

- 9 Open the cover on the other side to access the sensor underneath it.

- 10 Release the cables from the holes and cable guides, and then remove the sensor.

**Note:** Pay attention to the original route of the cable.

## Optional staple finisher removals

### Optional staple finisher removal

Press the latches to release, and then lift the optional bin off the printer.

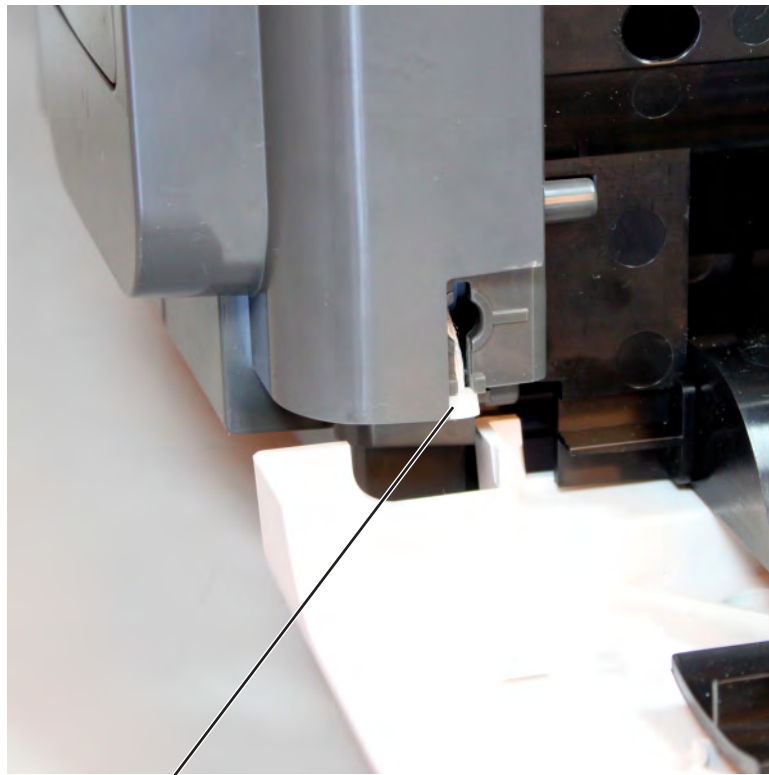

## Staple finisher rear door removal

- 1 Open the rear door, and detach the string (A) from the door.

**Note:** Fasten the string end (B) to the rear side to prevent it from recoiling into the interior of the staple finisher.

B

- 2** Position the door at an angle approximately 90 degrees from the staple finisher. Release the right hinge of the door first (1), then move the door to the right (2) to release the left hinge.

Parts removal

**3** Remove the rear door assembly.

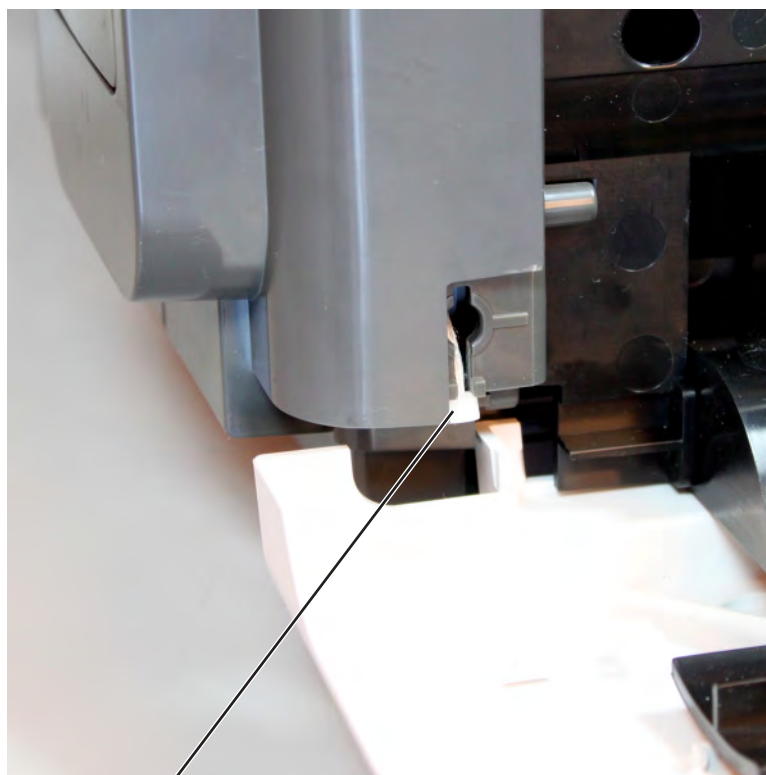

## Staple finisher left cover removal

**Note:** This part is not a FRU.

**1** Open the rear door, and then detach the string (A) from the rear door.

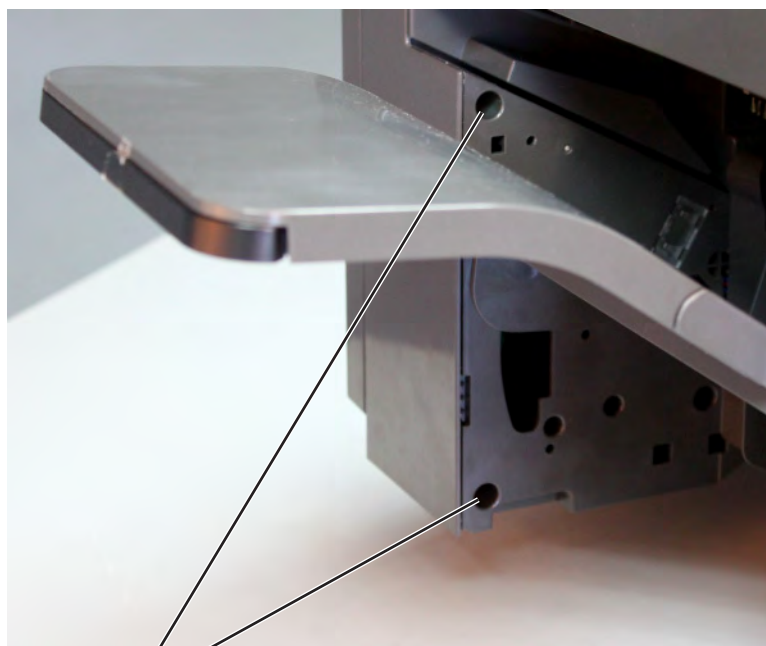

**Note:** Fasten the string end (B) to the rear side to prevent it from recoiling into the interior of the staple finisher.

B

**2** Remove the two screws (C), and then remove the cover.

C

Parts removal

**591**

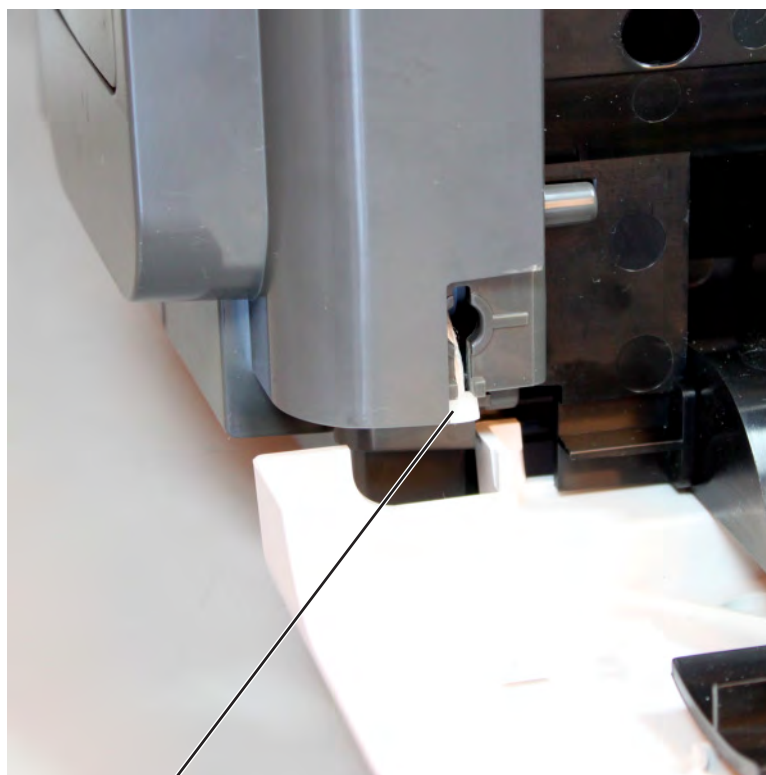

## Staple finisher right cover removal

- 1 Open the rear door, and then detach the string (A) from the rear door.

**Note:** Fasten the string end (B) to the rear side to prevent it from recoiling into the interior of the finisher.

B

**2** Remove the two screws (C), and then remove the cover.

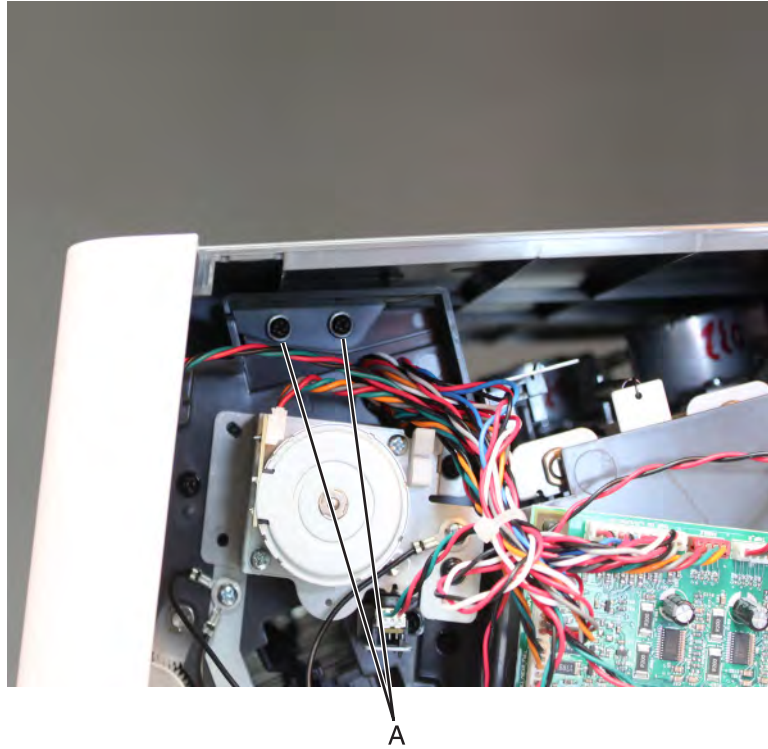

C

Parts removal

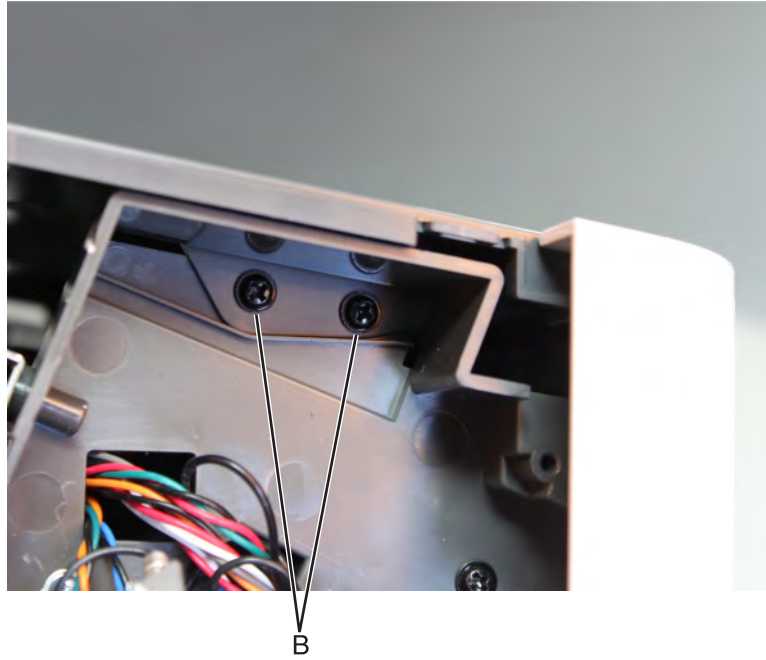

**593**

## Staple finisher top cover removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the two screws (A).

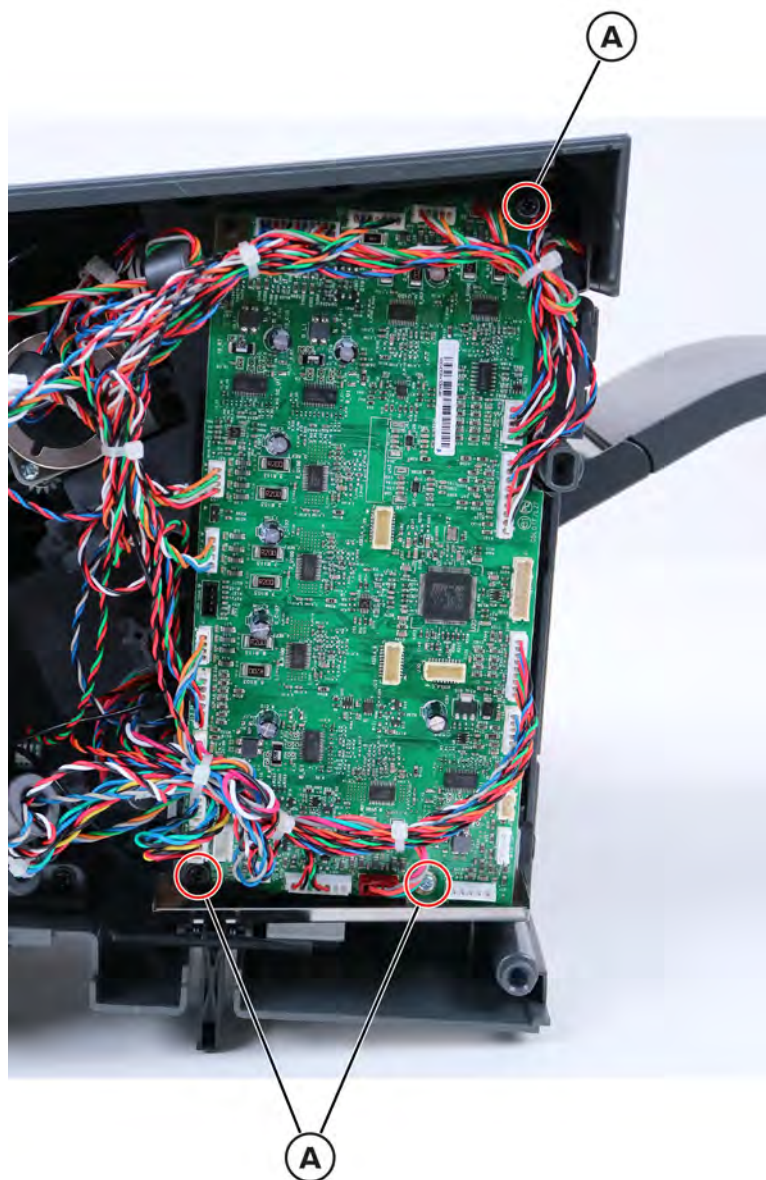

4 Remove the two screws (B).

5 Remove the cover.

## Staple finisher controller board removal

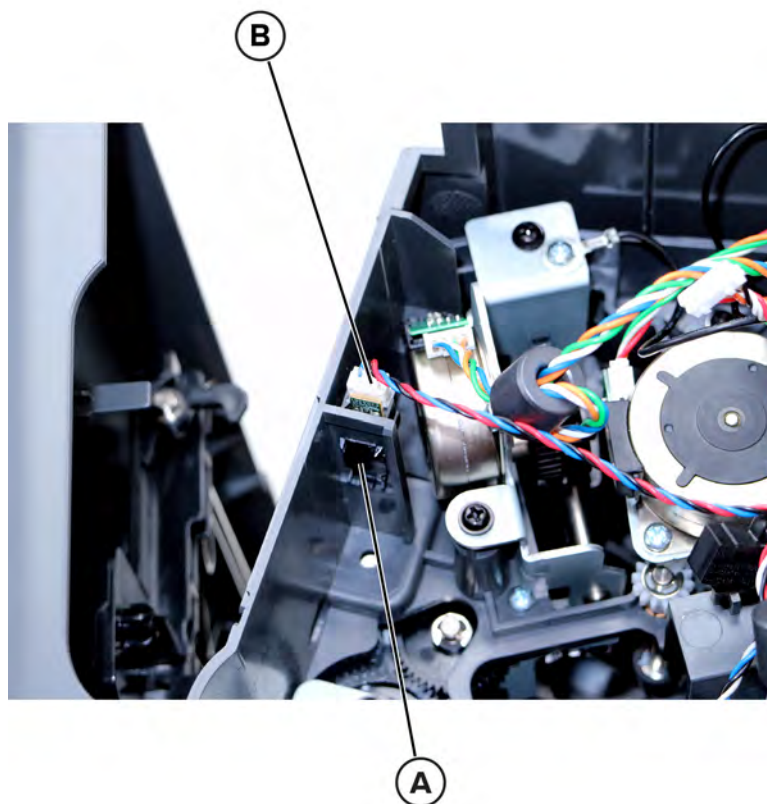

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 Disconnect all the cables from the controller board, and then remove the three screws (A).

- 3 Remove the board.

## Sensor (staple finisher door) removal

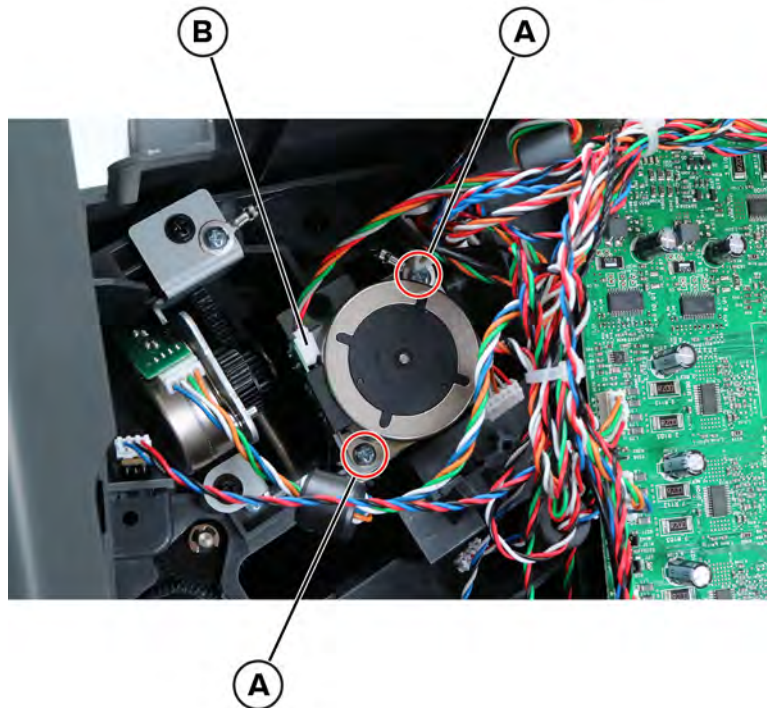

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 Remove the sensor retainer (A), and then disconnect the cable (B).

- 3 Remove the sensor.

## Motor (staple finisher paddle) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the two screws (A), and then disconnect the cable (B).

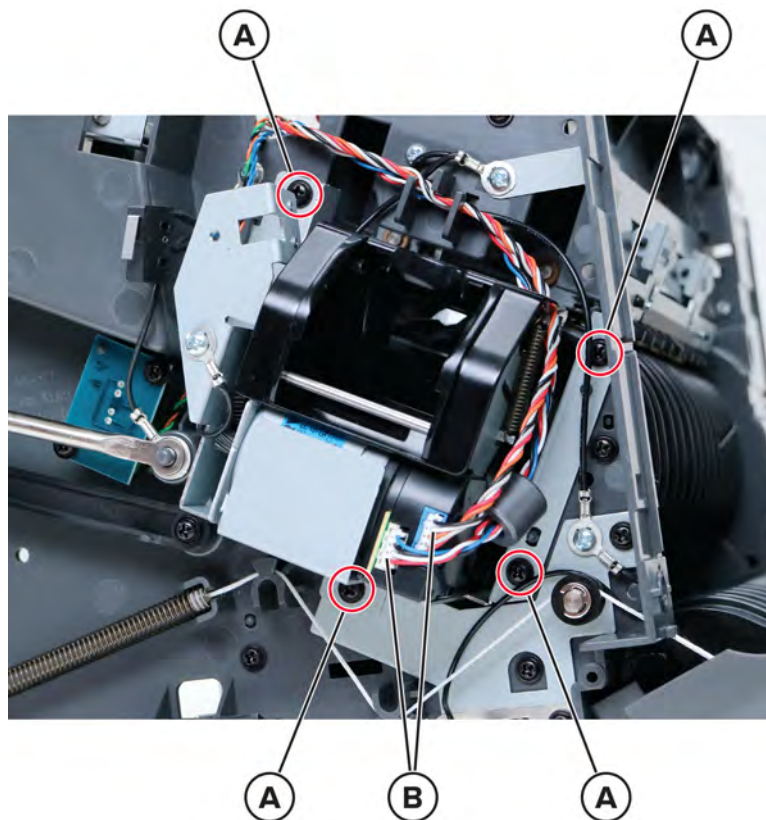

**Installation note:** Make sure that the two ground cables are reinstalled.

- 3 Remove the motor.

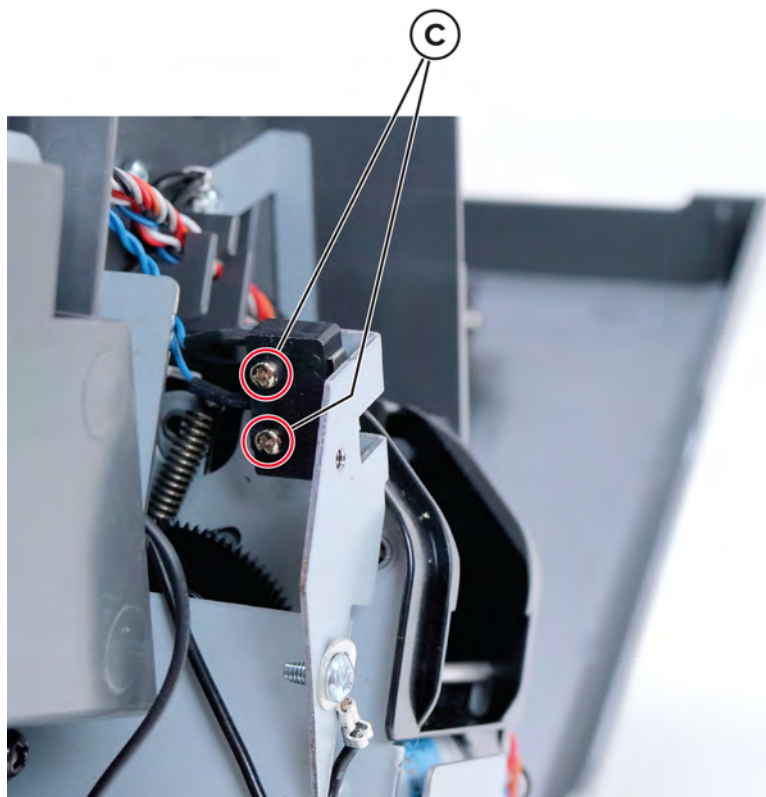

## Staple unit removal

- 1 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 2 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)

**3** Remove the four screws (A), and then disconnect the two cables (B).

4 Remove the two screws (C), and then release the switch.

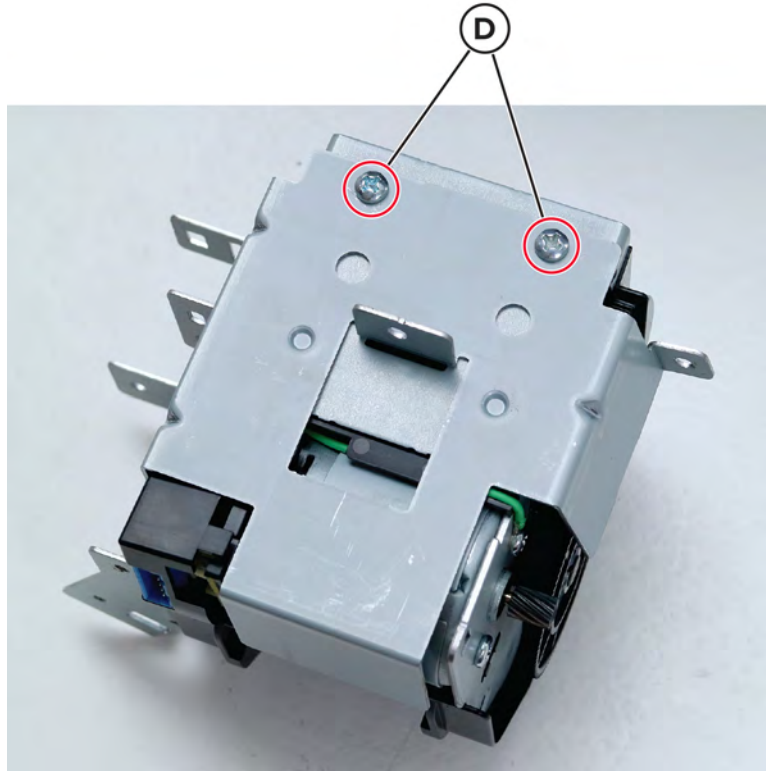

Parts removal

**600**

- 5 Remove the staple unit carriage, and then remove the two screws (D).

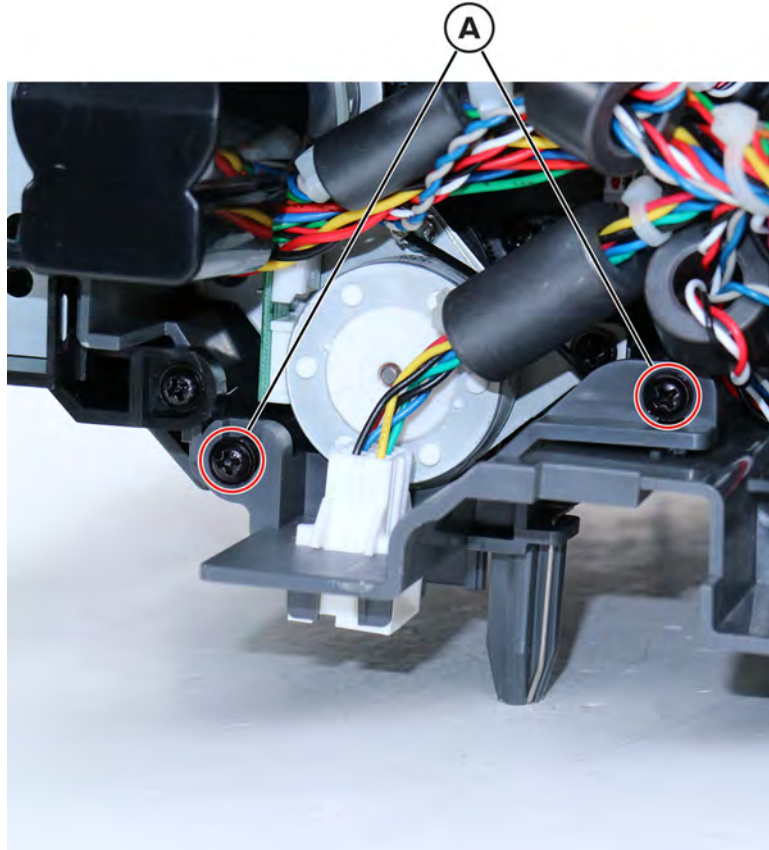

- 6 Remove the staple unit.

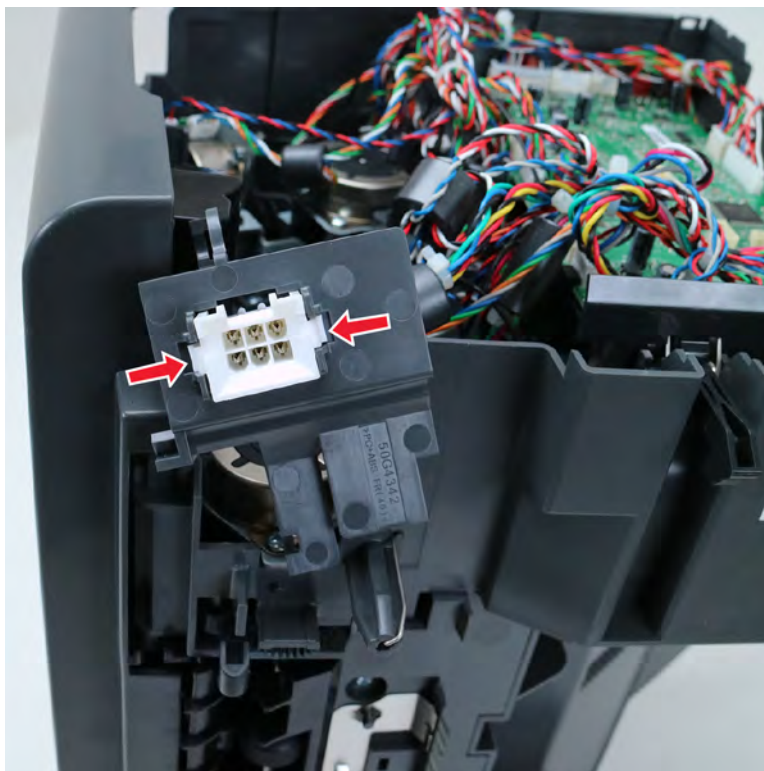

### Staple finisher interface cable removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple unit. See [“Staple unit removal” on page 598.](#)

**3** Remove the two screws (A), and then release the connector bracket.

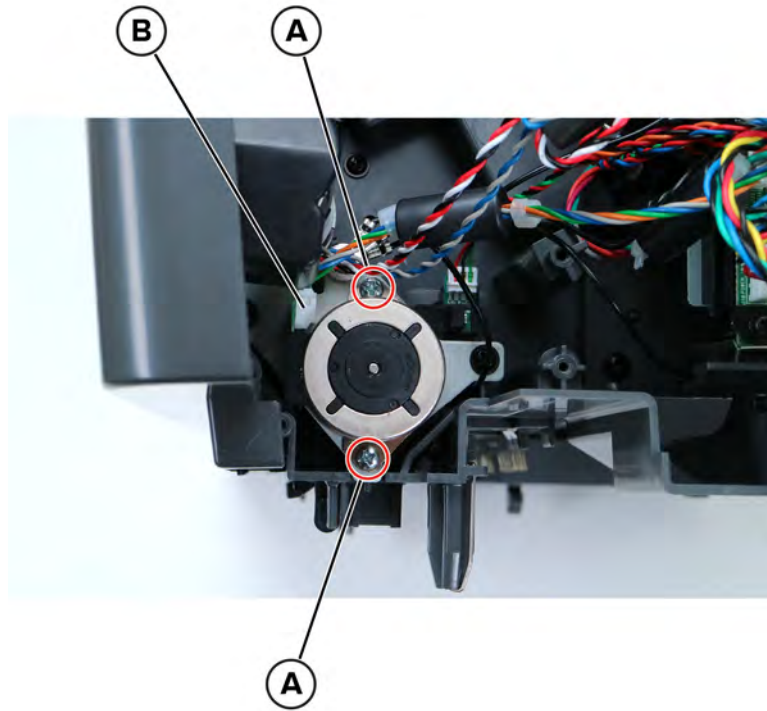

- 4 Press the latches to release, and then dislodge the connector.

- 5 Disconnect the interface cable from the controller board, and then remove it.

## Motor (staple finisher diverter) removal

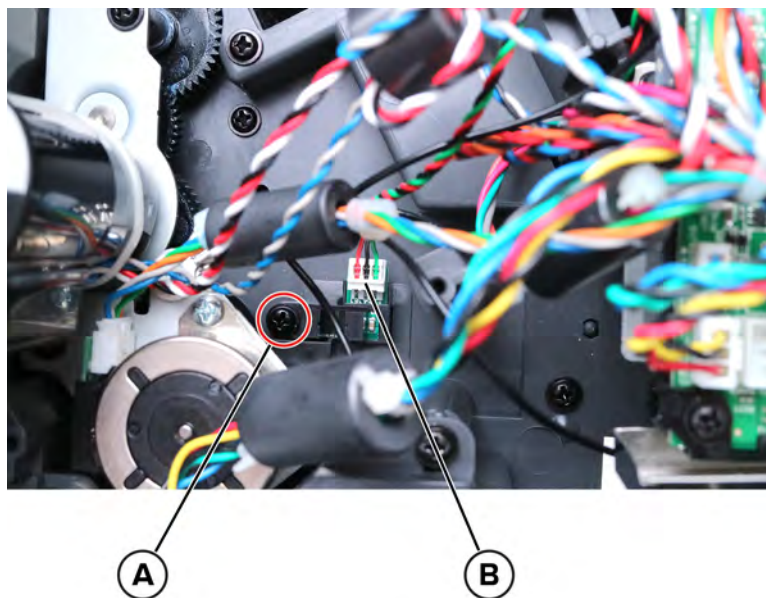

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 Remove the two screws (A), and then disconnect the cable (B).

- 3 Remove the motor.

## Sensor (staple finisher diverter plunger) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the screw (A), and then disconnect the cable (B).

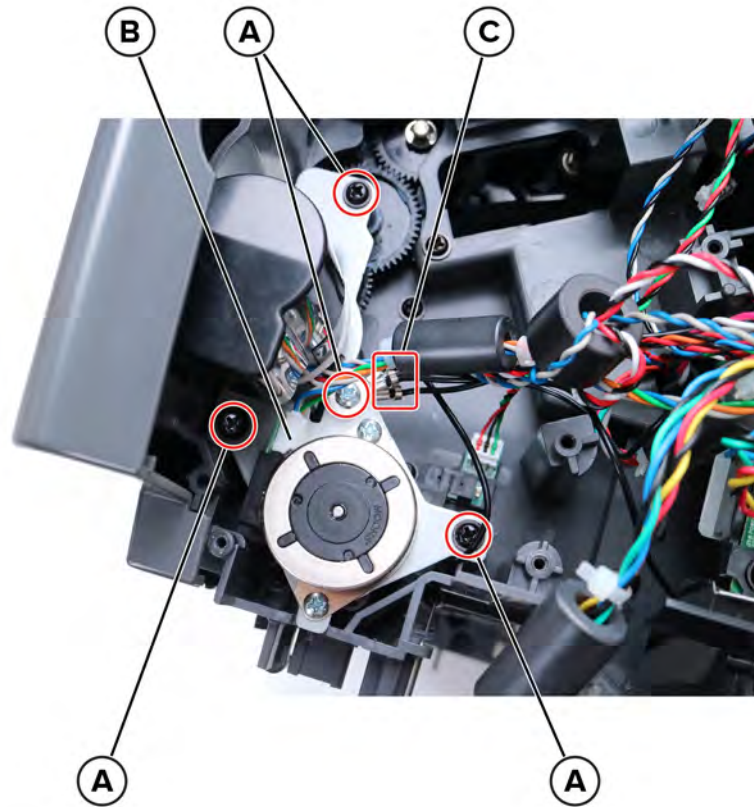

- 3 Remove the sensor.

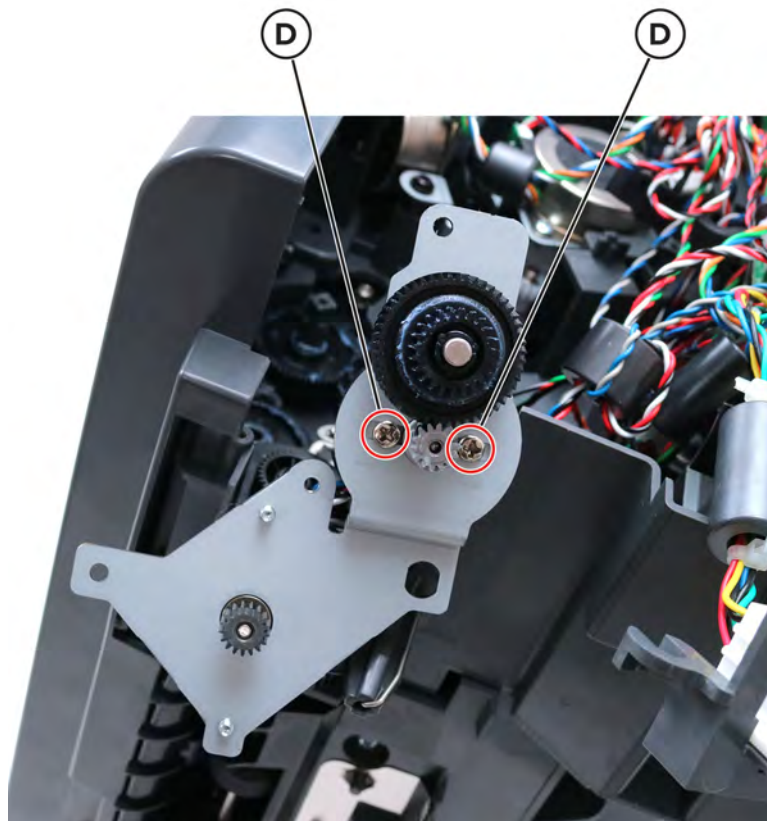

## Motor (staple finisher transport) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher interface cable. See [“Staple finisher interface cable removal” on page 601.](#)

**3** Remove the four screws (A), and then disconnect the cable (B) and the three ground cables (C).

**4** Release the motor bracket, and then remove the two screws (D).

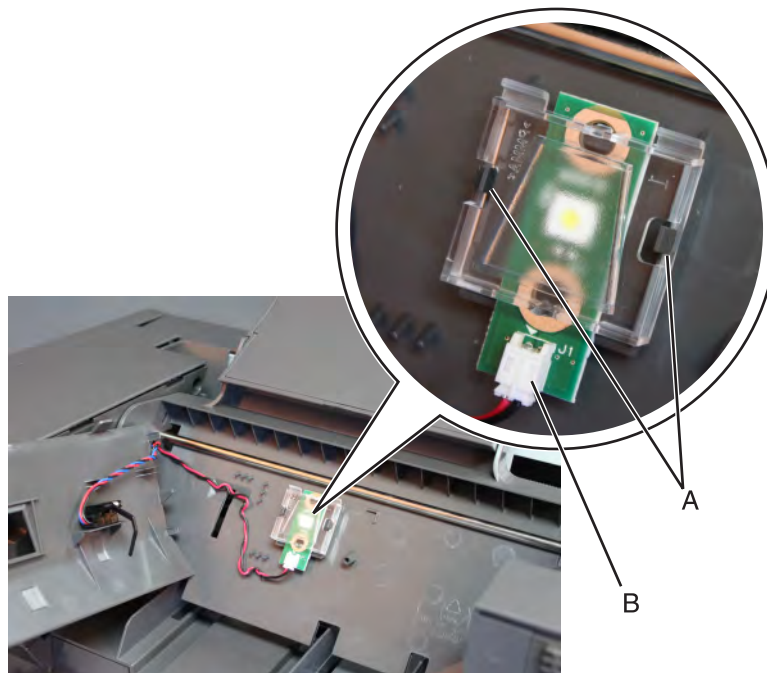

**5** Remove the motor.

## Standard bin LED removal

- 1 With a prying tool, open the LED cover.

- 2 Release the latches (A), and then remove the LED lens. Disconnect the cable (B), and then remove the LED.

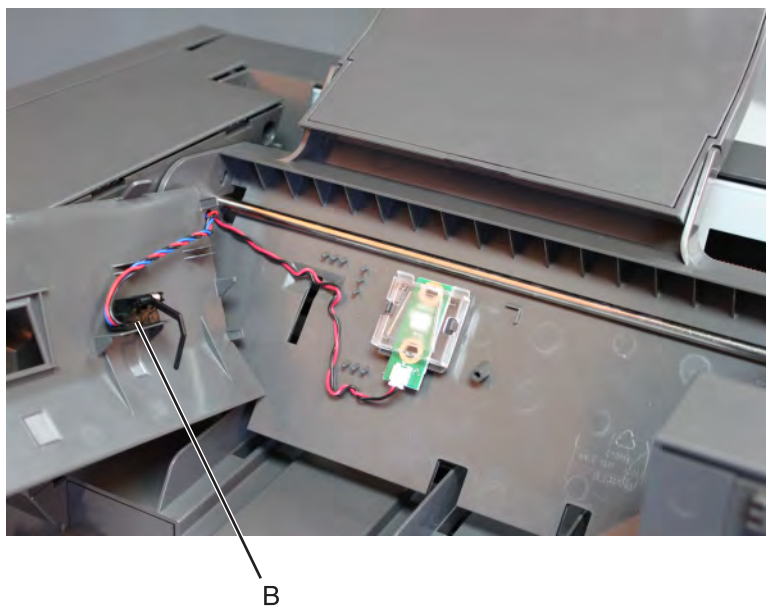

## Sensor (staple finisher bin paper present) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 With a prying tool, open the LED cover.

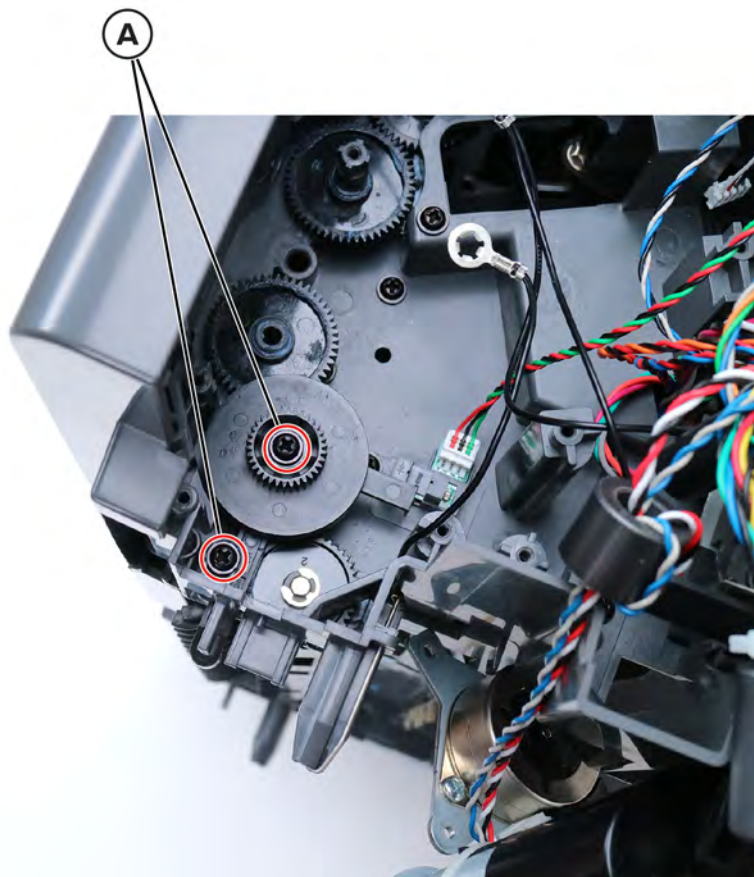

- 3 Release the sensor (B) from the cover.

- 4 Disconnect the sensor cable from the controller board, and then remove the sensor.

## Staple finisher diverter plunger assembly removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 Remove the staple finisher interface cable. See [“Staple finisher interface cable removal” on page 601](#).
- 3 Release the motor bracket. See [“Motor \(staple finisher transport\) removal” on page 605](#).
- 4 Remove the two screws (A).

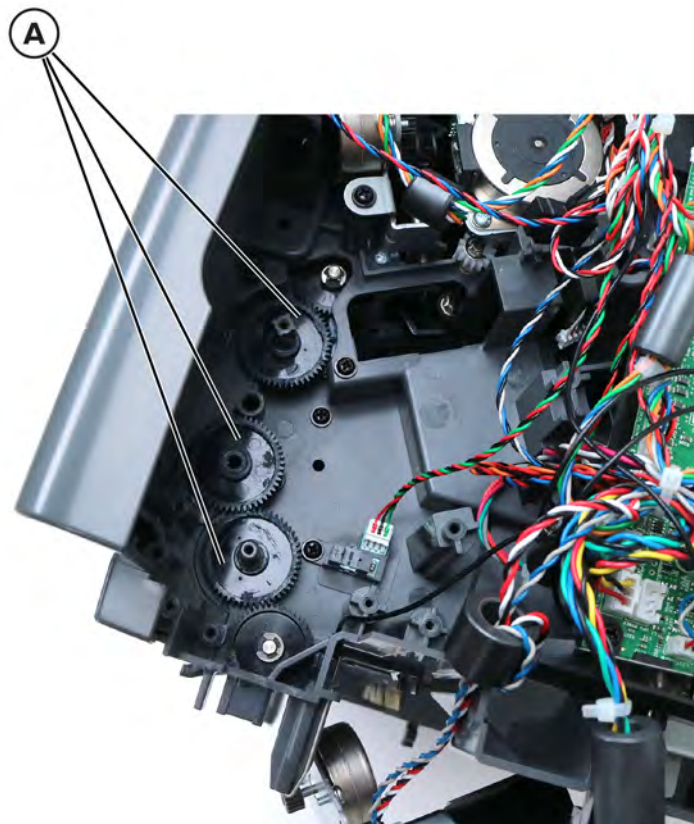

- 5 Remove the plunger.

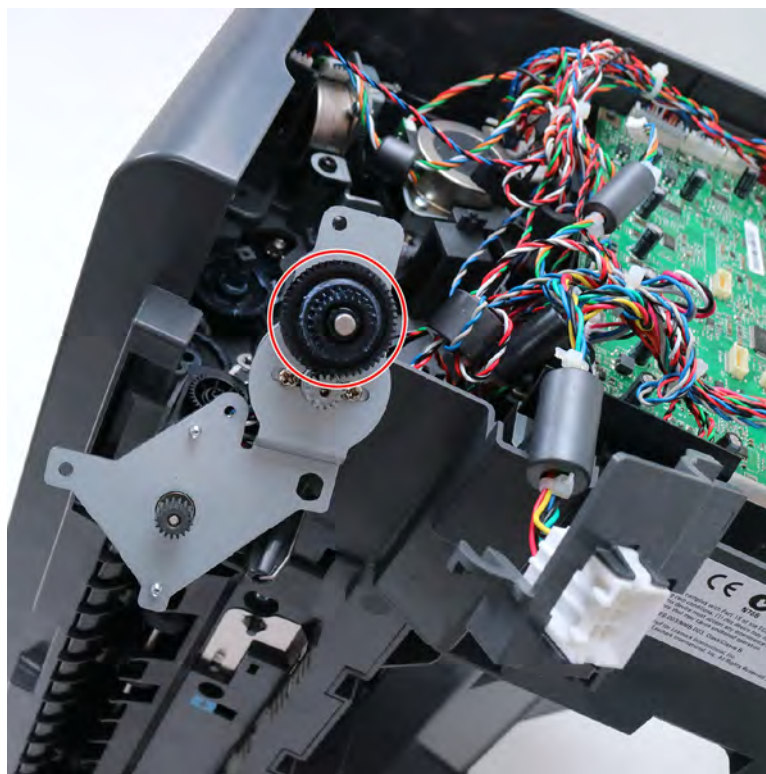

## Staple finisher drive gear assembly removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 Remove the staple finisher interface cable. See [“Staple finisher interface cable removal” on page 601](#).
- 3 Release the motor bracket. See [“Motor \(staple finisher transport\) removal” on page 605](#).
- 4 Remove the staple finisher diverter plunger assembly. See [“Staple finisher diverter plunger assembly removal” on page 610](#).

5 Remove the three gears (A).

6 Remove the gear behind the motor bracket.

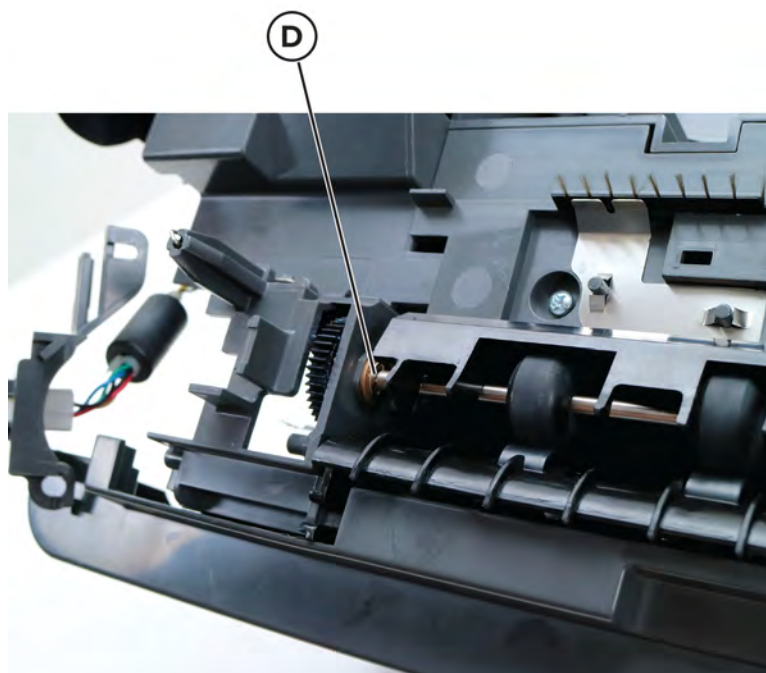

Parts removal

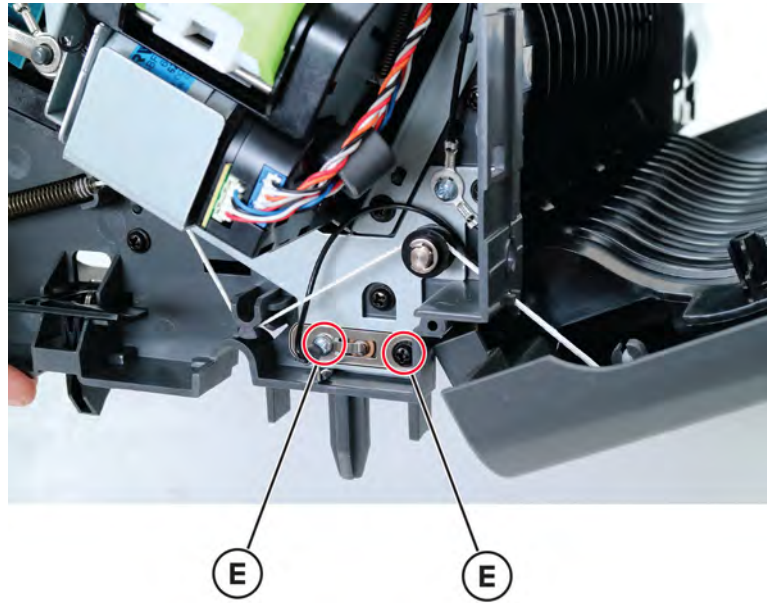

7 Remove the E-clip (C).

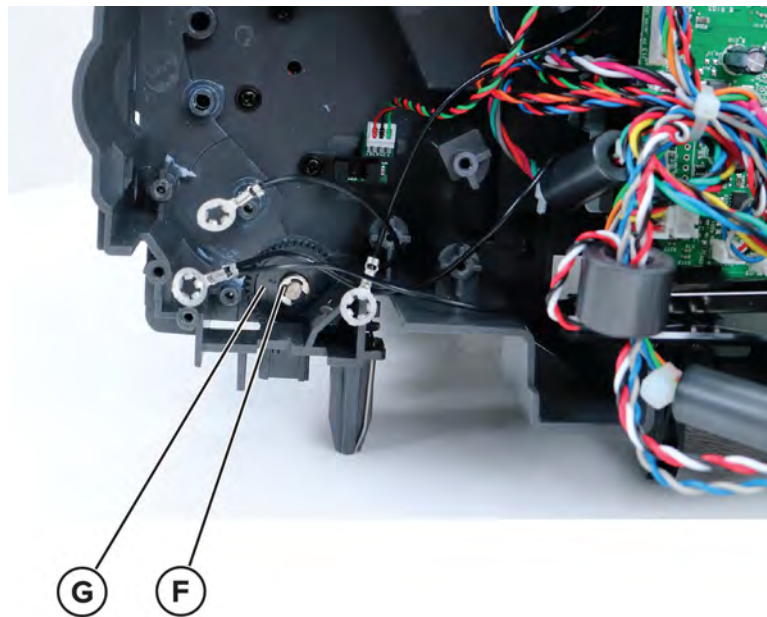

8 Remove the E-clip (D).

**9** Remove the two screws (E), and then remove the plate.

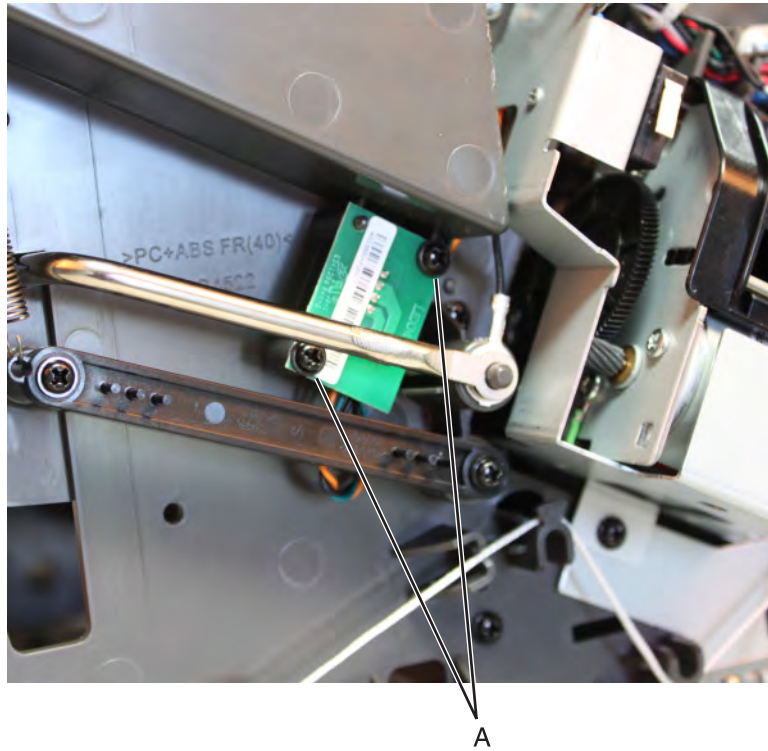

**10** Remove the E-clip (F), and then remove the gear (G).

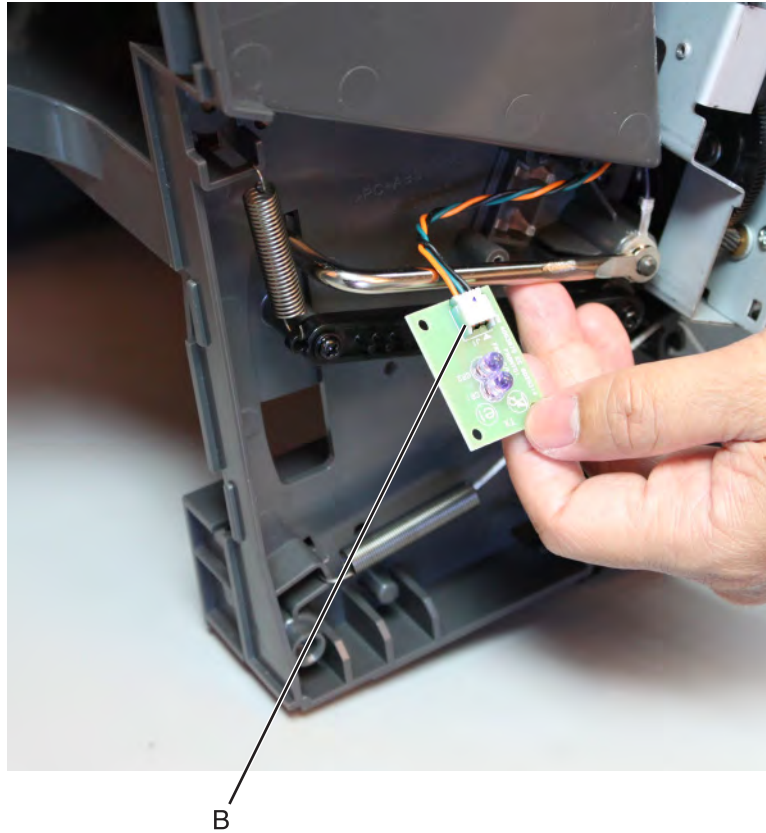

## Sensor (staple finisher bin full send) removal

- 1 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 2 Remove the two screws (A), and then release the sensor.

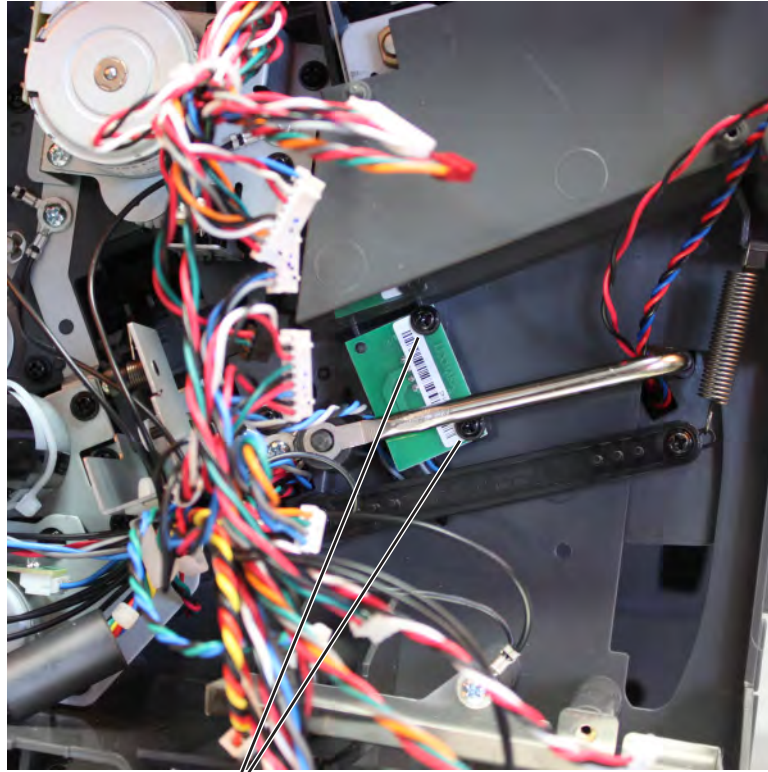

- 3 Disconnect the cable (B), and then remove the sensor.

### Sensor (staple finisher bin full receive) removal

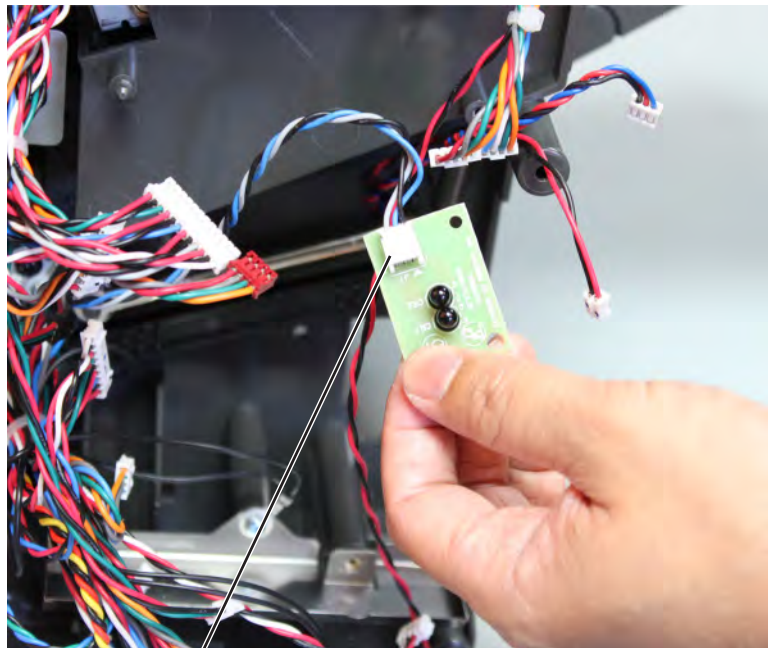

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher controller board. See [“Staple finisher controller board removal” on page 596.](#)

**3** Remove the two screws (A), and then release the sensor.

A

**4** Disconnect the cable (B), and then remove the sensor.

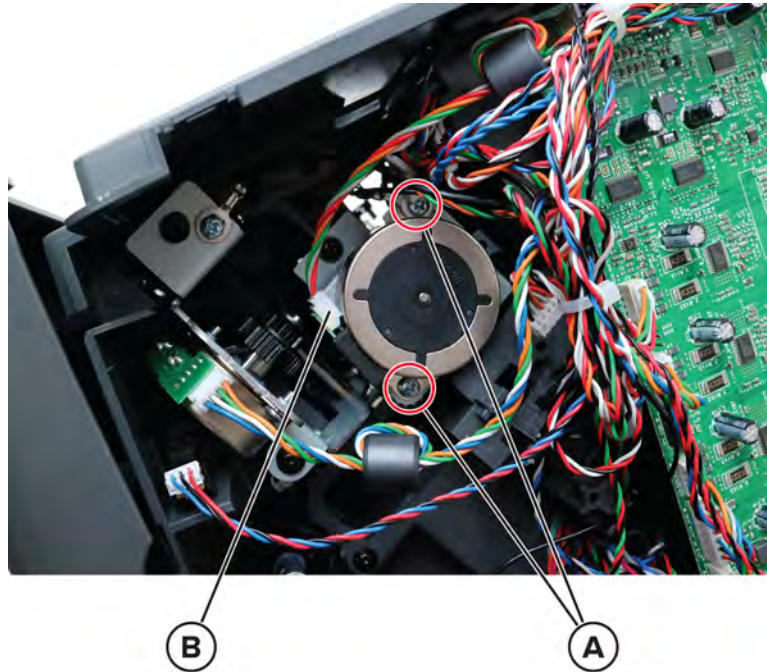

B

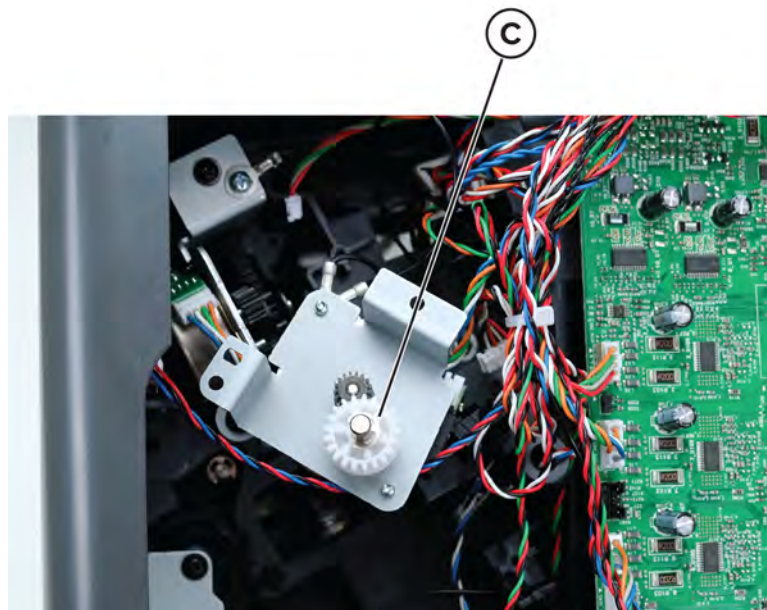

## Staple finisher paddle gear removal

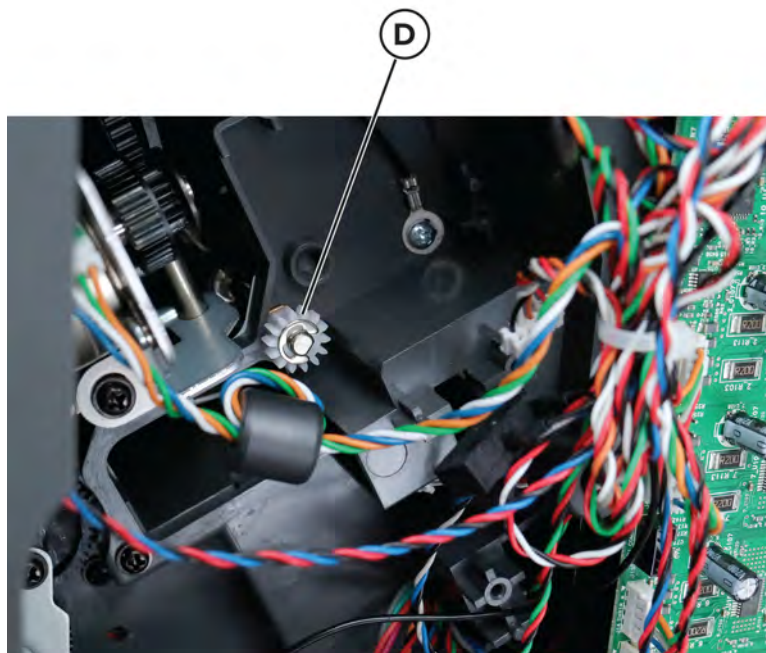

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher interface cable. See [“Staple finisher interface cable removal” on page 601.](#)
- 3 Remove the two screws (A), disconnect the cable (B), and then release the motor bracket.

- 4 Behind the motor bracket, remove the gear (C).

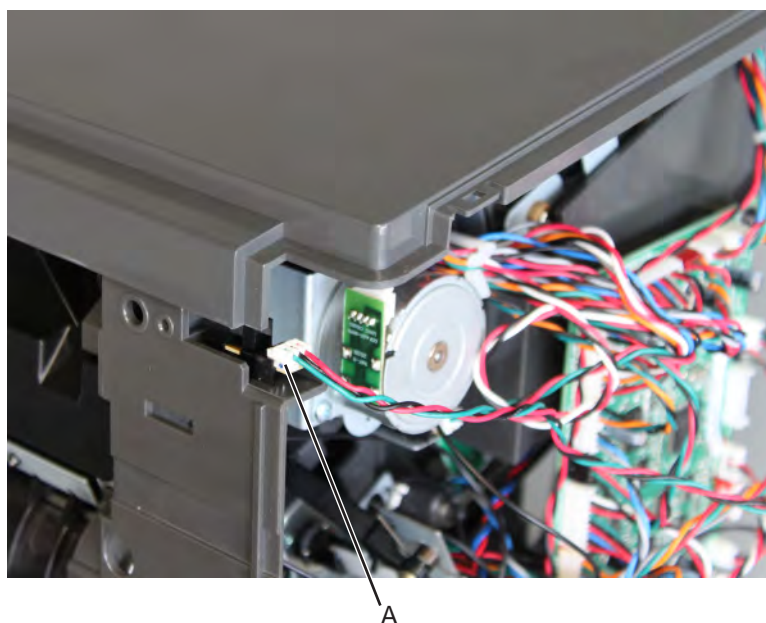

- 5 Remove the gear (D).

### Sensor (staple finisher rear door interlock) removal

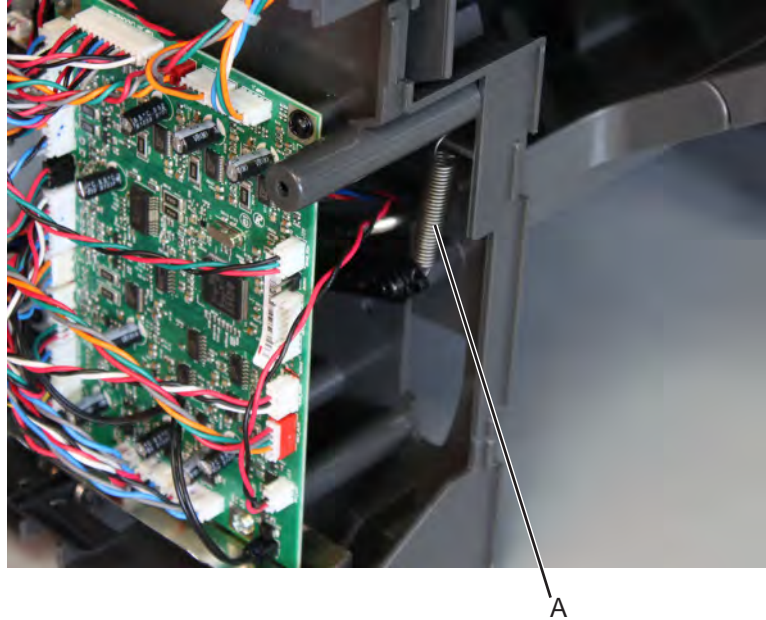

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Disconnect the sensor cable (A).

- 3 Release the sensor latches, and then remove the sensor.

## Staple finisher bin spring removal

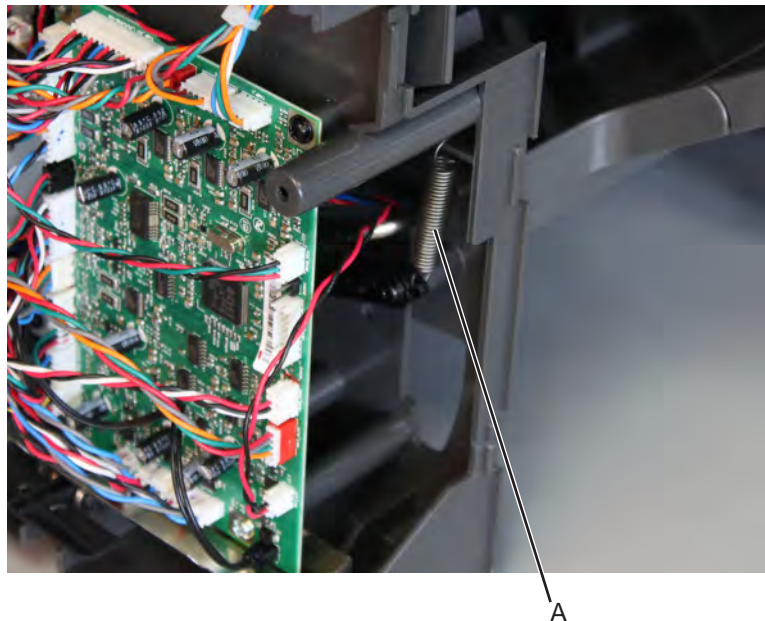

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Unhook the spring (A), and then remove it.

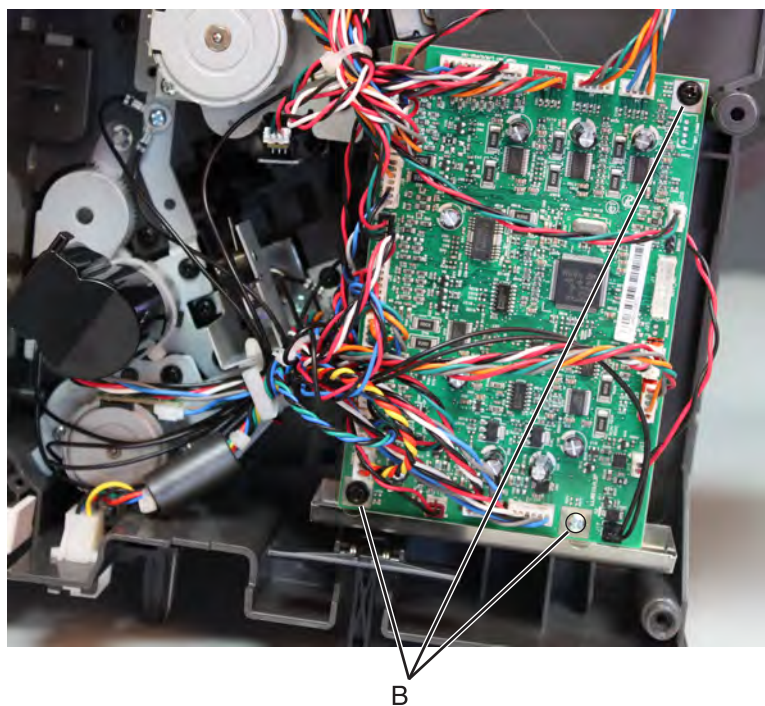

## Staple finisher bin link assembly removal

### Left link removal

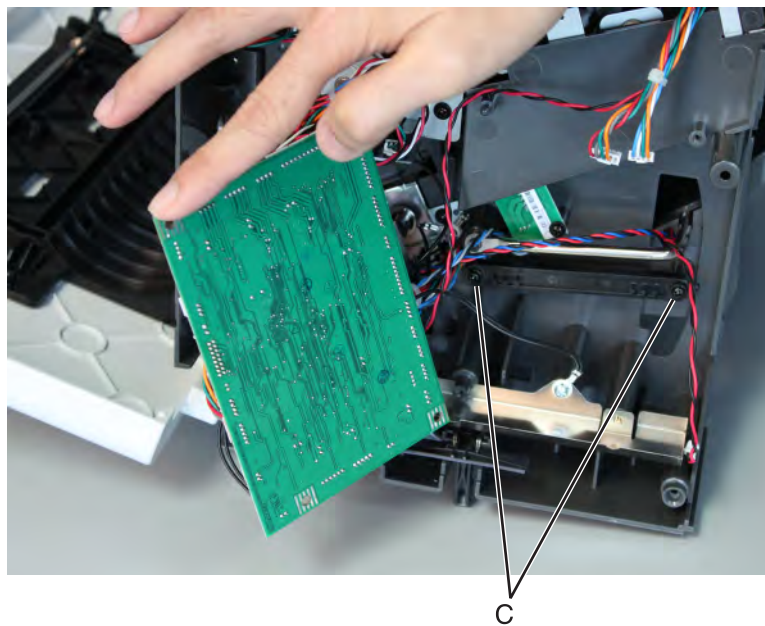

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590](#).
- 2 Unhook the spring (A), and then release the link.

- 3 Remove the three screws (B), and then release the controller board. Move the board to access the link behind it.

- 4 Remove the two screws (C), and then remove the link.

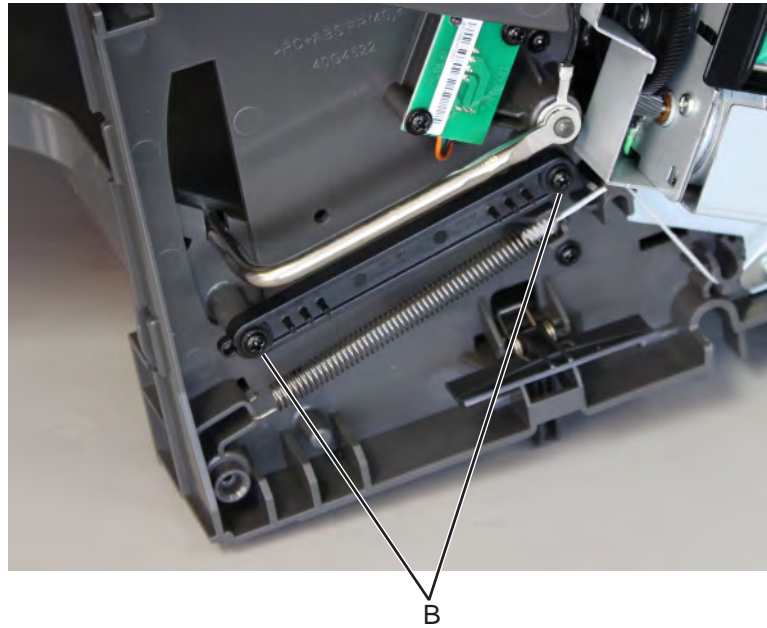

### Right link removal

- 1 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 2 Unhook the spring (A), and then release the link.

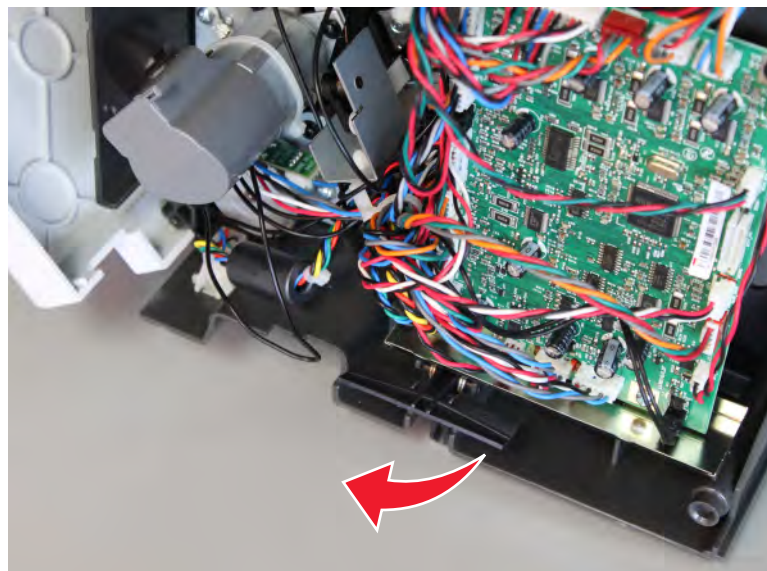

- 3 Remove the two screws (B), and then remove the link.

## Staple finisher latch removal

- 1 Remove the staple finisher left cover or right cover. See [“Staple finisher left cover removal” on page 590](#) or [“Staple finisher right cover removal” on page 592](#).
- 2 Pull the latch off the bin.

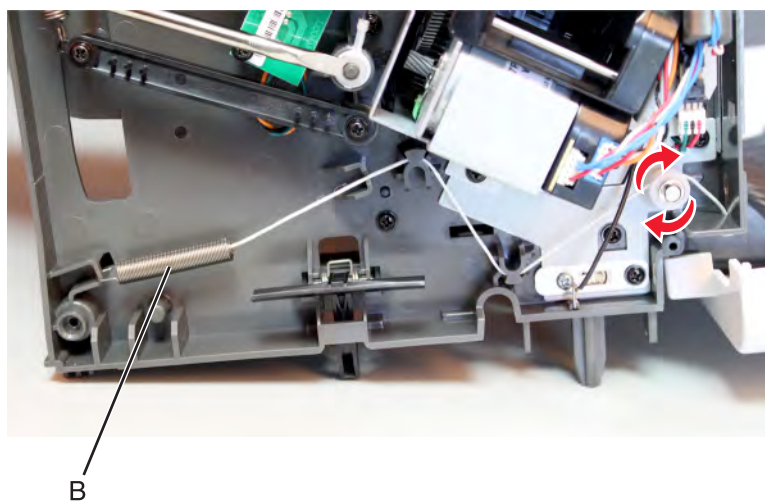

## Staple finisher spring with string removal

- 1 Open the rear door, and detach the string (A).

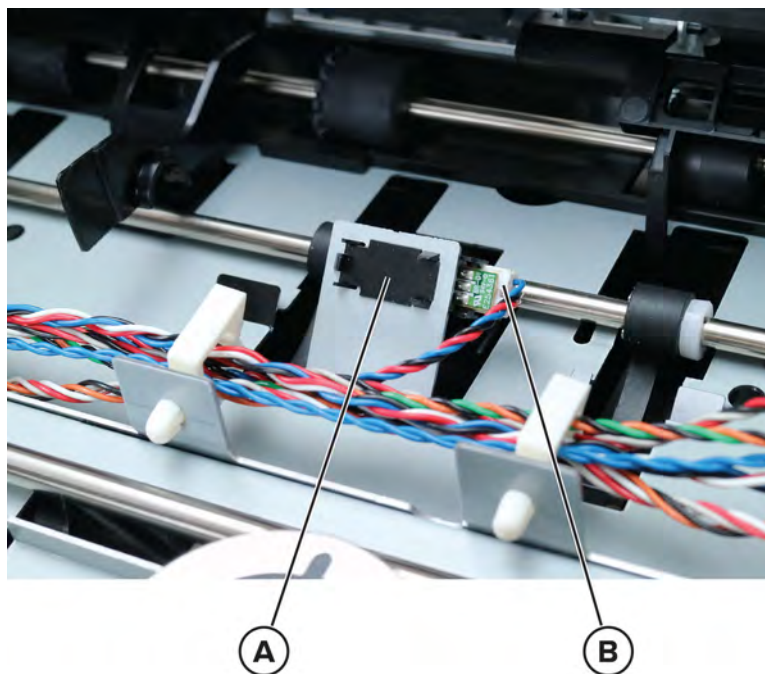

- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the spring (B) with string.

**Installation note:** Pay attention to the original position of the string. The string on the pulley is wound clockwise.

## Sensor (staple finisher paddle) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 4 Remove the sensor retainer (A), and then disconnect the cable (B).

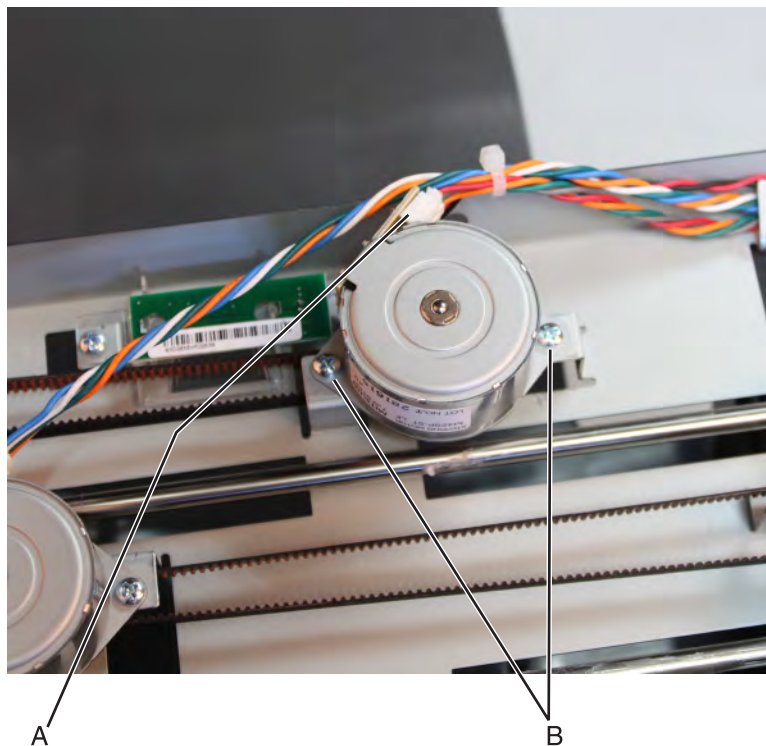

- 5 Remove the sensor.

## Motor (staple finisher right tamper) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 4 Disconnect the cable (A), and then remove the two screws (B).

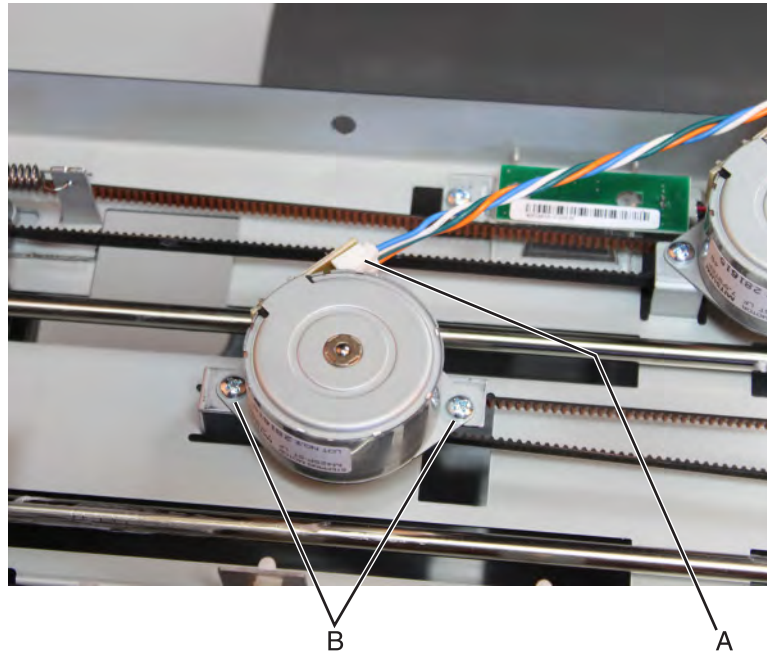

- 5 Remove the motor.

## Motor (staple finisher left tamper) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)

- 4 Disconnect the cable (A), and then remove the two screws (B).

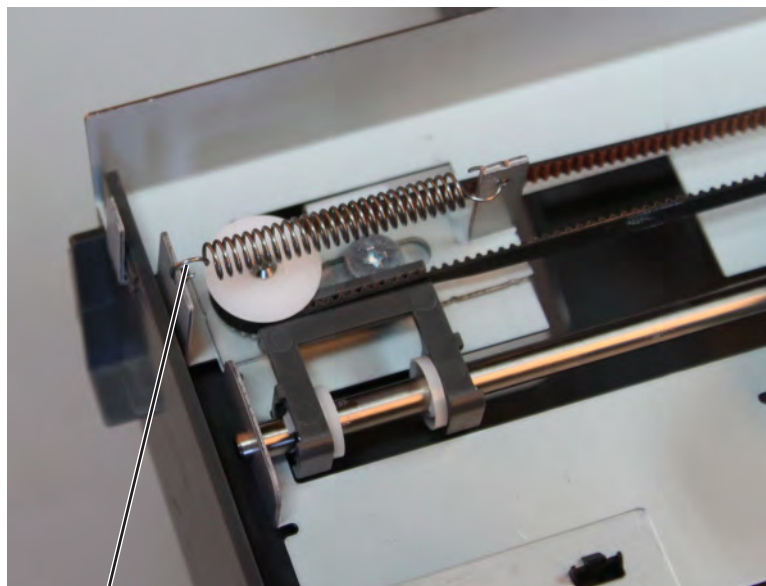

- 5 Remove the motor.

## Tamper drive belt removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 4 Release the motor engaged to the belt. See [“Motor \(staple finisher right tamper\) removal” on page 625](#) or [“Motor \(staple finisher left tamper\) removal” on page 625.](#)

- 5 Unhook the tamper spring (A), and then release the belt from the tamper gear.

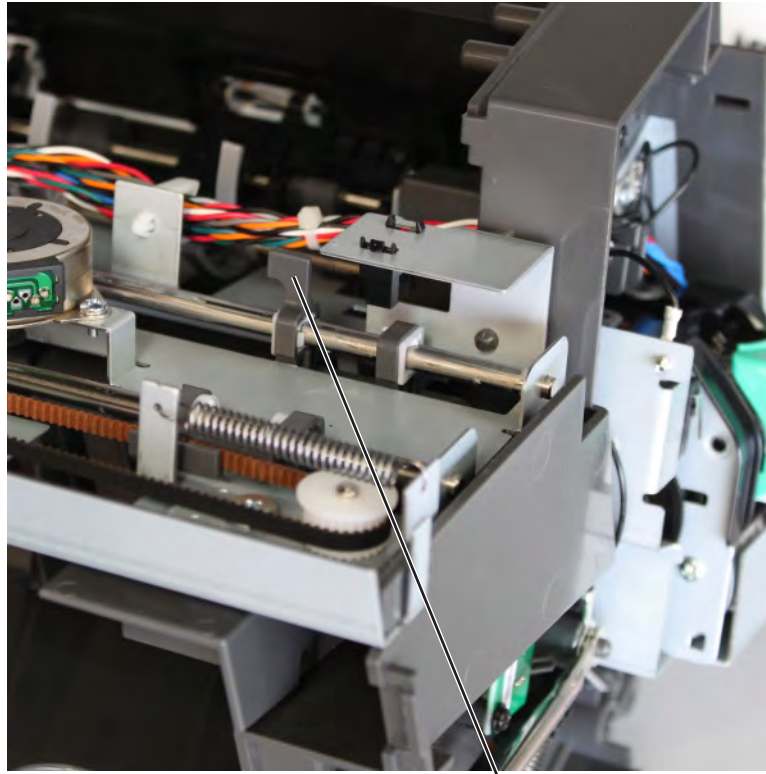

- 6 Remove the belt.

### Sensor (staple finisher right tamper) removal

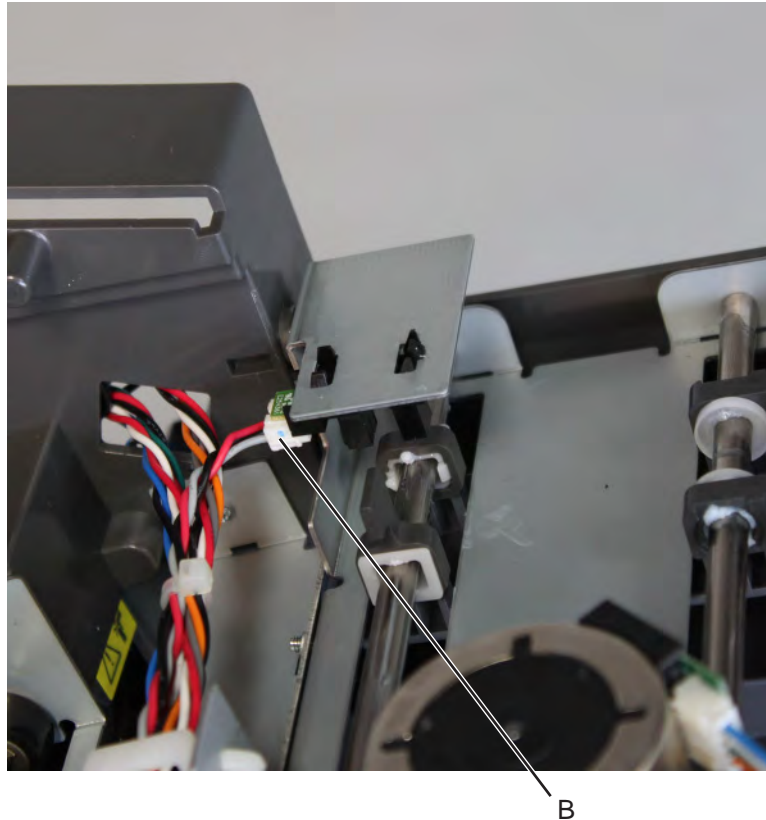

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)

- 4 Slightly move the right tamper to clear the sensor flag (A) from the sensor.

A

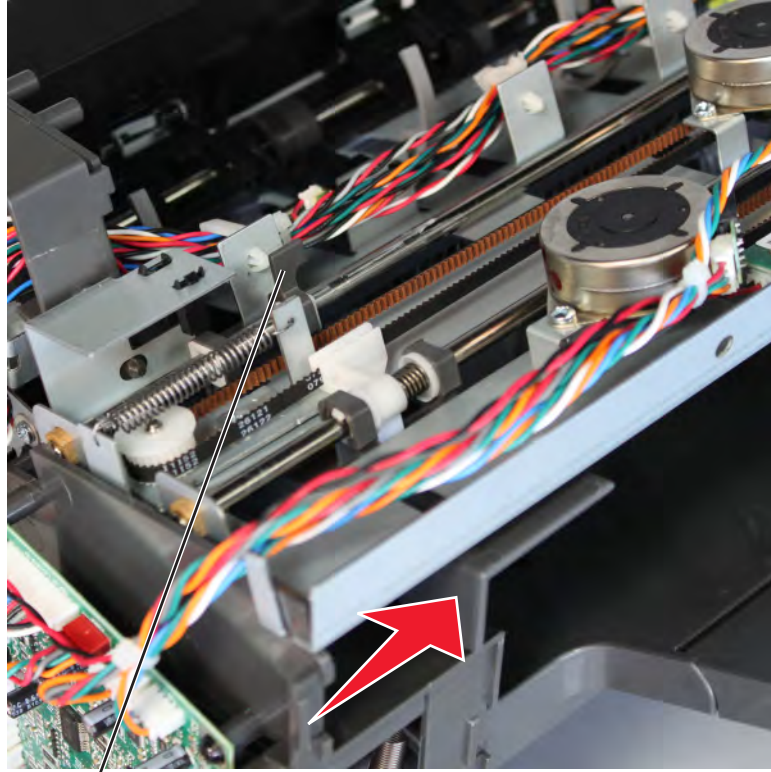

- 5 Disconnect the sensor cable (B), and then remove the sensor.

### Sensor (staple finisher left tamper) removal

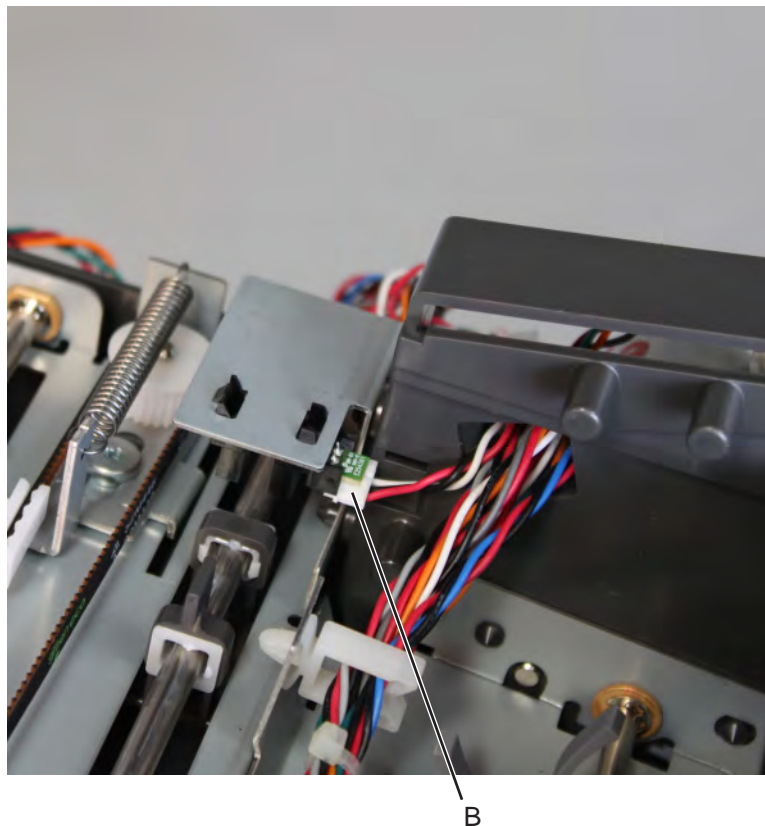

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)

4 Move the left tamper to clear the sensor flag (A) from the sensor.

A

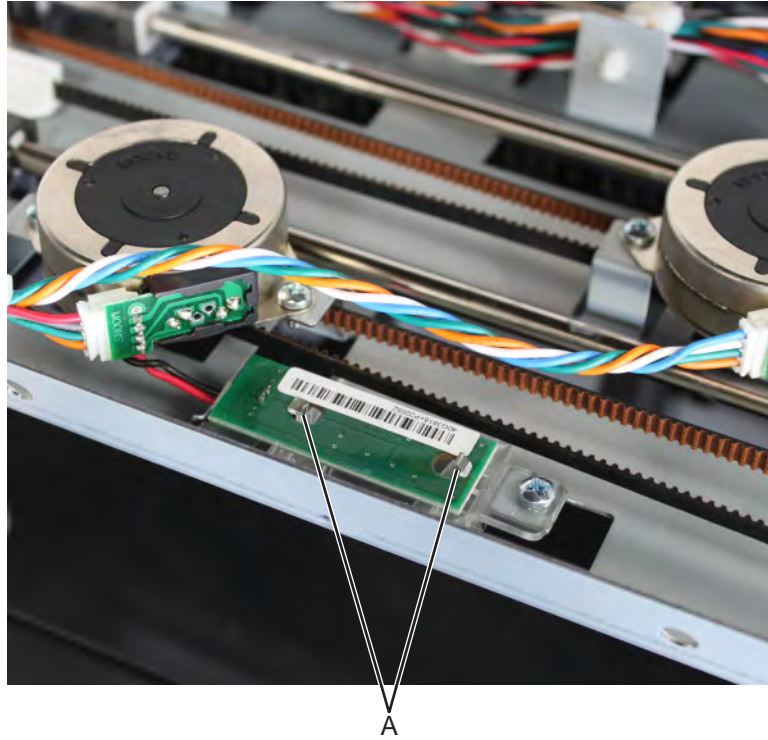

- 5 Disconnect the sensor cable (B), and then remove the sensor.

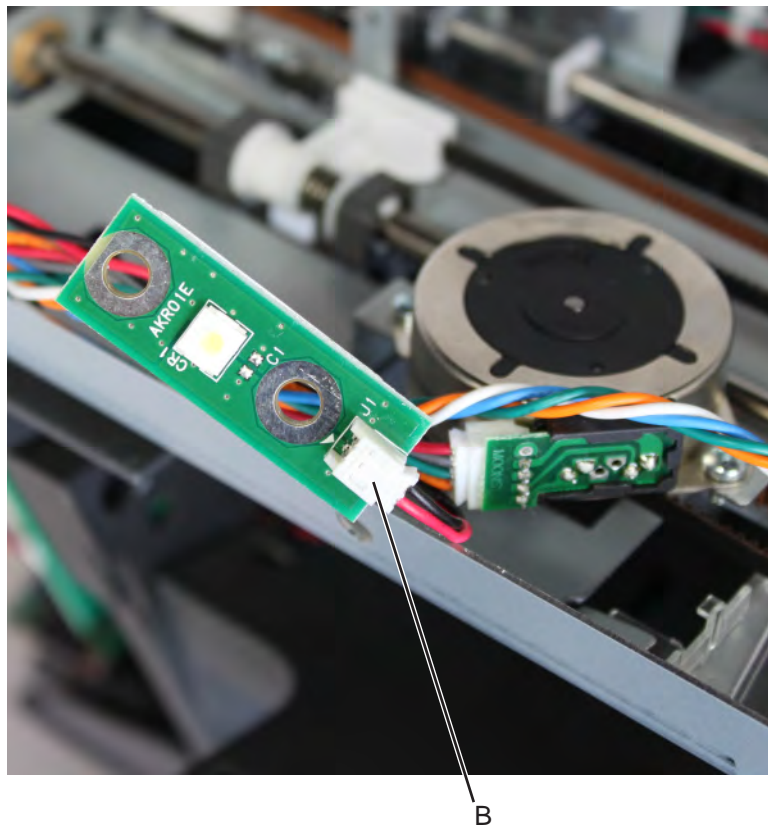

### Staple finisher bin LED removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)

4 Release the latches (A), and then release the LED.

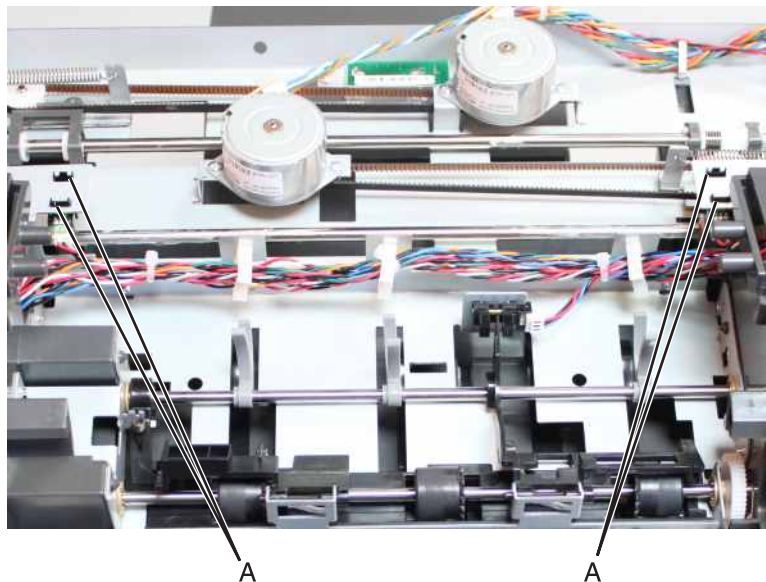

5 Disconnect the cable (B), and then remove the LED.

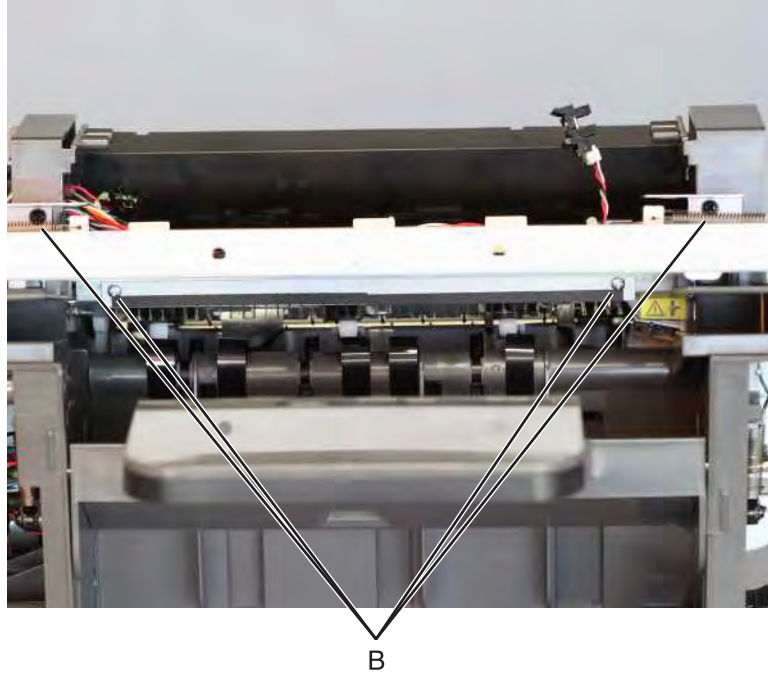

## Tamper aligner removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 4 Disconnect the tamper cables J2, J4, and J6 from the finisher controller board.
- 5 Release the latches (A), and then release the sensors.

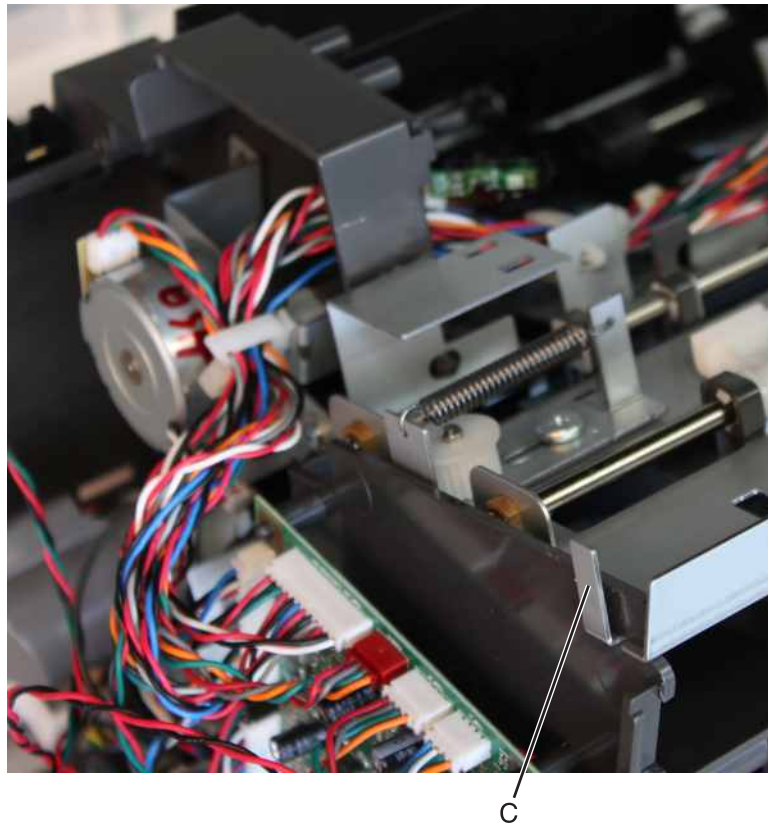

- 6 Remove the staple finisher bin LED. See [“Staple finisher bin LED removal” on page 631.](#)
- 7 Remove the left and right tamper motors. See [“Motor \(staple finisher left tamper\) removal” on page 625](#) and [“Motor \(staple finisher right tamper\) removal” on page 625.](#)
- 8 Remove the tamper drive belts. See [“Tamper drive belt removal” on page 626.](#)

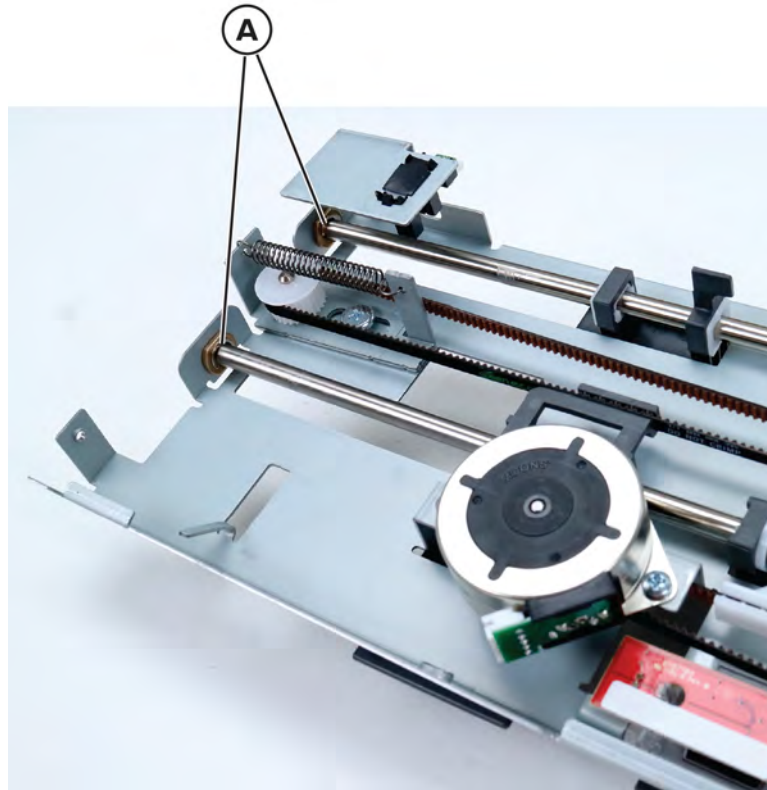

9 Remove the four screws (B), and then remove the tamper assembly.

**Installation note:** Make sure that the tab (C) is correctly inserted into its designated slot.

- 10** Release the tamper belts, remove the two E-clips (A), and then release the shafts.

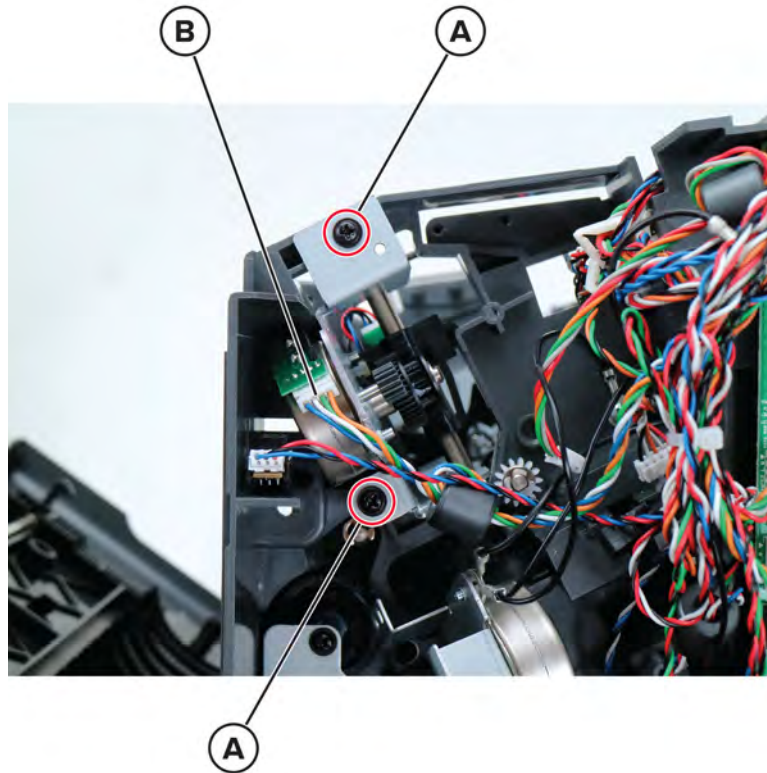

- 11** Slide the tamper aligner off its shaft.

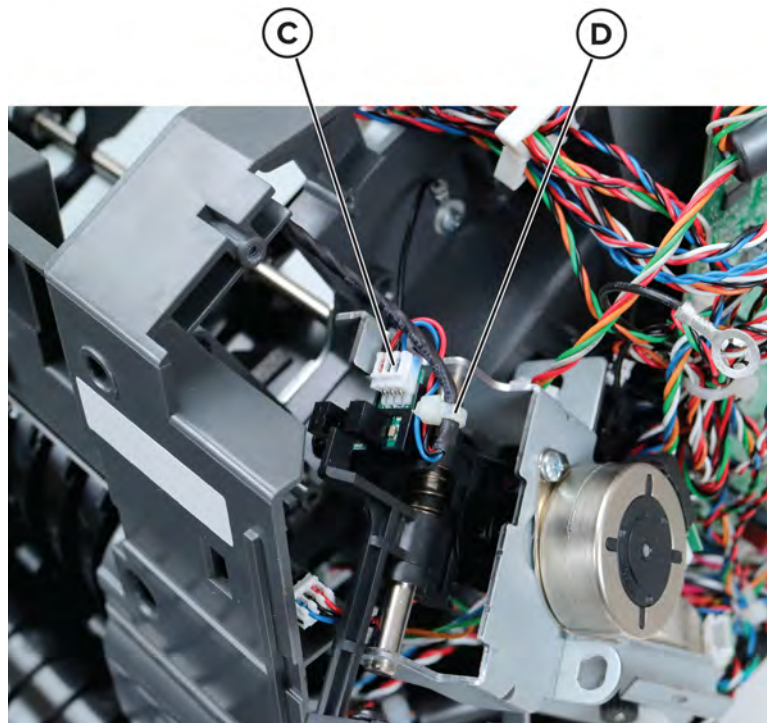

## **Staple finisher stack height assembly removal**

- 1** Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2** Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3** Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 4** Release the motor bracket. See [“Staple finisher paddle gear removal” on page 617.](#)

- 5** Remove the two screws (A), disconnect the cable (B), and then release the assembly bracket.

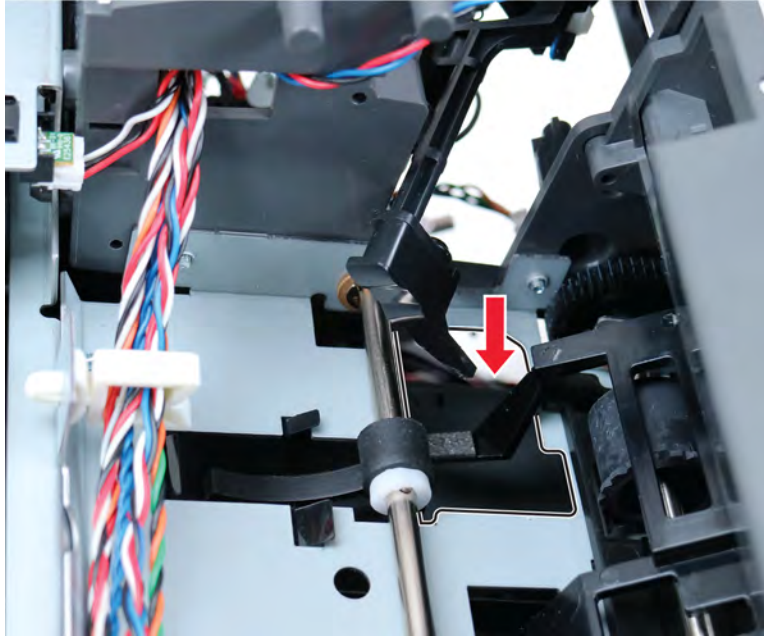

- 6** Disconnect the cable (C), and then cut the cable tie (D).

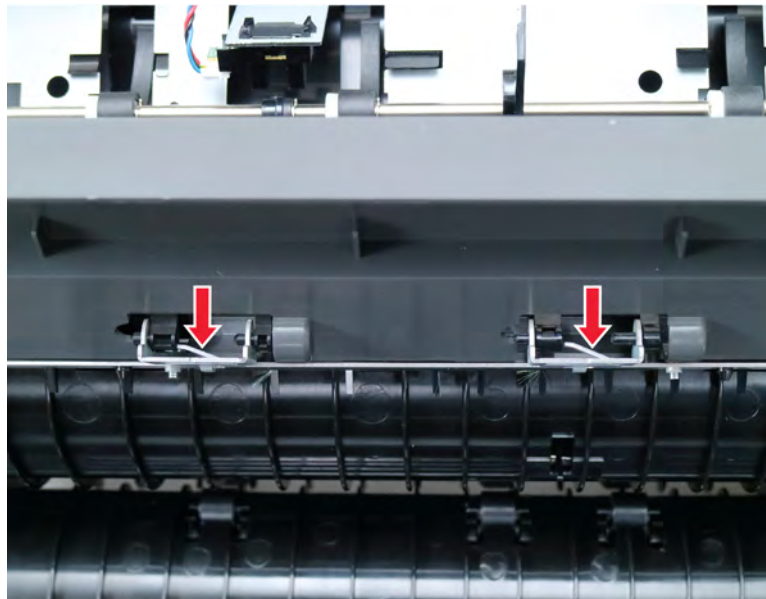

- 7** Remove the stack height assembly.

**Installation note:** Make sure that the stack height actuator is inserted properly.

## Staple finisher paper stack flap removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 4 Press the two locks to release the flap hinges.

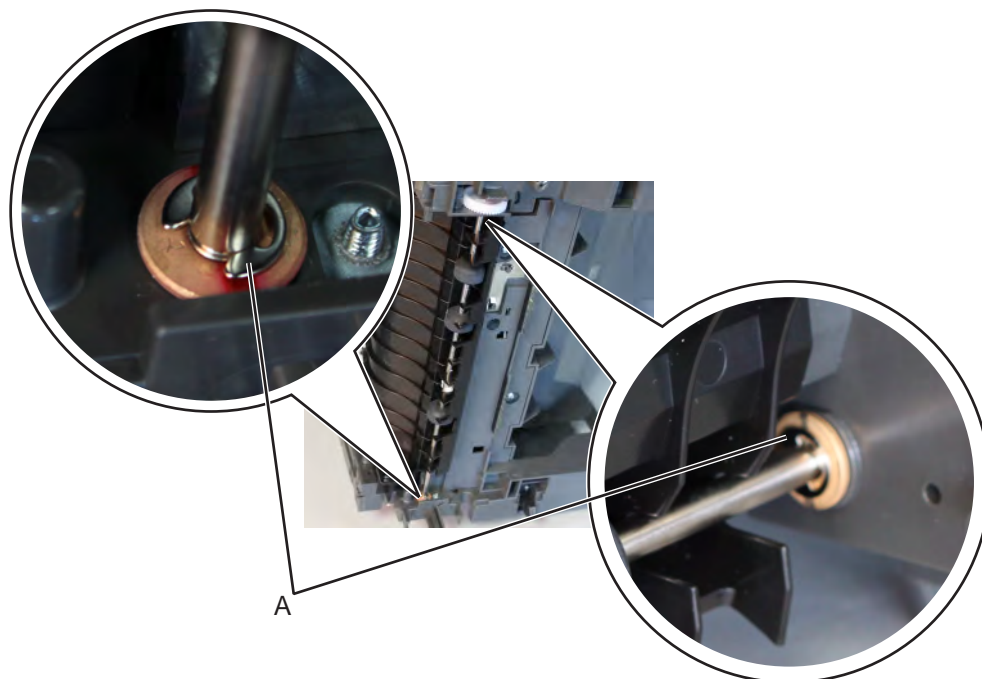

- 5 Remove the flap.

## Staple finisher entrance roller removal

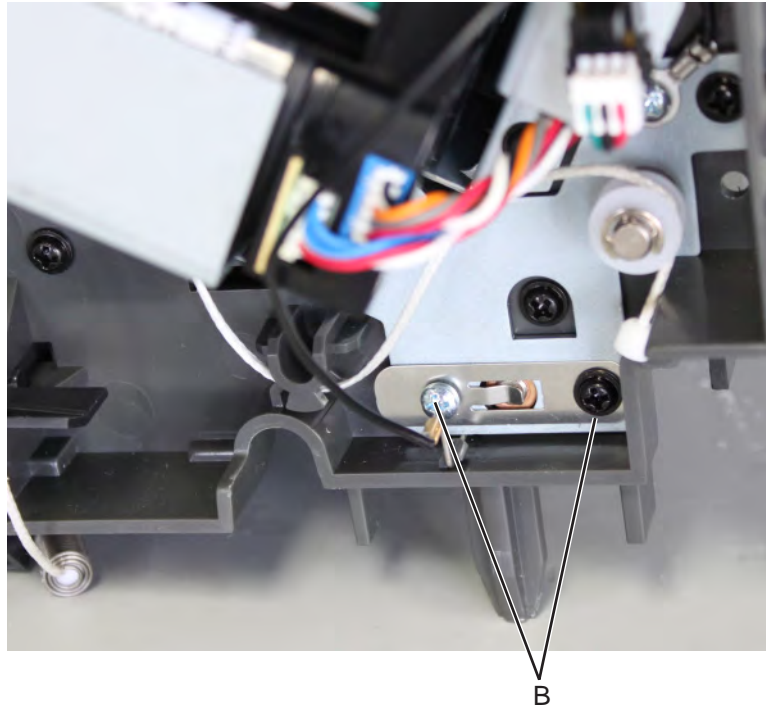

**Note:** This part is not a FRU.

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher diverter plunger assembly. See [“Staple finisher diverter plunger assembly removal” on page 610.](#)
- 4 Remove the staple finisher drive gear assembly. See [“Staple finisher drive gear assembly removal” on page 610.](#)
- 5 Remove the two E-clips (A).

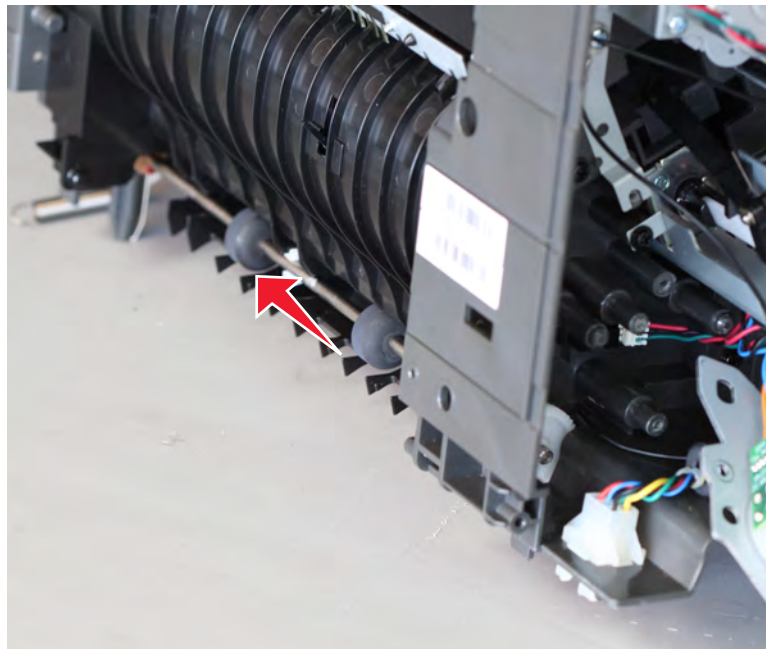

**Warning—Potential Damage:** Be careful not to lose the E-clips and spacers.

- 6 Remove the two screws (B), and then remove the grounding plate.

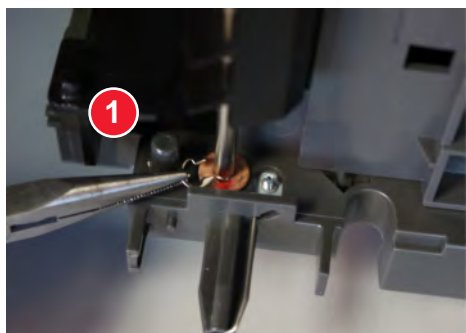

- 7 Slightly move the shaft to release, and then remove it.

**Warning—Potential Damage:** Be careful not to lose the bushing and spacers that hold the shaft.

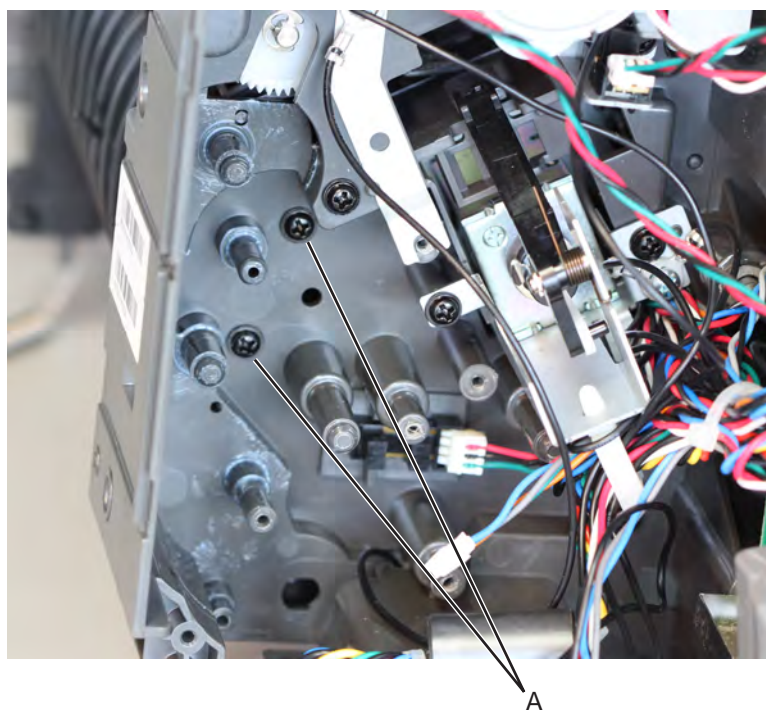

**Installation note:** To make it less difficult to reinstall the E-clip, use a pair of long-nose pliers to position it onto the shaft, and then lock it in place.

## Staple finisher chute assembly removal

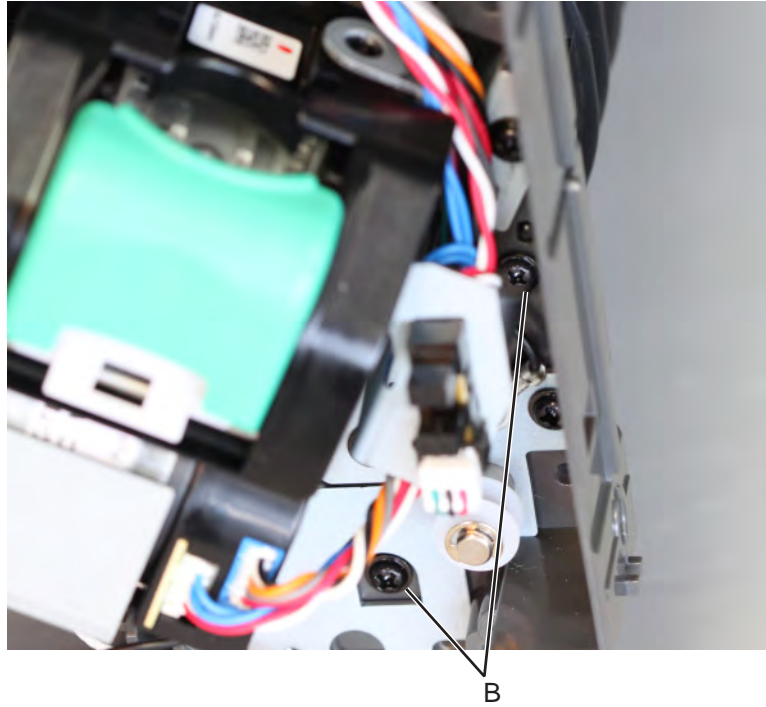

**Note:** This part is not a FRU.

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher diverter plunger assembly. See [“Staple finisher diverter plunger assembly removal” on page 610.](#)
- 4 Remove the staple finisher drive gear assembly. See [“Staple finisher drive gear assembly removal” on page 610.](#)
- 5 Remove the staple finisher entrance roller. See [“Staple finisher entrance roller removal” on page 638.](#)
- 6 From the left side, remove the two screws (A).

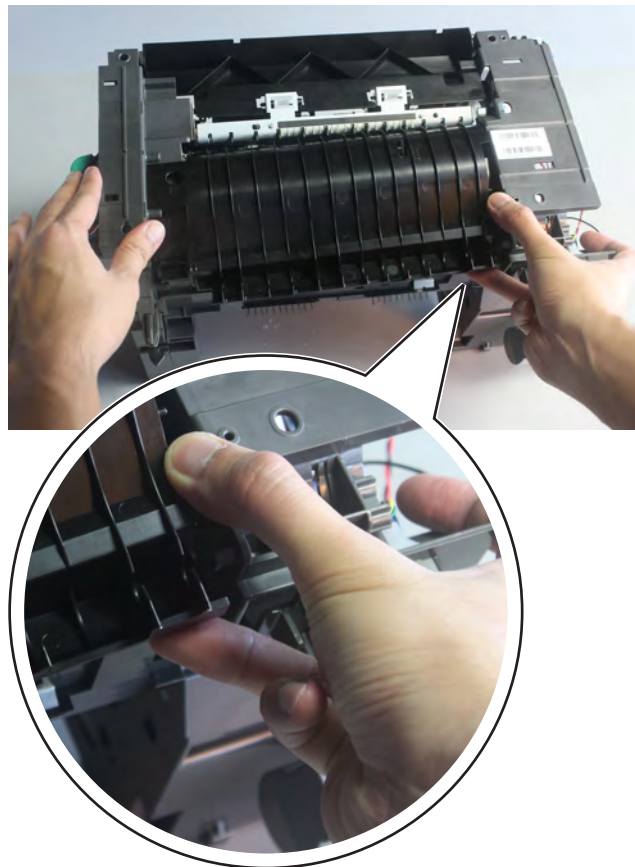

**7** From the right side, remove the two screws (B).

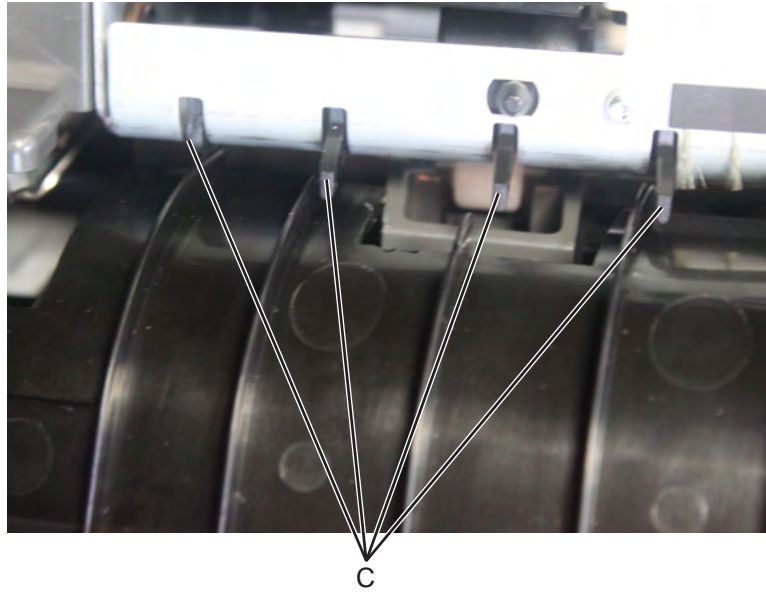

**8** Slightly push away the right frame to release the left part of the chute, while lifting the chute to dislodge it from its frame.

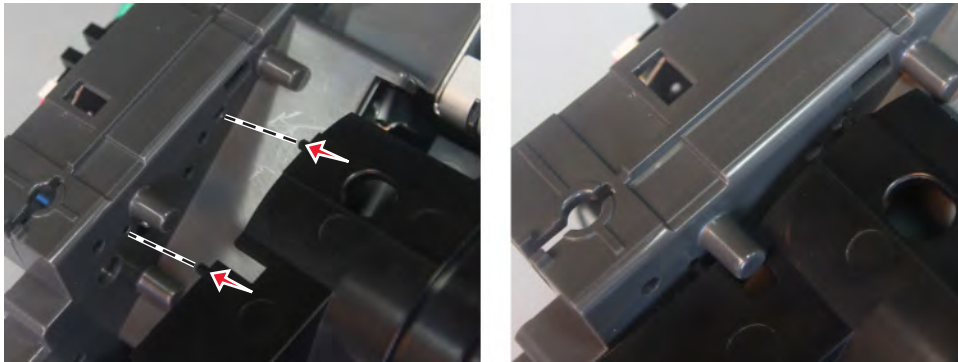

Parts removal

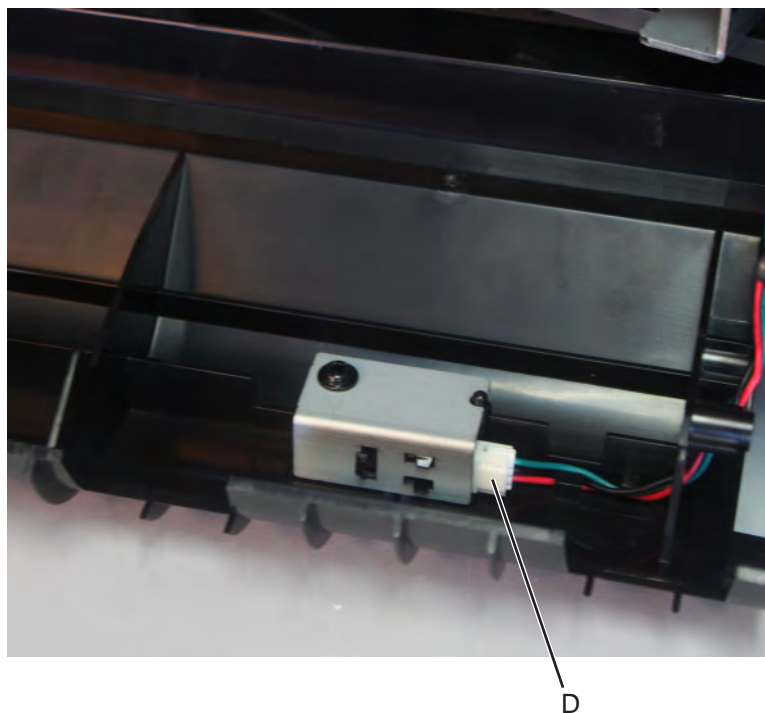

- 9 Obstacles (C) may cause difficulty in removing the chute. Ease the chute out of obstacles (C), and release it from the bin.

**Installation note:** Insert the tabs to their corresponding slots.

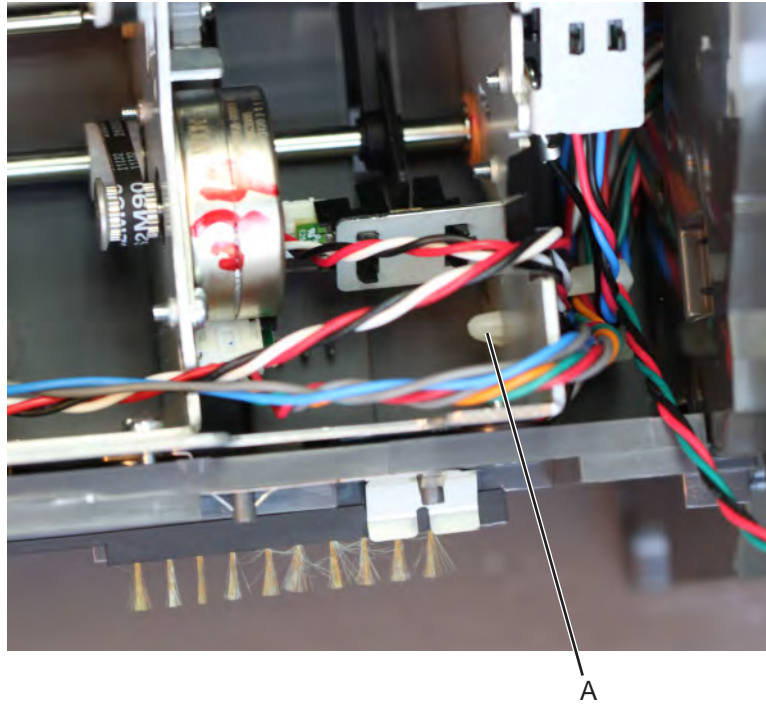

- 10 Disconnect the cable (D), and remove the chute assembly.

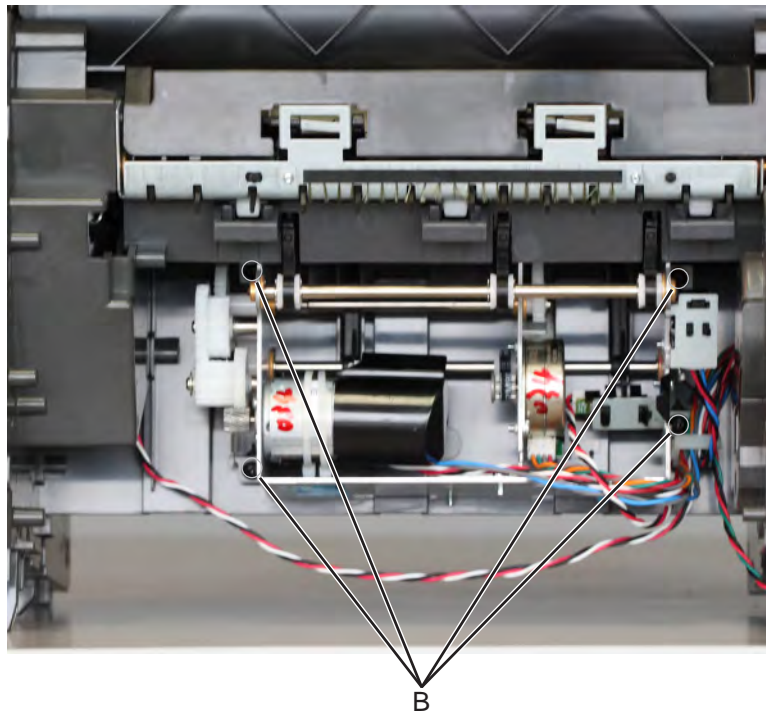

### Staple finisher ejector assembly removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher diverter plunger assembly. See [“Staple finisher diverter plunger assembly removal” on page 610.](#)
- 4 Remove the staple finisher drive gear assembly. See [“Staple finisher drive gear assembly removal” on page 610.](#)
- 5 Remove the staple finisher feed roll. See [“Staple finisher entrance roller removal” on page 638.](#)
- 6 Remove the staple finisher chute assembly. See [“Staple finisher chute assembly removal” on page 640.](#)

- 7 Release the cable holder (A) from the frame, and then remove it.

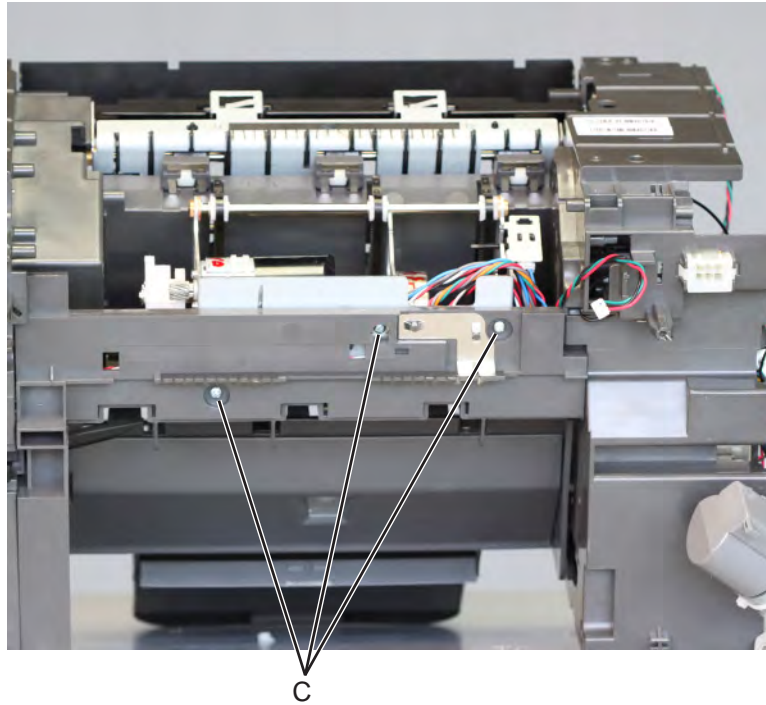

- 8 Remove the four screws (B).

Parts removal

- 9 From the bottom side, remove the three screws (C).

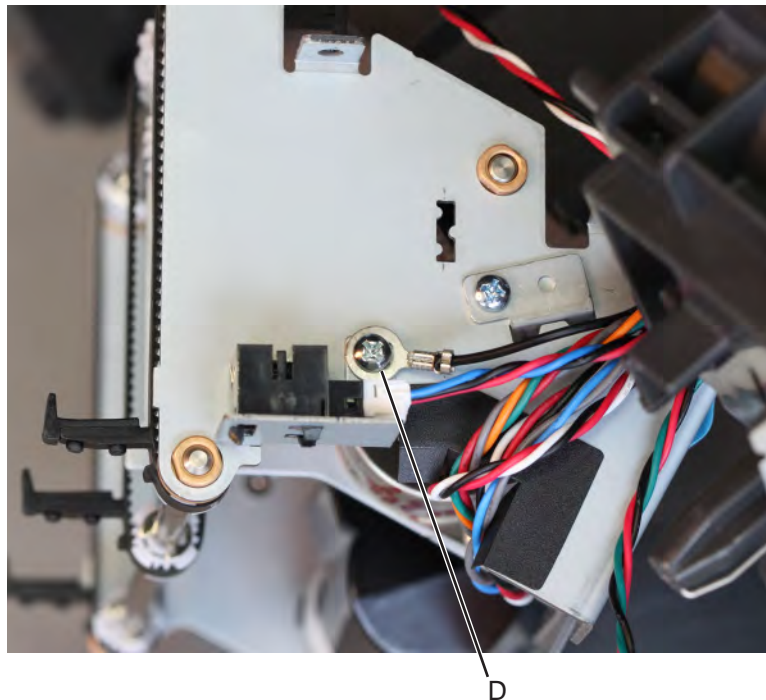

- 10 Release the cables from their guides.

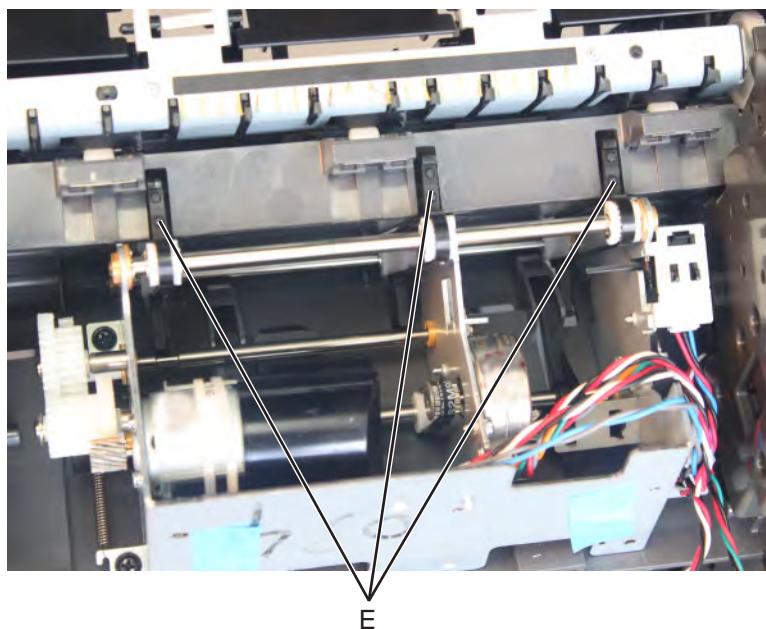

**Note:** Pay attention to the original route of the cables.

- 11 Pull the ejector assembly away from the bin.

- 12 Remove the screw (D), and then release the sensor bracket from the assembly.

**Installation note:** Make sure that the paddles (E) align and fit properly.

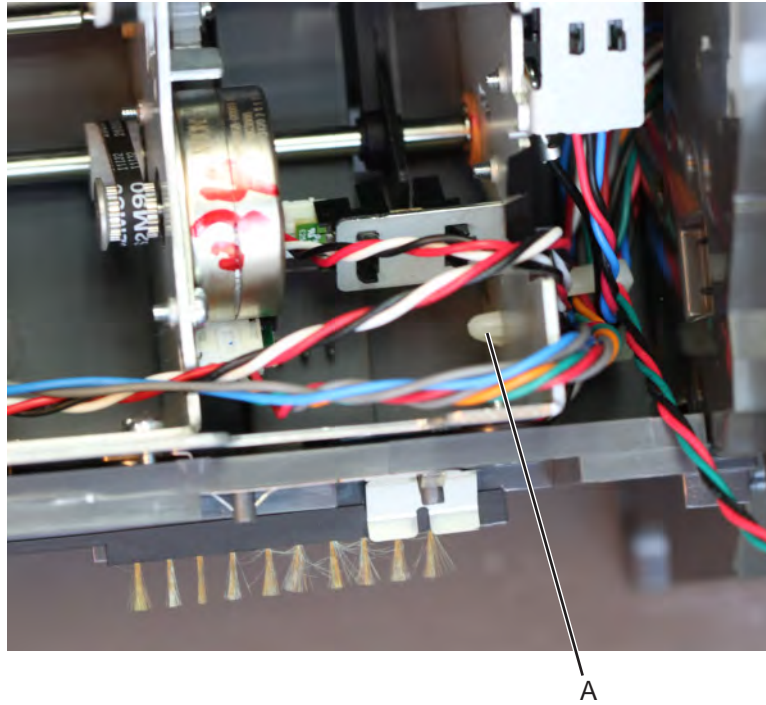

**Installation note:** Make sure that the cables do not get in the way of moving parts.

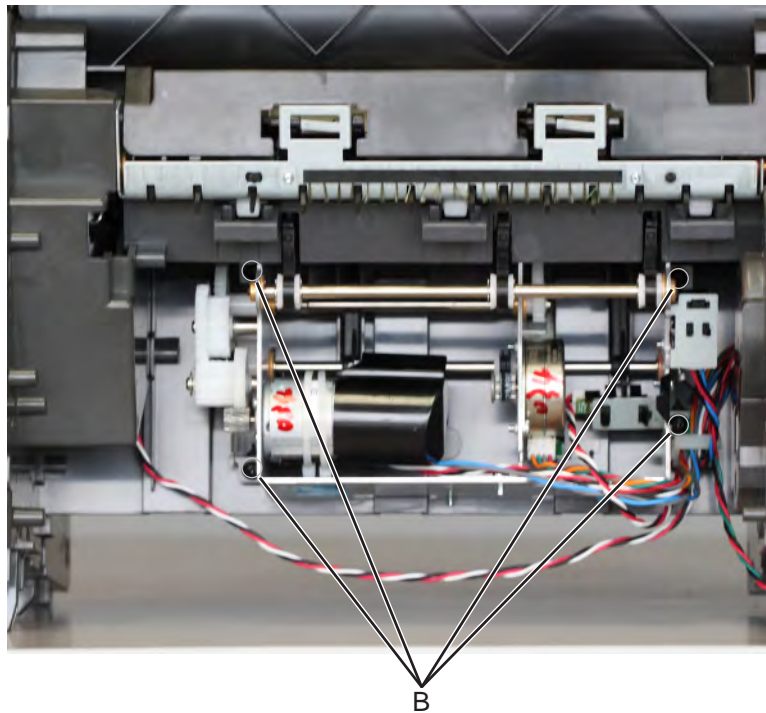

## Sensor (staple finisher ejector) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher diverter plunger assembly. See [“Staple finisher diverter plunger assembly removal” on page 610.](#)
- 4 Remove the staple finisher drive gear assembly. See [“Staple finisher drive gear assembly removal” on page 610.](#)
- 5 Remove the staple finisher entrance roller. See [“Staple finisher entrance roller removal” on page 638.](#)
- 6 Remove the staple finisher chute assembly. See [“Staple finisher chute assembly removal” on page 640.](#)

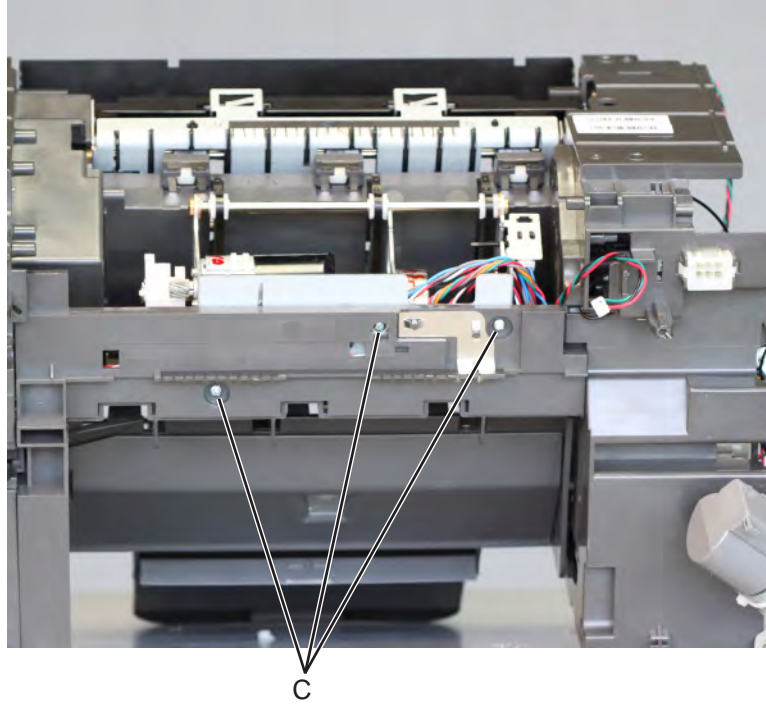

- 7 Release the cable holder (A) from the frame, and then remove it.

- 8 Remove the four screws (B).

- 9 From the bottom side, remove the three screws (C).

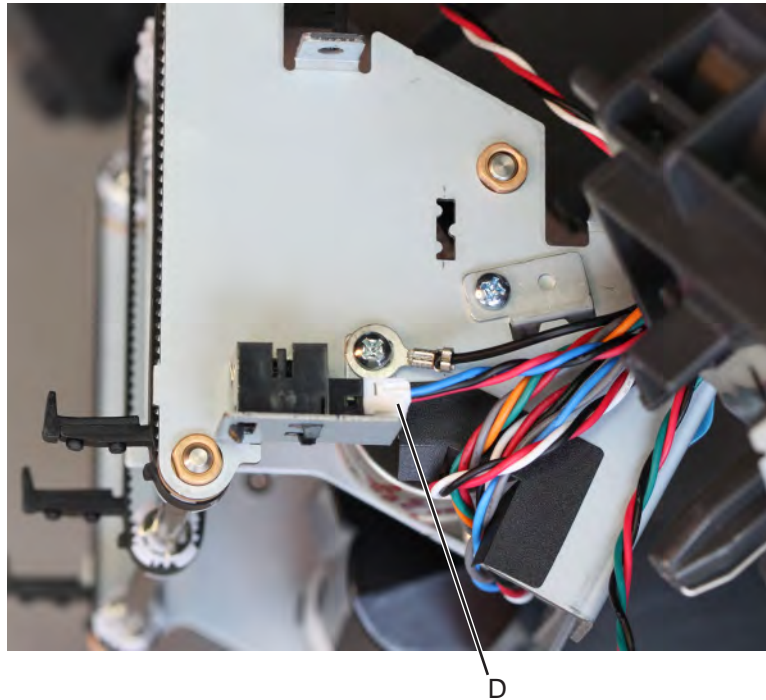

- 10 Release the cables from their guides.

**Note:** Pay attention to the original route of the cables.

- 11 Pull the ejector assembly away from the bin.

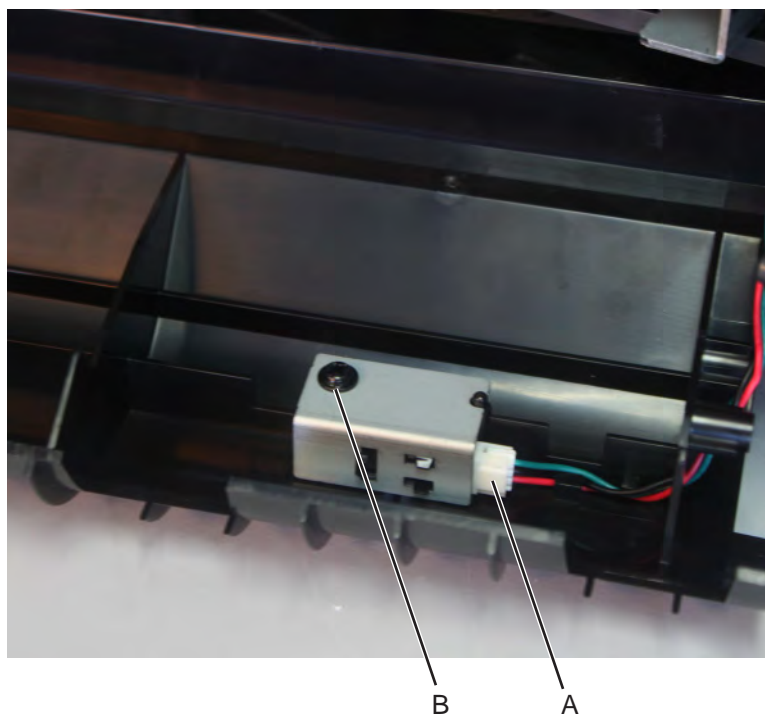

- 12 Disconnect the sensor cable (D), and then remove the sensor.

## Sensor (staple finisher pass-through) removal

- 1 Remove the staple finisher left cover. See [“Staple finisher left cover removal” on page 590.](#)
- 2 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 3 Remove the staple finisher diverter plunger assembly. See [“Staple finisher diverter plunger assembly removal” on page 610.](#)
- 4 Remove the staple finisher drive gear assembly. See [“Staple finisher drive gear assembly removal” on page 610.](#)
- 5 Remove the staple finisher feed roll. See [“Staple finisher entrance roller removal” on page 638.](#)
- 6 Remove the staple finisher chute assembly. See [“Staple finisher chute assembly removal” on page 640.](#)
- 7 Disconnect the cable (A), remove the screw (B), and then remove the sensor bracket.

- 8 Remove the sensor from the bracket.

## Staple cartridge access door removal

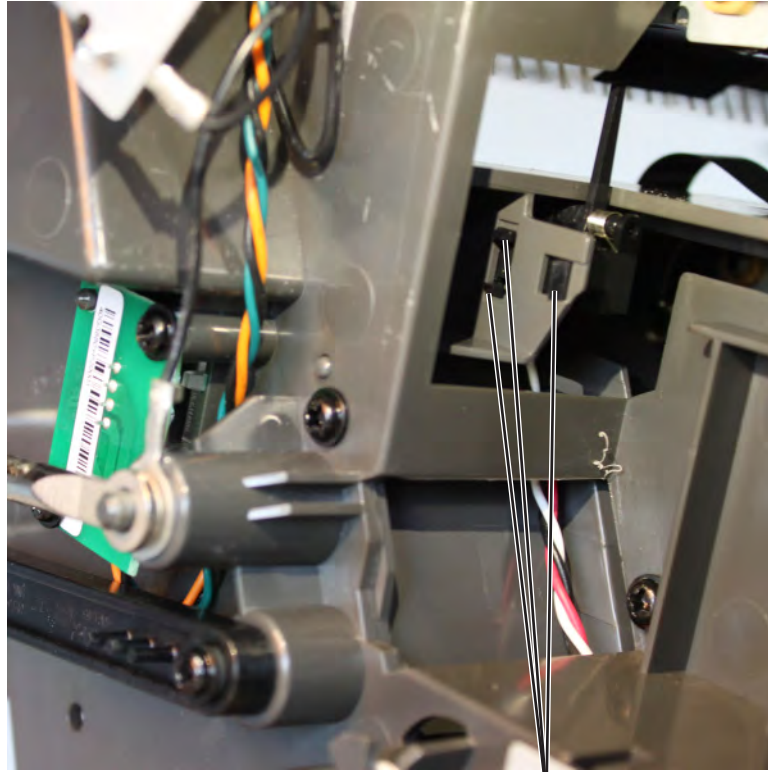

Open the access door (A), and then pull it off the cover.

## Sensor (staple throat paper present) removal

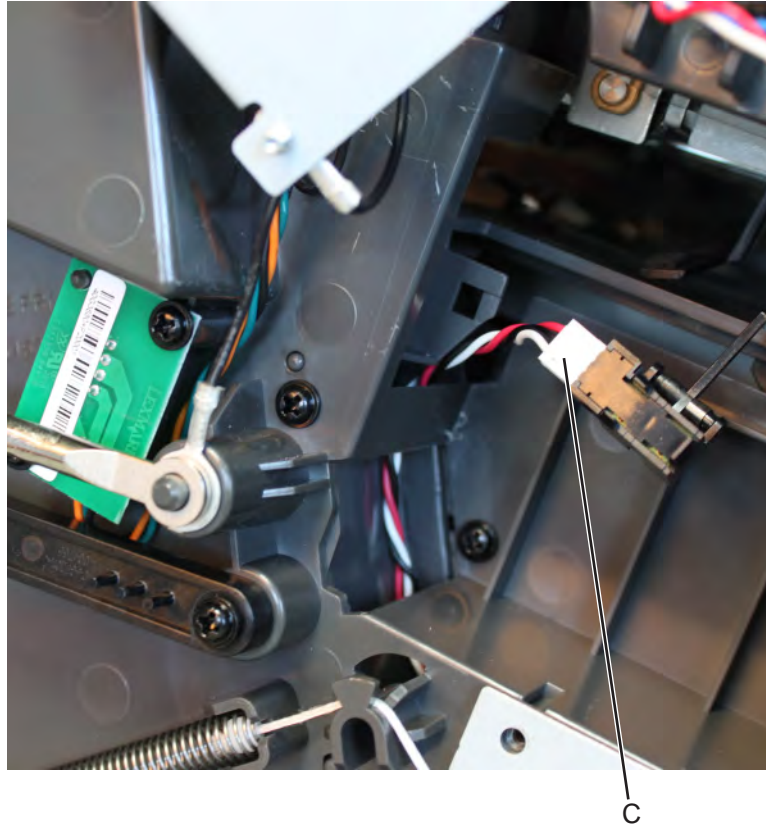

- 1 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 2 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 3 Remove the staple unit carriage. See [“Staple unit removal” on page 598.](#)

4 Release the latches (B), and then release the sensor from its bracket.

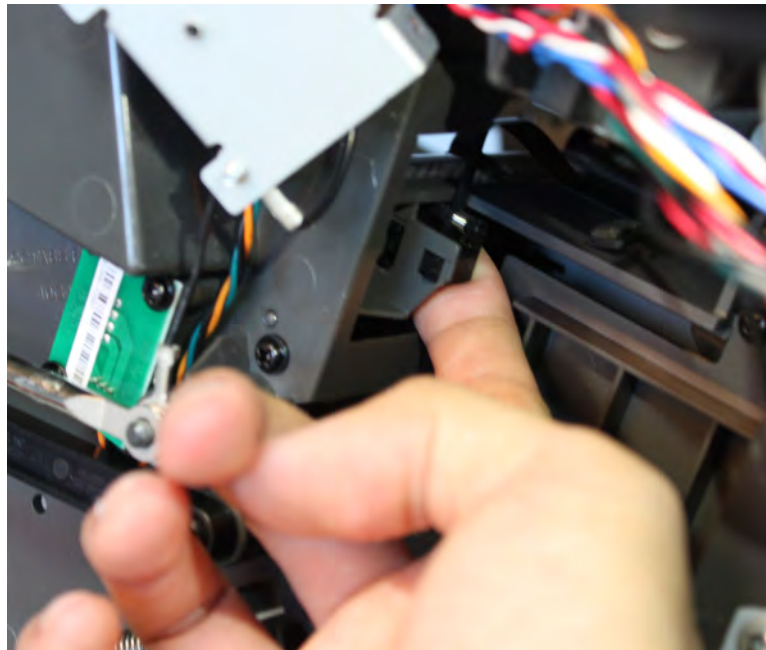

B

- 5 Disconnect the cable (C), and then remove the sensor.

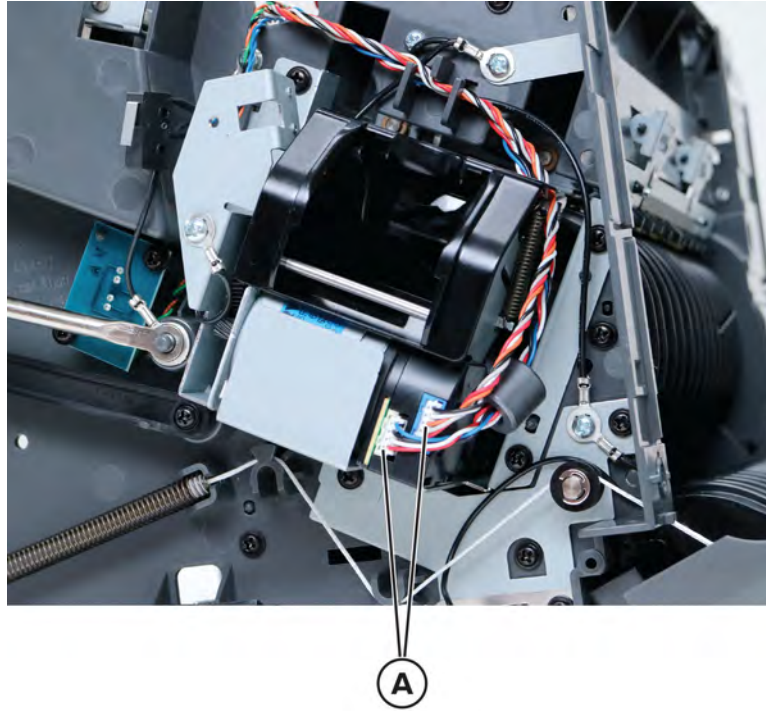

**Installation note:** Make sure that the sensor is properly installed. Push the sensor to its bracket until it is securely latched onto the frame.

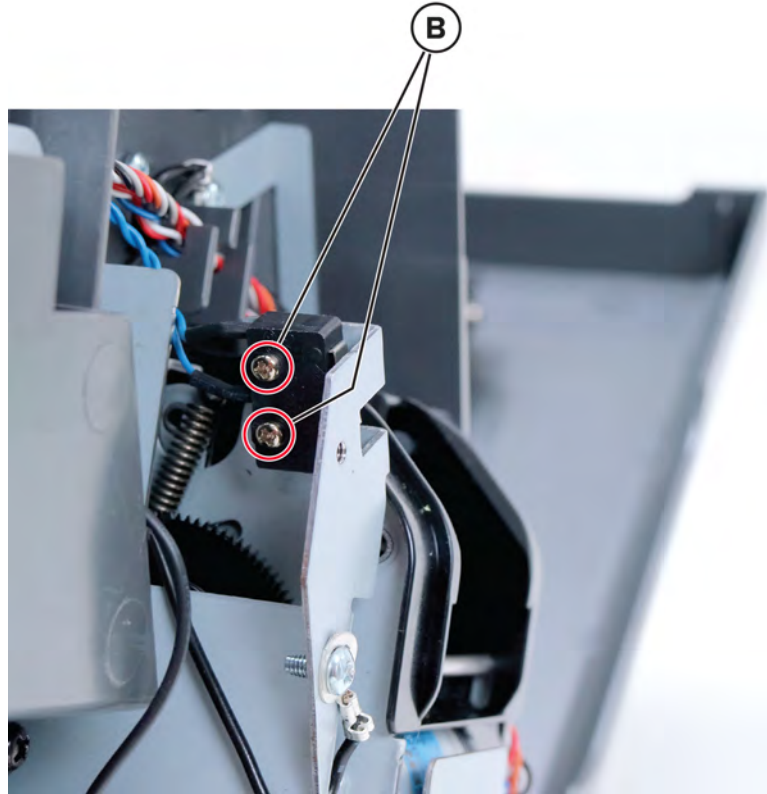

## Staple cartridge door close limit switch removal

- 1 Remove the staple finisher right cover. See [“Staple finisher right cover removal” on page 592.](#)
- 2 Remove the staple finisher top cover. See [“Staple finisher top cover removal” on page 594.](#)
- 3 Disconnect the two cables (A).

- 4 Remove the two screws (B), and then release the limit switch.

- 5 Disconnect the limit switch cable from the controller board.
- 6 Release, and then remove the limit switch.

**Note:** Pay attention to the original route of the cables.

## Optional 4-bin mailbox removals

### Optional 4-bin mailbox removal

- 1 Press the latches to release.
- 2 Lift the mailbox off the printer.

### Mailbox top cover removal

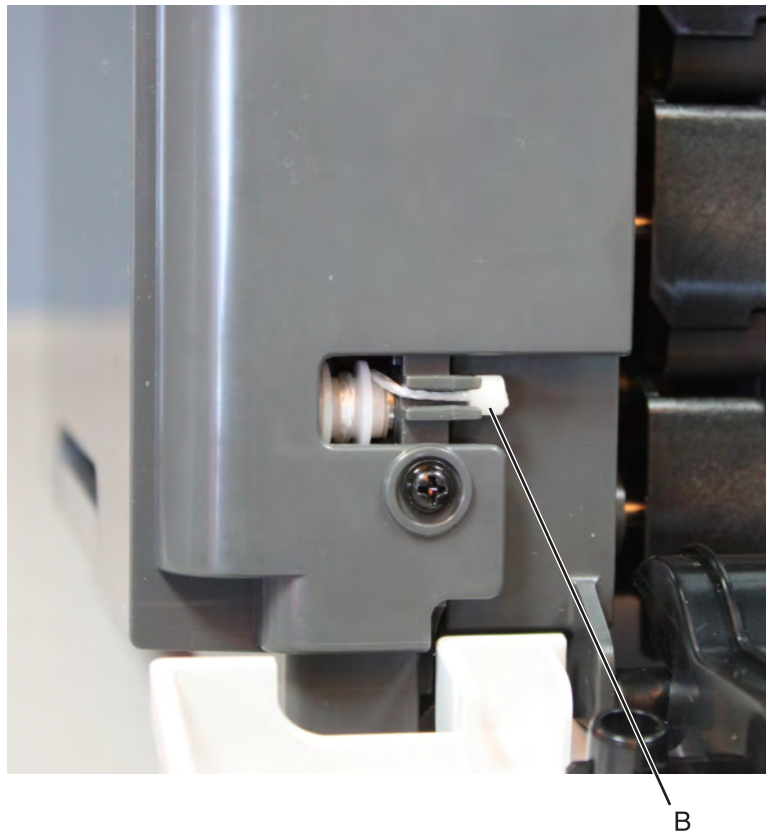

- 1 Lift the top cover.
- 2 Remove the top cover from the mailbox.

## Mailbox rear door removal

- 1 Open the rear door, and detach the string (A) from the door.

**Note:** Fasten the string end (B) to the rear side to prevent it from recoiling into the interior of the mailbox.

**2** Position the rear door at the angle shown, and pull the door off the mailbox.

Parts removal

**656**

## Mailbox right cover removal

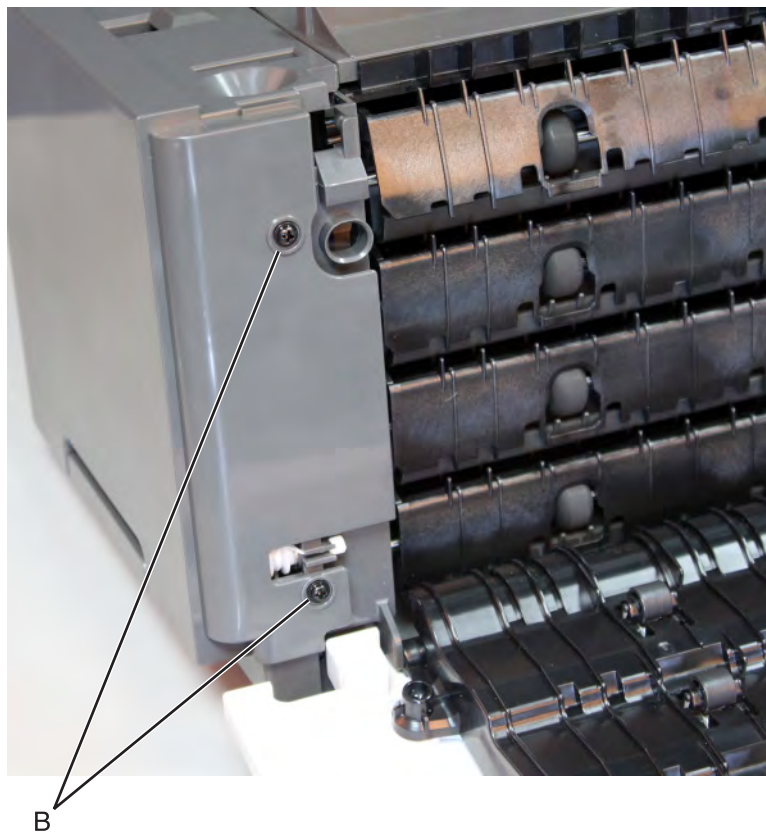

- 1 Open the rear door, and then detach the string (A) from the door.

**Note:** Fasten the string to the rear side to prevent it from recoiling into the interior of the mailbox.

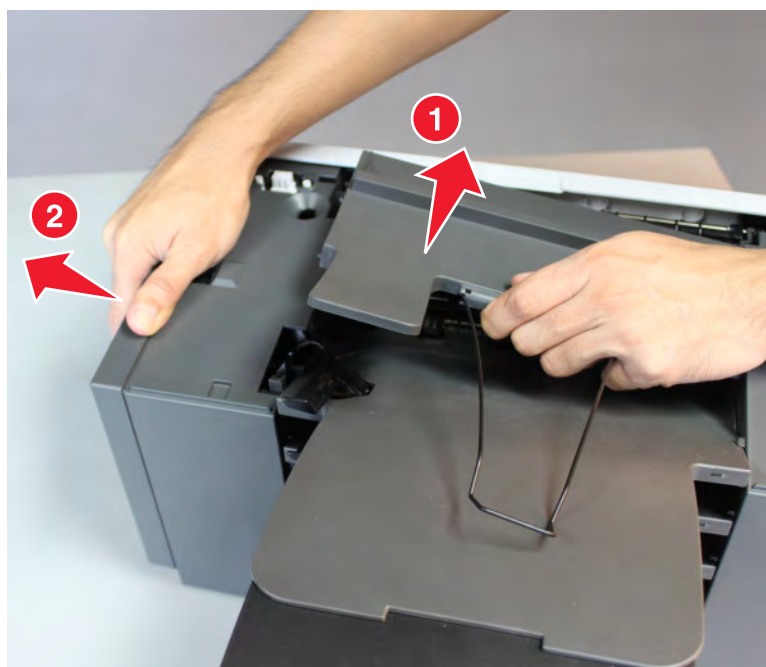

- 2 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654](#).

- 3** Remove the two screws (B) from the mailbox, and then remove the cover.

### Mailbox top bin cover with bail removal

- 1** Slightly push the inner frame of the mailbox to the left to release the bin cover, and then lift the bin cover.

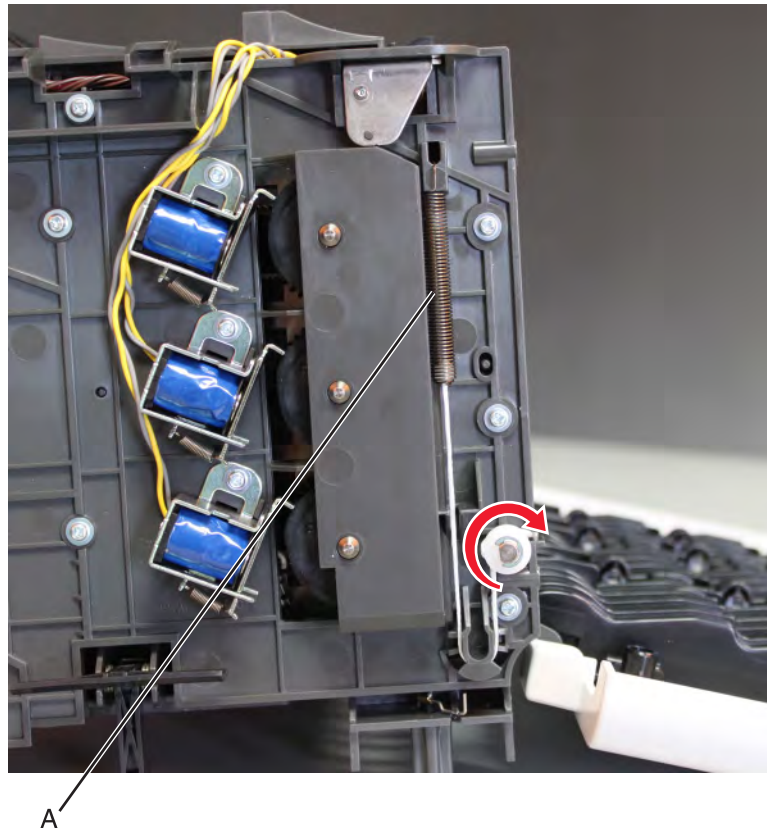

- 2 Release the mud bail flap from the bin cover, and then remove.

### Mailbox spring with string removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox right cover. See [“Mailbox right cover removal” on page 657.](#)
- 3 Remove the spring (A) with string.

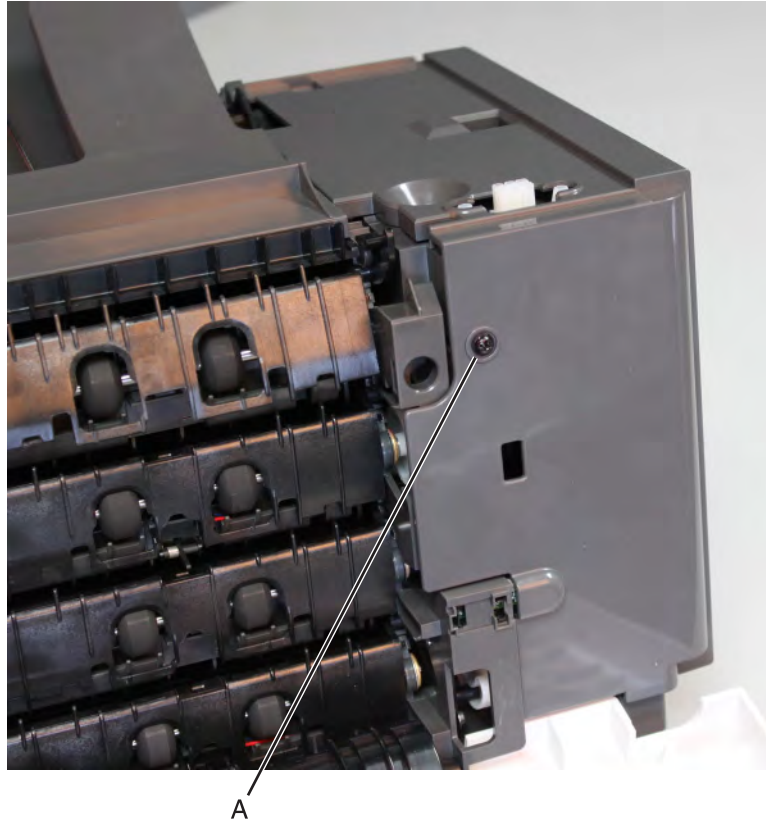

**Note:** Pay attention to the original position of the string. The string on the pulley is wound clockwise.

## Mailbox left cover removal

- 1 Open the rear door.
- 2 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)

- 3 Remove the screw from the mailbox (A), then remove the left cover.

### Mailbox solenoid removal

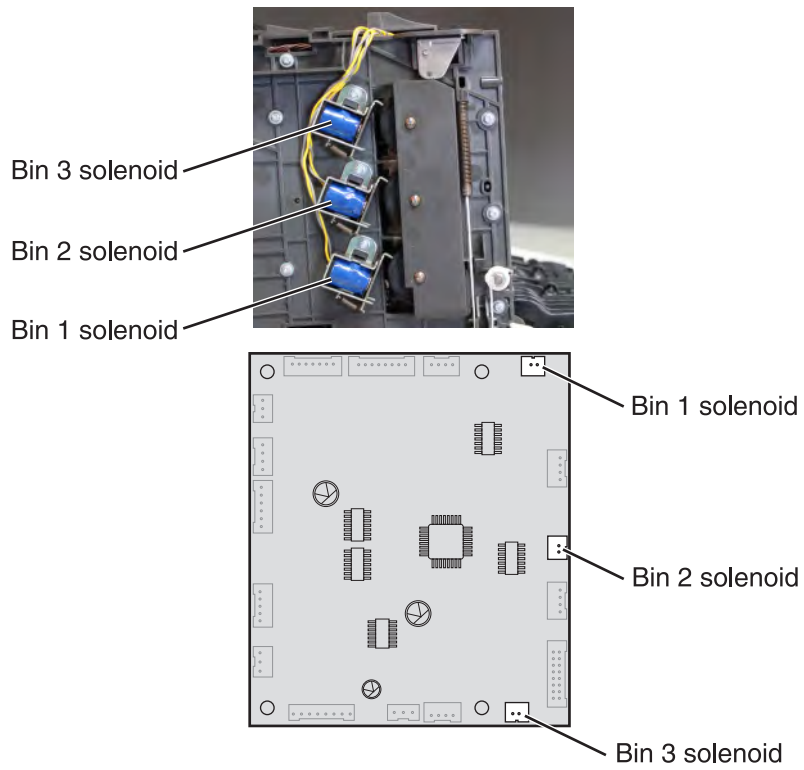

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox right cover. See [“Mailbox right cover removal” on page 657.](#)
- 3 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)

4 Lift the middle portion of the cover to release the tabs (A), then remove the cover.

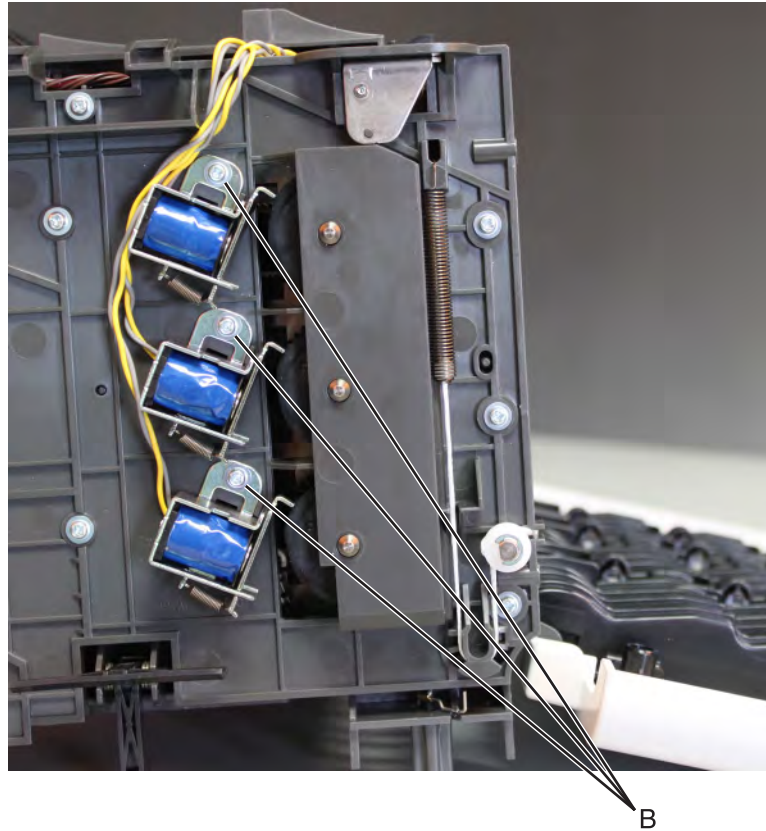

A

5 Disconnect the solenoid cable (J2A, J2B, or J2C) from the controller board.

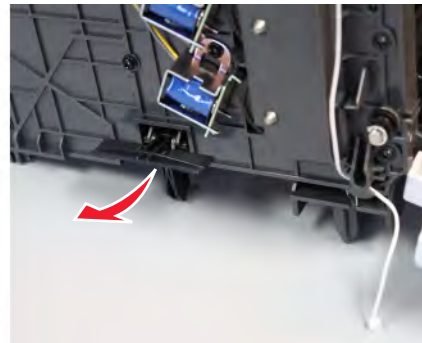

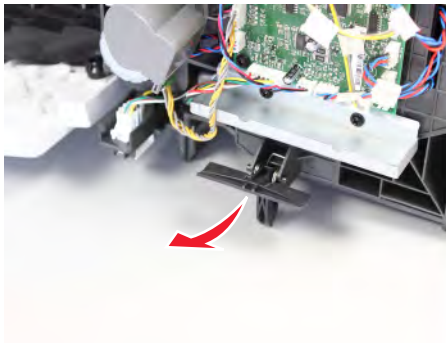

- 6 Remove the screw (B) securing the solenoid.

- 7 Route the cable off the mailbox, then remove the solenoid.

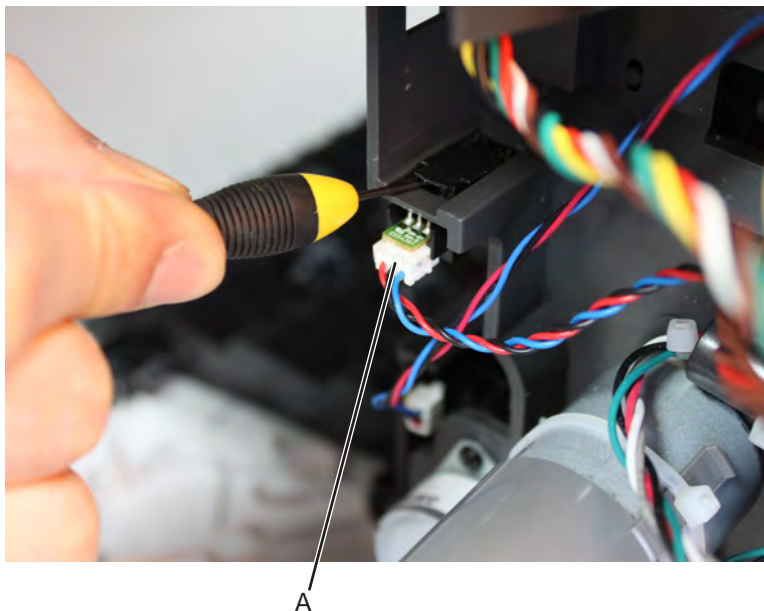

## Mailbox latch removal

- 1 Remove the mailbox left cover or right cover. See [“Mailbox left cover removal” on page 660](#) or [“Mailbox right cover removal” on page 657](#).
- 2 Pull the latches off the mailbox, and then remove.

## Sensor (mailbox rear door interlock) removal

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660](#).
- 2 Pry the mylar cover off the sensor latches.
- 3 Disconnect the cable (A), and then release the latches to remove the sensor.

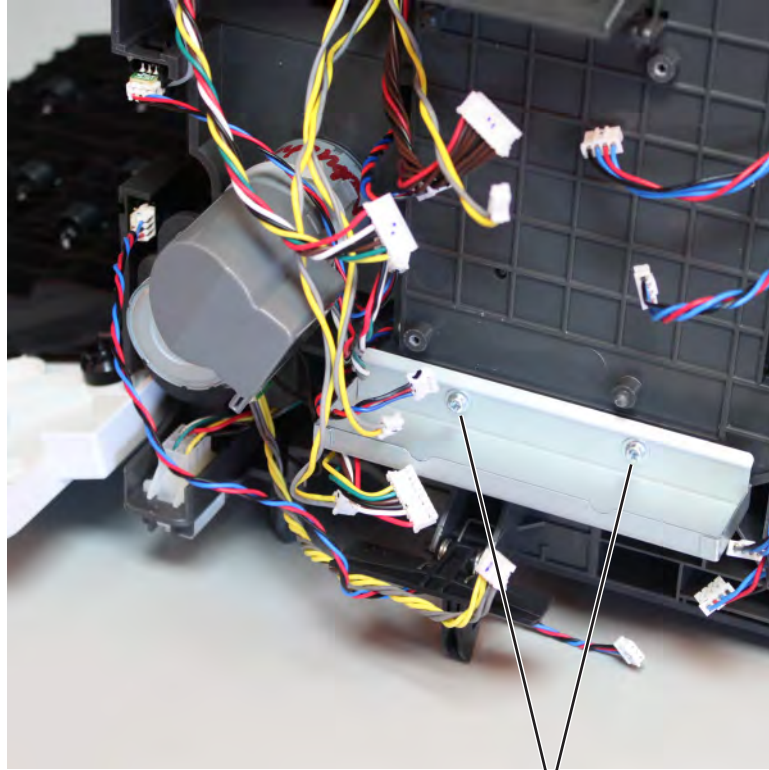

## Mailbox diverter plunger assembly removal

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660](#).
- 2 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655](#).

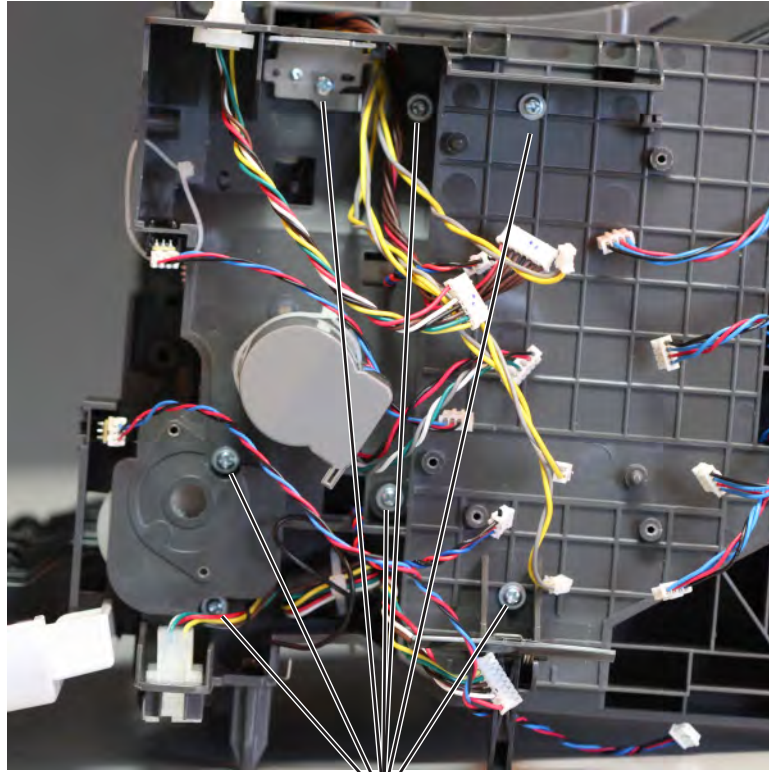

**3** Remove the two screws (A), and then remove the shield.

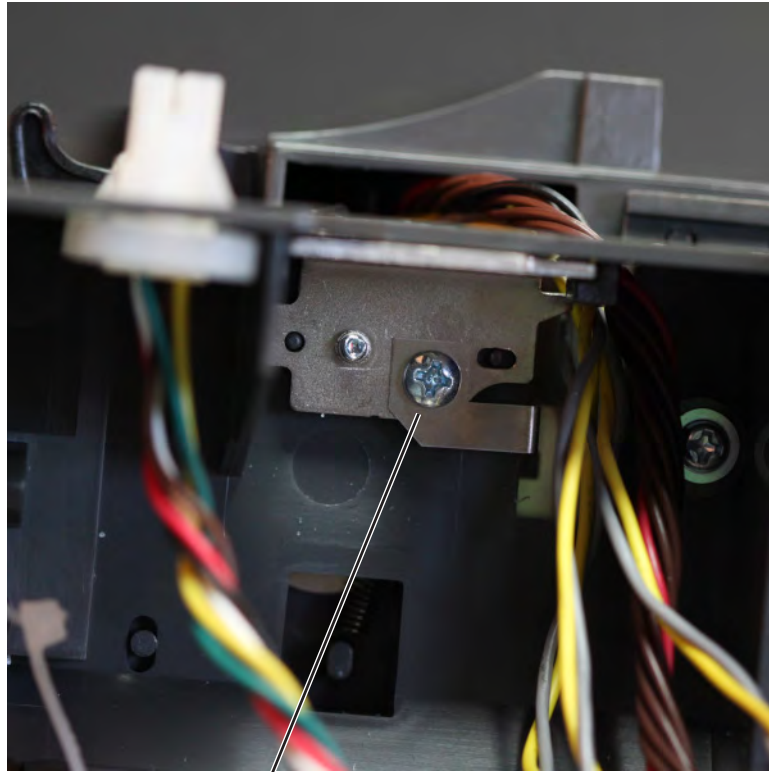

A

- 4 Remove the seven screws (B) from the inner left frame.

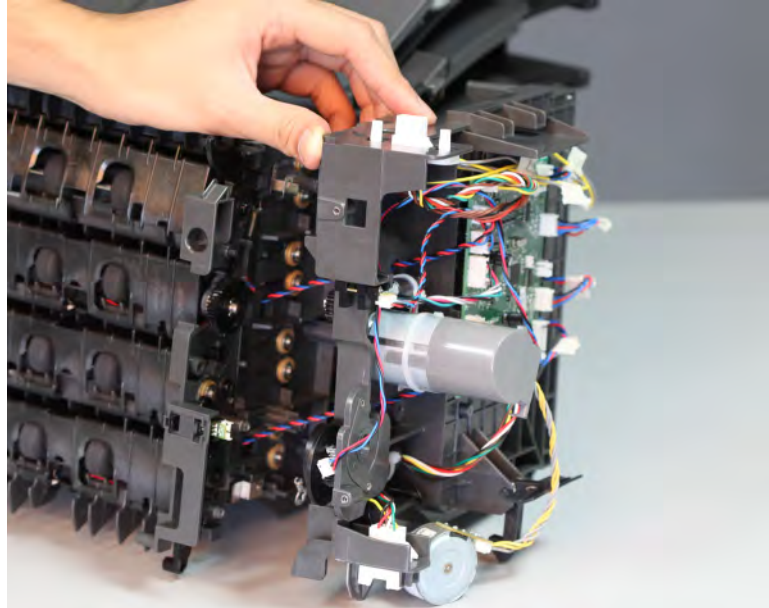

B

**Note:** Pay attention to the original position of the grounding plate (C).

C

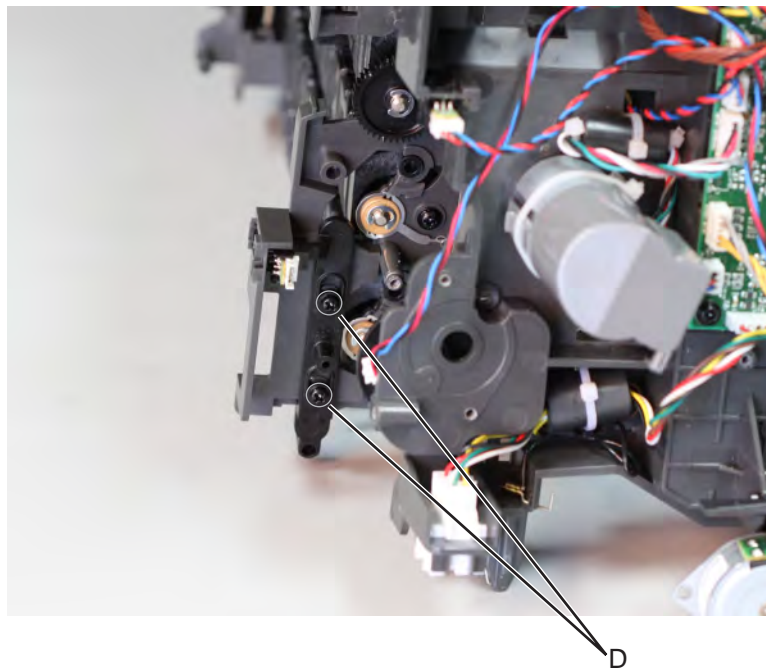

**5** Move away the left inner frame to access the parts underneath.

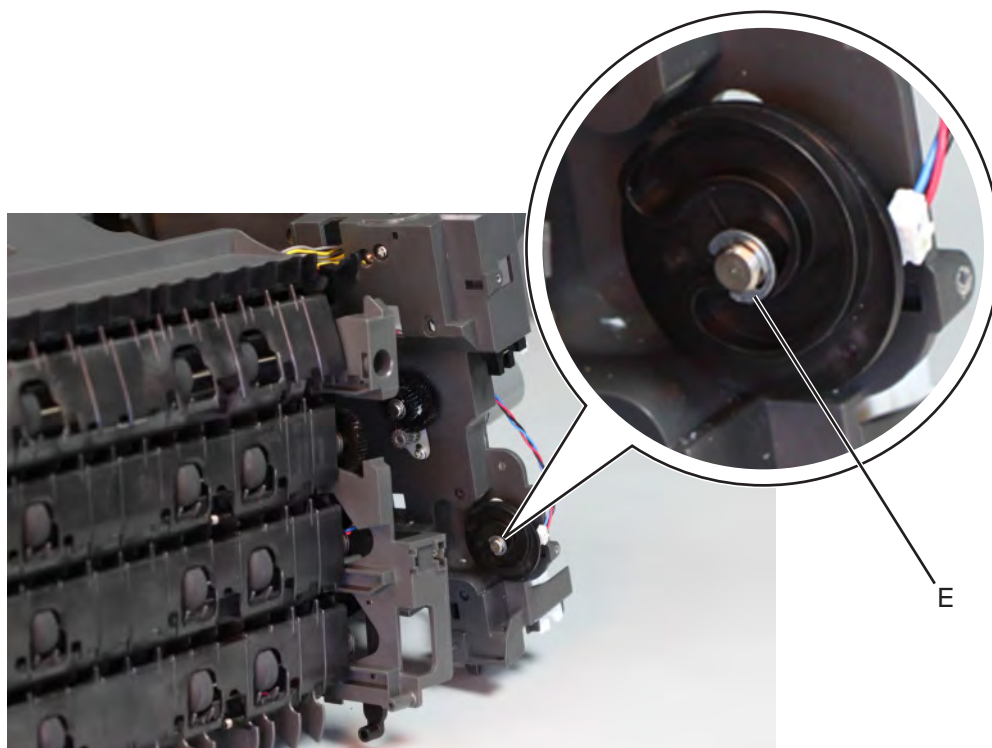

Parts removal

**667**

**6** Remove the two screws (D), and then remove the diverter plunger.

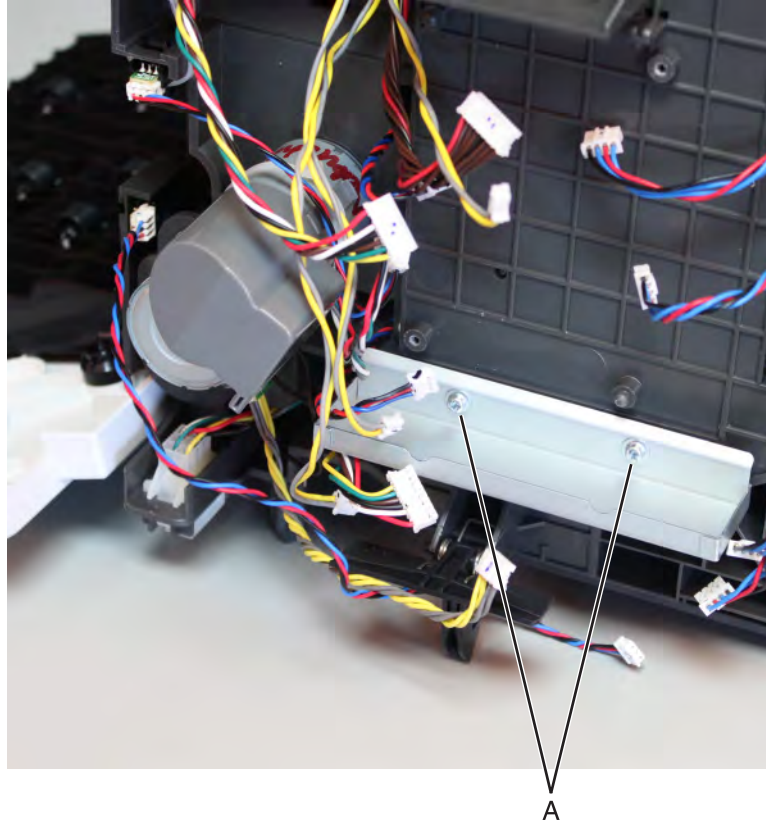

**7** Remove the E-clip (E) to release the cam, and then remove the diverter cam.

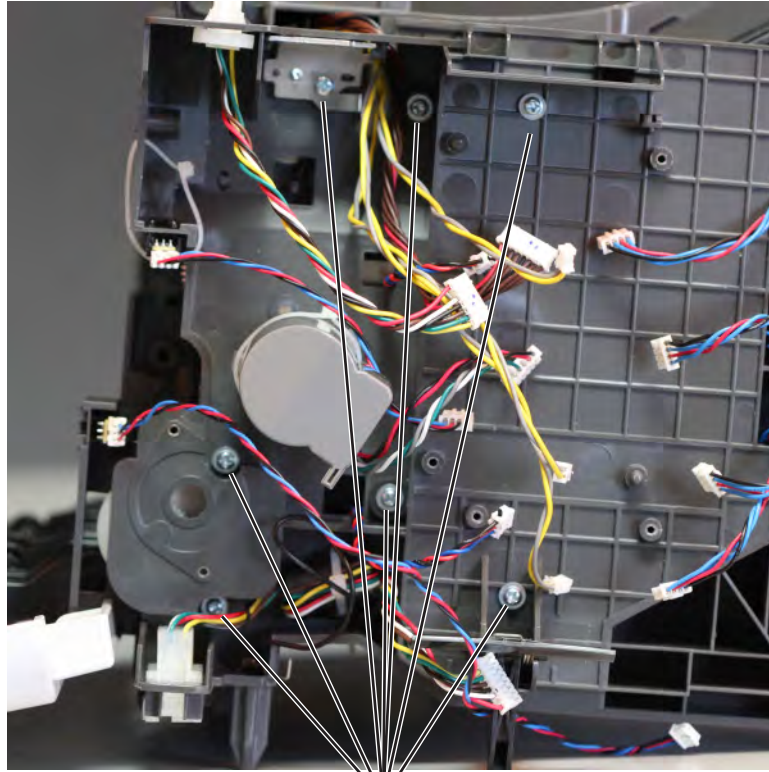

## Mailbox transport drive gear removal

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)
- 2 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655.](#)
- 3 Remove the two screws (A), and then remove the shield.

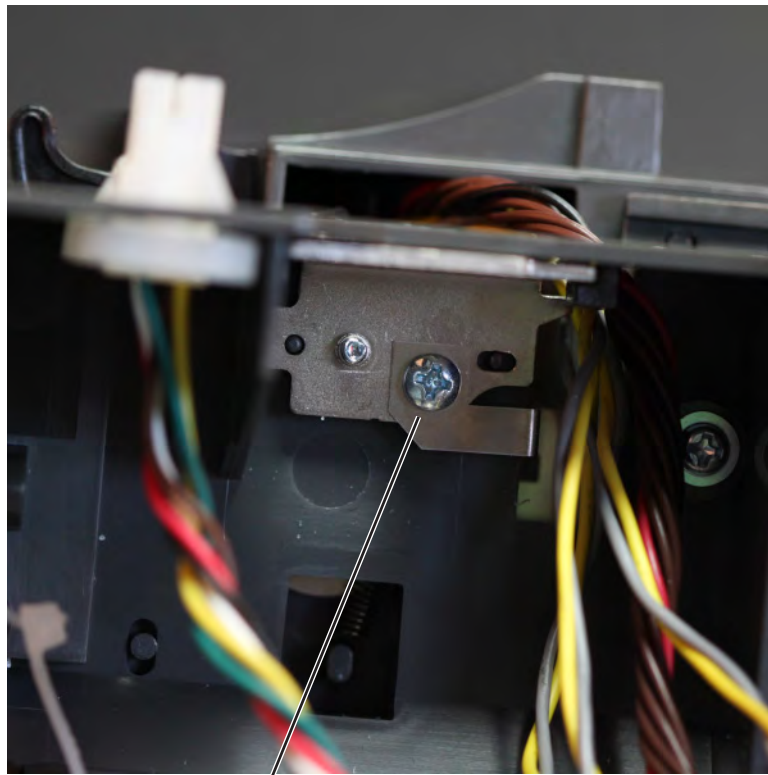

- 4 Remove the seven screws (B) from the inner left frame.

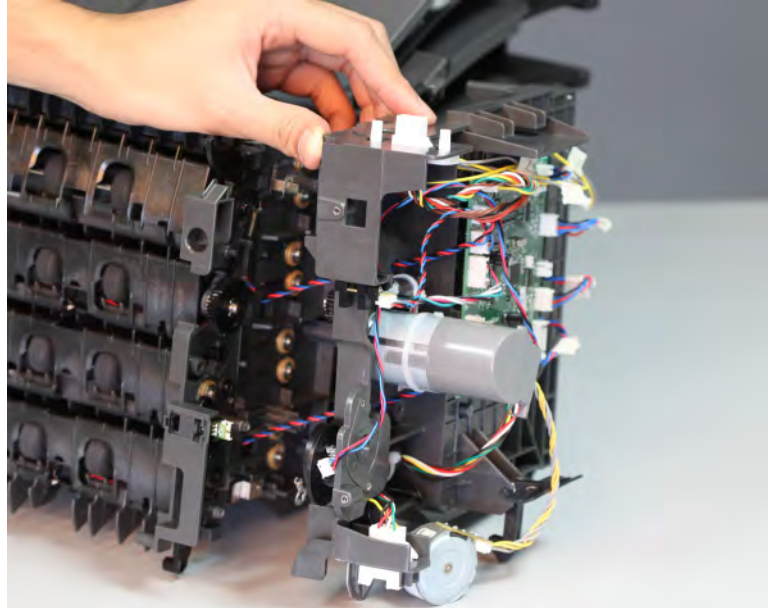

B

**Note:** Pay attention to the original position of the grounding plate (C).

C

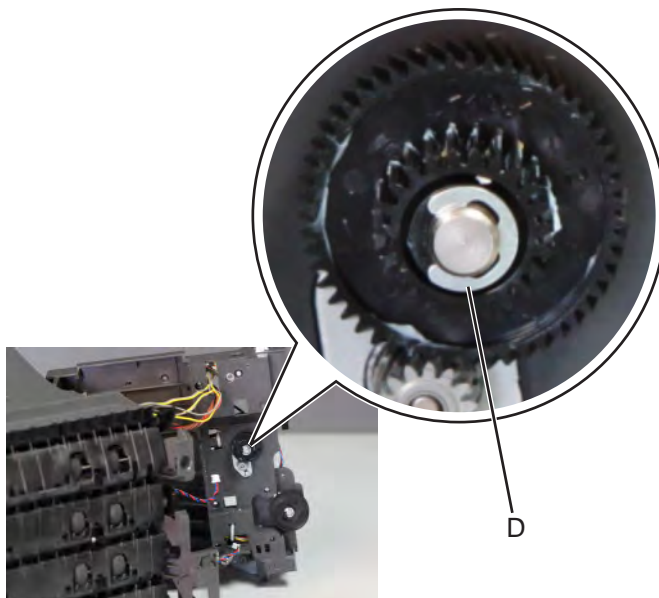

- 5** Move away the left inner frame to access the parts underneath it.

Parts removal

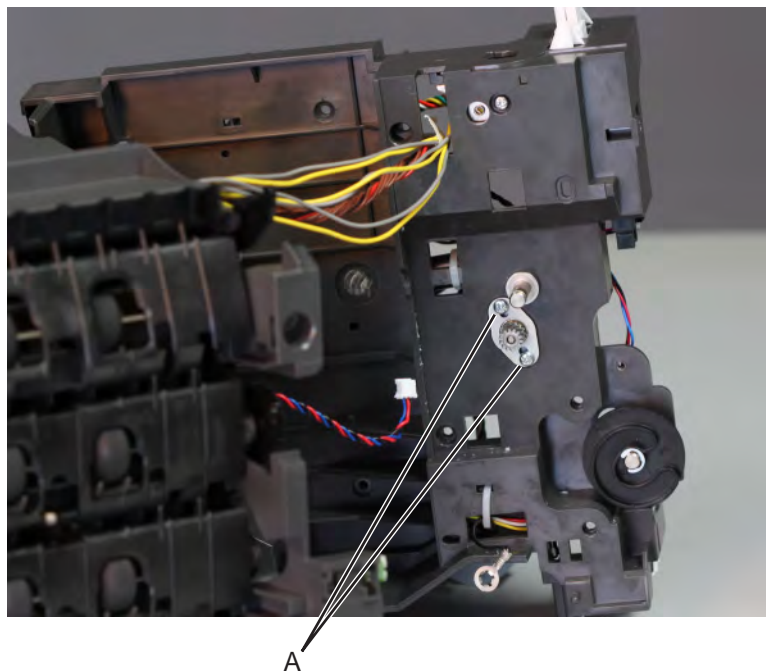

**671**

- 6 Remove the E-clip (D), and then remove the gear.

## Motor (mailbox transport) removal

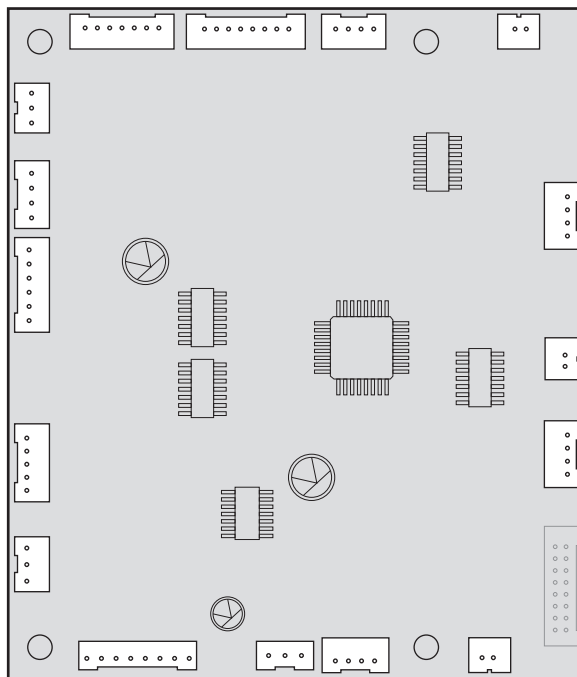

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)
- 2 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655.](#)
- 3 Remove the mailbox main drive gear. See [“Mailbox transport drive gear removal” on page 669.](#)
- 4 Remove the two screws (A) behind the left frame, and then remove the motor.

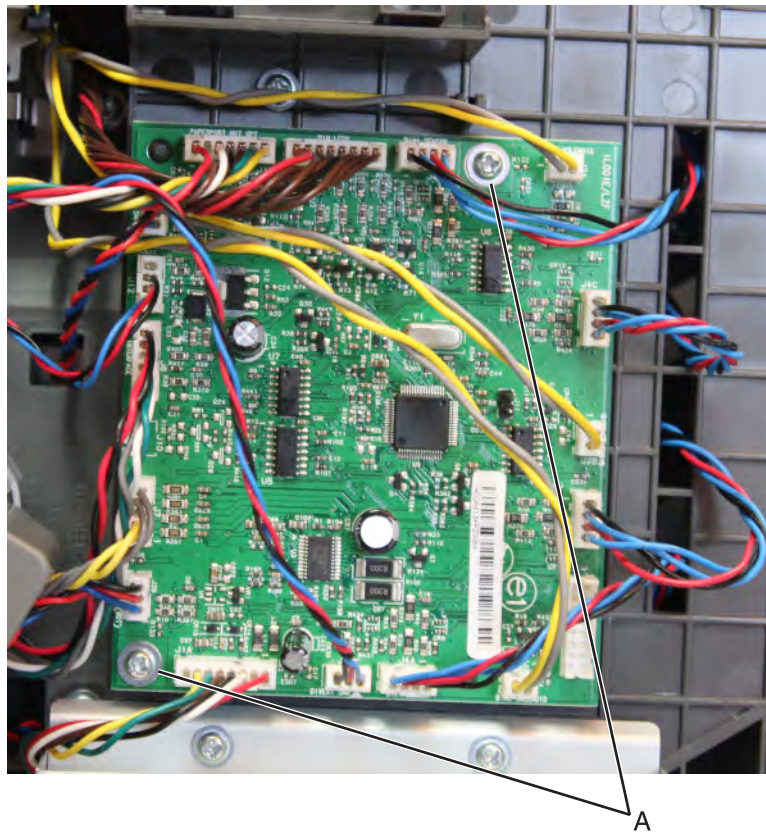

## Mailbox controller board removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654](#).
- 2 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660](#).
- 3 Disconnect all cables (J1B, J5, J4D, J2A, J4C, J2B, J4B, J2C, J4A, J8, J1A, J3B, J7, J6, J12, and J3T), and then remove the two screws (A) from the controller board.

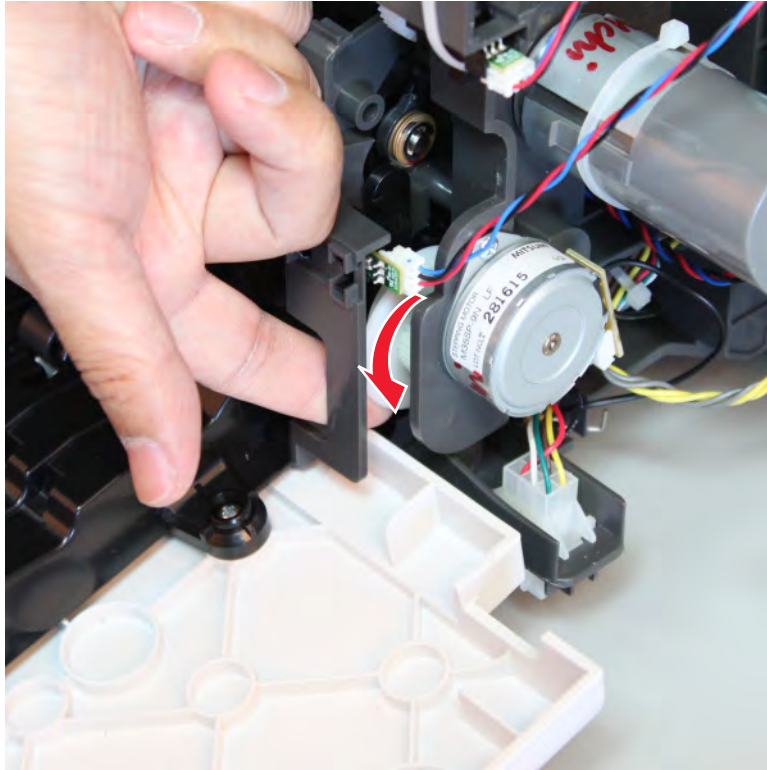

**4** Remove the controller board.

### **Sensor (mailbox diverter plunger) removal**

- 1** Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2** Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)

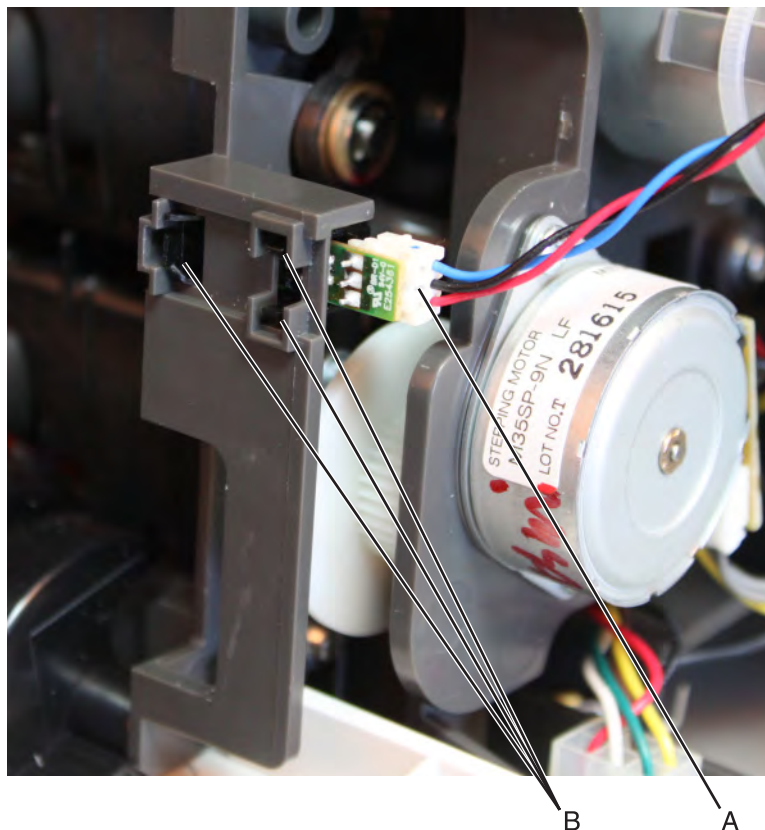

**3** Rotate the cam to clear the sensor.

Parts removal

**675**

- 4 Disconnect the cable (A), and then release the sensor latches (B).

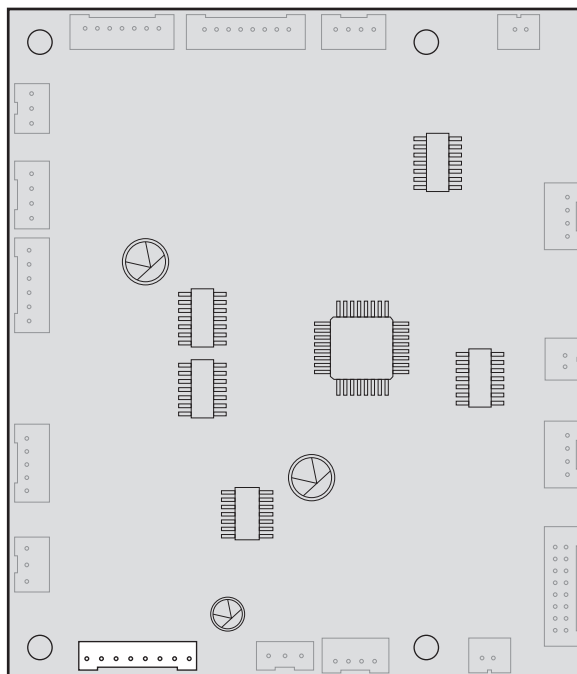

- 5 Remove the sensor.

## Mailbox lower interface cable removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)

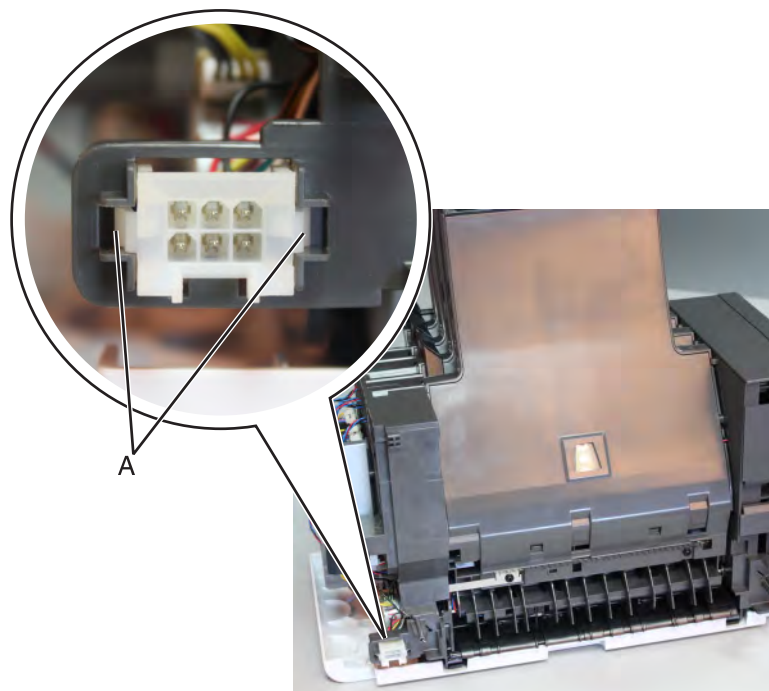

- 3 Disconnect the lower interface cable J1A from the controller board.

- 4 Cut the cable tie holding the lower interface cable.

**Installation note:** Make sure the cables don't get in the way of moving parts.

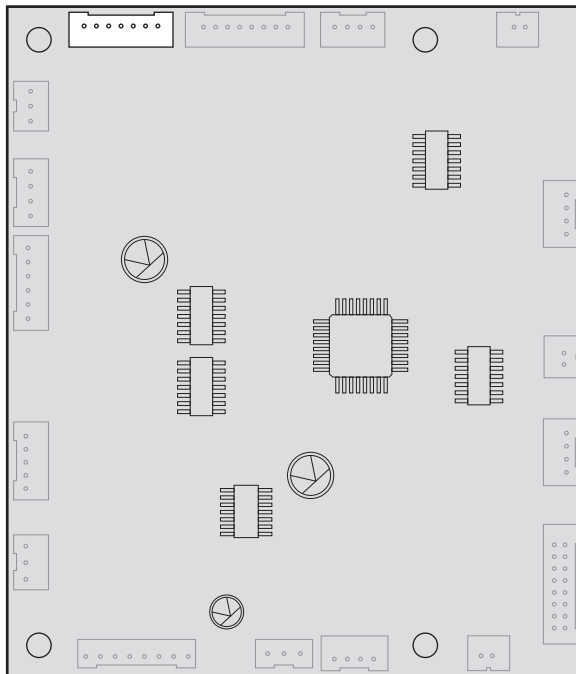

- 5 Push inward to release the latches (A), then push the connector off its slot.

- 6 Remove the lower interface cable.

## Mailbox upper interface cable removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)
- 3 Disconnect the upper interface cable J1B from the controller board.

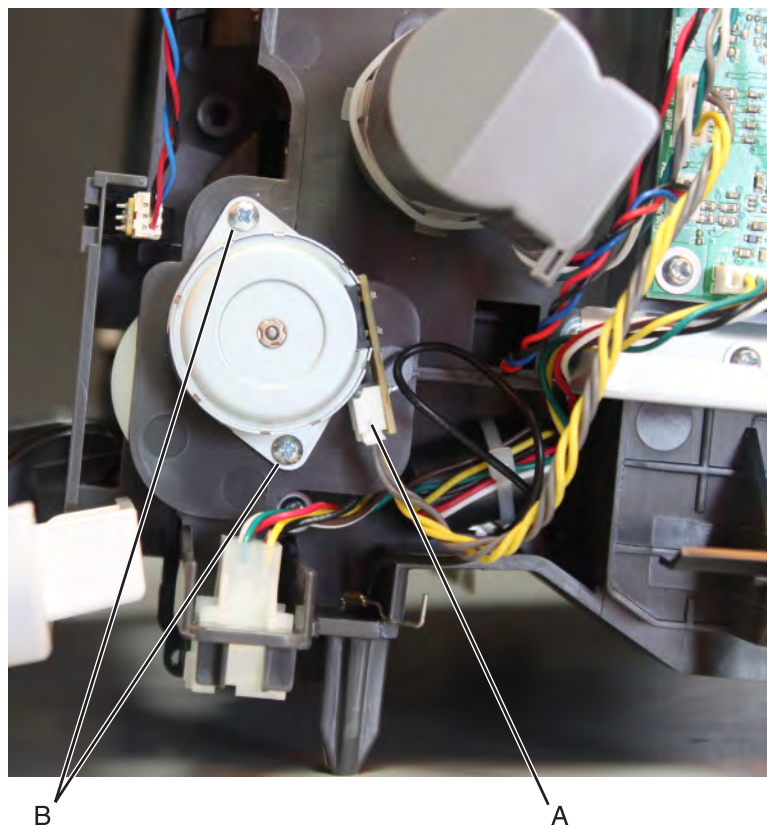

- 4 Crimp both connector pins, using pliers to make them fit the pin holes. Push the connector off its slot.
- 5 Remove the upper interface cable.

## Motor (mailbox diverter) removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)

**3** Disconnect the cable (A), and then remove the two screws (B) using a #1 Phillips screwdriver.

**4** Remove the motor.

## Mailbox bin full flag removal

- 1 Pull the flag to release the flag hinge.

- 2 Release the flag from the mailbox, and then remove it.

**Installation note:** Make sure that the flag hinge pins are inserted into their corresponding slots.

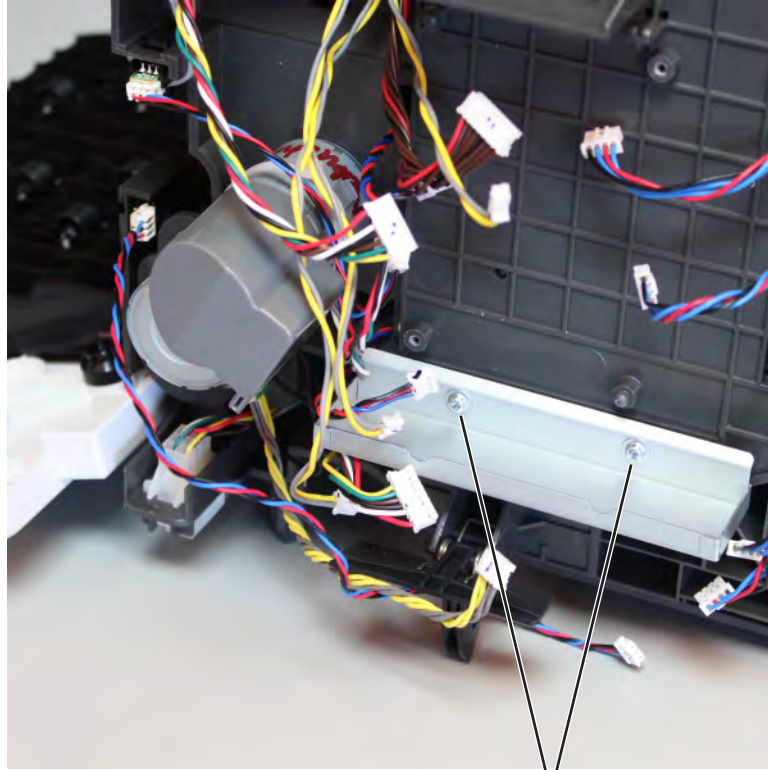

### Sensor (mailbox bin full) removal

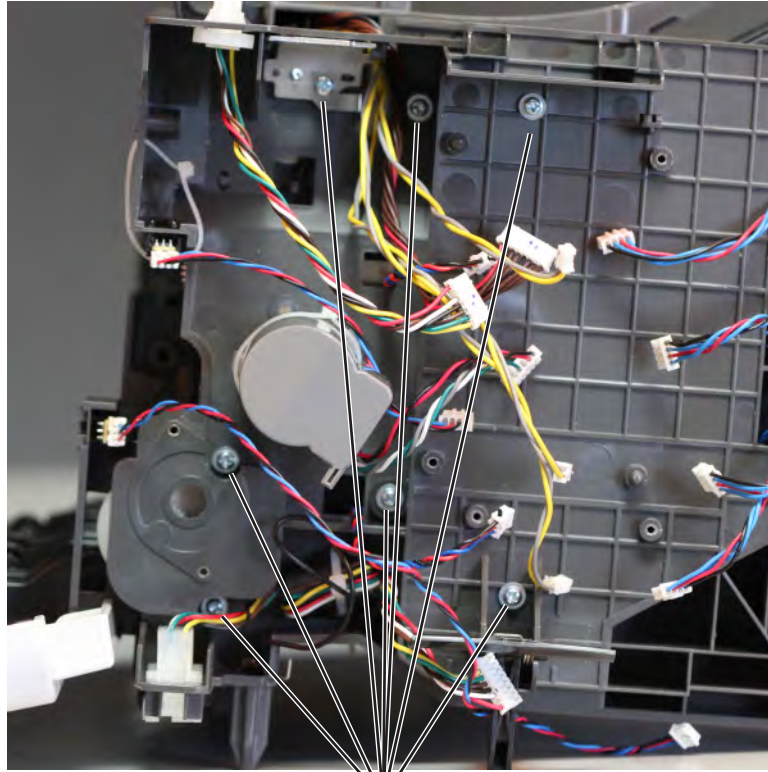

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)
- 3 Remove the motor (mailbox diverter). See [“Motor \(mailbox diverter\) removal” on page 678.](#)
- 4 Remove the mailbox controller board. See [“Mailbox controller board removal” on page 673.](#)

5 Remove the two screws (A), and then remove the shield.

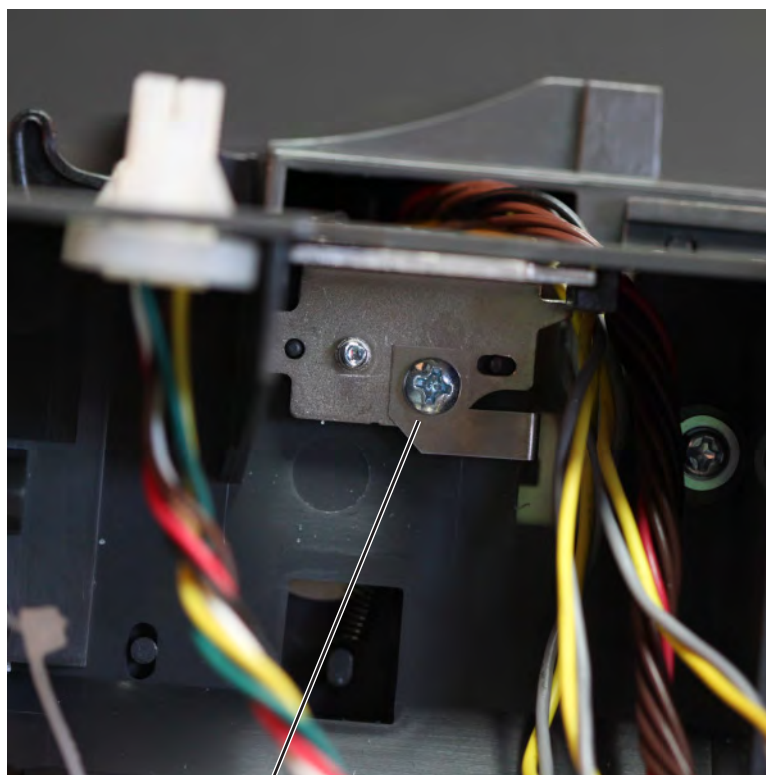

A

- 6 Remove the seven screws (B), and then release the left frame.

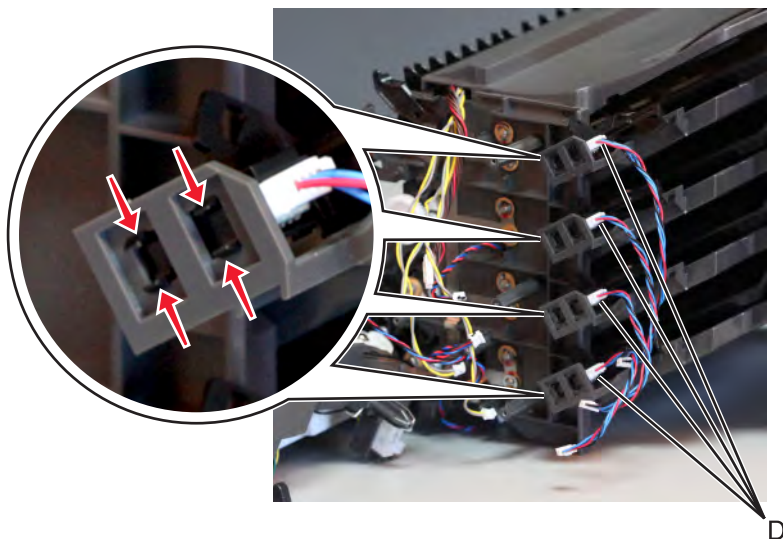

B

**Installation note:** Pay attention to the original position of the grounding plate (C).

C

- 7 Slightly pull the left frame to access the sensors behind it.
- 8 Disconnect the sensor cable (D), and then remove the sensor.

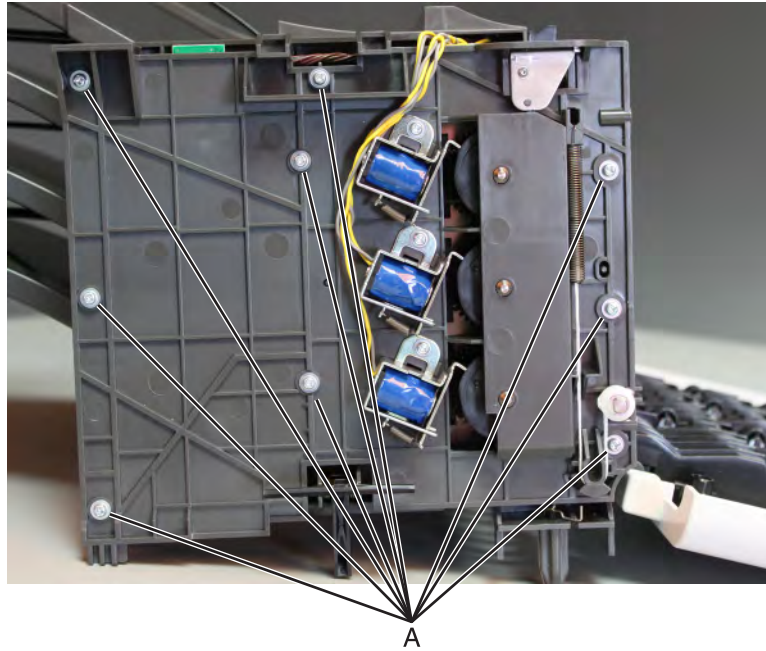

D

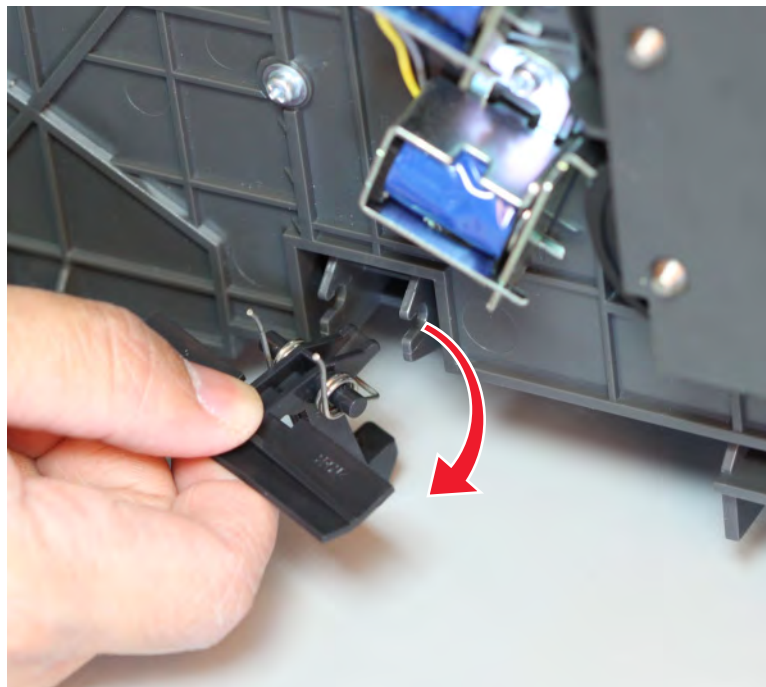

## Mailbox belt removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox right cover. See [“Mailbox right cover removal” on page 657.](#)

**3** Remove the nine screws (A) from the inner right frame.

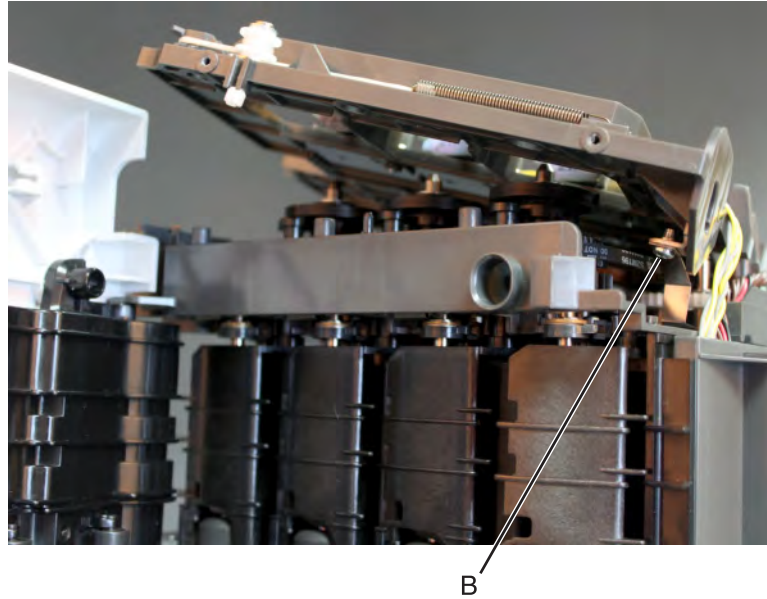

**4** Pull the latch to release, then remove.

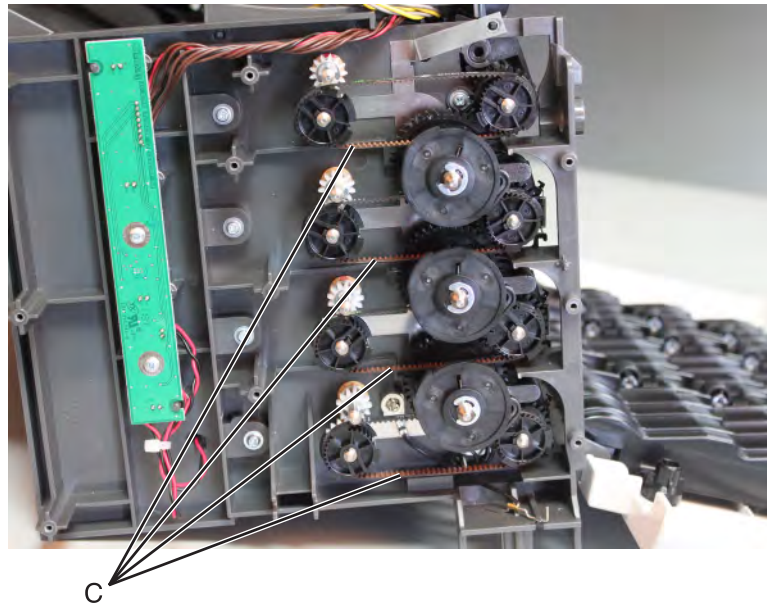

Parts removal

**685**

- 5 Carefully lift the inner right frame, then remove the ground screw (B).

- 6 Swing away the inner right frame to access the belt (C).

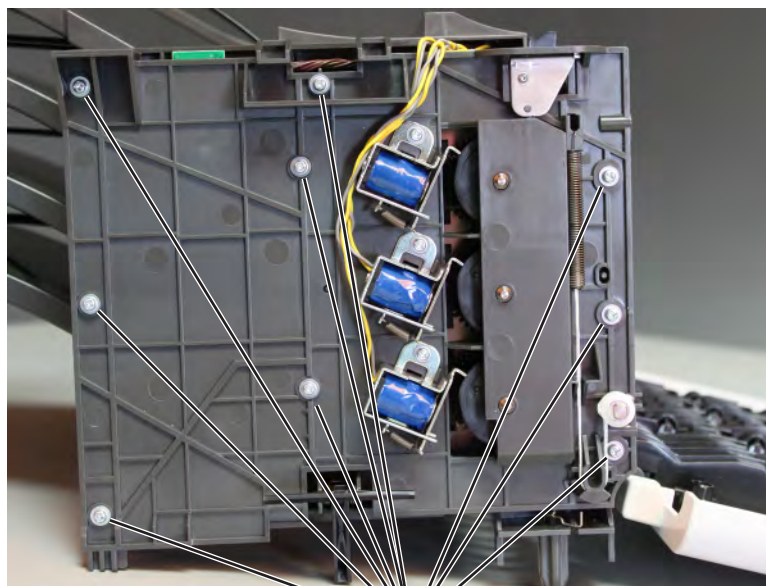

- 7 Remove the belt.

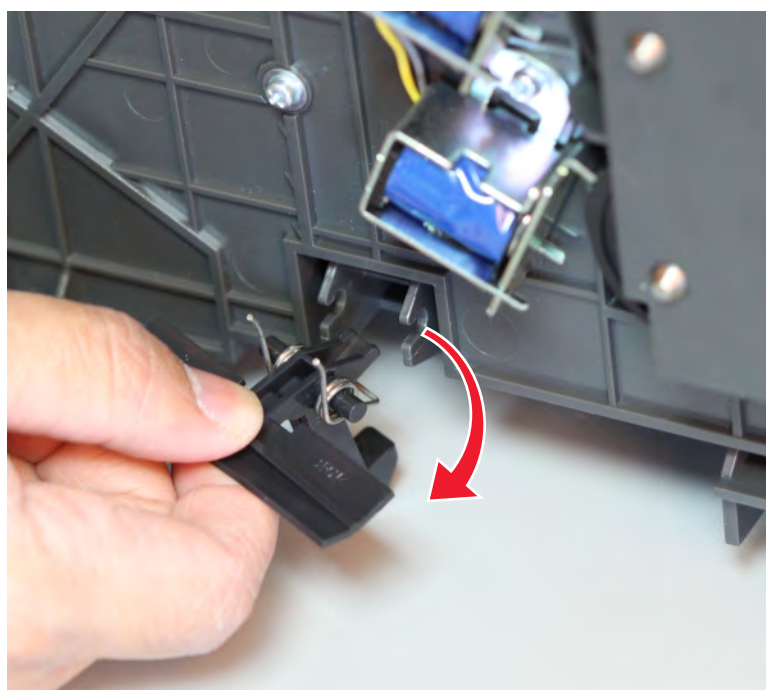

## Mailbox bin LED assembly removal

- 1 Remove the mailbox top cover. See [“Mailbox top cover removal” on page 654.](#)
- 2 Remove the mailbox right cover. See [“Mailbox right cover removal” on page 657.](#)

**3** Remove the nine screws (A).

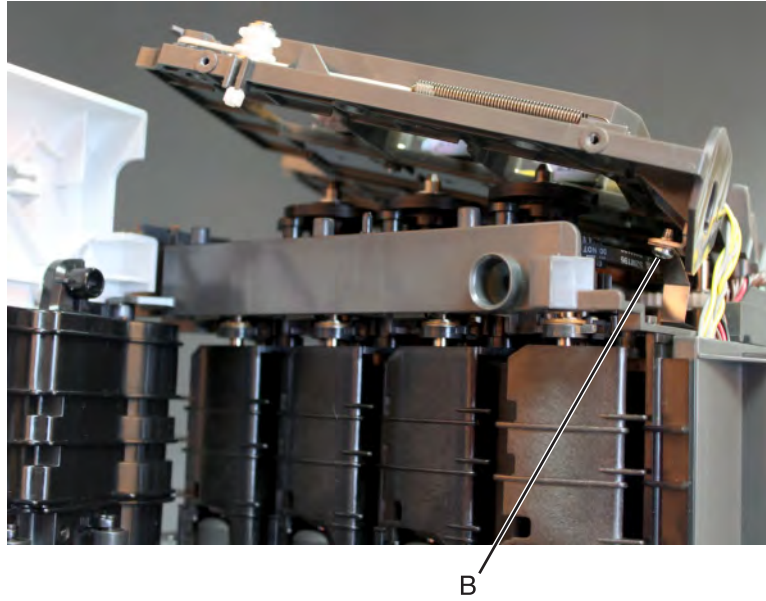

**4** Pull the latch to release, and then remove it.

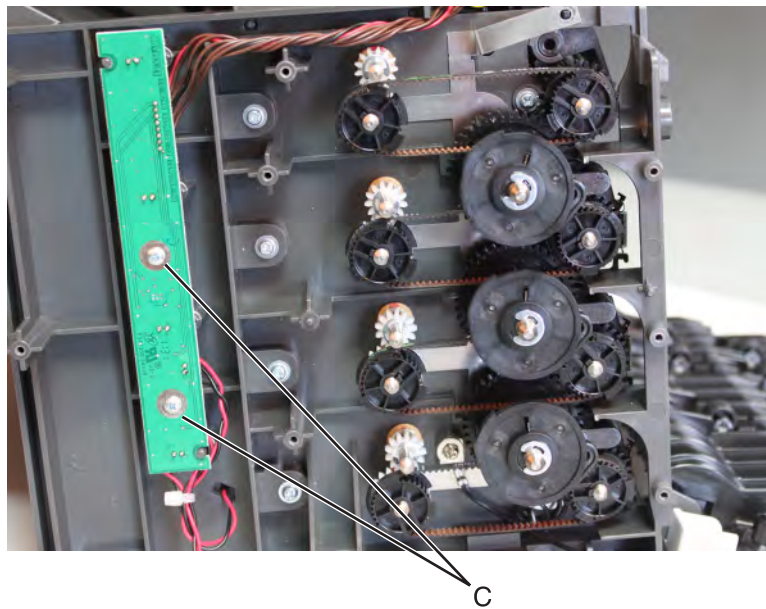

Parts removal

**687**

- 5** Carefully pull the inner right frame, and then remove the ground screw (B).

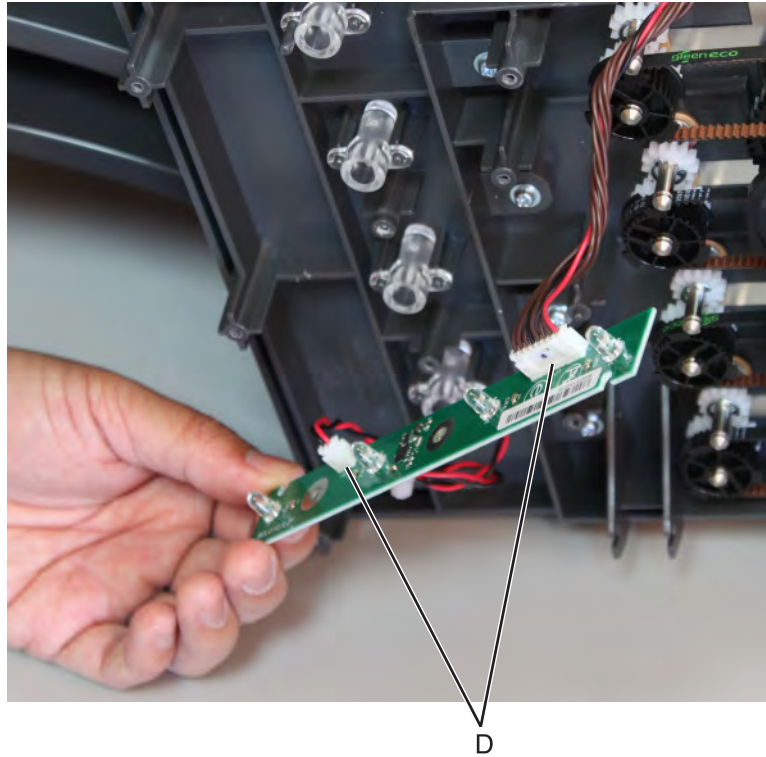

- 6** Move away the inner right frame to access the LED assembly behind it.
- 7** Remove the two screws (C) Using a #1 Phillips screwdriver, and then release the LED assembly.

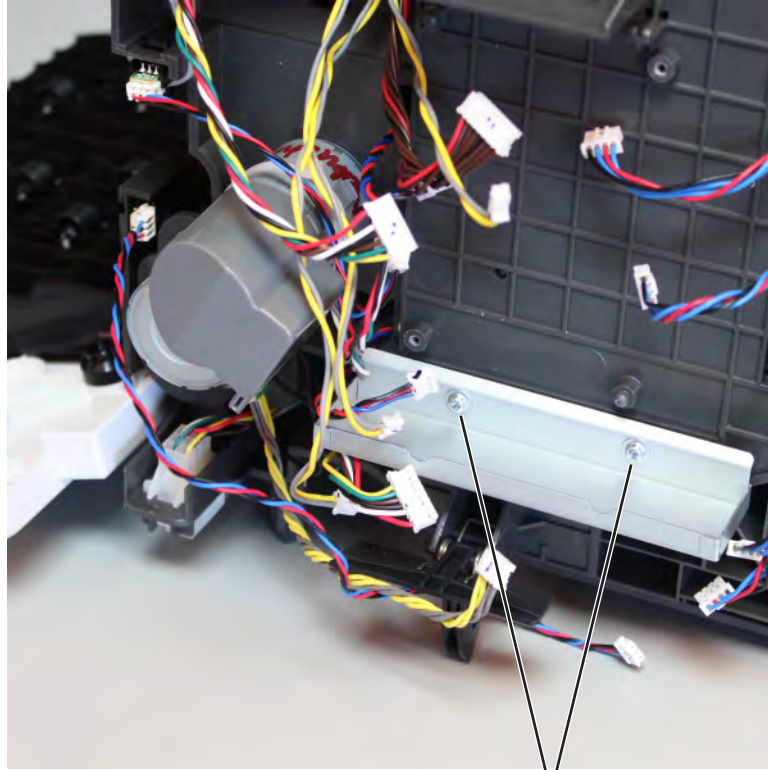

- 8 Disconnect the two cables (D), and then remove the bin LED assembly.

## Mailbox top diverter removal

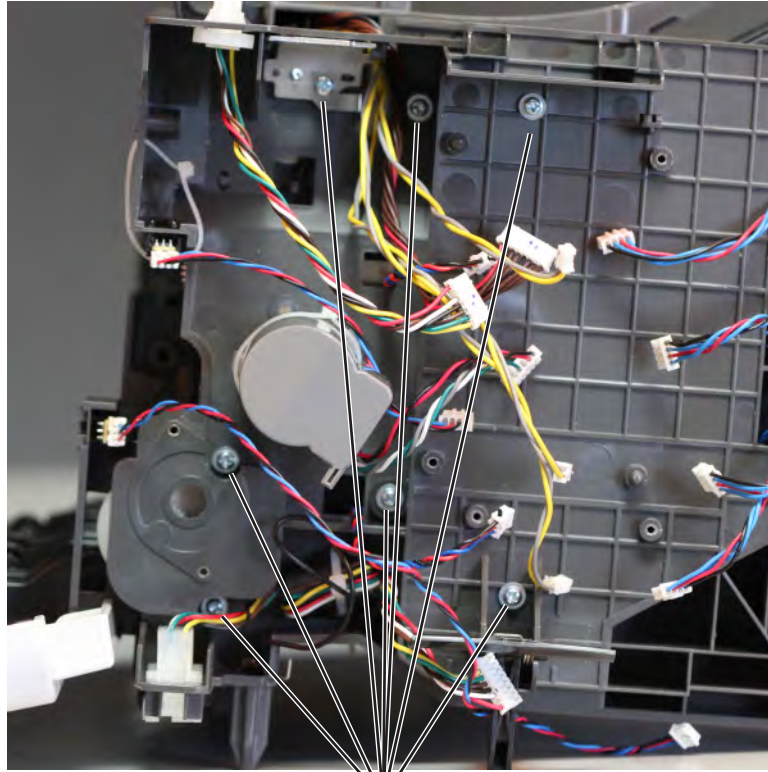

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)
- 2 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655.](#)
- 3 Remove the mailbox controller board. See [“Mailbox controller board removal” on page 673.](#)

4 Remove the two screws (A), and then remove the shield.

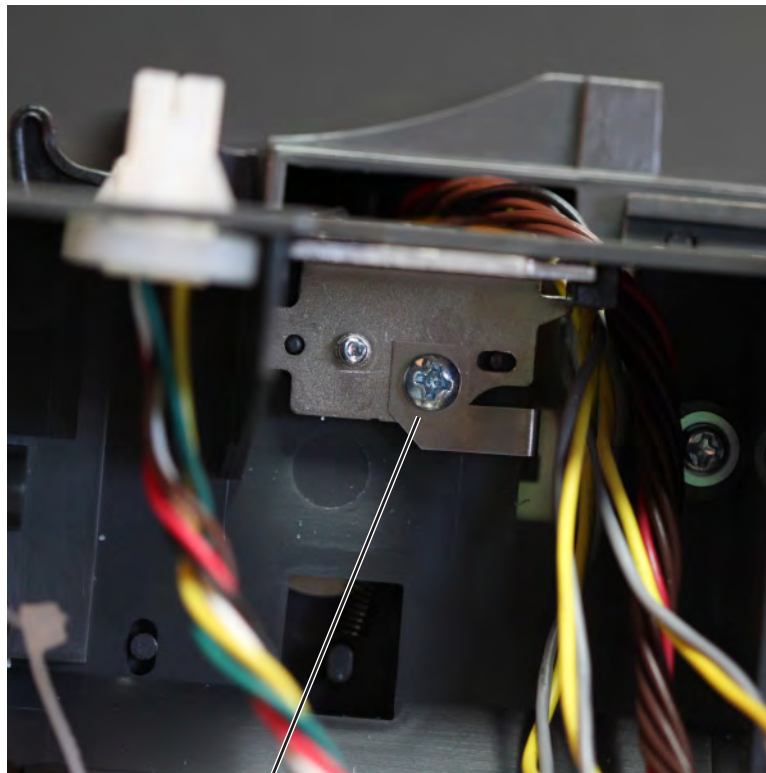

A

- 5 Remove the seven screws (B), and then release the inner left frame.

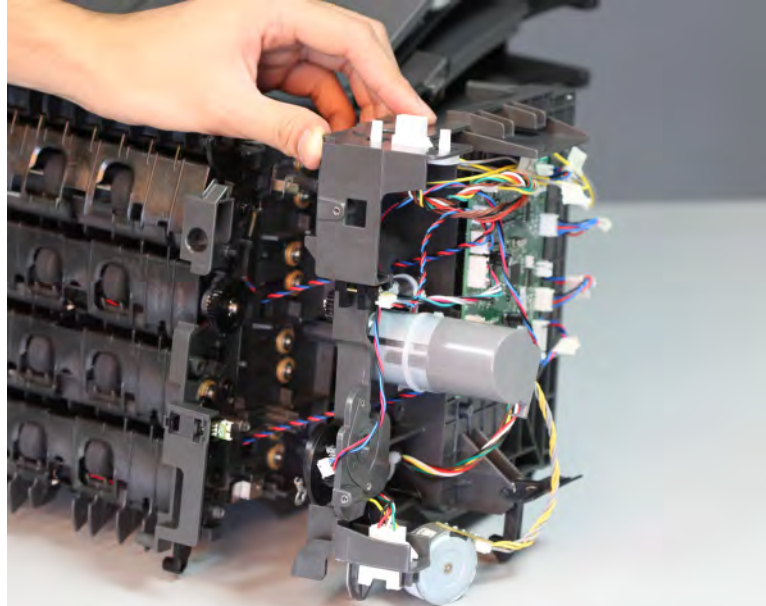

B

**Note:** Pay attention to the original position of the grounding plate (C).

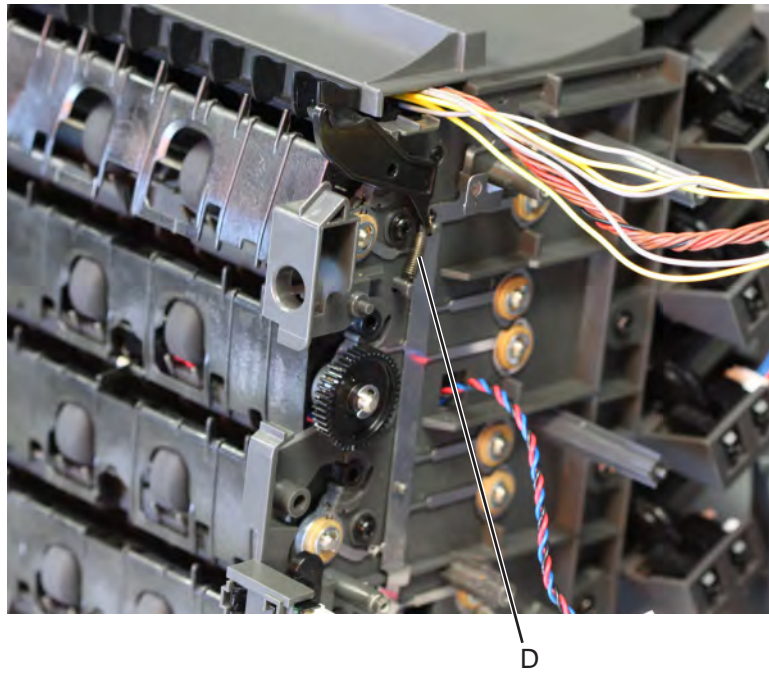

C

**6** Move away the left inner frame to access the parts underneath it.

**7** Unhook the diverter spring (D) to release the diverter.

**Note:** Be careful not to lose the diverter spring.

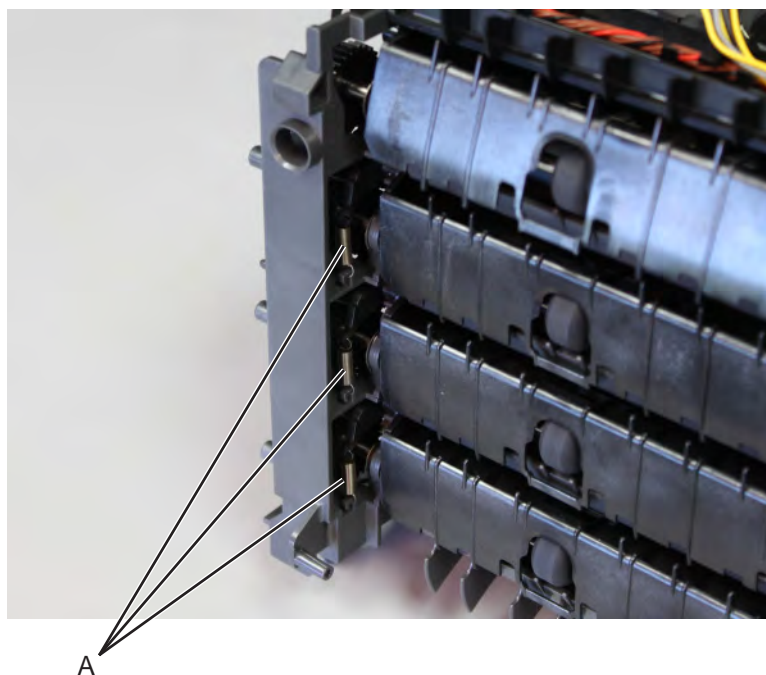

**8** Pry the diverter off its hinge. Dislodge also the other end of the diverter, and then remove the diverter.

## Mailbox middle diverter removal

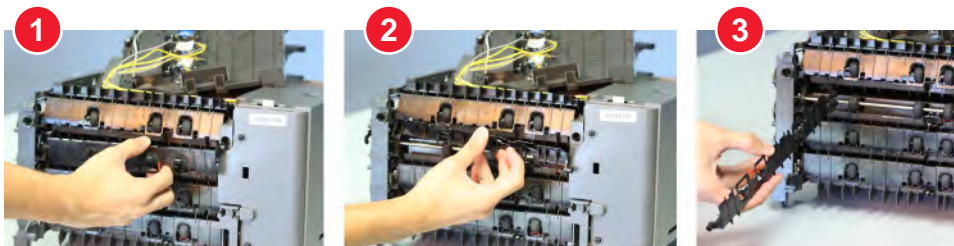

- 1 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655.](#)
- 2 Release the spring (A) from the diverter.

- 3 Pry the right end of the diverter until it is released.

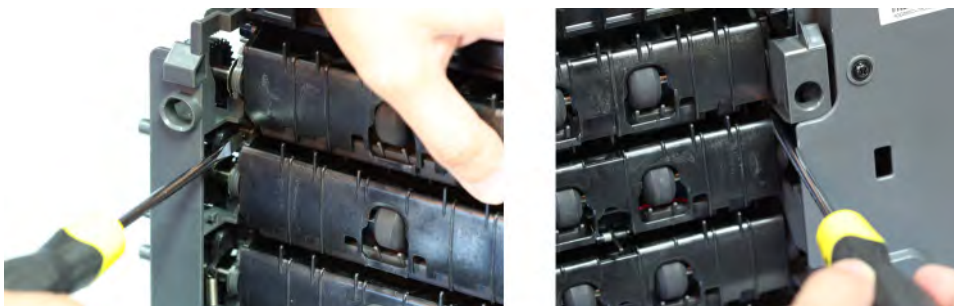

4 Carefully twist until the left end is also released.

5 Remove the diverter.

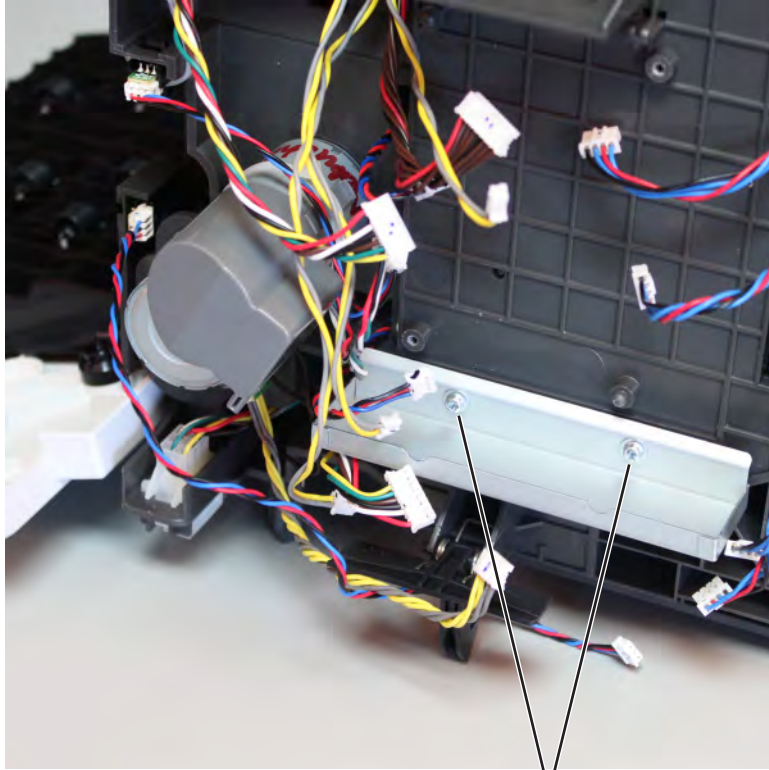

**Installation note:** Use a flat-head screwdriver to push the left and right ends of the diverter in place.

## Mailbox top diverter spring removal

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660](#).
- 2 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655](#).
- 3 Remove the mailbox controller board. See [“Mailbox controller board removal” on page 673](#).

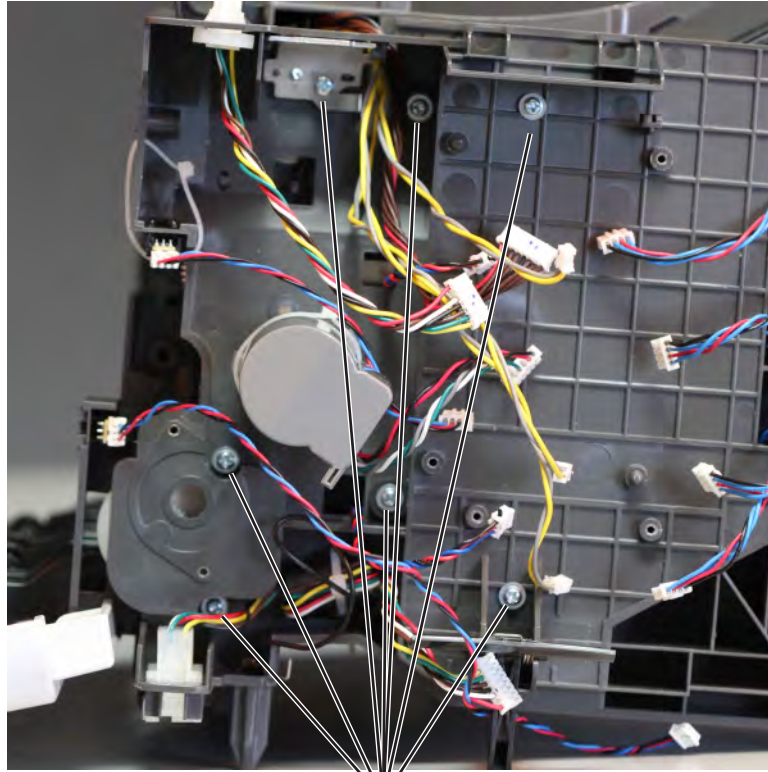

4 Remove the two screws (A), and then remove the shield.

A

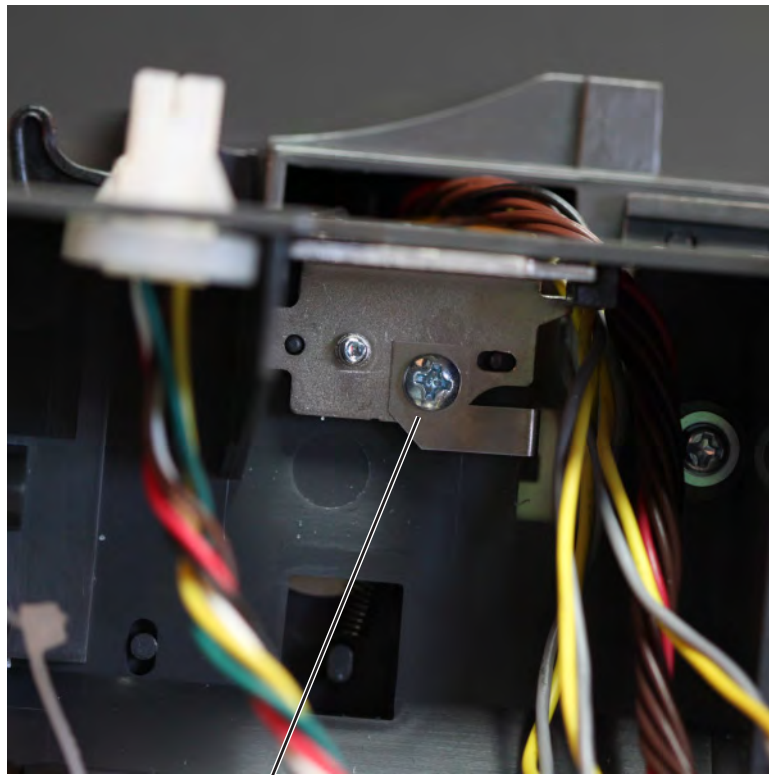

- 5 Remove the seven screws (B), and then release the inner left frame.

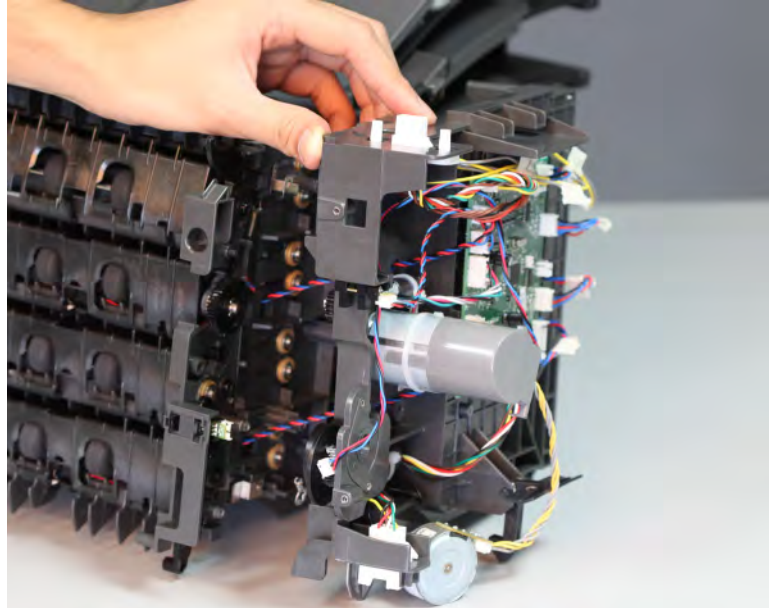

B

**Note:** Pay attention to the original position of the grounding plate (C).

C

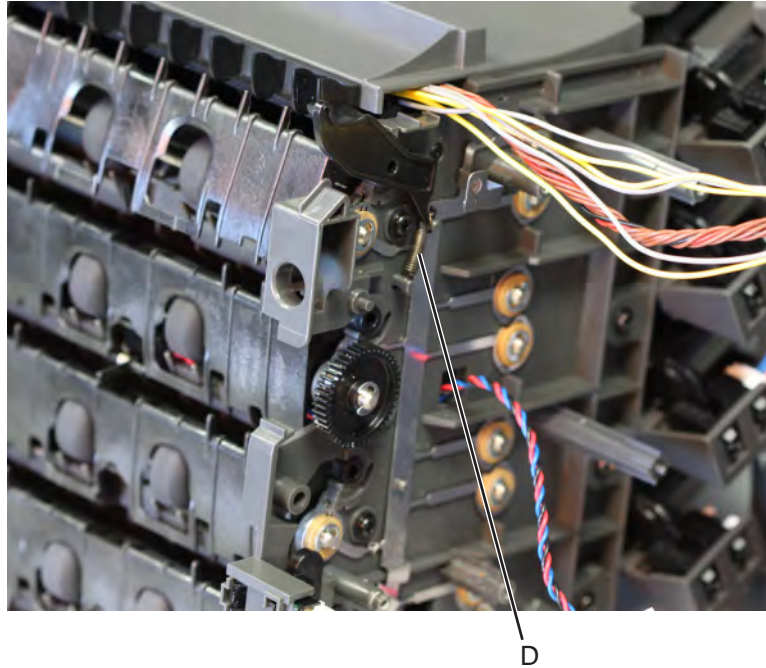

**6** Move away the left inner frame to access the parts underneath it.

Parts removal

**698**

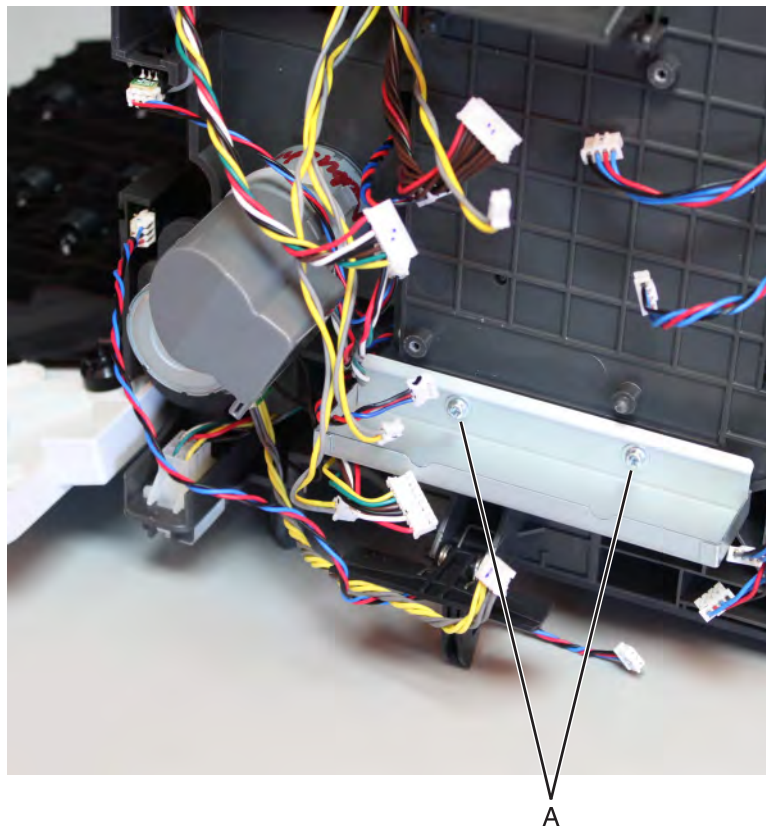

- 7 Unhook, and then remove the diverter spring (D).

### Sensor (mailbox pass-through) removal

- 1 Remove the mailbox left cover. See [“Mailbox left cover removal” on page 660.](#)
- 2 Remove the mailbox rear door. See [“Mailbox rear door removal” on page 655.](#)
- 3 Remove the mailbox controller board. See [“Mailbox controller board removal” on page 673.](#)

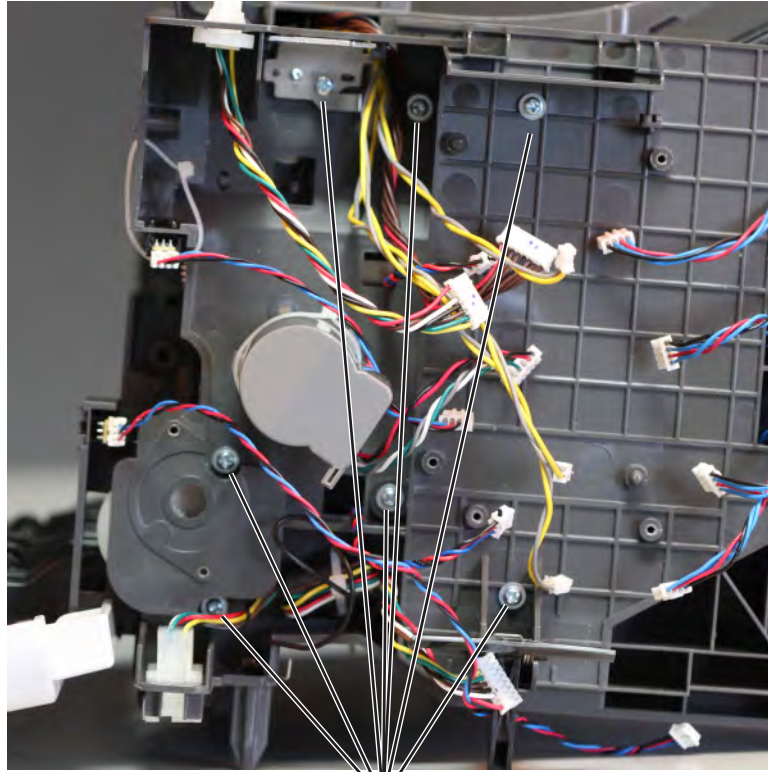

4 Remove the two screws (A), and then remove the shield.

Parts removal

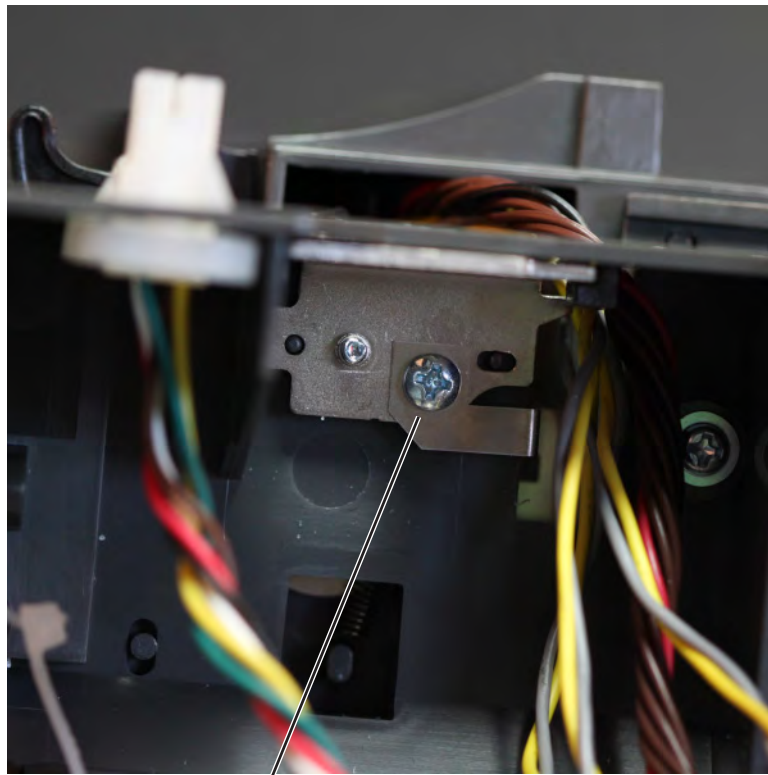

**700**

- 5 Remove the seven screws (B), and then release the inner left frame.

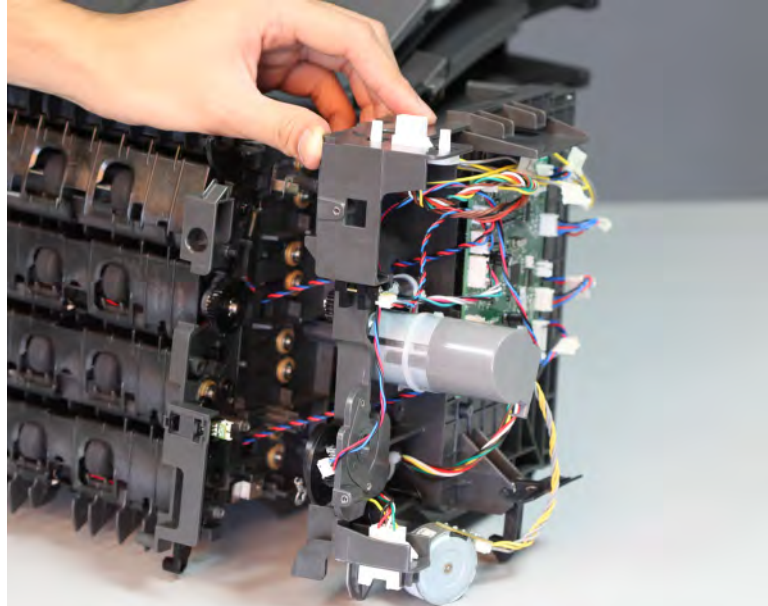

B

**Note:** Pay attention to the original position of the grounding plate (C).

C

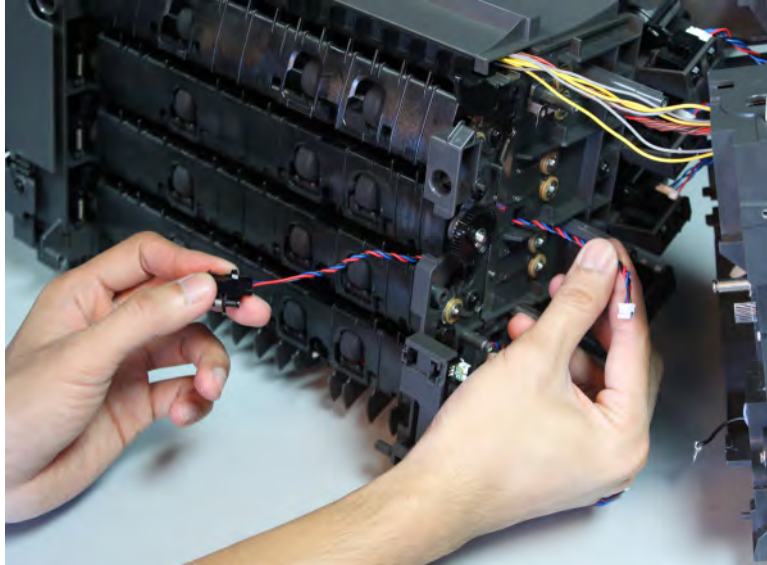

**6** Move away the inner left frame to access the parts underneath it.

Parts removal

**702**

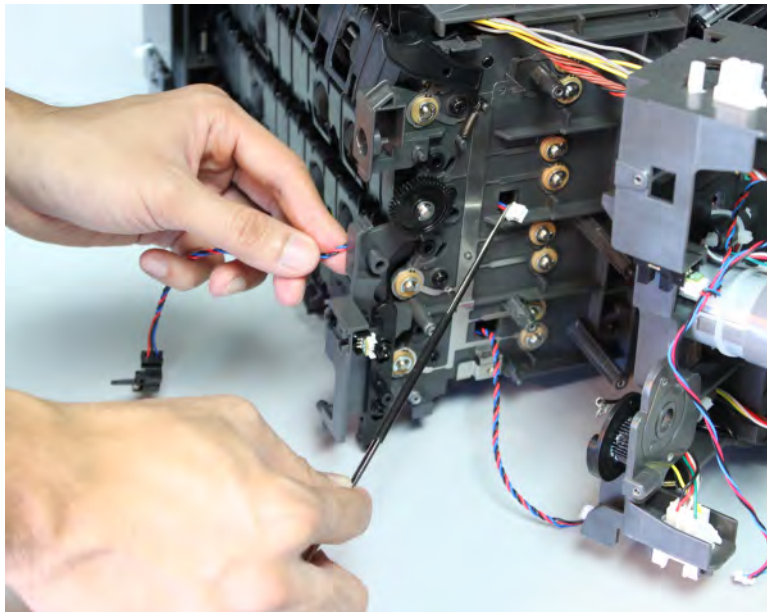

- 7 Pull the sensor off its slot, and then carefully release the cable from its cable guides.

- 8 Thread the sensor cable through the hole until it is removed.

**Note:** Pay attention to the original route of the sensor cable.

**Installation note:** There will be some difficulty inserting the connector through the hole. Use a spring hook to thread the connector through the hole.

## Optional staple, hole punch finisher removals

### Optional staple, hole punch finisher removal

- 1 Press the latches to unlock the finisher.
- 2 Remove the finisher.

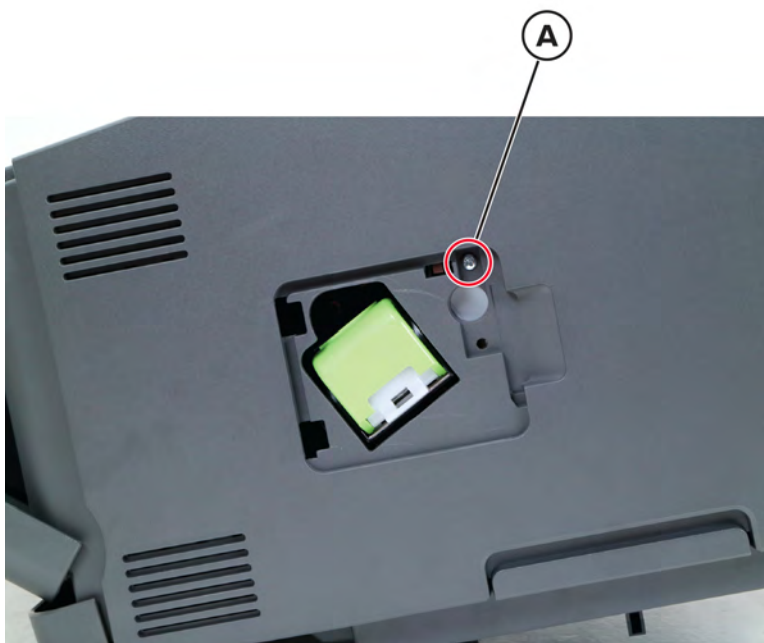

## Left staple cartridge access door removal

- 1 Open the access door.
- 2 Pull, and then remove the door.

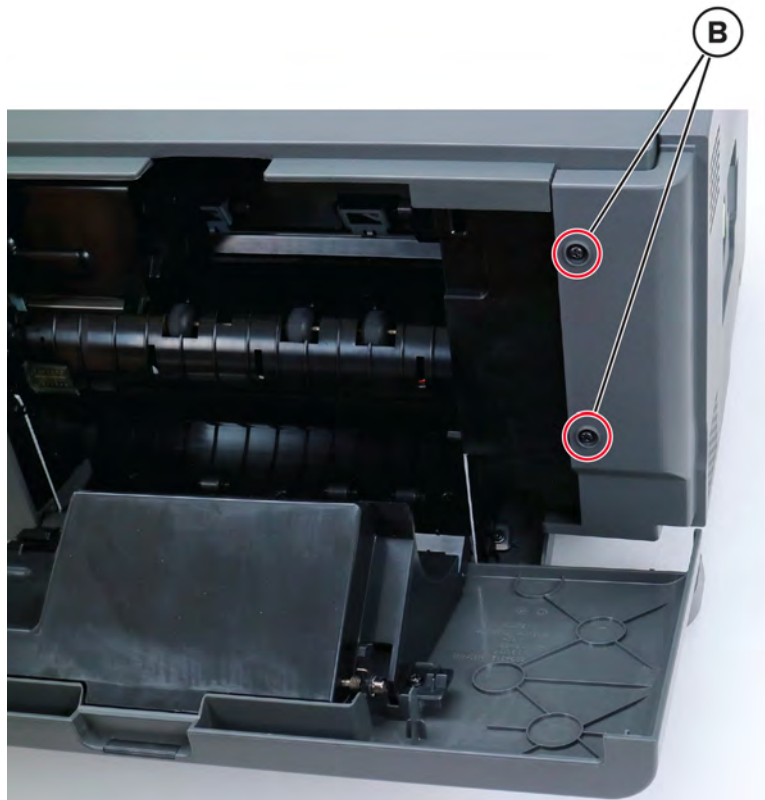

## Staple, hole punch finisher left cover removal

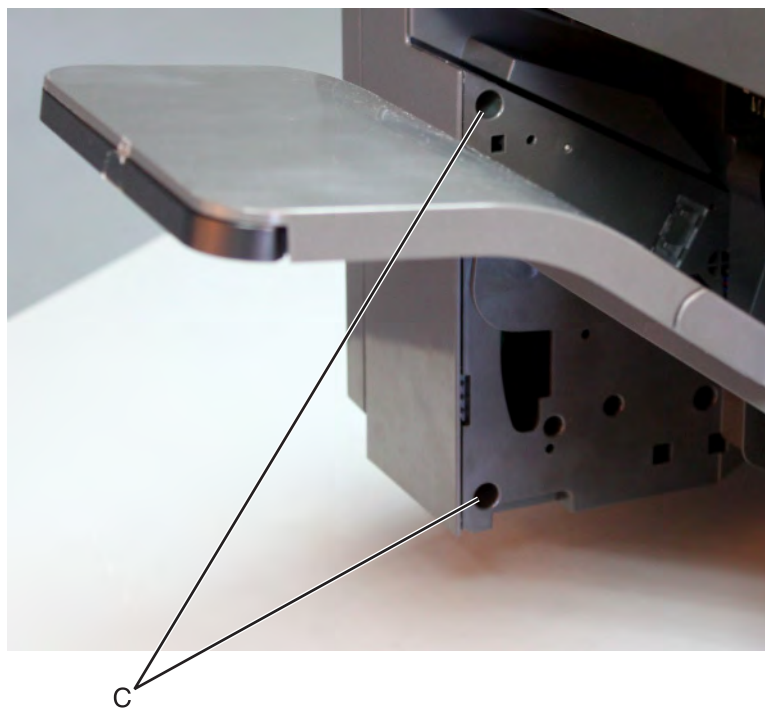

- 1 Remove the left staple cartridge access door. See [“Left staple cartridge access door removal” on page 705](#).
- 2 Remove the screw (A).

**3** Open the rear door, and then remove the two screws (B).

**4** From the front, remove the two screws (C).

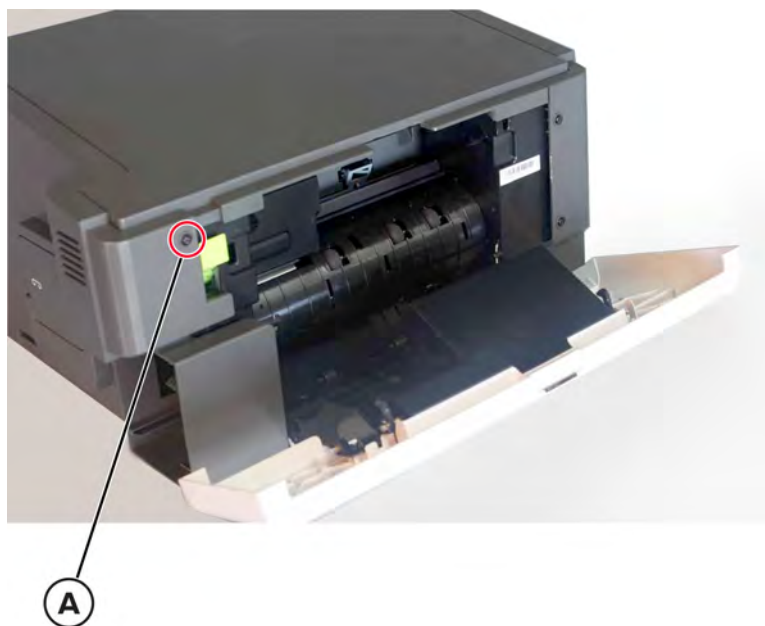

**5** Remove the cover.

Parts removal

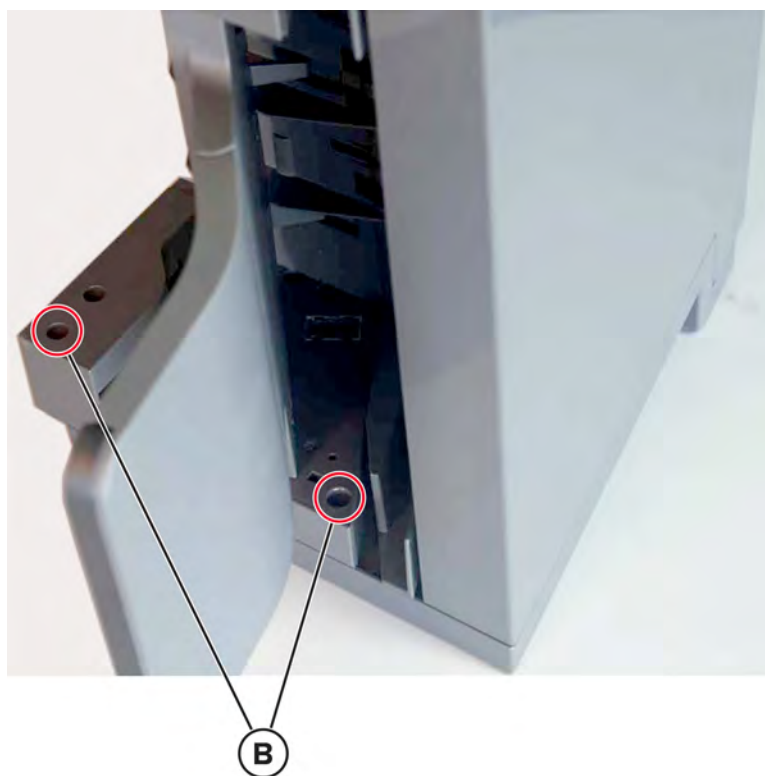

**706**

## Staple, hole punch finisher right cover removal

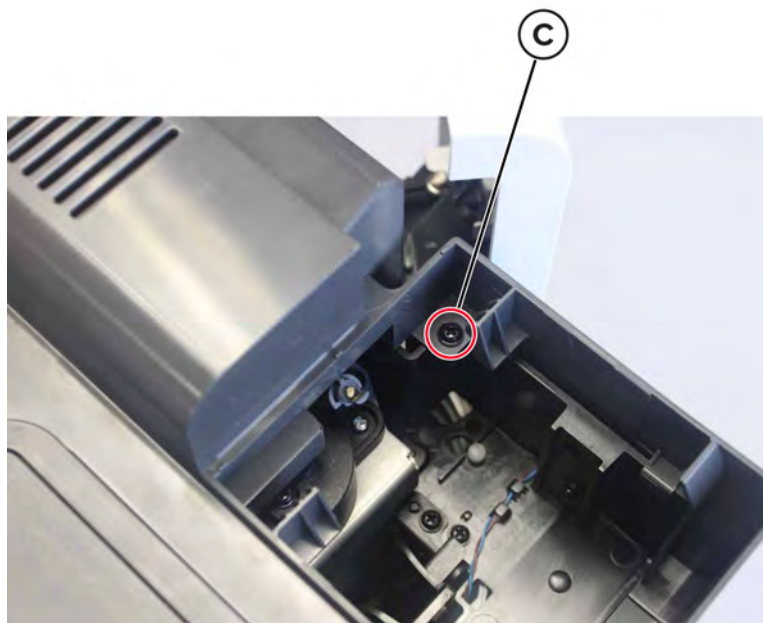

- 1 Open the rear door, and then remove the screw (A).

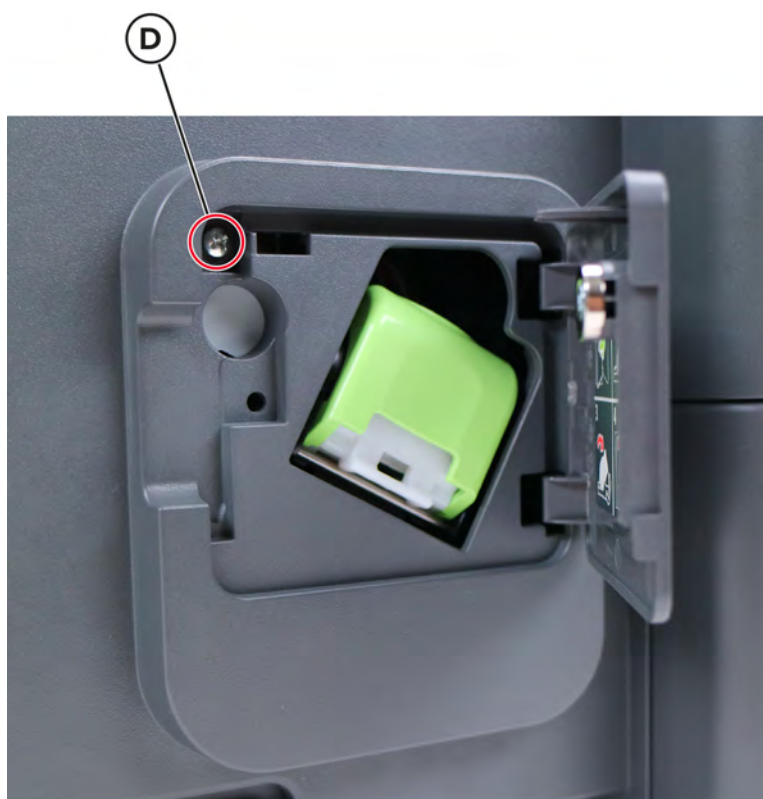

- 2 From the front, remove the two screws (B).

- 3** Remove the hole punch box, and then remove the screw (C).

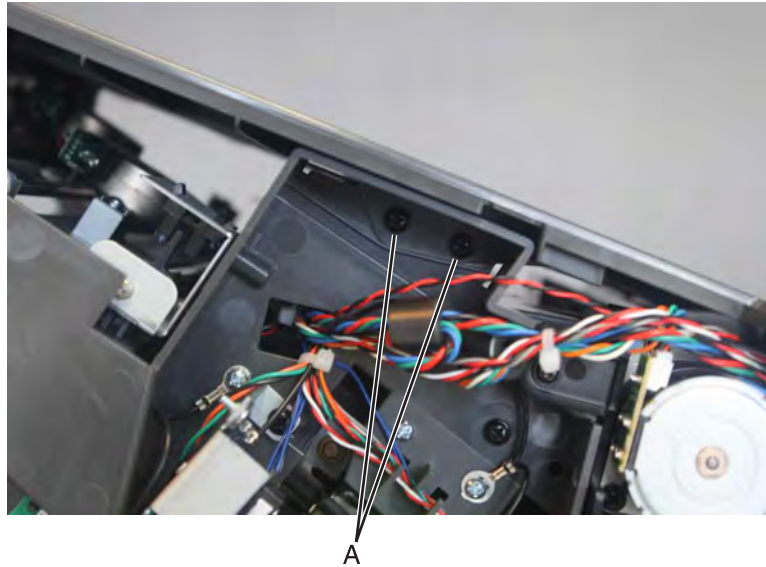

- 4** Open door F, and then remove the screw (D).

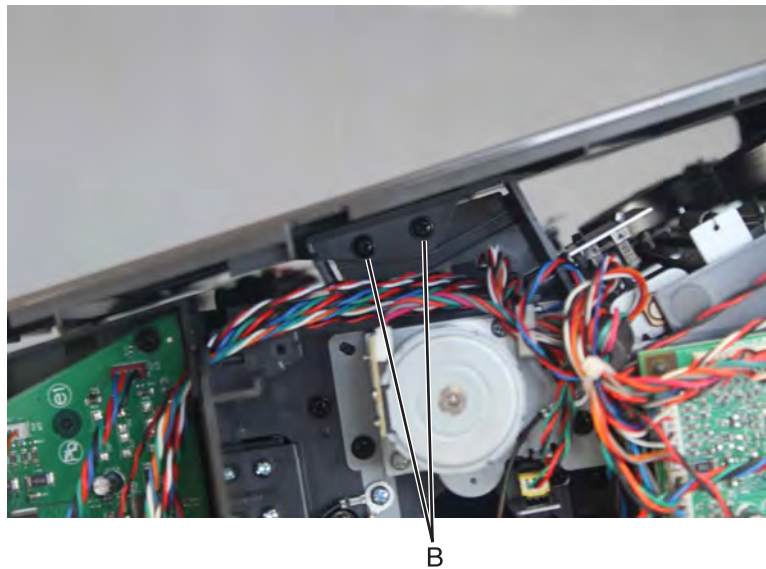

- 5** Remove the cover.

## Staple, hole punch finisher top cover removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 3 From the right side, remove the two screws (A).

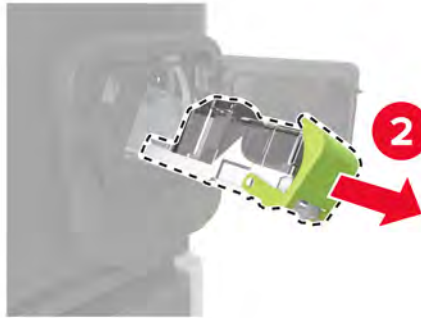

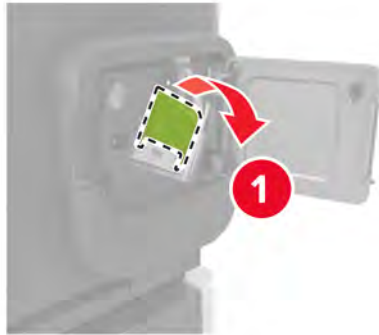

- 4 From the left side, remove the two screws (B).

- 5 Remove the cover.

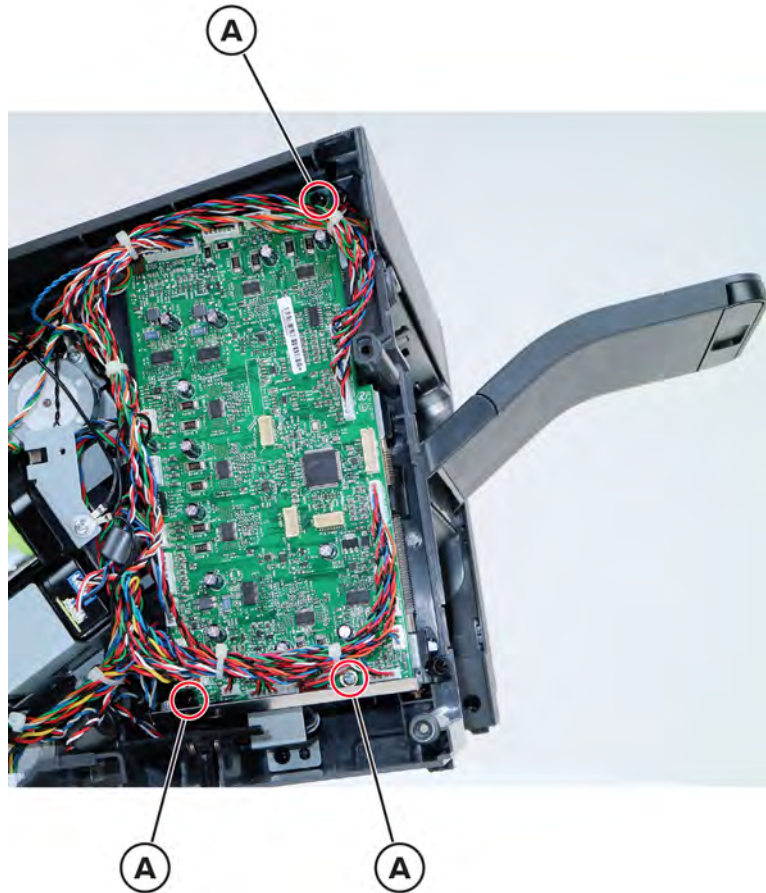

## Staple cartridge holder removal

- 1 Open the staple cartridge access door.
- 2 Remove the cartridge holder.

## Staple, hole punch finisher controller board removal

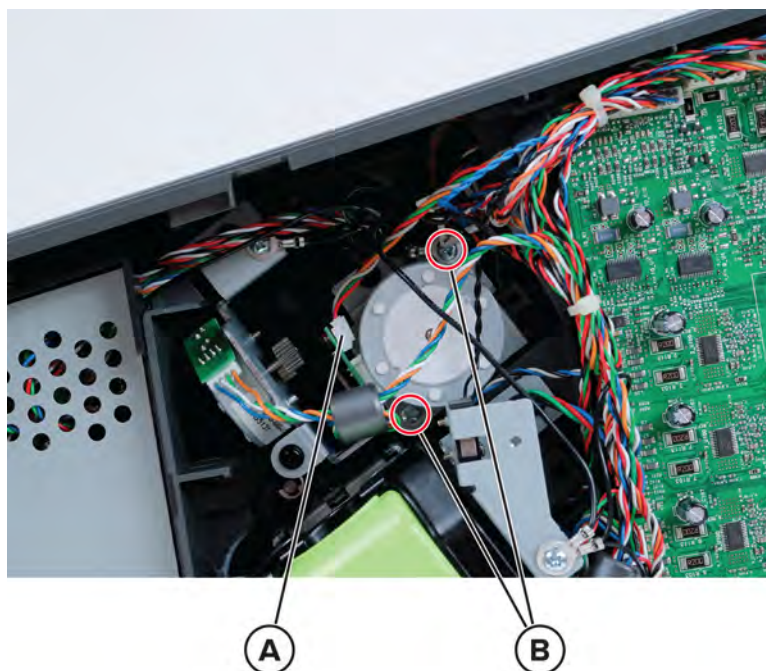

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Disconnect all the cables from the controller board, and then remove the three screws (A).

- 3 Remove the board.

## Motor (SHPF paddle) removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Disconnect the cable (A), and then remove the two screws (B).

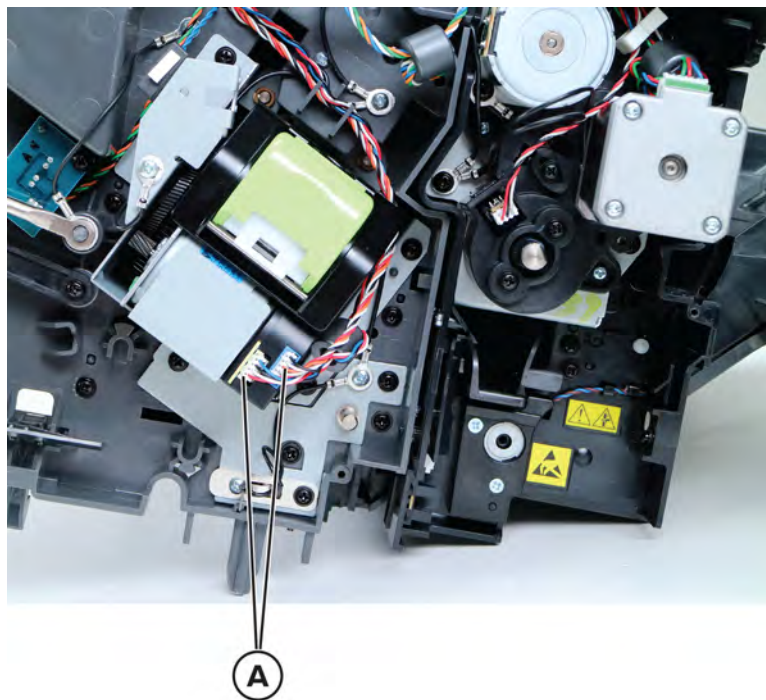

- 3 Remove the motor.

## SHPF staple cartridge door close limit switch removal

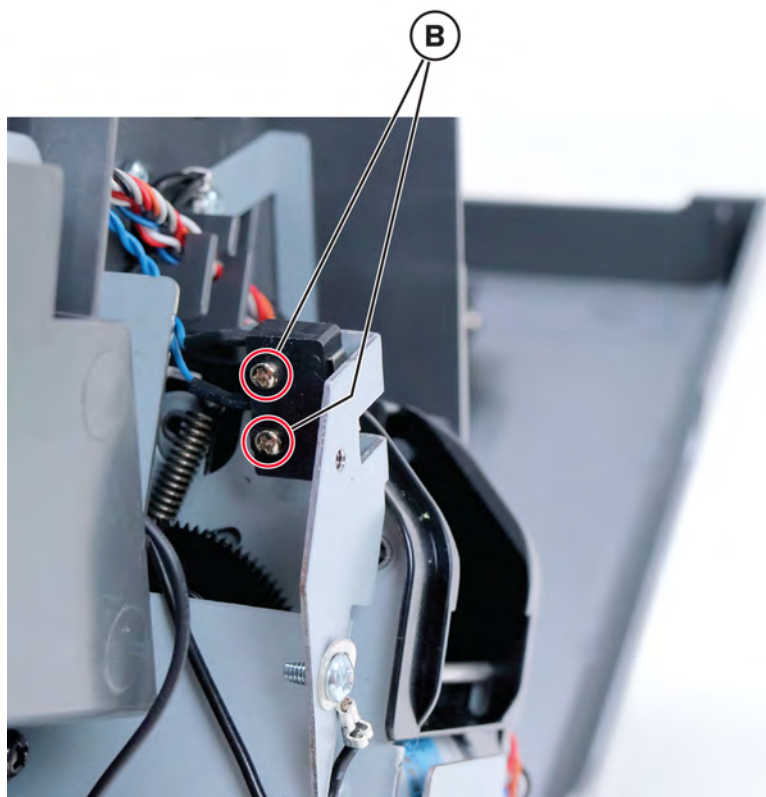

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)

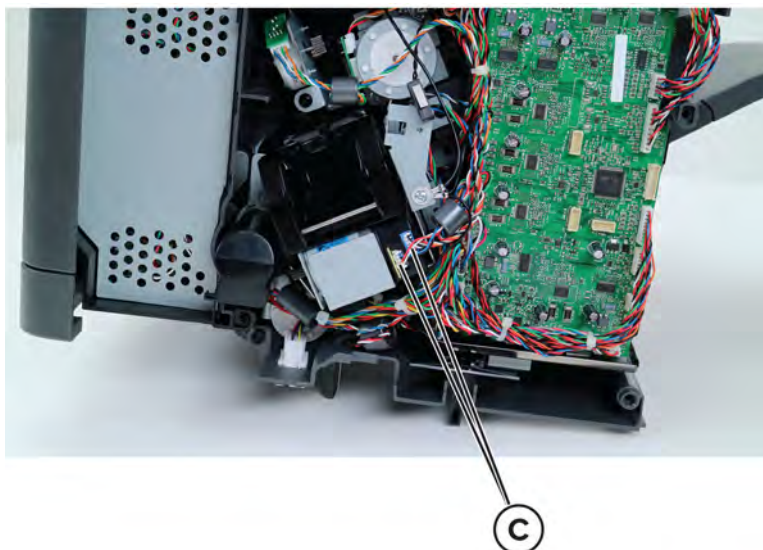

**3** From the right side, disconnect the two cables (A).

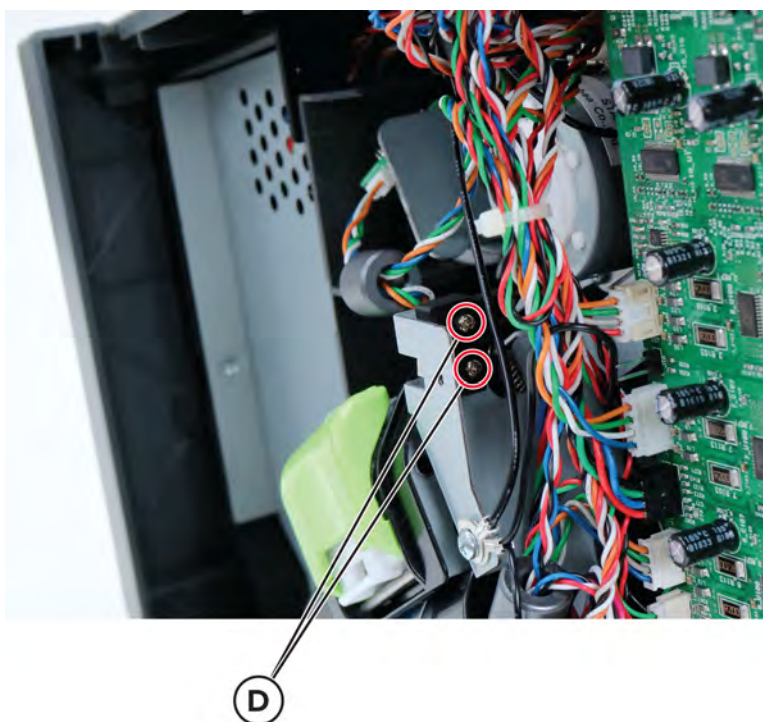

**4** Remove the screws (B), and then release the right limit switch.

- 5 From the left side, disconnect the two cables (C)

- 6 Remove the two screws (D), and then release the left limit switch.

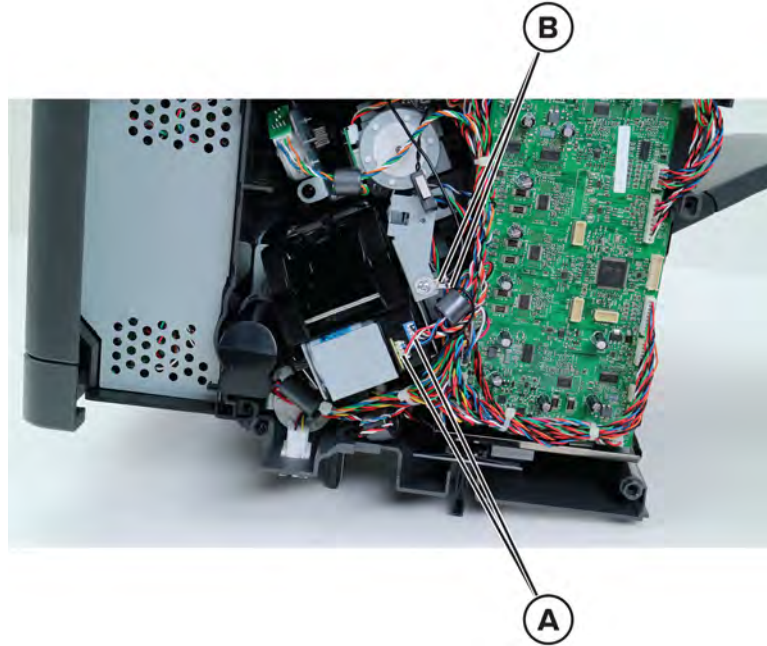

- 7 Disconnect the limit switch cable from the controller board.

- 8 Release, and then remove the limit switch.

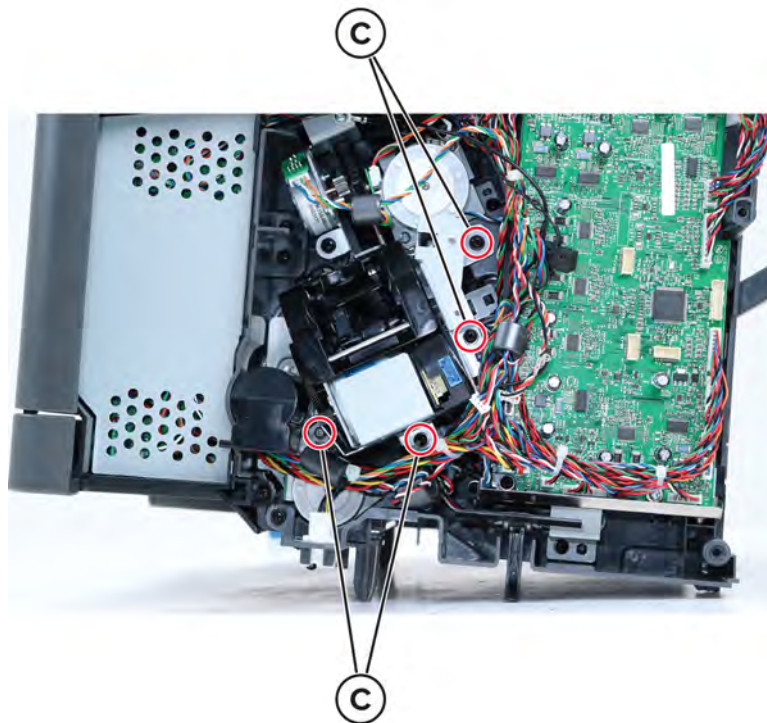

**Note:** Pay attention to the original route of the cables.

## Left staple unit removal

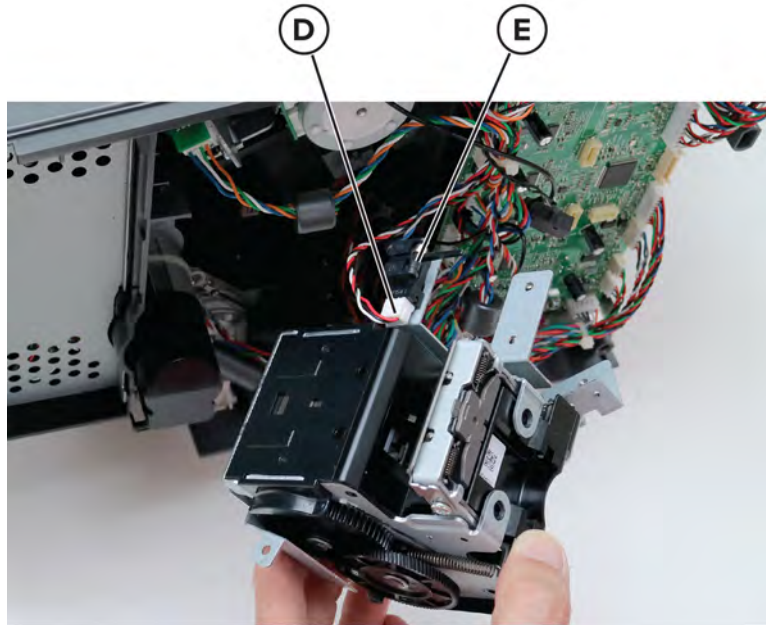

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Disconnect the cables (A) and the two ground cables (B).

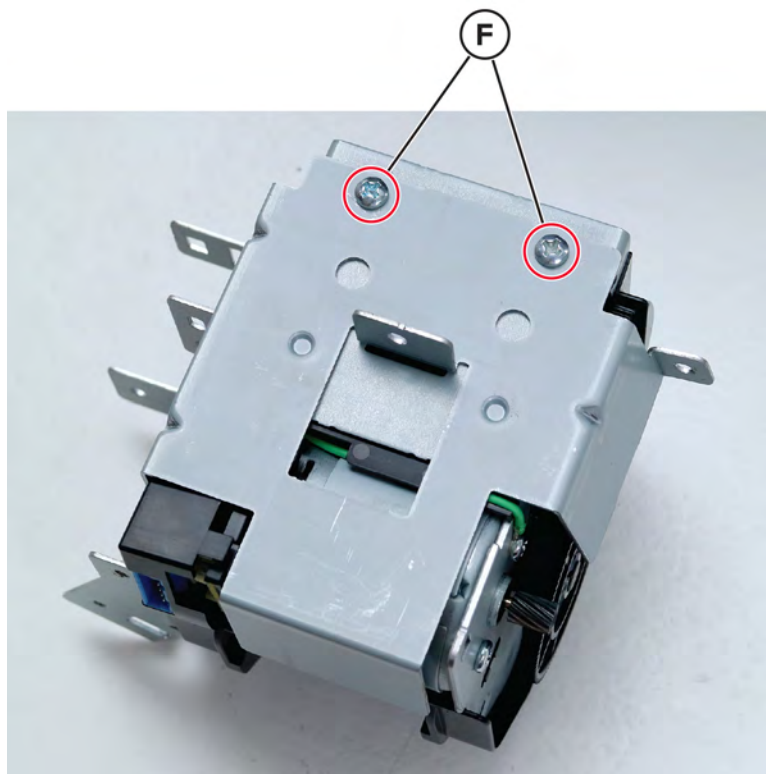

- 3 Remove the four screws (C), and then release the bracket.

- 4 Disconnect the cable connector (D), and then remove the sensor (SHPF staple throat paper present) (E).

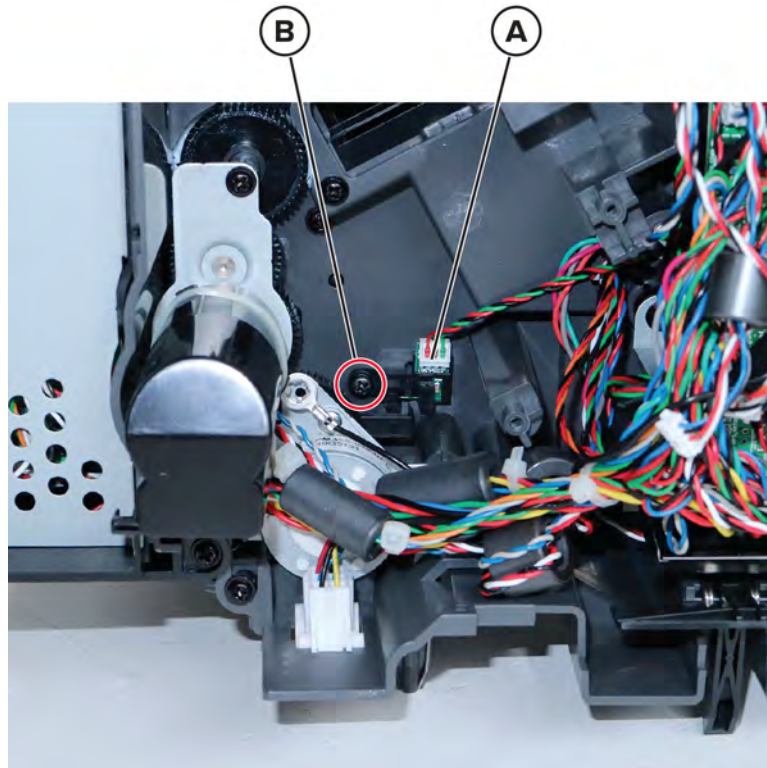

- 5 Remove the two screws (F).

- 6 Remove the staple unit from the bracket.

## Sensor (SHPF diverter plunger) removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the left staple unit. See [“Left staple unit removal” on page 715.](#)
- 3 Disconnect the cable (A), and then remove the screw (B).

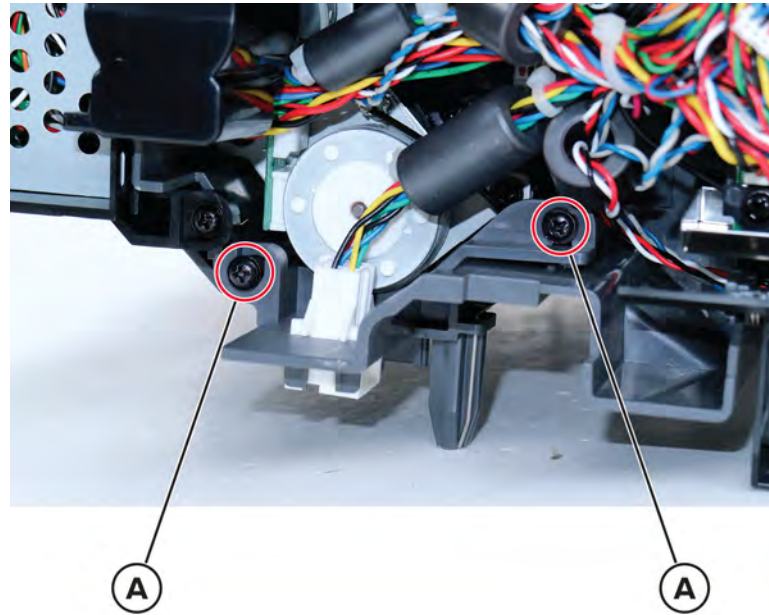

- 4 Remove the sensor.

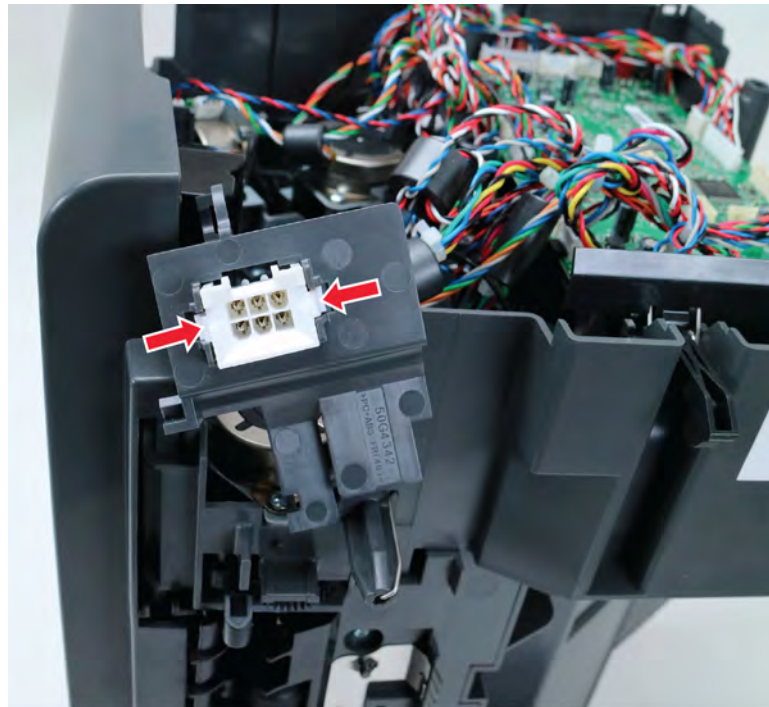

## Staple, hole punch finisher interface cable removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the left staple unit. See [“Left staple unit removal” on page 715.](#)

- 3 Remove the two screws (A), and then release the connector bracket.

- 4 Press the latches to release, and then dislodge the connector.

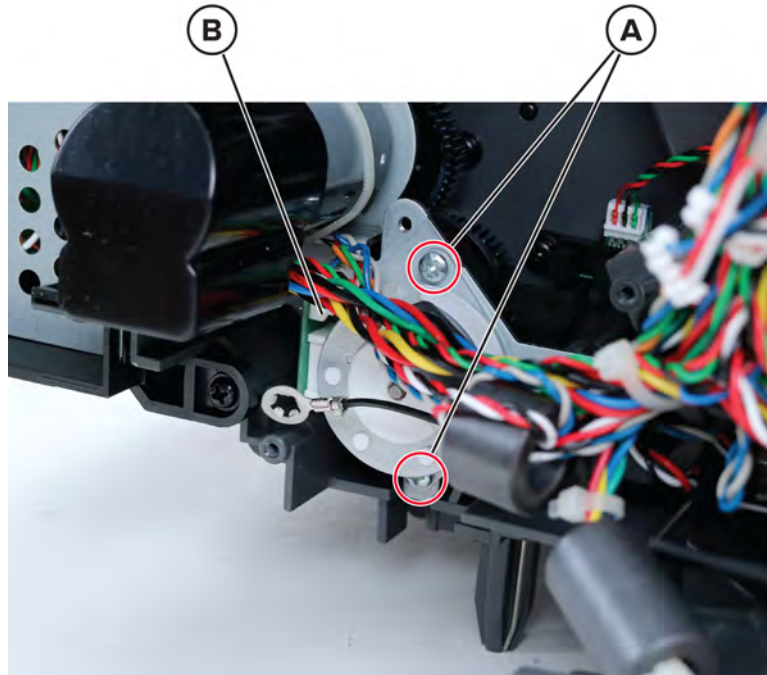

- 5 Disconnect the interface cable from the controller board, and then remove it.

## Motor (SHPF diverter plunger) removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the left staple unit. See [“Left staple unit removal” on page 715.](#)

- 3 Remove the two screws (A), and then disconnect the cable (B).

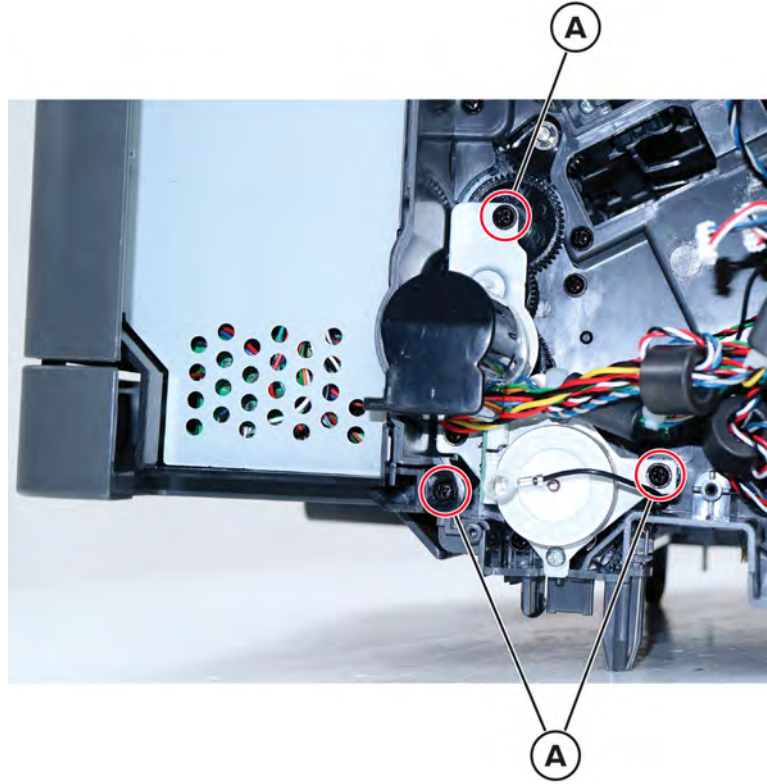

- 4 Remove the motor.

## Motor (SHPF transport) removal

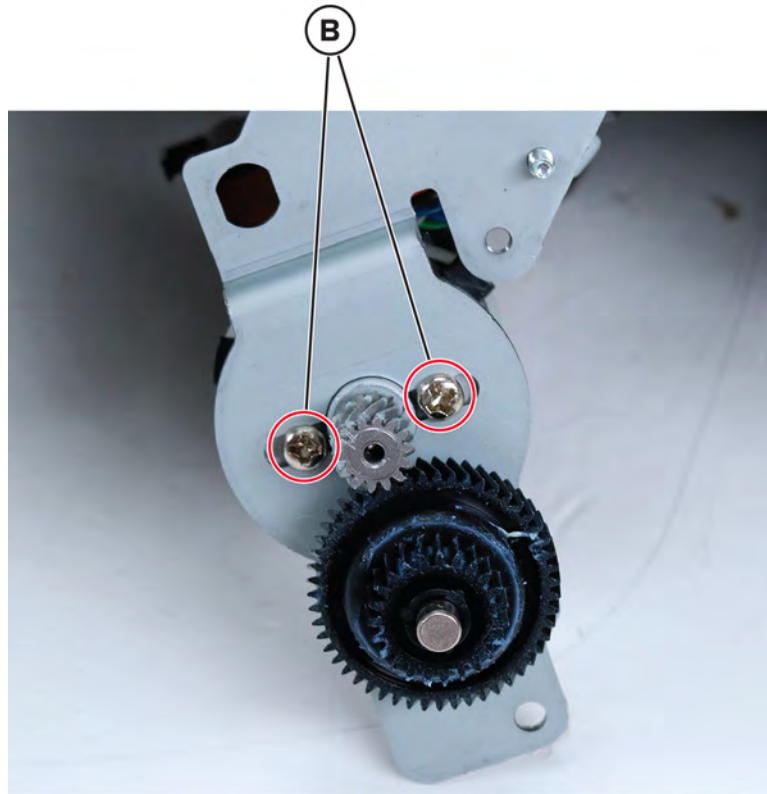

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the left staple unit. See [“Left staple unit removal” on page 715.](#)

**3** Remove the three screws (A), and then disconnect all the cables from the motor bracket.

- 4 Behind the motor bracket, remove the two screws (B).

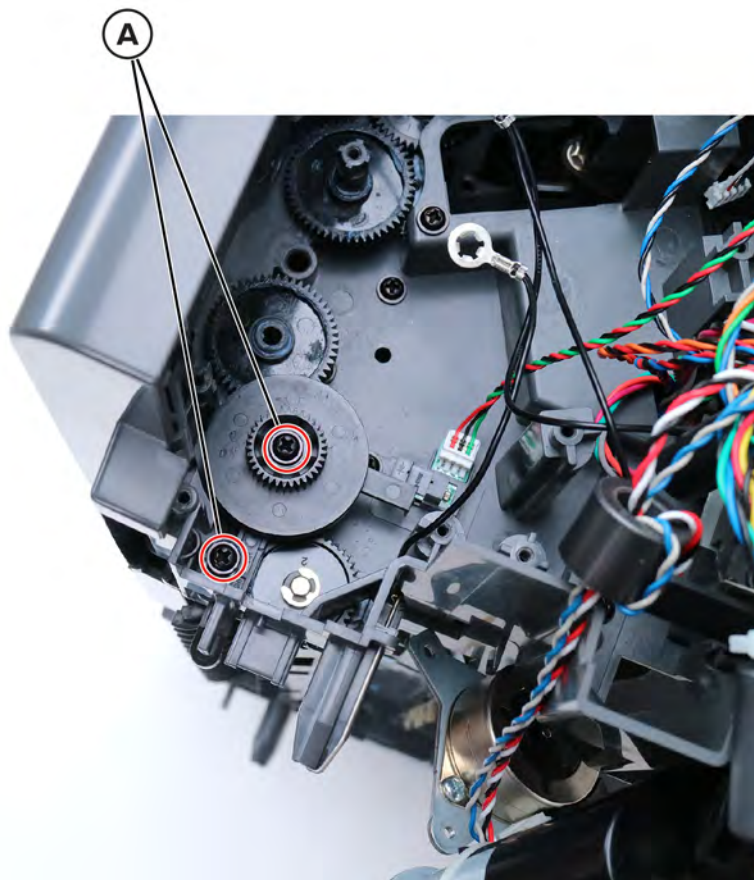

- 5 Remove the motor.

## **SHPF diverter plunger assembly removal**

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher interface cable. See [“Staple, hole punch finisher interface cable removal” on page 717.](#)
- 3 Release the motor bracket. See [“Motor \(SHPF transport\) removal” on page 719.](#)

- 4 Remove the two screws (A).

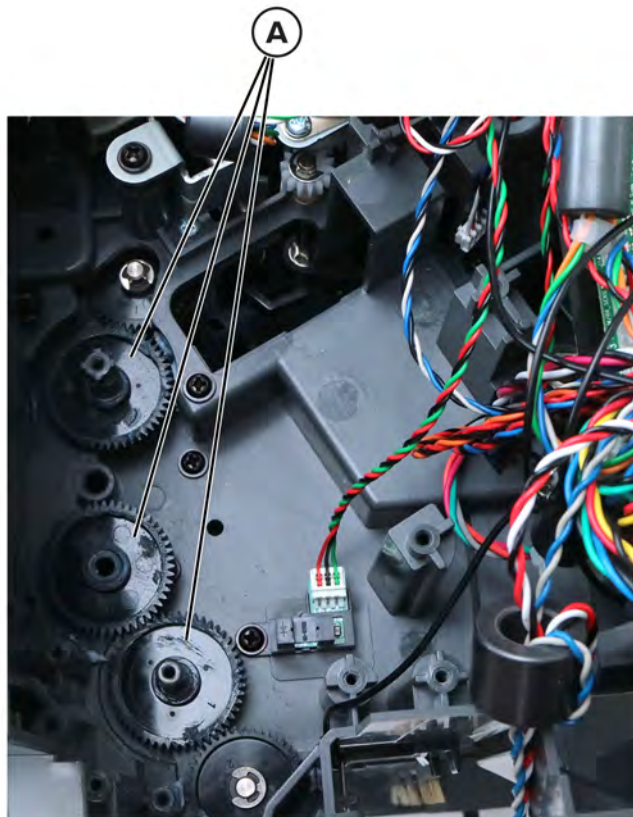

- 5 Remove the diverter plunger assembly.

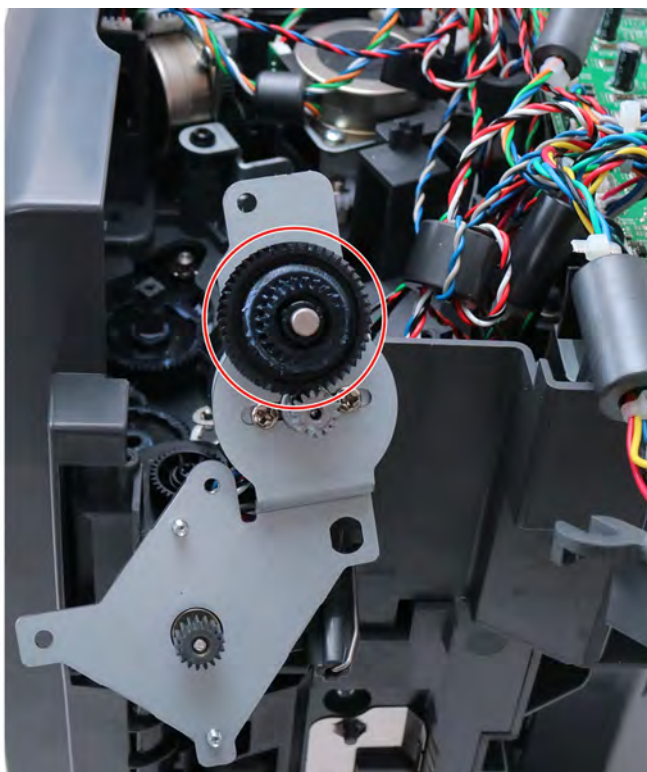

## **SHPF drive gear assembly removal**

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher interface cable. See [“Staple, hole punch finisher interface cable removal” on page 717.](#)
- 3 Release the motor bracket. See [“Motor \(SHPF transport\) removal” on page 719.](#)
- 4 Remove the staple, hole punch finisher diverter plunger assembly. See [“SHPF diverter plunger assembly removal” on page 721.](#)

5 Remove the three gears (A).

6 Remove the gear behind the motor bracket.

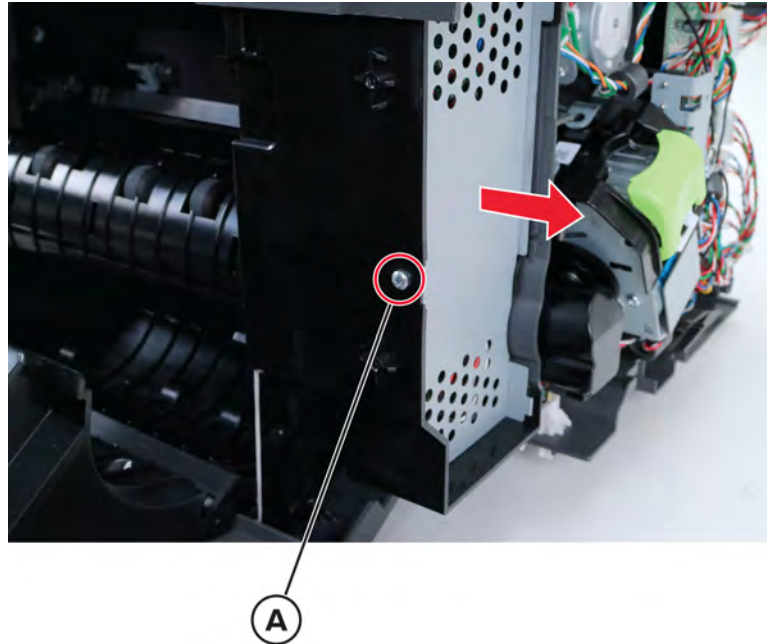

Parts removal

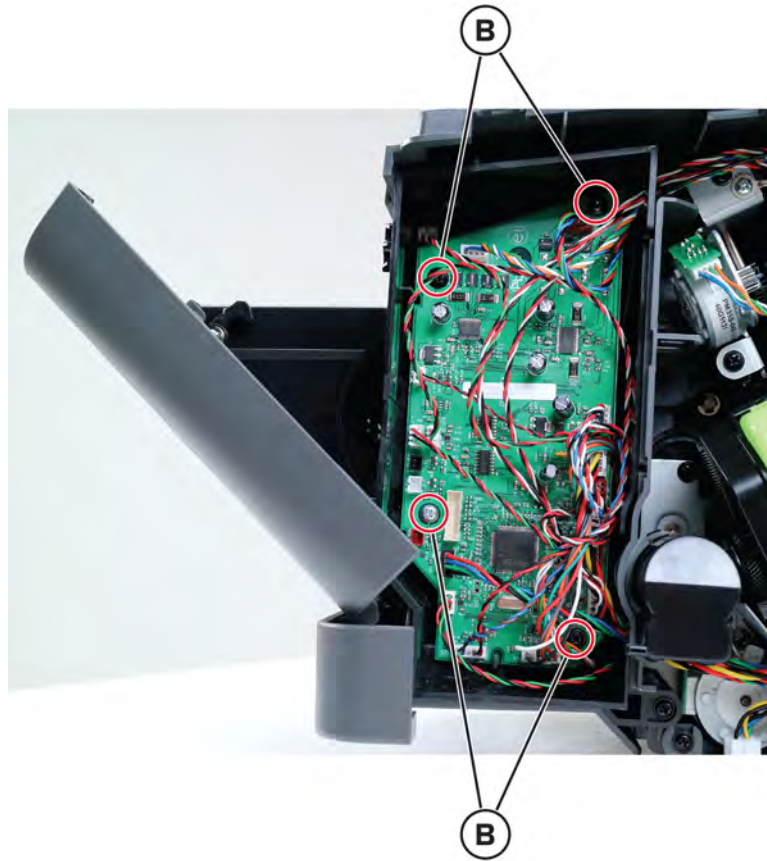

723

## Sensor (SHPF rear door interlock) removal

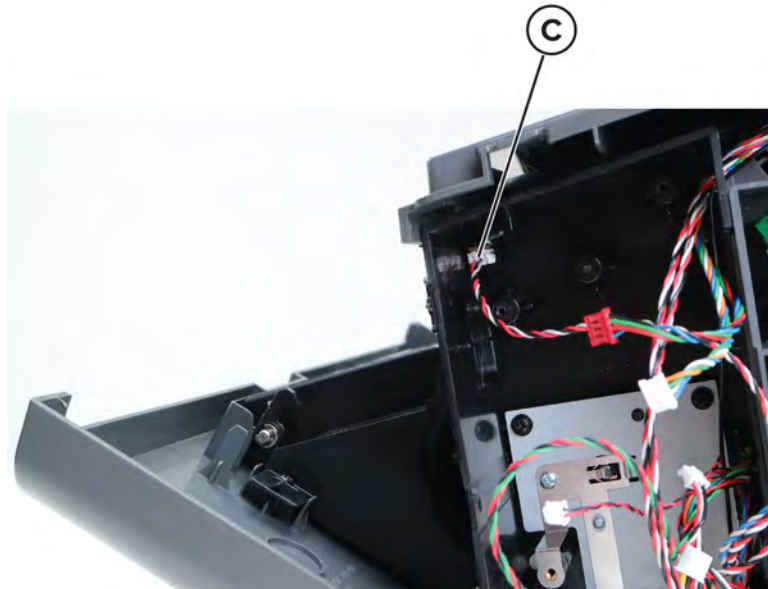

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Open the rear door.
- 3 Remove the screw (A), and then remove the plate.

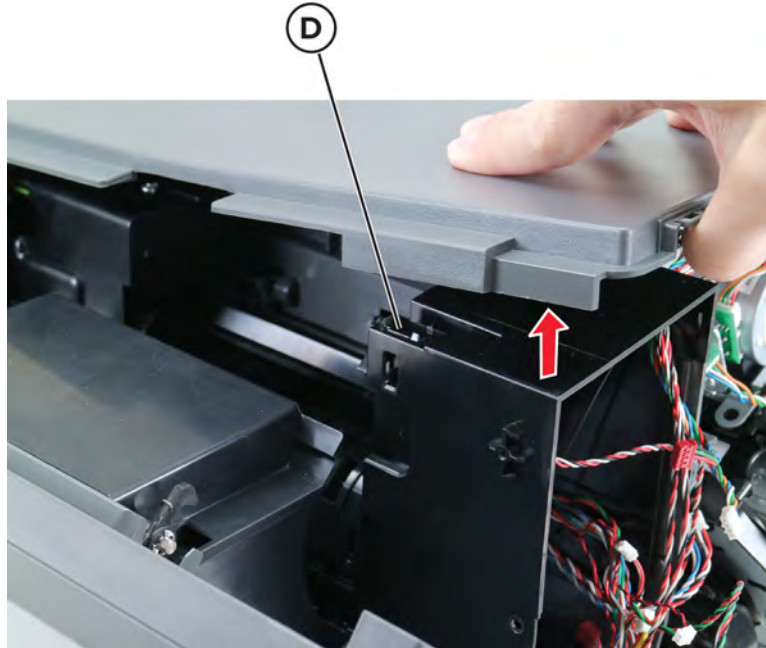

- 4 Disconnect all the HPU controller board cables, remove the four screws (B), and then remove the board.

- 5 Disconnect the sensor cable (C).

- 6 Slightly lift the top cover, and then remove the sensor retainer (D).

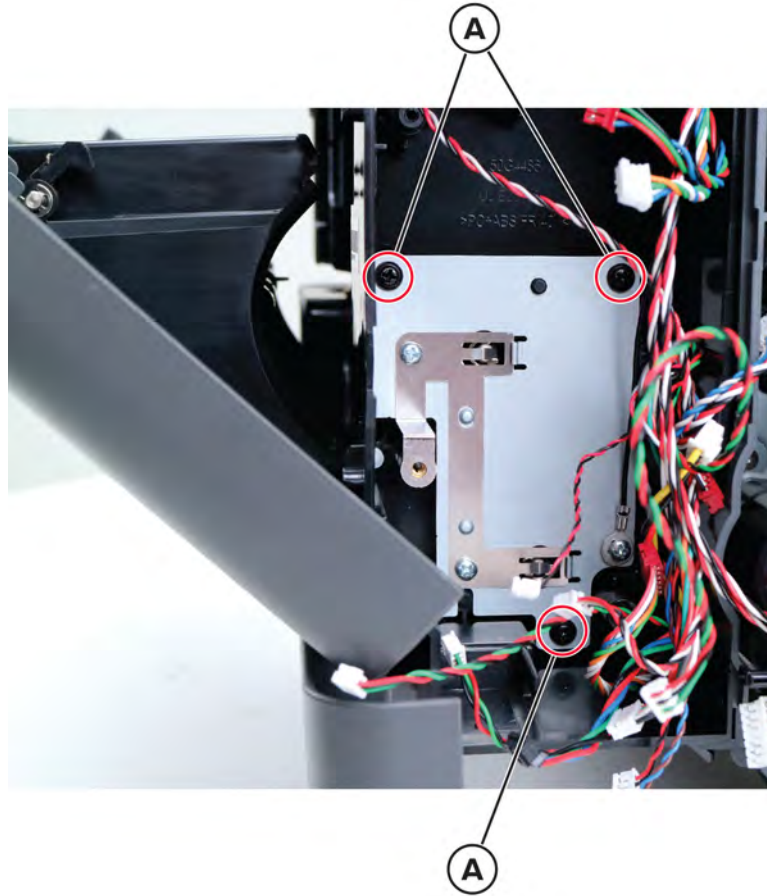

- 7 Remove the sensor.

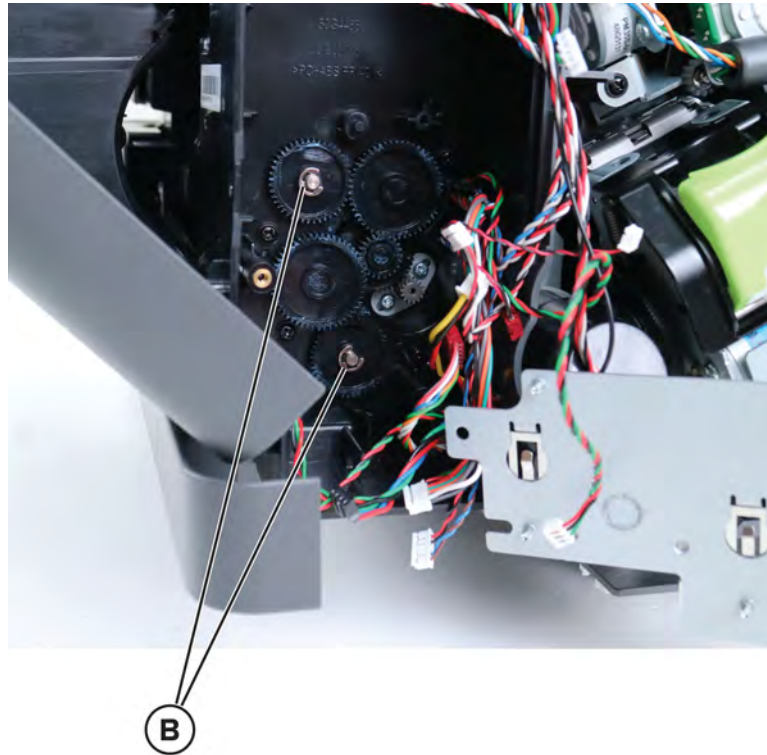

## Punch drive gears removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the HPU controller board. See [“Sensor \(SHPF rear door interlock\) removal” on page 724.](#)

**3** Remove the three screws (A), and then remove the plate.

- 4 Remove the two E-clips (B), and then remove the gears.

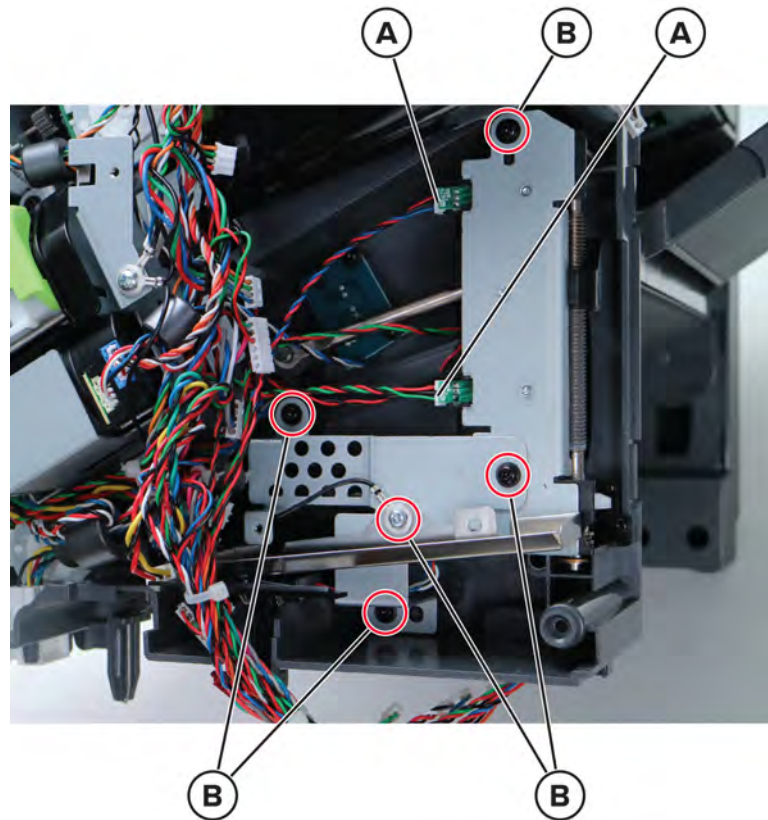

## Staple, hole punch finisher elevator drive removal

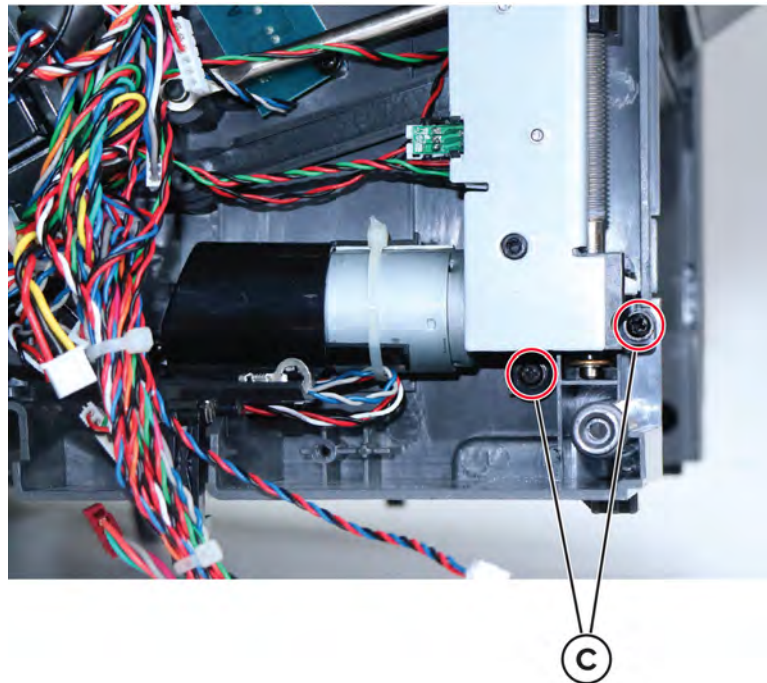

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the controller board. See [“Staple, hole punch finisher controller board removal” on page 711.](#)

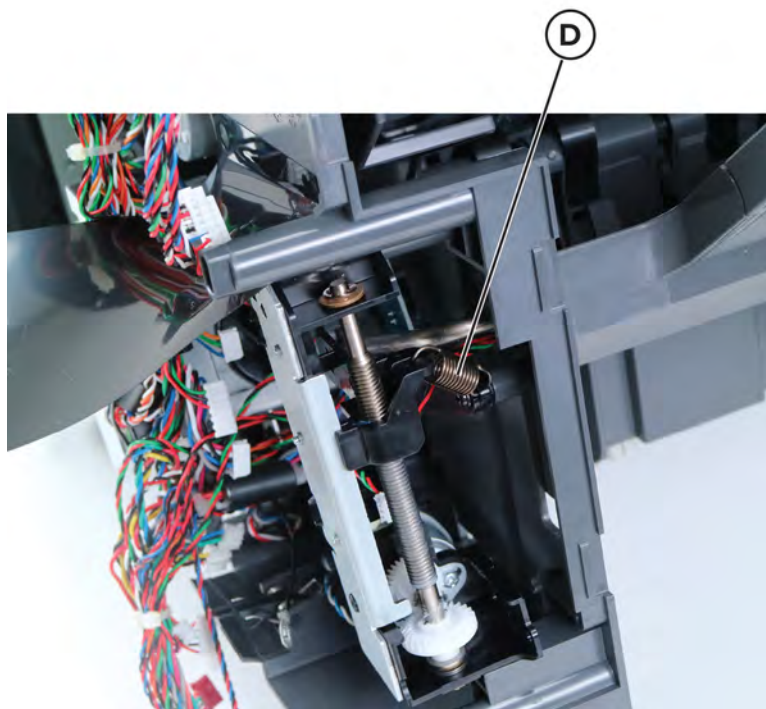

**3** Disconnect the two cables (A), and then remove the five screws (B).

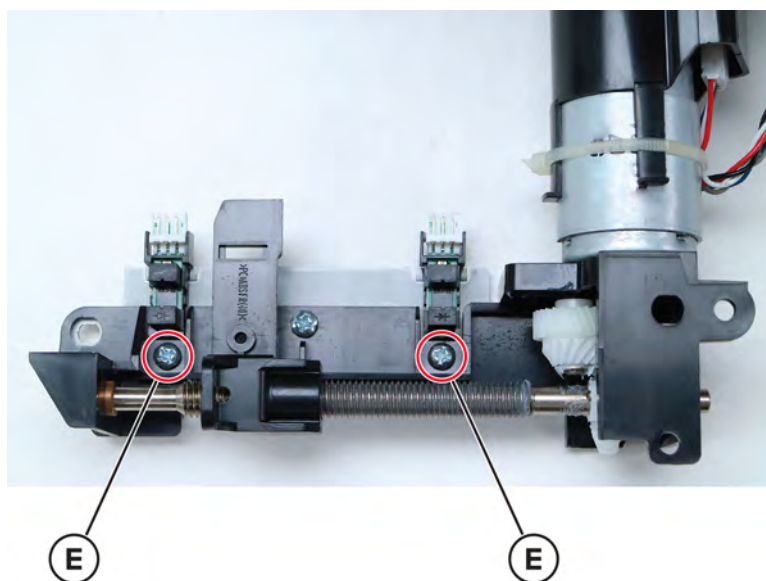

**4** Remove the two screws (C).

- 5 Release the spring (D), and then remove the elevator drive.

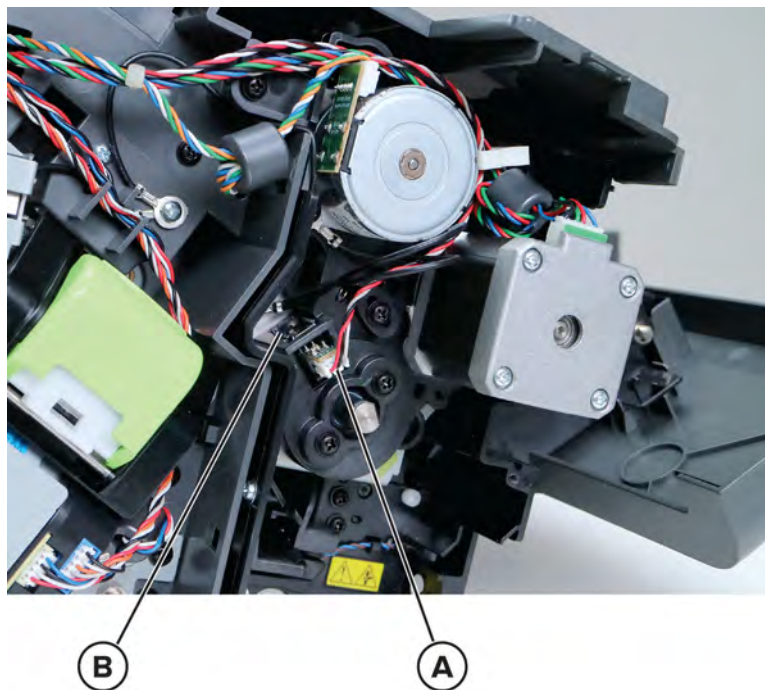

- 6 Remove the two screws (E), and then remove the two sensors from the elevator drive.

## Sensor (hole punch) removal

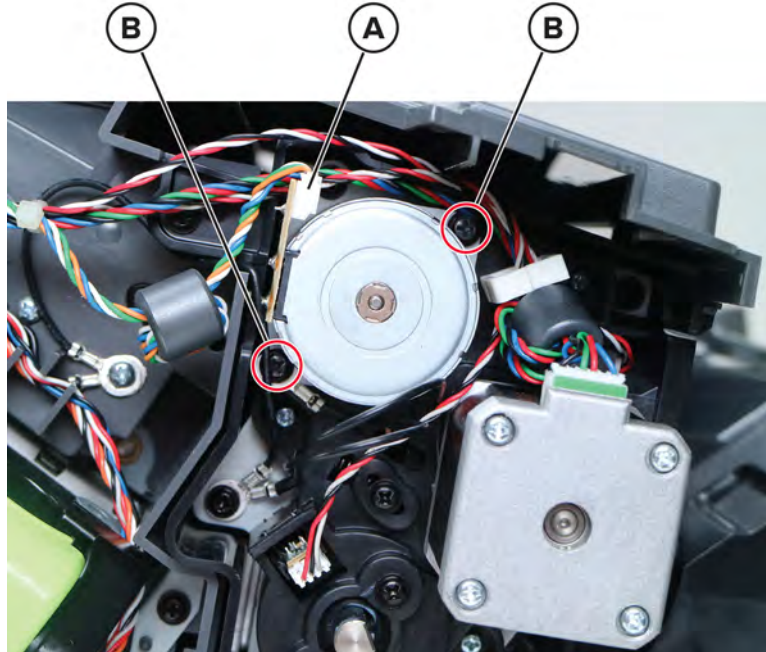

- 1 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher controller board removal” on page 711](#).
- 2 Disconnect the cable (A), and then remove the sensor retainer (B).

- 3 Remove the sensor.

## Motor (HPU carriage) removal

- 1 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 2 Disconnect the cable (A), and then remove the two screws (B).

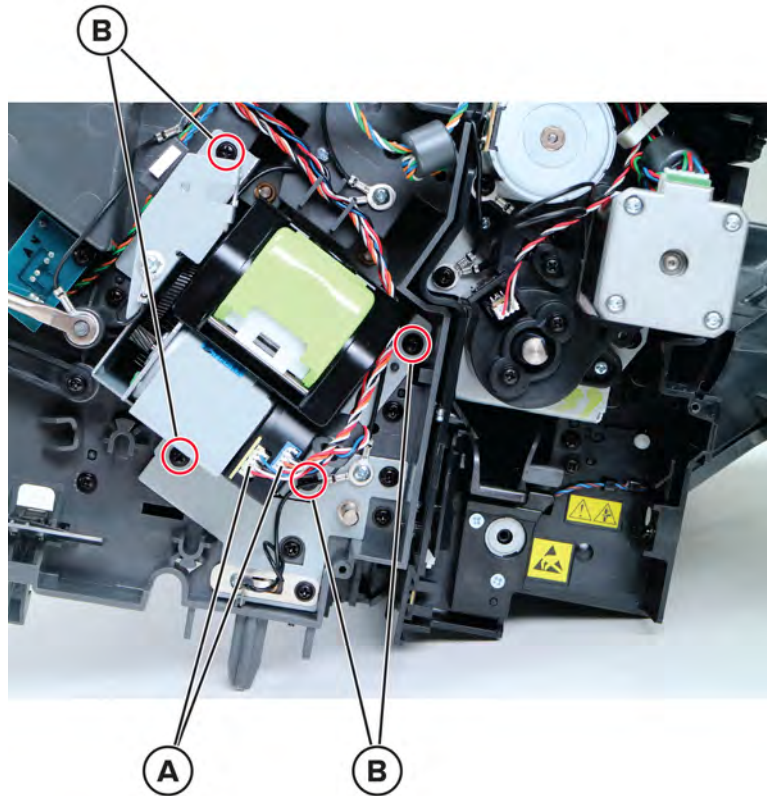

- 3 Remove the motor.

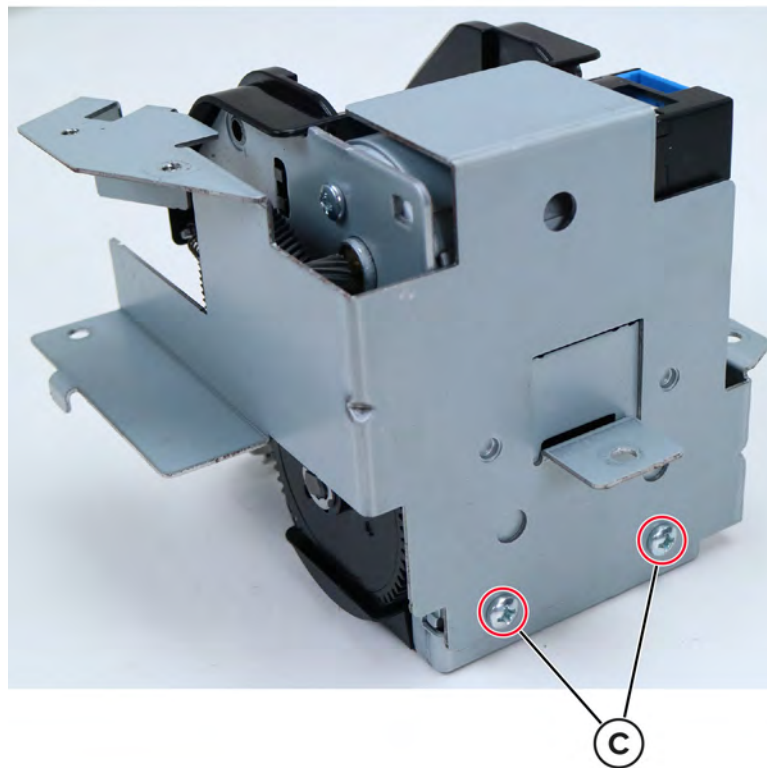

## Right staple unit removal

- 1 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 2 Release the right stapler door close limit switch. See [“SHPF staple cartridge door close limit switch removal” on page 712.](#)

**3** Disconnect the two cables (A), remove the four screws (B), and then remove the bracket.

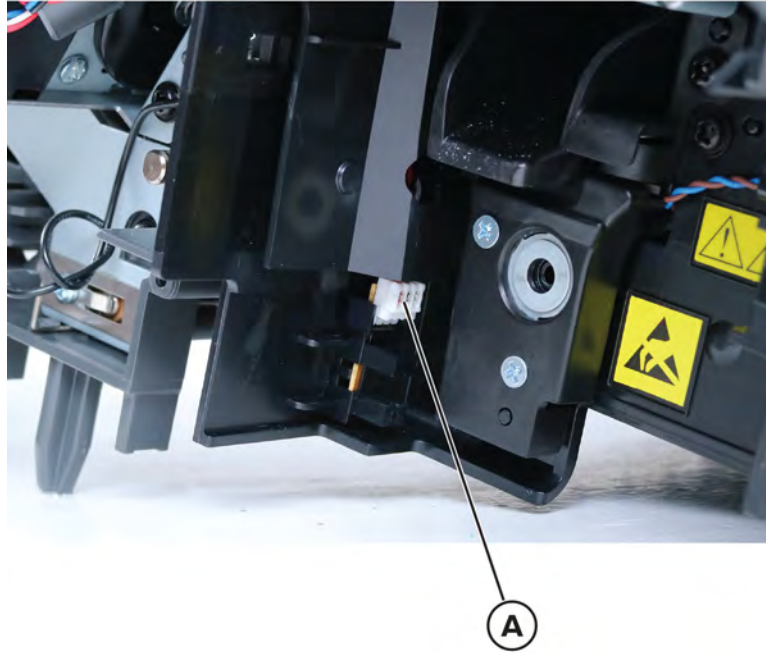

**4** Remove the two screws (C), and then remove the staple unit.

Parts removal

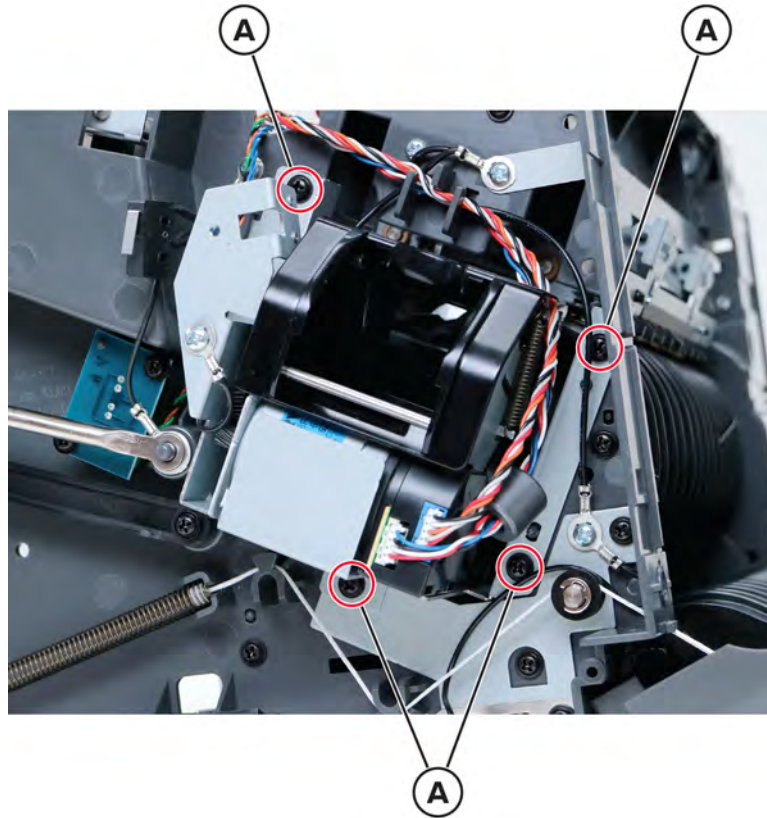

## Sensor (hole punch box present) removal

- 1 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 2 Disconnect the sensor cable (A), and then remove the sensor.

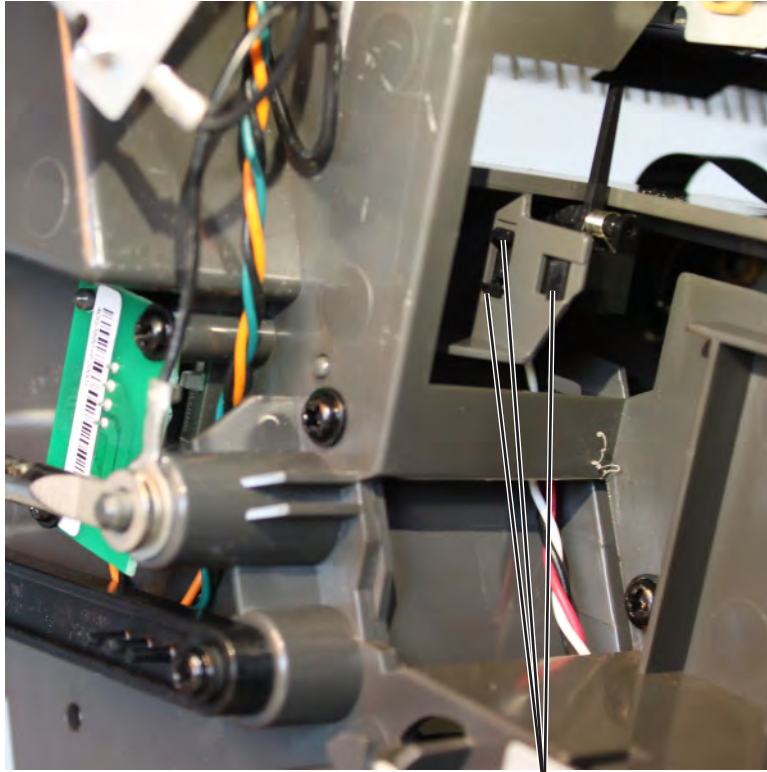

## Sensor (SHPF staple throat paper present) removal

- 1 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 2 Remove the four screws (A), and then release the bracket.

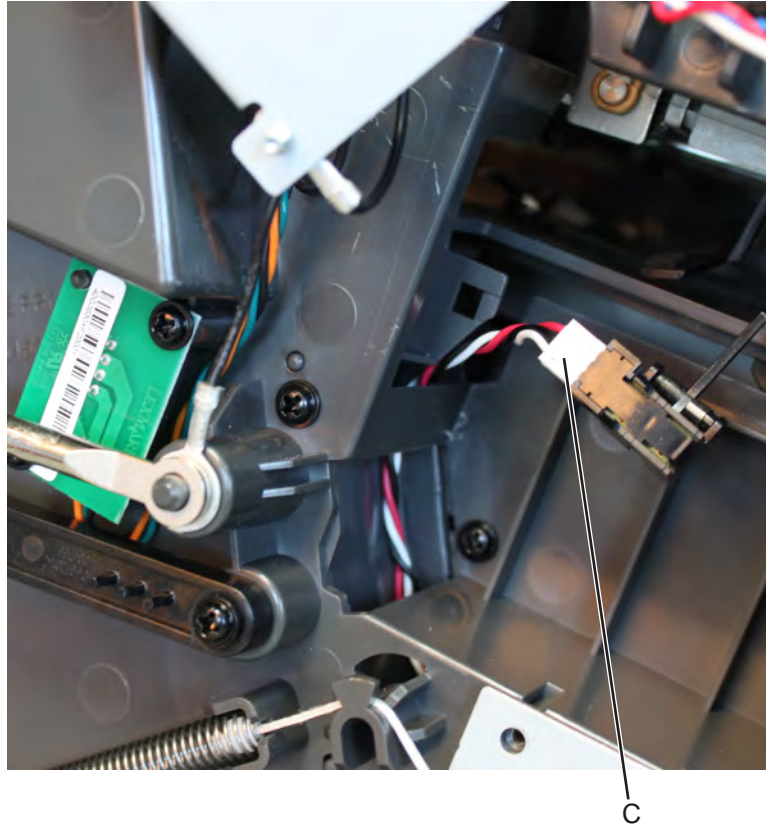

- 3 Release the sensor latches (B), and then release the sensor from its bracket.

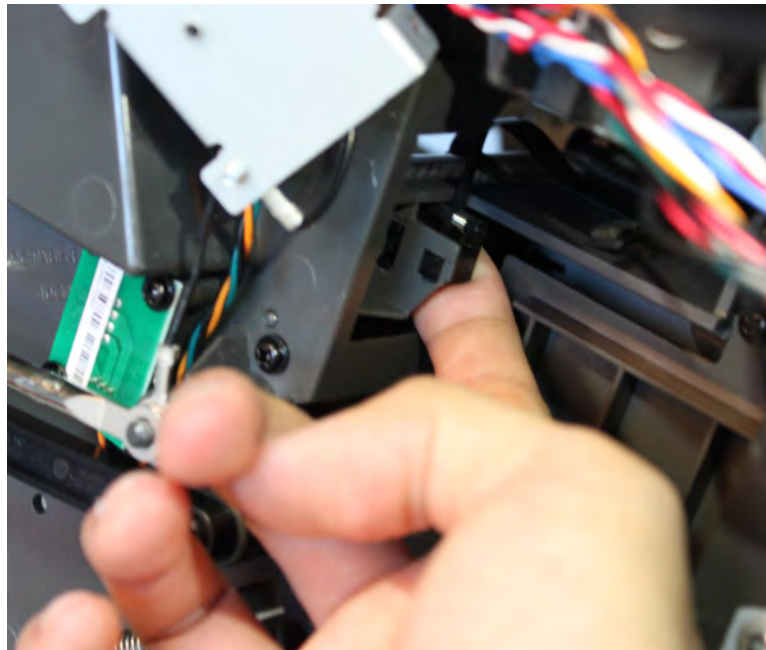

B

- 4 Disconnect the cable (C), and then remove the sensor.

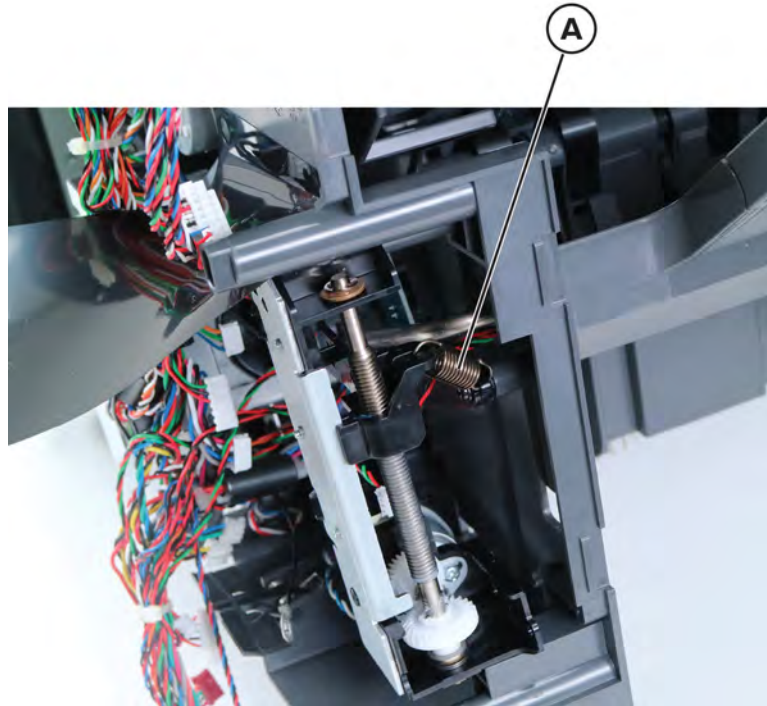

**Installation note:** Make sure that the sensor is properly installed. Push the sensor to its bracket until it is securely latched onto the frame.

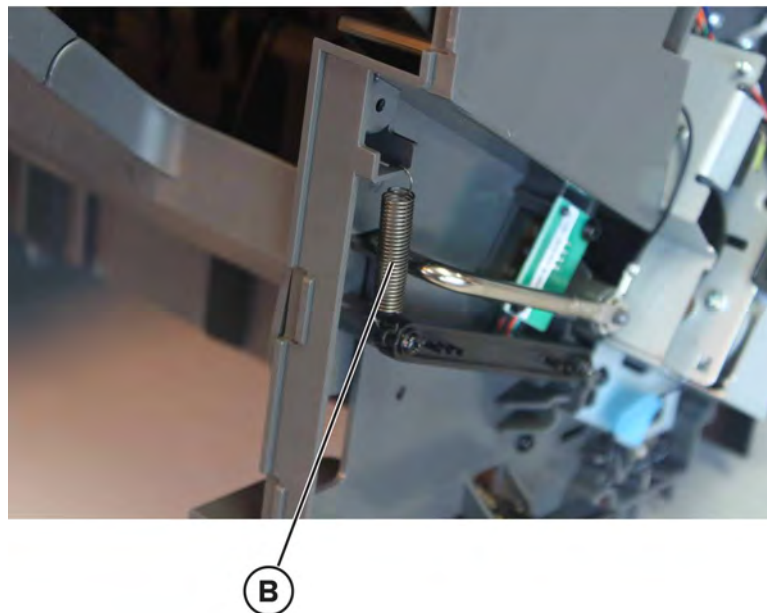

## SHPF bin link tension spring removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 3 Unhook the tension spring (A) from the left side, and then remove it.

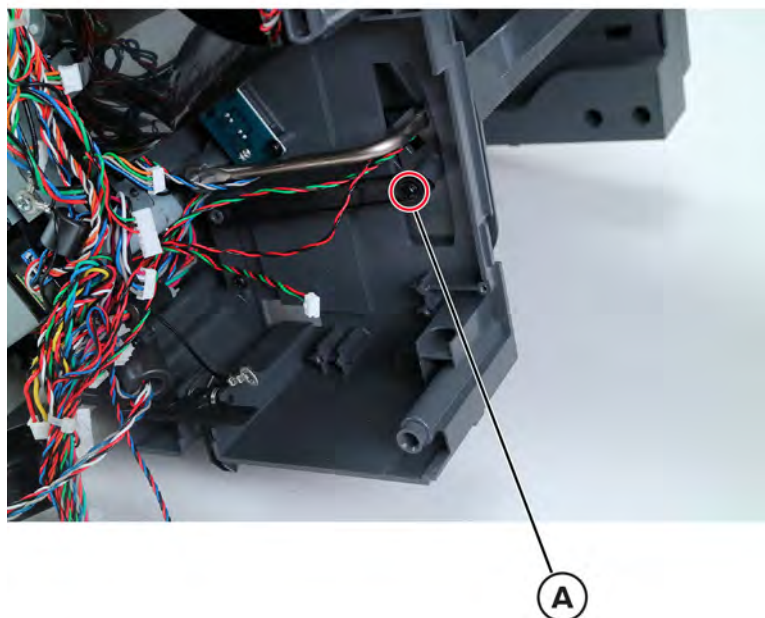

- 4 Unhook the tension spring (B) from the right side, and then remove it.

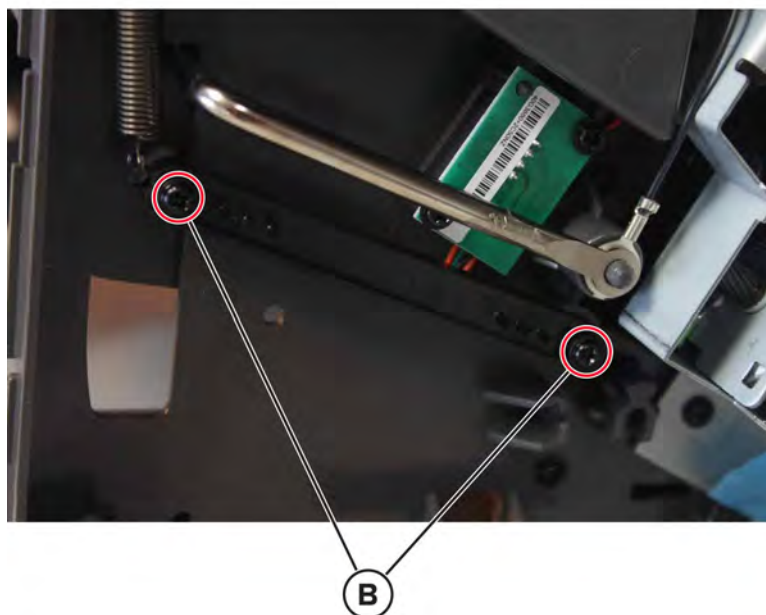

## SHPF bin link assembly removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 3 Remove the staple, hole punch finisher controller board. See [“Staple, hole punch finisher controller board removal” on page 711.](#)
- 4 Remove the staple, hole punch finisher elevator drive. See [“Staple, hole punch finisher elevator drive removal” on page 728.](#)
- 5 Remove the screw (A), and then remove the left tray link.

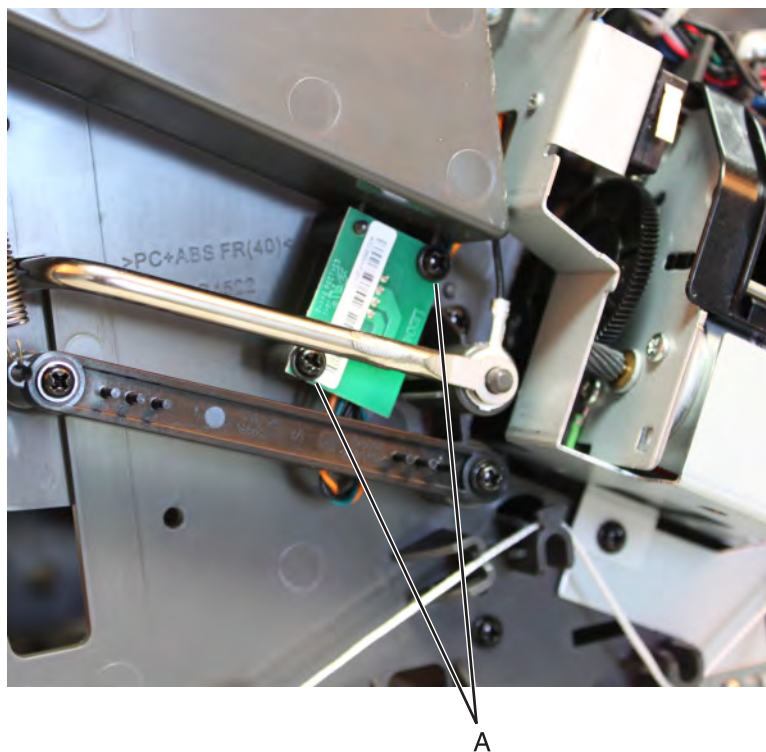

- 6 Remove the two screws (B), and then remove the right tray link.

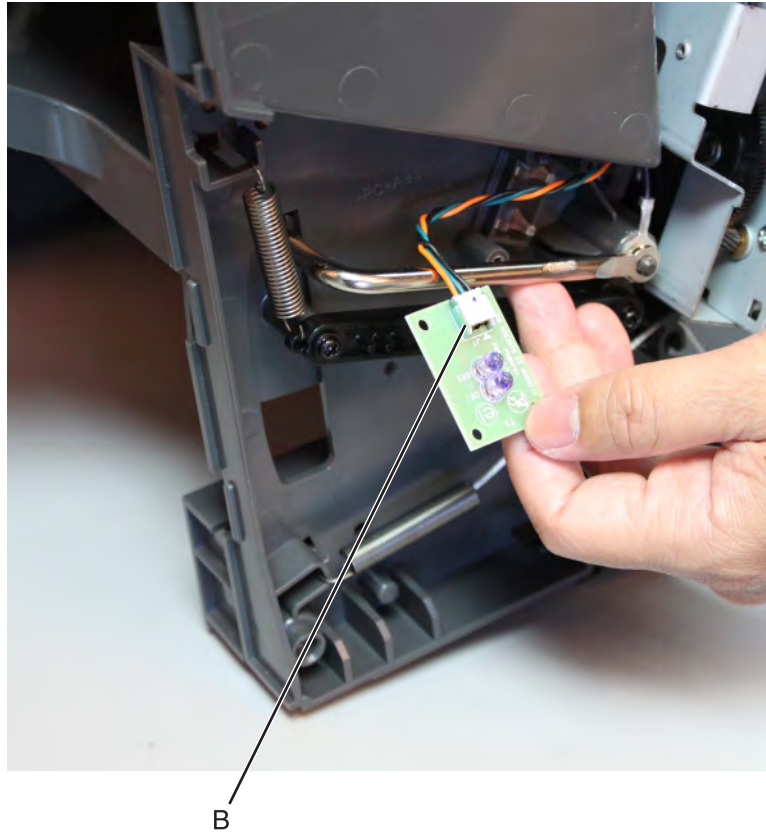

## Sensor (SHPF bin full send) removal

- 1 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707.](#)
- 2 Remove the two screws (A), and then release the sensor.

Parts removal

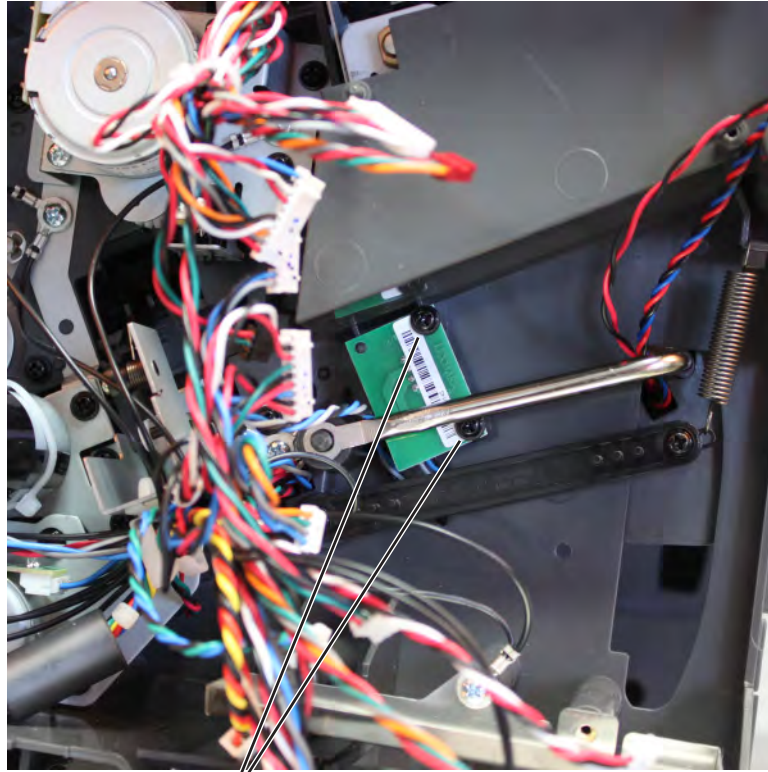

- 3 Disconnect the cable (B), and remove the sensor.

### Sensor (SHPF bin full receive) removal

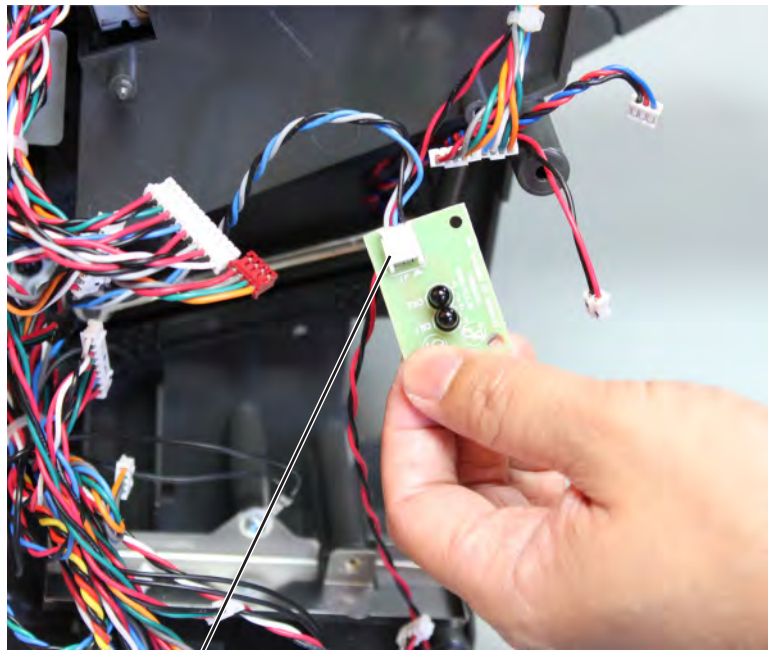

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705.](#)
- 2 Remove the staple, hole punch finisher controller board. See [“Staple, hole punch finisher controller board removal” on page 711.](#)

**3** Remove the two screws (A), and then release the sensor.

A

**4** Disconnect the cable (B), and then remove the sensor.

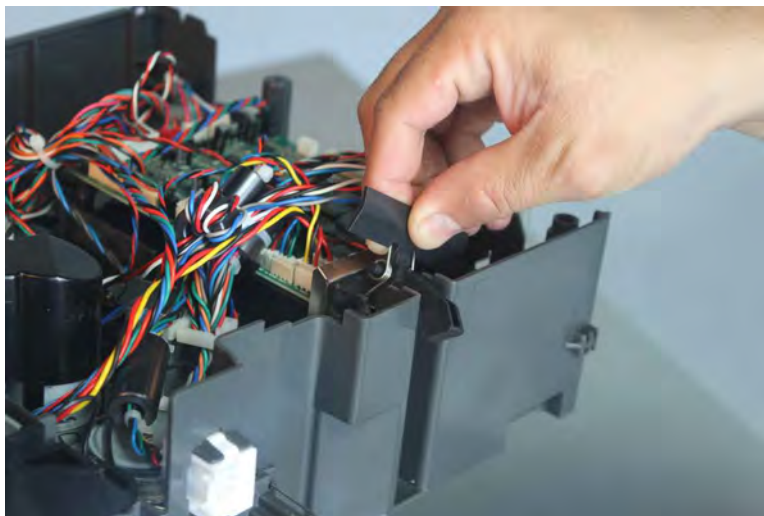

B

## Staple, hole punch finisher latch removal

- 1 Remove the staple, hole punch finisher left cover or right cover. See [“Staple, hole punch finisher left cover removal” on page 705](#) or [“Staple, hole punch finisher right cover removal” on page 707](#).
- 2 Pull the latch off the finisher.

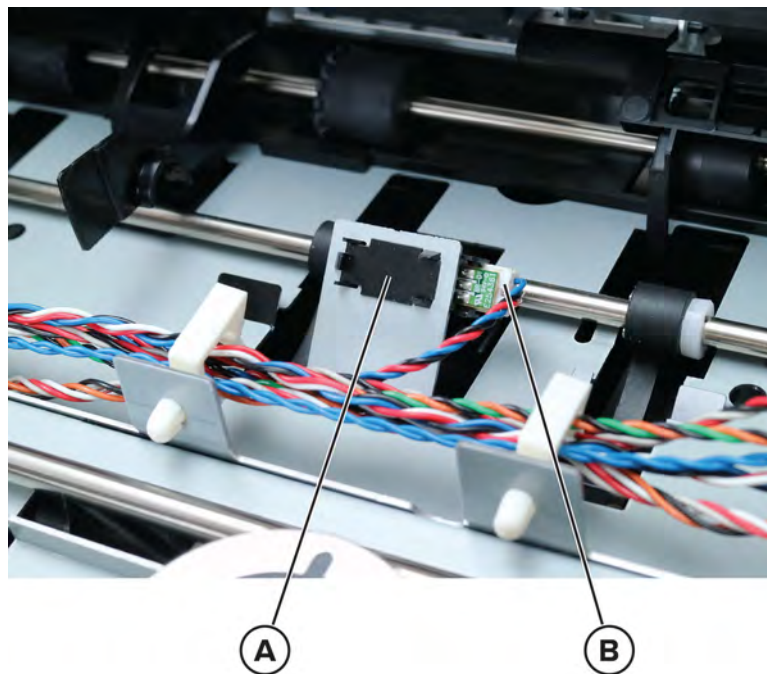

**Note:** The latch on the right side can be removed using the same method shown.

## Sensor (SHPF paddle) removal

- 1 Remove the staple, hole punch finisher left cover. See [“Staple, hole punch finisher left cover removal” on page 705](#).
- 2 Remove the staple, hole punch finisher right cover. See [“Staple, hole punch finisher right cover removal” on page 707](#).
- 3 Remove the staple, hole punch finisher top cover. See [“Staple, hole punch finisher top cover removal” on page 709](#).

- 4 Remove the sensor retainer (A), and then disconnect the cable (B).

- 5 Remove the sensor.

# Component locations

## Printer configurations

You can configure your printer by adding optional 250-, 550-, or 2100-sheet trays.

### Basic model

1	Standard 550-sheet tray
2	Multipurpose feeder
3	Control panel <b>Note:</b> The appearance may vary depending on your printer model.
4	Standard bin

## Fully-configured model

	Hardware option	Alternative hardware option
<b>1</b>	4-bin mailbox	<ul style="list-style-type: none"> <li>• Output expander</li> <li>• High-capacity output</li> <li>• Staple finisher</li> <li>• Staple, hole punch finisher</li> </ul>
<b>2</b>	Optional 2100-sheet tray	None
<b>3</b>	Caster base	None
<b>4</b>	Optional 550-sheet tray	Optional 250-sheet tray
<b>5</b>	Staple, hole punch finisher	<ul style="list-style-type: none"> <li>• Output expander</li> <li>• High-capacity output</li> <li>• 4-bin mailbox</li> <li>• Staple finisher</li> </ul>

The staple, hole punch finisher must not be combined with any other output options.

In a configuration with two or more optional finishers:

- The staple finisher must always be on top.
- The high-capacity output expander must always be at the bottom.
- The output expander is the only option that can be placed on top of the high-capacity output expander.
- The output expander and mailbox may be installed in any order.

When using optional trays:

- Always use a caster base when the printer is configured with a 2100-sheet tray.
- The 2100-sheet tray must always be at the bottom of a configuration.
- A maximum of four optional trays may be configured with the printer.
- The optional 250- and 550-sheet trays may be installed in any order.

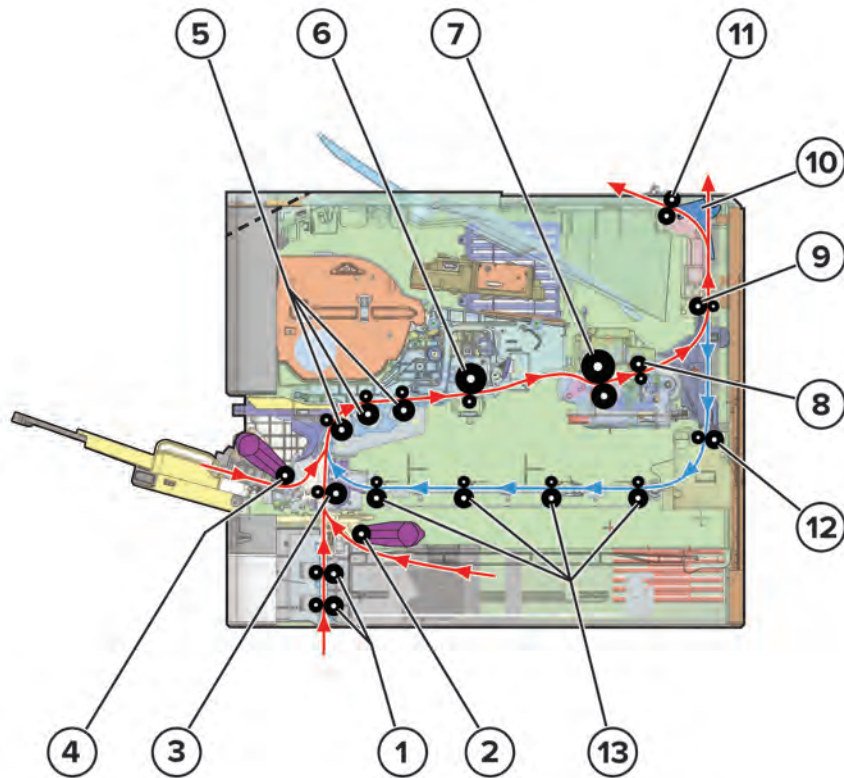

## Port locations

**Warning—Potential Damage:** To avoid loss of data or printer malfunction, do not touch the USB cable, any wireless network adapter, or the printer in the areas shown while actively printing.

	Use the	To
1	Power cord socket	Connect the printer to an electrical outlet.
2	USB printer port	Connect the printer to a computer.
3	Ethernet port	Connect the printer to a network.
4	USB port	Attach a keyboard or any compatible option.

## Printer roller locations

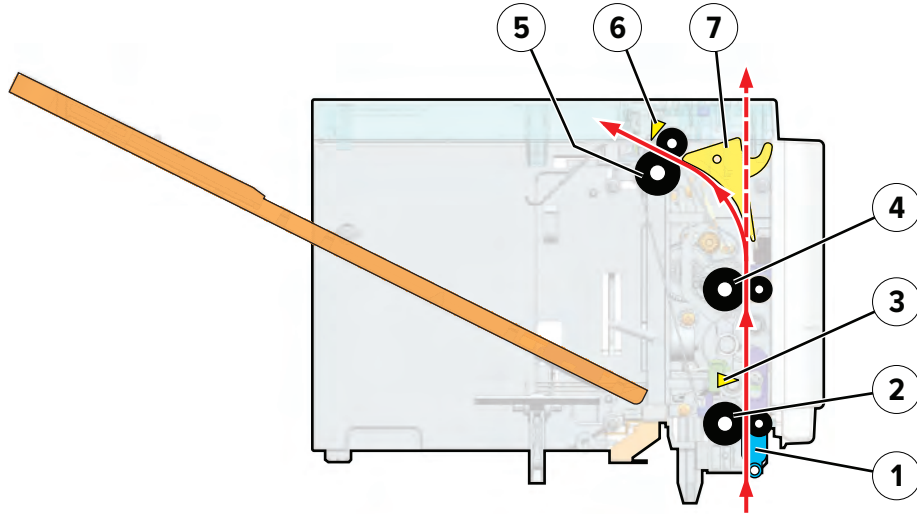

1	Transport rollers
2	Tray 1 pick roller
3	Lower aligner roller
4	MPF pick roller
5	Upper aligner rollers
6	Photoconductor drum
7	Fuser roller/belt
8	Fuser exit roller
9	Lower redrive roller
10	Diverter
11	Upper redrive roller
12	Duplex entry roller
13	Duplex aligner rollers

## Printer sensor locations

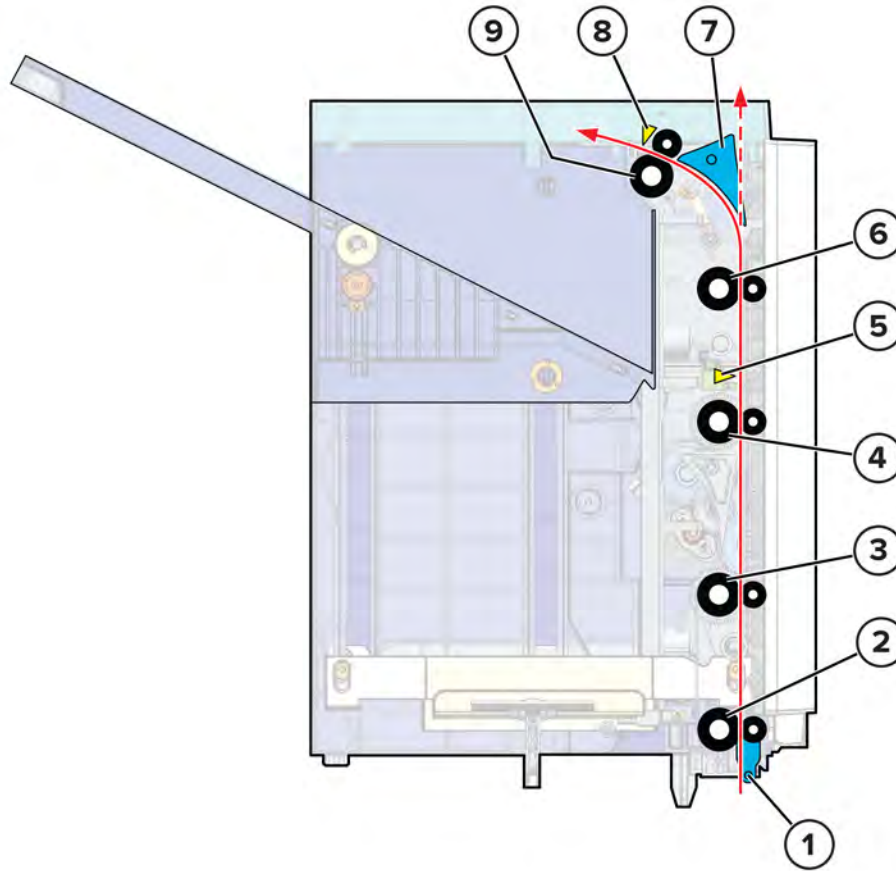

1	Sensor (paper size)
2	Sensor (tray 1 paper present)
3	Sensor (pick position)
4	Sensor (pick)
5	Sensor (tray 1 pass-through)
6	Sensor (MPF paper present)
7	Sensor (input)
8	Sensor (fuser exit)
9	Sensor (narrow media) <b>Note:</b> This part is found in hot roll fusers only.
10	Sensor (exit)
11	Sensor (duplex path)

## Output expander locations

1	Diverter plunger
2	Transport roller 1
3	Sensor (OE pass-through)
4	Transport roller 2
5	Exit roller
6	Sensor (OE bin full)
7	Diverter

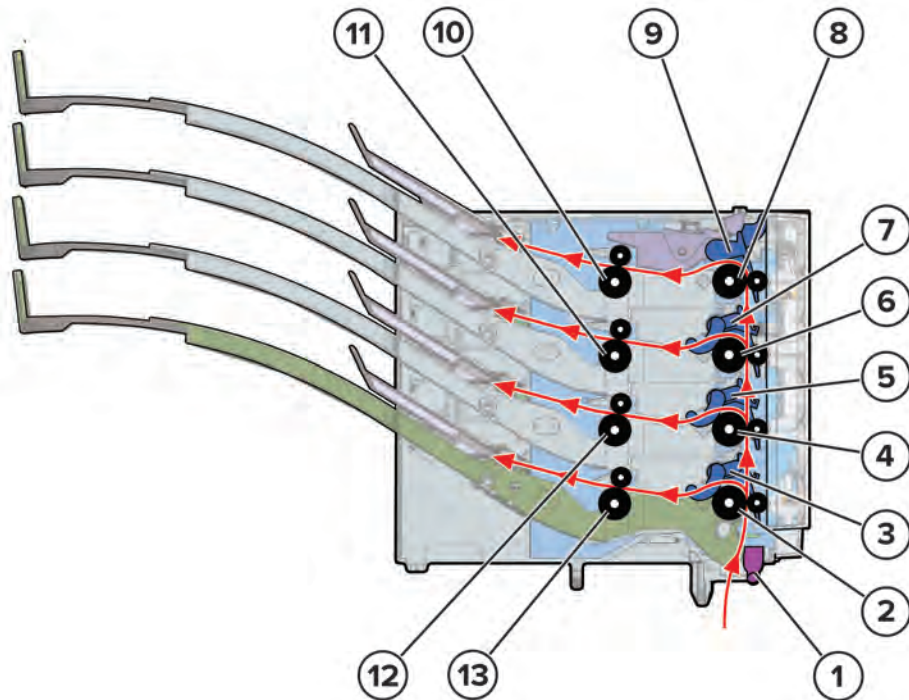

# High capacity output expander locations

1	Diverter plunger
2	HCOE entrance roller
3	HCOE transport roller 1
4	HCOE transport roller 2
5	Sensor (HCOE pass-through)
6	HCOE transport roller 3
7	Diverter
8	Sensor (HCOE bin full)
9	HCOE exit roller

# Mailbox locations

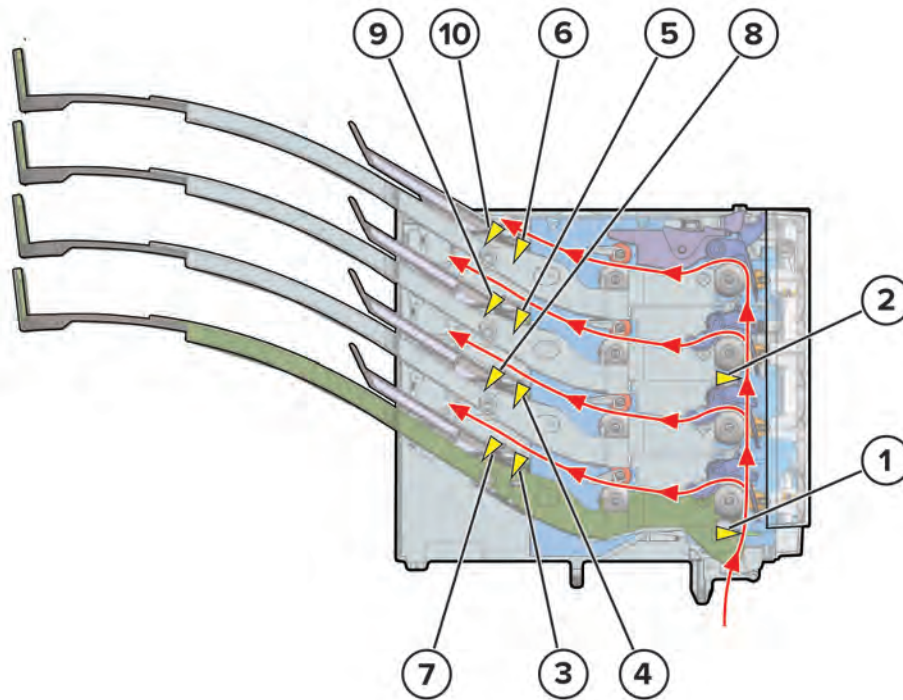

## Mailbox rollers

<b>1</b>	Diverter plunger
<b>2</b>	Mailbox transport roller 1
<b>3</b>	Diverter 1
<b>4</b>	Mailbox transport roller 2
<b>5</b>	Diverter 2
<b>6</b>	Mailbox transport roller 3
<b>7</b>	Diverter 3
<b>8</b>	Mailbox transport roller 4
<b>9</b>	Diverter 4
<b>10</b>	Exit roller 4
<b>11</b>	Exit roller 3
<b>12</b>	Exit roller 2
<b>13</b>	Exit roller 1

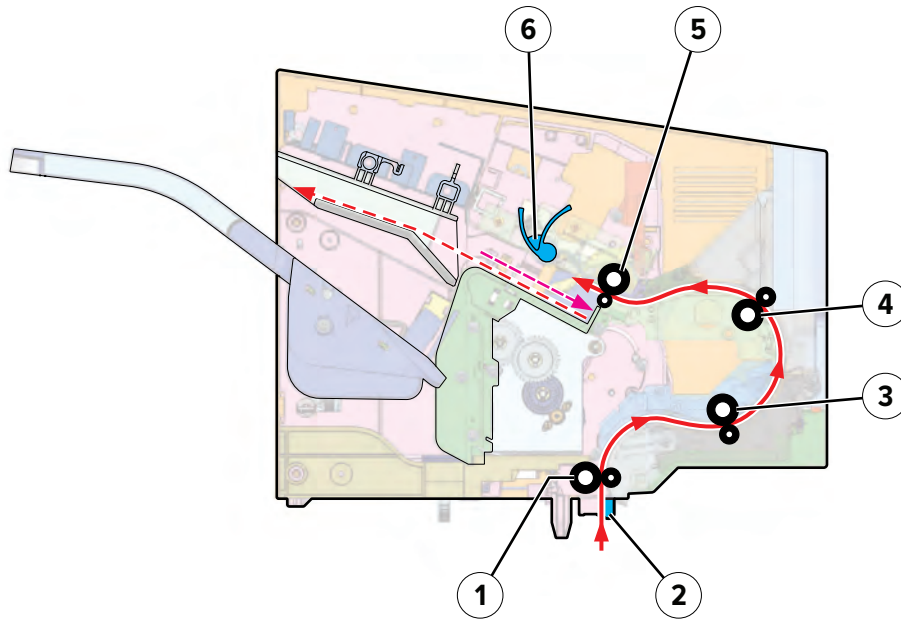

## Mailbox sensors

<b>1</b>	Sensor (mailbox pass-through 1)
<b>2</b>	Sensor (mailbox pass-through 2)
<b>3</b>	Sensor (mailbox bin 1 paper present)
<b>4</b>	Sensor (mailbox bin 2 paper present)
<b>5</b>	Sensor (mailbox bin 3 paper present)
<b>6</b>	Sensor (mailbox bin 4 paper present)
<b>7</b>	Sensor (mailbox bin 1 full)
<b>8</b>	Sensor (mailbox bin 2 full)
<b>9</b>	Sensor (mailbox bin 3 full)
<b>10</b>	Sensor (mailbox bin 4 full)

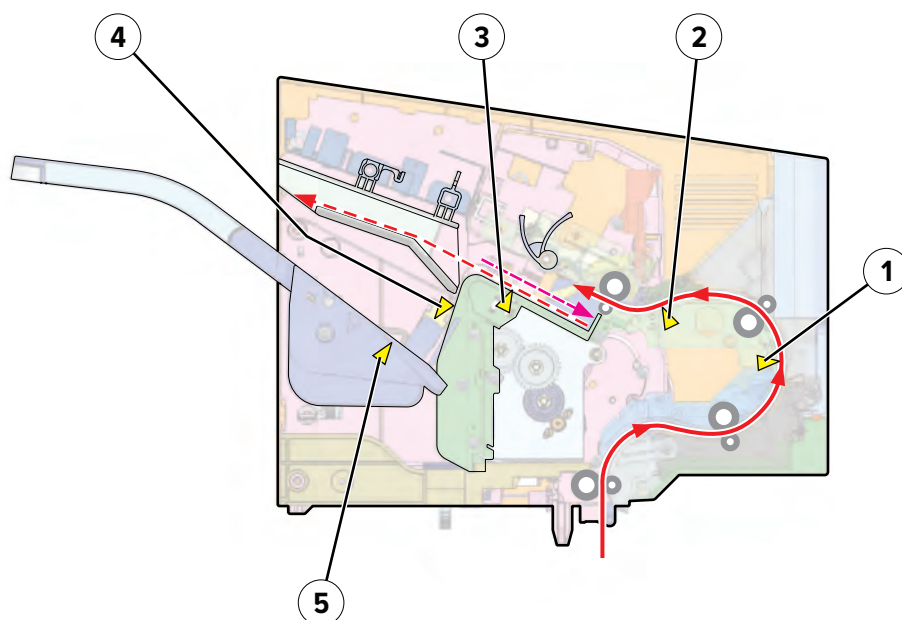

# Staple, hole punch finisher locations

## SHPF rollers

1	SHPF entrance roller
2	Diverter plunger
3	SHPF transport roller 1
4	SHPF transport roller 2
5	SHPF exit roller
6	SHPF paddle roller

## SHPF sensors

1	Sensor (SHPF transport 1)
2	Sensor (SHPF transport 2)
3	Sensor (SHPF tamper paper present)
4	Sensor (SHPF bin full)
5	Sensor (SHPF bin paper present)

## Printer controller board connectors

Connector	Connects to	Pin no.	Signal

# Maintenance

## Inspection guide

The purpose of this inspection guide is to aid you in identifying the intervals, based on page count, at which parts must be inspected (for visible physical damage), cleaned, or replaced.

If any unsafe conditions exist, find out how serious the hazard could be and if you can continue before you correct the hazard.

As you service the machine, check for the following:

- Damaged, missing, or altered parts, especially in the area of the On/Off switch and the power supply
- Damaged, missing, or altered covers, especially in the area of the top cover and the power supply cover
- Possible safety exposure from any non-Lexmark attachments
- Printer and options are sitting flat (for example, not sitting on cables or hanging over a ledge)
- Printer is properly set on any options

Use the following table to determine when specified parts should be inspected:

**MS725 Inspection guide table**

PART/ITEM	EVERY SERVICE CALL	EVERY 200K	NOTES
Tray insert <ul style="list-style-type: none"> <li>• Width paper guide</li> <li>• Length paper guide</li> </ul>	Inspect	Replace	Check for correct positioning.
Separator pad	Inspect, clean if needed	Replace	Clean with a damp cloth.
Tray pick roller	Inspect, clean	Replace	Clean with a damp cloth.
MPF pick roller	Inspect, clean	Inspect, clean	Clean with a damp cloth.
Transfer roller	Inspect	Replace	Ensure correct installation.
Fuser	Inspect	Replace	Ensure correct installation.
Fuser wiper	Inspect	Replace	Ensure correct installation.
Rear door	Inspect	Inspect	Ensure correct operation and closure.
Duplex paper path	Inspect	Inspect	Check for paper fragments and obstructions.
Toner spillage	Clean	Clean	Remove all toner spillage from the printer.

PART/ITEM	EVERY SERVICE CALL	EVERY 200K	NOTES
Pick tires	Inspect, clean if needed	Inspect, clean if needed	Check for toner contamination.

### MS82x Inspection guide table

PART/ITEM	EVERY SERVICE CALL	EVERY 225K	NOTES
Tray insert <ul style="list-style-type: none"> <li>• Width paper guide</li> <li>• Length paper guide</li> </ul>	Inspect	Replace	Check for correct positioning.
Separator pad	Inspect, clean if needed	Replace	Clean with a damp cloth.
Tray pick roller	Inspect, clean	Replace	Clean with a damp cloth.
MPF pick roller	Inspect, clean	Inspect, clean	Clean with a damp cloth.
Rear door	Inspect	Inspect	Ensure correct operation and closure.
Duplex paper path	Inspect	Inspect	Check for paper fragments and obstructions.
Toner spillage	Clean	Clean	Remove all toner spillage from the printer.
Pick tires	Inspect, clean if needed	Inspect, clean if needed	Check for toner contamination.

## Scheduled maintenance

### Fuser maintenance kits

The printer may stop printing when the fuser rated life is reached. At rated fuser life, a Fuser maintenance kit is required. The correct Fuser maintenance kit must be installed for the type of fuser that is installed in the printer. See [“Identifying the type of fuser used in the printer” on page 768](#).

Code levels prior to Base code of LW20.DN4.P231-0 and Engine code of FDN.DN.E410-0 set the 80.3x error as a non-continuable stop. To change the 80.3x error code to a continuable stop, please see technical bulletin TE523 by visiting [www.lexmark.com](http://www.lexmark.com). A continuable stop is an error code that will allow the user to continue using the printer once the error is acknowledged using the control panel.

There are multiple warnings to indicate that the fuser is nearing end of life and that a maintenance kit is required.

### Maintenance kit nearly low [80.0x]

- 1 Replace the maintenance kit. For more information, see the instruction sheet that came with the replacement parts.
- 2 From the printer control panel, select **Continue** to clear the message and continue printing. For non-touch-screen printer models, press  to confirm.
- 3 If you do not have a maintenance kit, then see [“Maintenance kits” on page 766](#), or see the *Ordering a maintenance kit* section of the *User’s Guide*, or visit [www.lexmark.com](http://www.lexmark.com).

### Maintenance kit low [80.1x]

- 1 Replace the maintenance kit. For more information, see the instruction sheet that came with the replacement parts.
- 2 From the printer control panel, select **Continue** to clear the message and continue printing. For non-touch-screen printer models, press  to confirm.
- 3 If you do not have a maintenance kit, then see [“Maintenance kits” on page 766](#), or see the *Ordering a maintenance kit* section of the *User’s Guide*, or visit [www.lexmark.com](http://www.lexmark.com).

### Maintenance kit very low, 2000 estimated pages remain [80.2x]

- 1 Replace the maintenance kit. For more information, see the instruction sheet that came with the replacement parts.
- 2 From the printer control panel, select **Continue** to clear the message and continue printing. For non-touch-screen printer models, press  to confirm.
- 3 If you do not have a maintenance kit, then see [“Maintenance kits” on page 766](#), or see the *Ordering a maintenance kit* section of the *User’s Guide*, or visit [www.lexmark.com](http://www.lexmark.com).

### Maintenance kit low, 0 estimated pages remain [80.3x]

- 1 Replace the maintenance kit. For more information, see the instruction sheet that came with the replacement parts.
- 2 If you do not have a maintenance kit, then see [“Maintenance kits” on page 766](#), or see the *Ordering a maintenance kit* section of the *User’s Guide*, or visit [www.lexmark.com](http://www.lexmark.com).

**Note:** The printer is not intended to continue past this point [80.3x]. If a maintenance kit cannot be installed at this time, contact the Lexmark help desk for procedures to allow the printer to continue printing for a limited number of additional pages. For the contact information, visit <http://support.lexmark.com>.

### Maintenance kit very low, 0 estimated pages remain [80.4x]

- 1 Replace the maintenance kit. For more information, see the instruction sheet that came with the replacement parts.
- 2 If you do not have a maintenance kit, then see [“Maintenance kits” on page 766](#), or see the *Ordering a maintenance kit* section of the *User’s Guide*, or visit [www.lexmark.com](http://www.lexmark.com).

**Note:** The printer is not intended to continue past this point [80.4x]. There are no additional procedures that will allow the printer to print without installing a maintenance kit.

## Maintenance kits

The control panel displays an 80.xy error at required maintenance intervals. It is necessary to install the appropriate maintenance kit to maintain the print quality and reliability of the printer. The following maintenance kits are available:

Part number and kit	Contents
41X2242—200K Maintenance kit, Hot roll fuser (115 V Contact Detack LRP, Type 11) <b>Note:</b> This fuser is not applicable to MS82x, B2865, M5255, and M5270 printer models.	<ul style="list-style-type: none"> <li>• 41X2147—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2243—200K Maintenance kit, Hot roll fuser (220 V Contact Detack LRP, Type 13) <b>Note:</b> This fuser is not applicable to MS82x, B2865, M5255, and M5270 printer models.	<ul style="list-style-type: none"> <li>• 41X2148—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2244—200K Maintenance kit, Hot roll fuser (115 V NLRP Contact Detack ASM, Type 17) <b>Note:</b> This fuser is not applicable to MS82x, B2865, M5255, and M5270 printer models.	<ul style="list-style-type: none"> <li>• 41X2149—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2245—200K Maintenance kit, Hot roll fuser (220 V NLRP Contact Detack ASM, Type 19) <b>Note:</b> This fuser is not applicable to MS82x, B2865, M5255, and M5270 printer models.	<ul style="list-style-type: none"> <li>• 41X2150—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2233—225K Maintenance kit, Belt SY fuser (115 V LTR LRP, Type 00) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X1115—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2234—225K Maintenance kit, Belt SY fuser (230 V A4 LRP, Type 01) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X1116—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2235—225K Maintenance kit, Belt SY fuser (100 V A4 LRP, Type 02) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X1117—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2236—225K Maintenance kit, Belt SY fuser (115 V A4 LRP, Type 03) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2141—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>

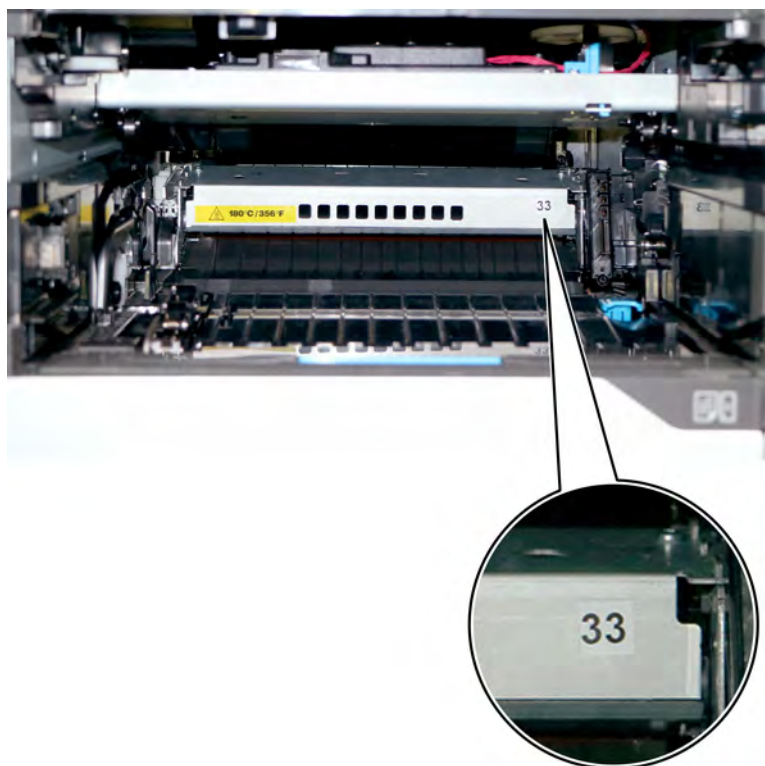

Part number and kit	Contents
41X2237—225K Maintenance kit, Belt SY fuser (230 V LTR LRP, Type 04) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2142—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2238—225K Maintenance kit, Belt SY fuser (115 V LTR NLRP, Type 05) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2143—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>

41X2240—225K Maintenance kit, Belt SY fuser (100 V A4 NLRP, Type 07) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2145—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2241—225K Maintenance kit, Belt SY fuser (115 V A4 NLRP, Type 08) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2146—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2352—400K Maintenance kit, Rollers	<ul style="list-style-type: none"> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2250—400K Maintenance kit, Belt HY fuser (115 V LTR LRP, Type 32) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2155—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2251—400K Maintenance kit, Belt HY fuser (230 V A4 LRP, Type 33) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2156—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2252—400K Maintenance kit, Belt HY fuser (115 V A4 LRP, Type 35) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2157—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>
41X2253—400K Maintenance kit, Belt HY fuser (230 V LTR LRP, Type 36) <b>Note:</b> This fuser is not applicable to the MS725 printer model.	<ul style="list-style-type: none"> <li>• 41X2158—Fuser</li> <li>• 41X1108—3 Pick rollers</li> <li>• 41X1119—3 Tray separators</li> <li>• 41X1076—Transfer roller</li> </ul>

After replacing the maintenance kit, the maintenance count will automatically be reset to zero to clear the 80.xy message.

## Identifying the type of fuser used in the printer

From the front of the printer:

- 1 Open the front door, and then remove the toner cartridge and imaging unit.
- 2 Find the two-digit number to identify the fuser type.

From the rear of the printer:

- 1 Open the rear door.
- 2 Find the barcode sticker on the fuser.

The two-digit number for identifying the fuser type can be found on the sticker.

## Preventive maintenance

Between scheduled maintenance intervals, paper feed, paper transport, and image quality problems can occur. Some preventive maintenance procedures can help prevent issues like these.

### Device-specific preventive maintenance

To clean the display and keypad, use the LCD cleaning cloth. A single two-step LCD cleaning cloth is stored in the compartment beneath the exit tray. Additional cleaning cloths are available.

The following table lists the part needed to perform preventive maintenance:

Part number	Description	Maintenance interval
40X0392	LCD cleaning kit	As needed

## Lubrication specification

There are no lubrication requirements for this printer.

## Cleaning the printer

### Cleaning the printer

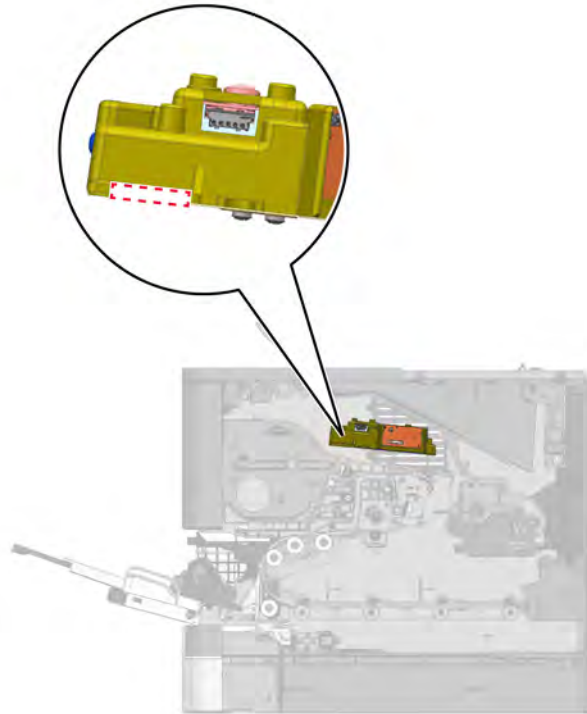

-  **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock when cleaning the exterior of the printer, unplug the power cord from the electrical outlet and disconnect all cables from the printer before proceeding.
-  **ATTENTION—RISQUE D'ELECTROCUTION :** pour éviter tout risque d'électrocution lors du nettoyage de l'extérieur de l'imprimante, débranchez le cordon d'alimentation électrique de la prise et déconnectez tous les câbles de l'imprimante avant de continuer.
-  **PRECAUCIÓN: PELIGRO DE DESCARGAS ELÉCTRICAS:** Para evitar el riesgo de descarga eléctrica al limpiar el exterior de la impresora, desconecte el cable de alimentación de la toma eléctrica y desconecte todos los cables de la impresora antes de realizar la operación.
-  **VORSICHT – STROMSCHLAGGEFAHR:** Um das Risiko eines elektrischen Schlags beim Reinigen des Druckergehäuses zu vermeiden, ziehen Sie das Netzkabel aus der Steckdose, und ziehen Sie alle Kabel vom Drucker ab, bevor Sie fortfahren.

#### Notes:

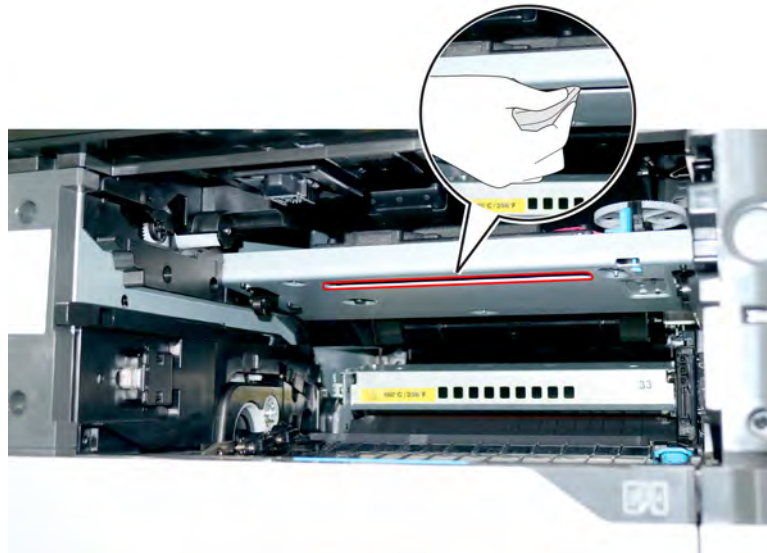

- Perform this task after every few months.
  - Damage to the printer caused by improper handling is not covered by the printer warranty.
- 1** Turn off the printer, and then unplug the power cord from the electrical outlet.
  - 2** Remove paper from the standard bin and manual feeder.
  - 3** Remove any dust, lint, and pieces of paper around the printer using a soft brush or vacuum.
  - 4** Wipe the outside of the printer with a damp, soft, lint-free cloth.
- Notes:**
- Do not use household cleaners or detergents, as they may damage the finish of the printer.
  - Make sure that all areas of the printer are dry after cleaning.
- 5** Connect the power cord to the electrical outlet, and then turn on the printer.

## Cleaning the printhead glass

- 1 Remove the toner cartridge and imaging unit.
- 2 Locate the exit glass under the printhead.

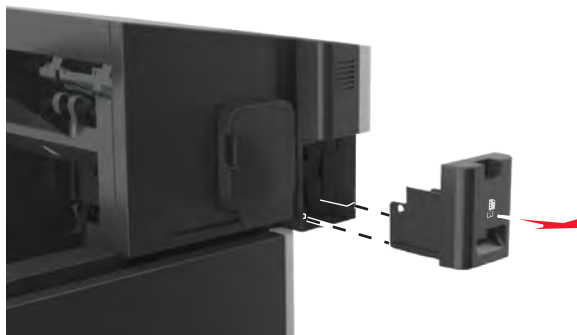

- 3 Wipe the exit glass using a lint-free cloth.

## Emptying the hole punch box

- 1 Pull out the hole punch box.

- 2 Empty the container.

- 3 Insert the emptied hole punch box back into the finisher until it *clicks* into place.

# Parts catalog

## Legend

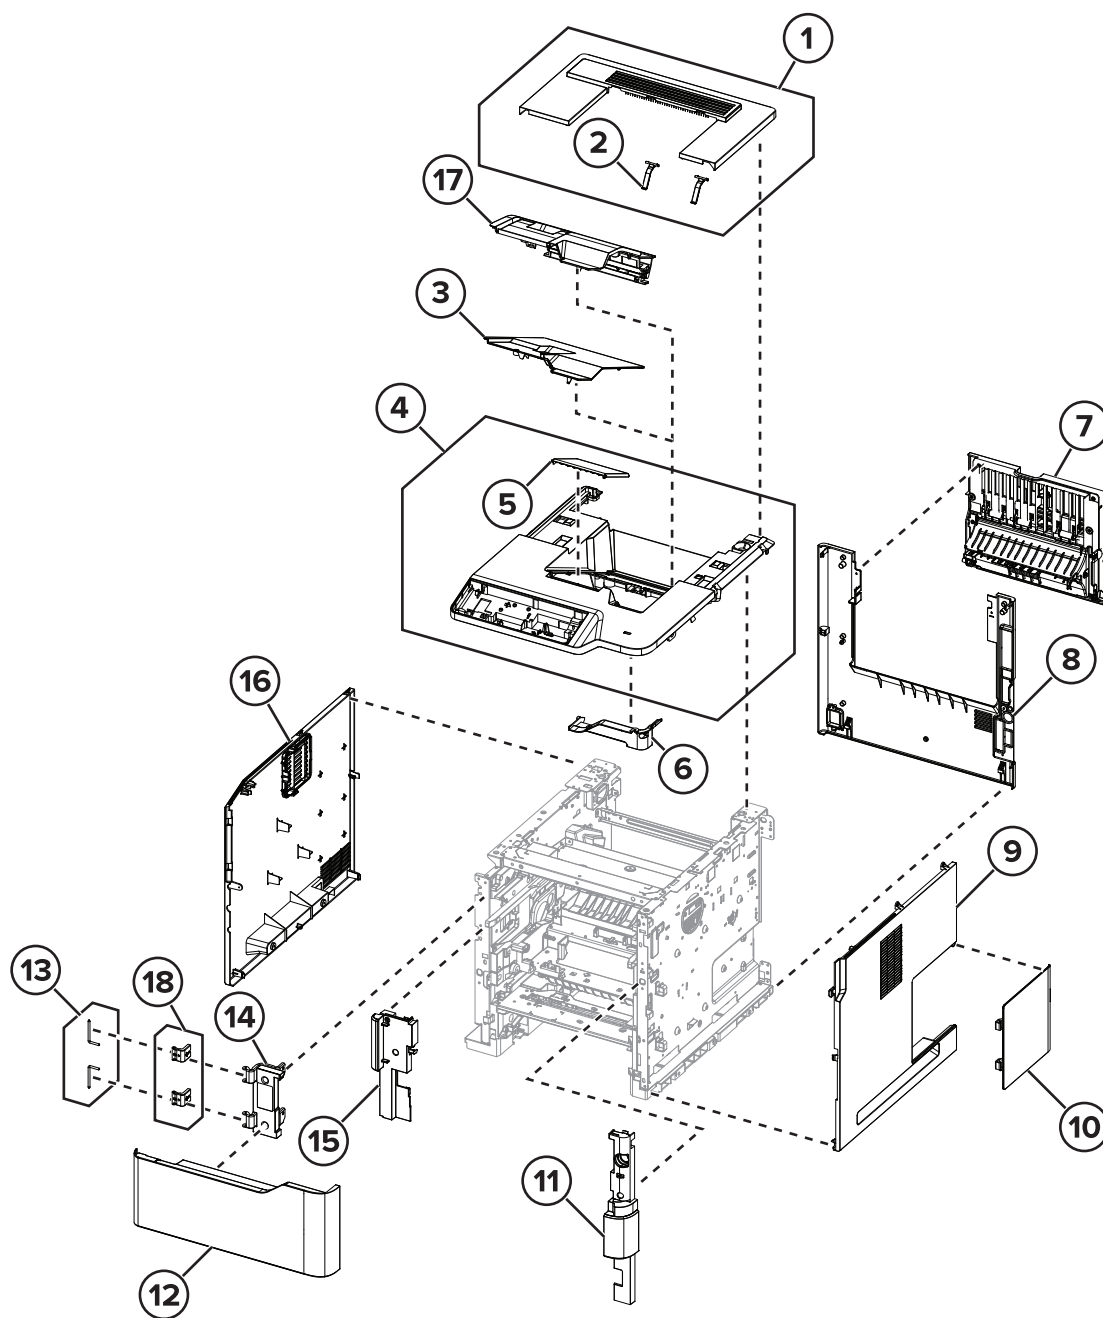

The following column headings are used in the parts catalog:

- **Asm-index**—Identifies the item in the illustration
- **P/N**—Identifies the part number of a FRU
- **Units/mach**—Refers to the number of units in a printer
- **Units/opt**—Refers to the number of units in an option
- **Units/FRU**—Refers to the number of units in a FRU
- **Description**—A brief description of the part

The following abbreviations are used in the parts catalog:

- **NS** (not shown) in the Asm-index column indicates that the part is procurable but is not shown in the illustration.
- **PP** (parts packet) in the Description column indicates that the part is contained in a parts packet.

# Printer specifications

## Power consumption

### Product power consumption

The following table documents the power consumption characteristics of the product.

**Note:** Some modes may not apply to your product.

Mode	Description	Power consumption (Watts)
Printing	The product is generating hard-copy output from electronic inputs.	800 (MS725dvn); 670 (M5255, MS821n, MS821dn); 700 (MS822de); 770 (B2865dw, MS823n, MS823dn); 830 (M5270, MS825dn, MS826de)
Copy	The product is generating hard-copy output from hard-copy original documents.	N/A
Scan	The product is scanning hard-copy documents.	N/A
Ready	The product is waiting for a print job.	High power usage: 95 (MS725dvn); 39 (M5255, MS821n, MS821dn, MS822de); 34 (B2865dw, MS823n, MS823dn); 38.5 (M5270, MS825dn, MS826de) Low power usage: 75 (MS725dvn); 21.5 (M5255, MS821n, MS821dn, MS822de); 20 (B2865dw, MS823n, MS823dn); 21 (M5270, MS825dn, MS826de)
Sleep Mode	The product is in a high-level energy-saving mode.	1.3 (MS725dvn); 1.4 (M5255, M5270, MS821n, MS821dn, MS822de, MS825dn, MS826de); 1.6 (B2865dw, MS823n, MS823dn)
Hibernate	The product is in a low-level energy-saving mode.	0.2
Off	The product is plugged into an electrical outlet, but the power switch is turned off.	0.2

The power consumption levels listed in the previous table represent time-averaged measurements. Instantaneous power draws may be substantially higher than the average.

Values are subject to change. See [www.lexmark.com](http://www.lexmark.com) for current values.

### Sleep Mode

This product is designed with an energy-saving mode called *Sleep Mode*. The Sleep Mode saves energy by lowering power consumption during extended periods of inactivity. The Sleep Mode is automatically engaged after this product is not used for a specified period of time, called the *Sleep Mode Timeout*.

Factory default Sleep Mode Timeout for this product (in minutes):	15
---	----

By using the configuration menus, the Sleep Mode Timeout can be modified between 1 minute and 120 minutes. Setting the Sleep Mode Timeout to a low value reduces energy consumption, but may increase the response time of the product. Setting the Sleep Mode Timeout to a high value maintains a fast response, but uses more energy.

## Hibernate Mode

This product is designed with an ultra-low power operating mode called *Hibernate mode*. When operating in Hibernate Mode, all other systems and devices are powered down safely.

The Hibernate mode can be entered in any of the following methods:

- Using the Hibernate Timeout
- Using the Schedule Power modes

Factory default Hibernate Timeout for this product in all countries or regions	3 days
--	--------

The amount of time the printer waits after a job is printed before it enters Hibernate mode can be modified between one hour and one month.

## Off mode

If this product has an off mode which still consumes a small amount of power, then to completely stop product power consumption, disconnect the power supply cord from the electrical outlet.

## Total energy usage

It is sometimes helpful to calculate the total product energy usage. Since power consumption claims are provided in power units of Watts, the power consumption should be multiplied by the time the product spends in each mode in order to calculate energy usage. The total product energy usage is the sum of each mode's energy usage.

## Selecting a location for the printer

When selecting a location for the printer, leave enough room to open trays, covers, and doors and to install hardware options.

- Make sure that airflow in the room meets the latest revision of the ASHRAE 62 standard or the CEN Technical Committee 156 standard.
- Provide a flat, sturdy, and stable surface.
- Keep the printer:
  - Clean, dry, and free of dust.
  - Away from stray staples and paper clips.
  - Away from the direct airflow of air conditioners, heaters, or ventilators.
  - Free from direct sunlight and humidity extremes.
- Observe the recommended temperatures and avoid fluctuations:

Ambient temperature	10 to 32.2°C (50 to 90°F)
Storage temperature	0 to 40°C (32 to 104°F)

- Allow the following recommended amount of space around the printer for proper ventilation:

1	Top	152 mm (6 in.)
2	Right side	152 mm (6 in.)
3	Front	406 mm (16 in.) <b>Note:</b> The minimum space needed in front of the printer is 76 mm (3 in.).
4	Left side	152 mm (6 in.)
5	Rear	152 mm (6 in.)

## Noise emission levels

The following measurements were made in accordance with ISO 7779 and reported in conformance with ISO 9296.

**Note:** Some modes may not apply to your product.

1-meter average sound pressure, dBA	
Printing	56 (MS725dvn); 57 (B2865dw, M5255, MS821n, MS821dn, MS822de, MS823n, MS823dn); 58 (M5270, MS825dn, MS826de)
Ready	28 (MS725dvn); 14 (B2865dw, M5255, M5270, MS821n, MS821dn, MS822de, MS823n, MS823dn, MS825dn, MS826de)

Values are subject to change. See [www.lexmark.com](http://www.lexmark.com) for current values.

## Temperature information

Operating temperature and relative humidity	15.3 to 32.2°C (60 to 90°F) and 8 to 80% RH
Printer / cartridge / imaging unit long-term storage <sup>1</sup>	1.1 to 35°C (34 to 95°F) and 8 to 80% RH Maximum wet-bulb temperature <sup>2</sup> : 22.8°C (73°F) Non-condensing environment
Printer / cartridge / imaging unit short-term shipping	-40 to 43.3°C (-40 to 110°F)
<sup>1</sup> Supplies shelf life is approximately 2 years. This is based on storage in a standard office environment at 22°C (72°F) and 45% humidity. <sup>2</sup> Wet-bulb temperature is determined by the air temperature and the relative humidity.	

## Enabling the security reset jumper

The security reset jumper can reset a printer that is locked due to a forgotten password or lost network connectivity.

### Notes:

- Resetting the printer deletes all security settings.
- Before changing the security settings, ask for permission from your administrator.

- 1 Turn off the printer.
- 2 Access the controller board.
- 3 Move the jumper to cover the middle and exposed prongs.

**Note:** The small yellow jumper is located beside a lock icon on the controller board.

- 4 Turn on the printer.

## Invalidating the effects of a jumper reset

- 1 From the Embedded Web Server, click **Settings > Security > Miscellaneous Security Settings**.
- 2 From the Security Reset Jumper menu, select **No Effect**.

**Warning:** This setting disables access to the security menus of a locked printer. To regain access to the menus, replace the controller board.

- 3 Click **Submit**.

### Notes:

- Use a cable lock to secure the controller board and prevent a malicious reset.
- For multifunction products, when the controller board is replaced, the security settings are lost and the LDAP configuration and Copy function are no longer protected.

# Options and features

## Available internal options

- Flash memory
- Font cards
- Firmware cards
  - Forms and Bar Code
  - PRESCRIBE
  - IPDS
- Printer hard disk
- Internal solutions port
  - Parallel 1284-B Interface Card
  - RS-232C Serial Interface Card
  - Fiber Interface Card
  - N8350 802.11b/g/n Wireless Print Server Interface Card

## Optional trays supported

- 550-sheet tray
- 550-sheet lockable tray
- 250-sheet tray
- 250-sheet lockable tray
- 2100-sheet tray

## Optional bins supported

- Output expander
- High capacity output expander
- 4-bin mailbox
- Staple finisher
- Staple, hole punch finisher

## Options configurations

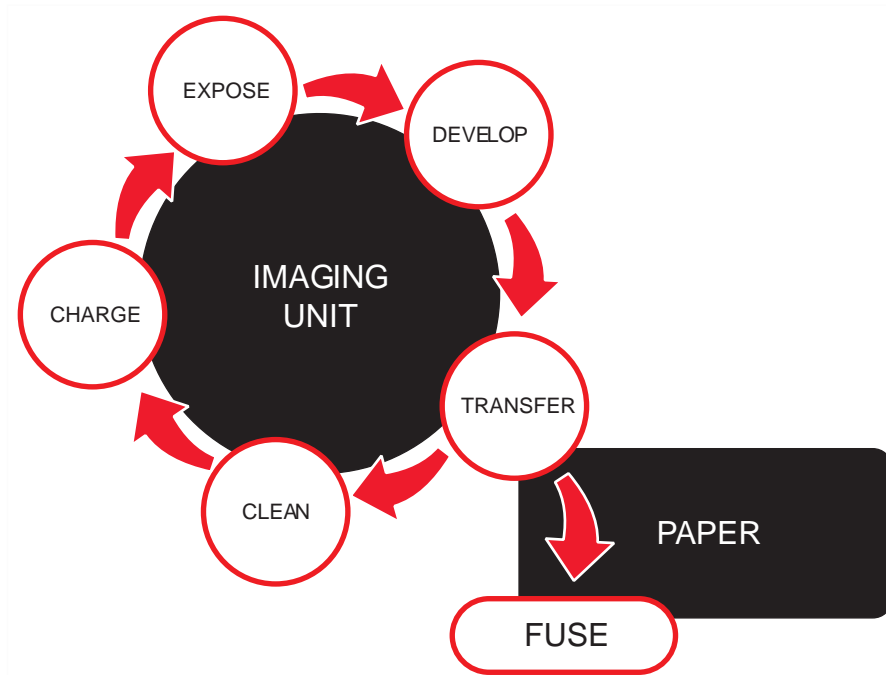

Sources and Capacities	MS821n/dn, MS822de	MS823n/dn	MS825dn, MS826de
<b>Input sources:</b> number of optional trays	4	4	4
<b>Optional bins</b>			
Output expander	up to 3	up to 3	up to 3
Mailbox	up to 3	up to 3	up to 3

Sources and Capacities	MS821n/dn, MS822de	MS823n/dn	MS825dn, MS826de
Staple finisher	1	1	1
High capacity output expander	1	1	1
Output expander + mailbox	Up to 3 total, any combination of output expander and mailbox		
Output expander (on top) + high capacity output expander	1 each	1 each	1 each
Output expander + staple finisher (on top only)	1 each	1 each	1 each
Mailbox + staple finisher (on top only)	1 each	1 each	1 each
Staple, hole punch finisher	1, cannot be paired with another optional bin		
<b>Output capacity</b>			
Output expander	500	500	500
Mailbox	4 x 100	4 x 100	4 x 100
Staple finisher (unstapled)	500	500	500
High capacity output expander	1500	1500	1500
Staple, hole punch finisher	500	500	500

# Theory of operation

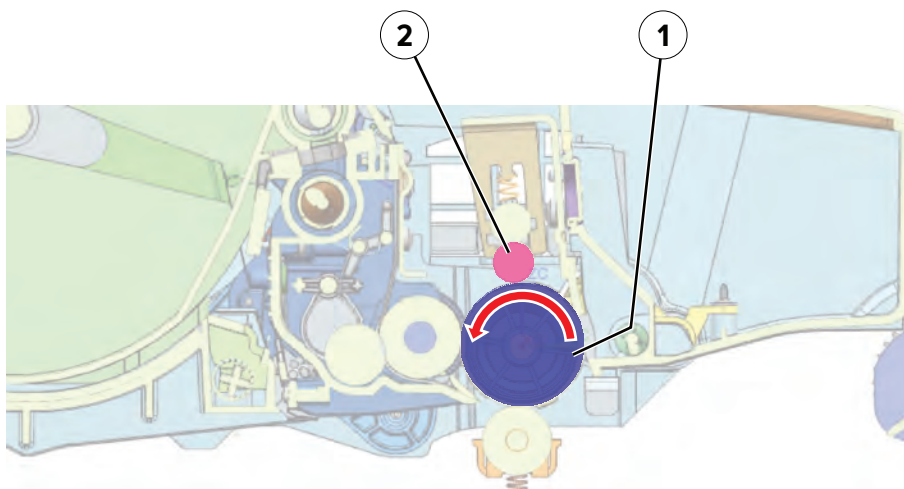

## Print cycle operation

### Flowchart

## Electrophotographic (EP) process

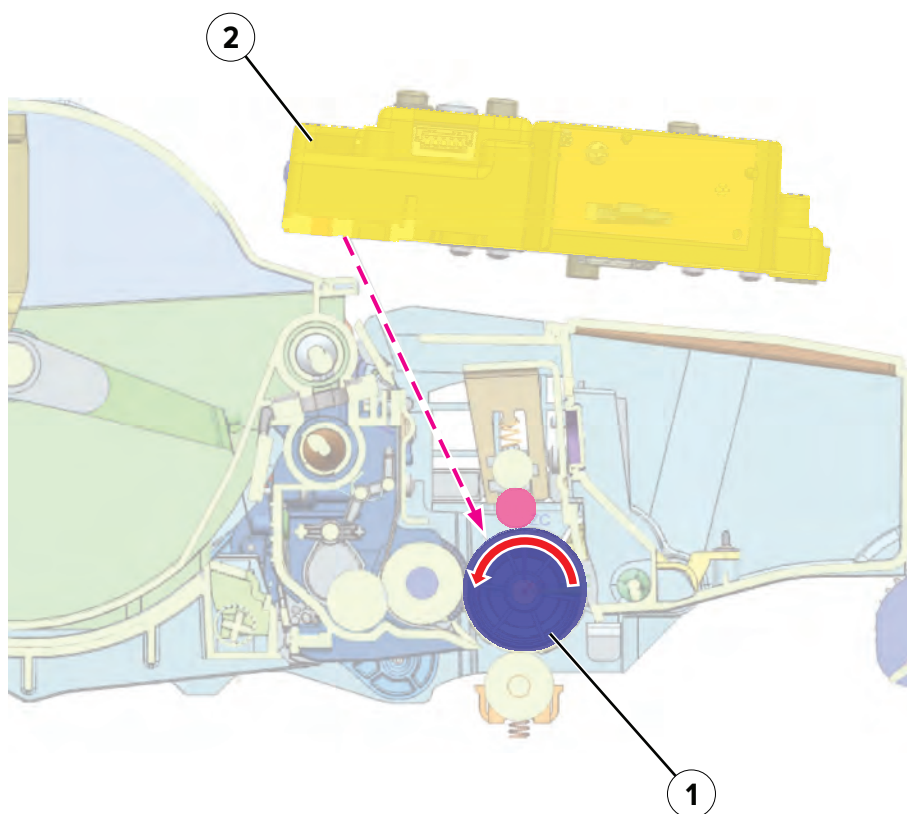

### Charge

1	Photoconductor drum
2	Charge roller

A uniform negative electrical charge is applied by the charge roller to the surface of the photoconductor drum. The photoconductive properties of the surface material allow it to hold the charge as long as it is not exposed to light.

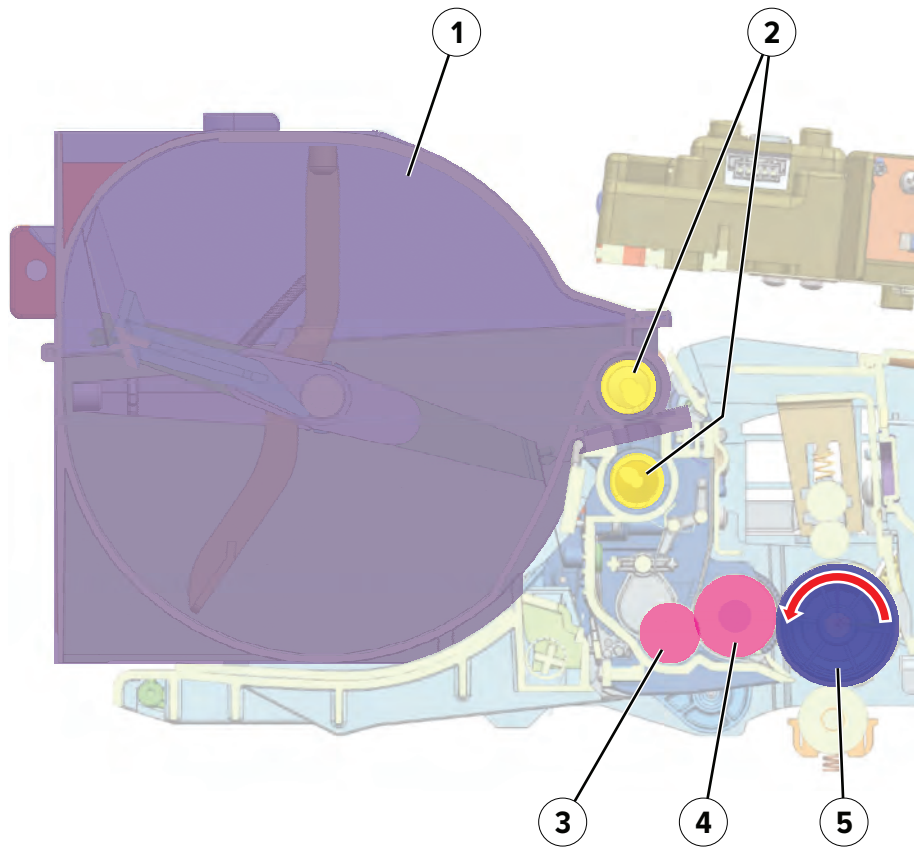

## Expose

1	Photoconductor drum
2	Printhead

The printhead emits the light that contacts the surface of the photoconductor drum. The light turns on or off coinciding with the digital latent image. The light causes areas of the photoconductor drum surface to lose charge, resulting in a relative opposite polarity.

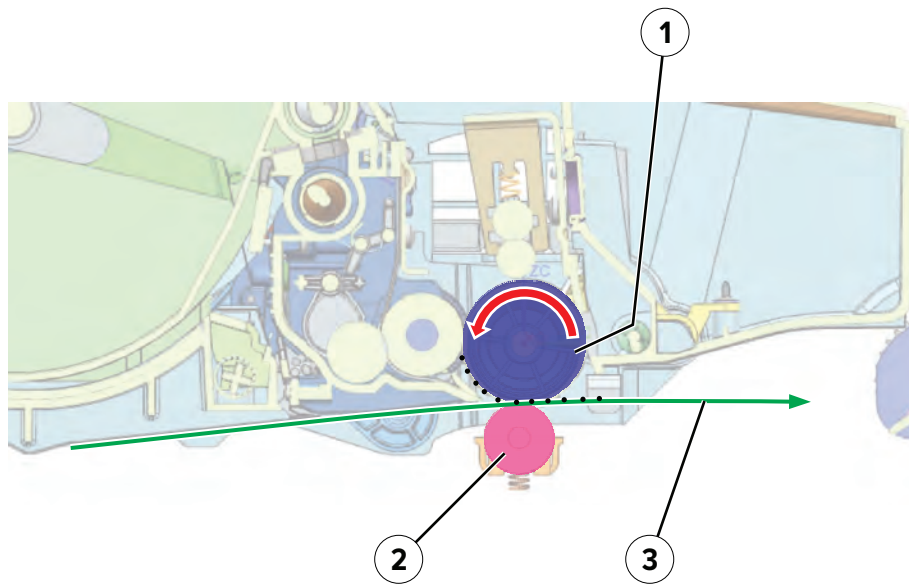

## Develop

<b>1</b>	Toner cartridge
<b>2</b>	Augers
<b>3</b>	Toner add roller
<b>4</b>	Developer roller
<b>5</b>	Photoconductor drum

The developer roller applies the toner from the toner cartridge to the photoconductor drum. The difference in charge cause the toner particles to attract to the photoconductor drum areas which were exposed to light.

## Transfer

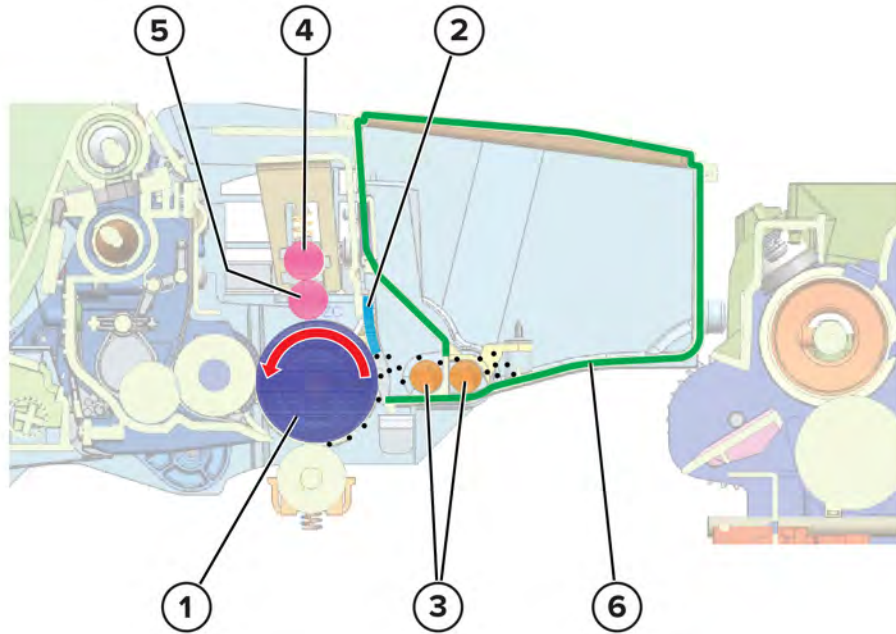

1	Photoconductor drum
2	Transfer roller
3	Paper

The developed image transfers from the photoconductor drum to the paper. The polarity of the transfer roller attracts the toner to the paper surface.

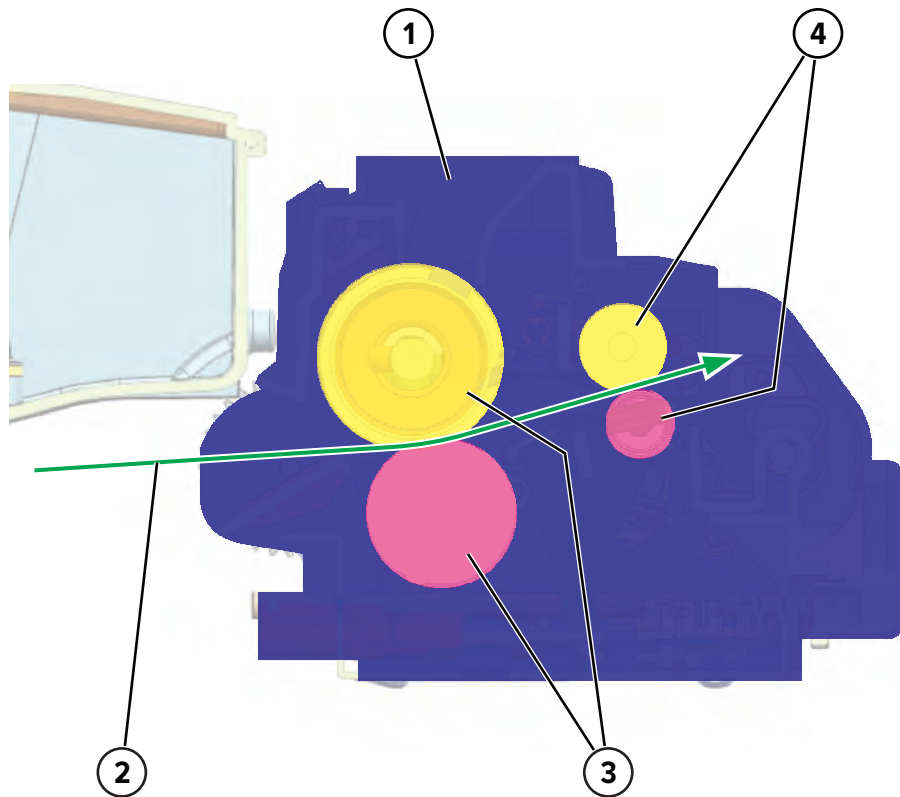

## Clean

1	Photoconductor drum
2	Cleaning blade
3	Augers
4	Cleaning roller
5	Charge roller
6	Waste toner chamber

The cleaning blade removes the toner residue from the photoconductor drum. The cleaning roller removes the toner residue from the charge roller. The cycle (charge, expose, develop, transfer, clean) repeats until the whole image is transferred to the paper.

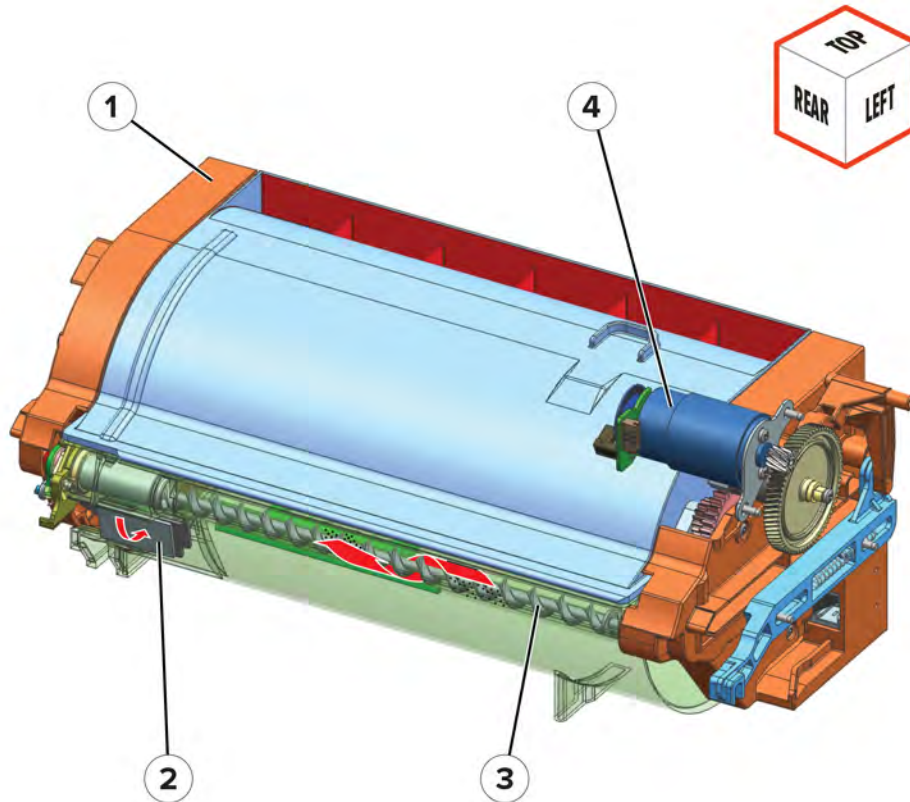

## Fuse

<b>1</b>	Fuser unit
<b>2</b>	Paper
<b>3</b>	Fuser rollers
<b>4</b>	Fuser exit rollers

Even if the toner image is already on the paper, the toner particles are not yet permanently bonded to the surface. For the final part of printing, the paper is transported to the fuser where heat and pressure are applied to it. As a result, the toner particles melt and permanently fuse with the paper, completing the print process. The cycle repeats for the succeeding pages.

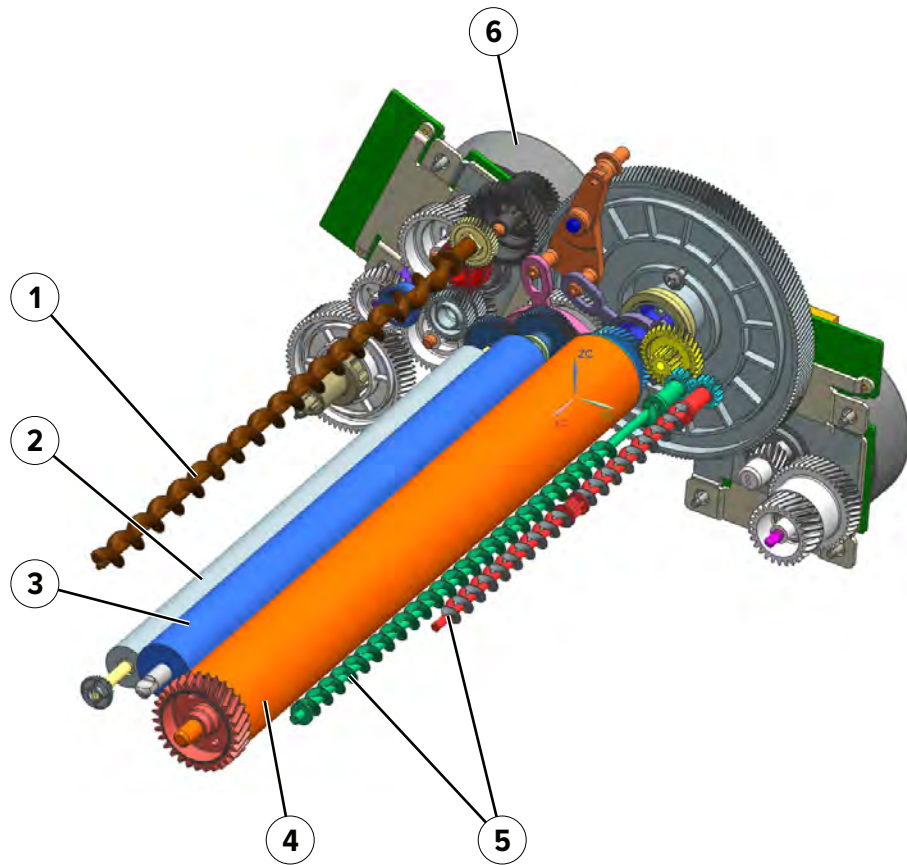

## Fresh toner delivery drive

1	Toner cartridge
2	Shutter
3	Auger
4	Motor (toner cartridge)

The toner cartridge supplies fresh toner to the imaging unit. When the cartridge is installed, the shutter opens to enable toner delivery. Inside the cartridge, paddles agitate the toner to ensure proper circulation. The auger directs the toner particles toward the toner outlet. The paddles and auger are driven by the motor (toner cartridge).

## Main drive

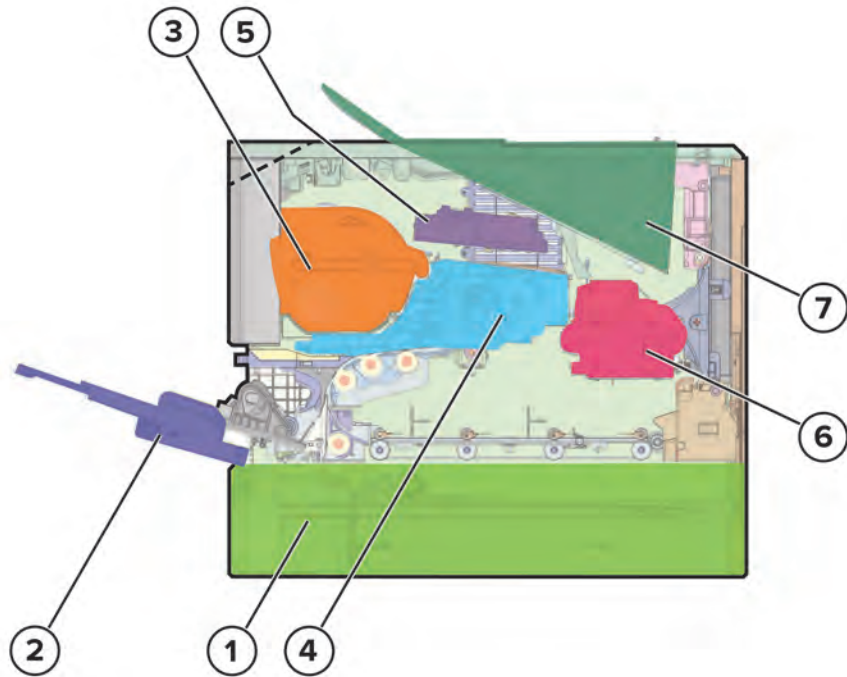

1	Developer auger
2	Toner add roller
3	Developer roller
4	Photoconductor drum
5	Waste toner augers
6	Motor (main)

Inside the imaging unit, the developer roller applies the toner to the photoconductor drum surface. The developer auger and toner add roller ensure that the proper amount of toner is supplied. Inside the waste toner chamber, waste toner augers collect the waste toner. These augers also maximize the waste toner container capacity. The augers, rollers, and photoconductor drum are driven by the motor (main).

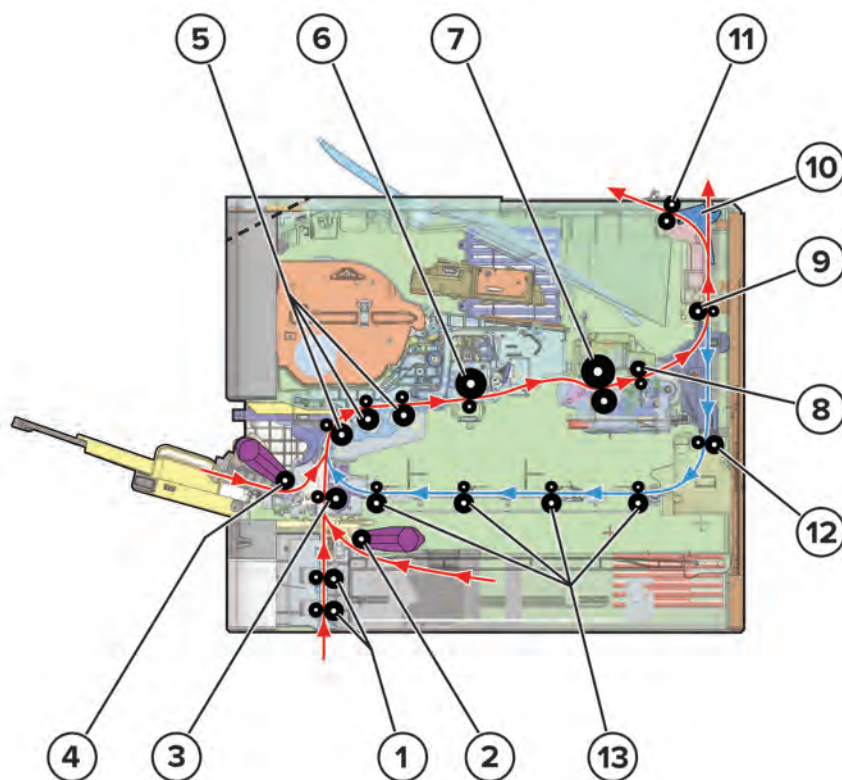

# Printer operation

## Printer sections

1	Tray 1
2	MPF
3	Toner cartridge
4	Imaging unit
5	Printhead
6	Fuser
7	Bin

## Printer paper path rollers

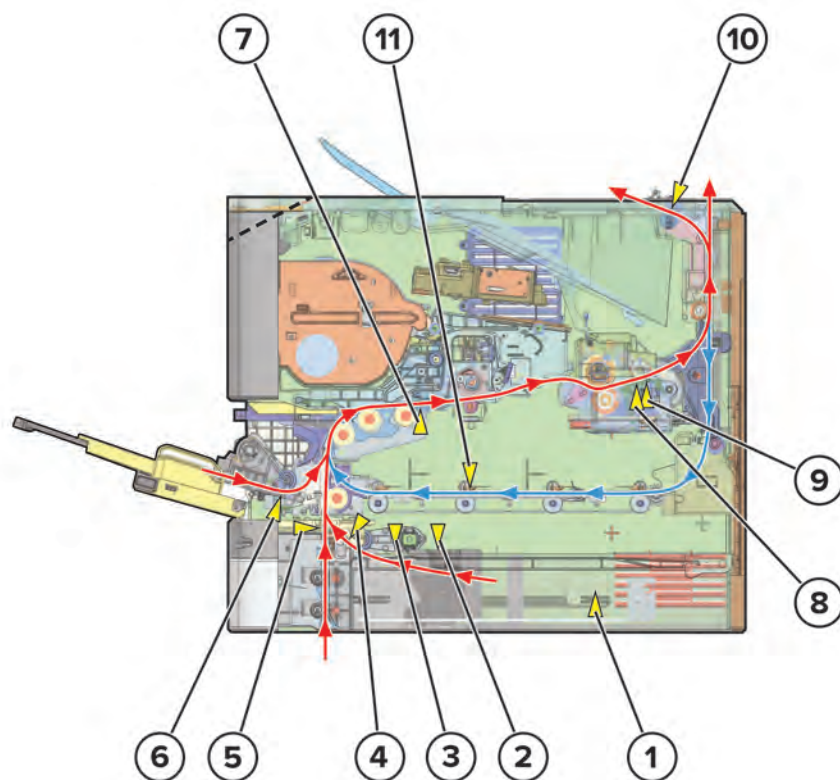

1	Transport rollers
2	Tray 1 pick roller
3	Lower aligner roller
4	MPF pick roller
5	Upper aligner rollers
6	Photoconductor drum
7	Fuser roller/belt
8	Fuser exit roller
9	Lower redrive roller
10	Diverter
11	Upper redrive roller
12	Duplex entry roller
13	Duplex aligner rollers

Paper is fed from tray 1, MPF, or optional trays.

By default, paper will travel along the standard paper path (in red). For print jobs on the opposite page of the paper, paper will reenter the printer following the duplex paper path (in blue).

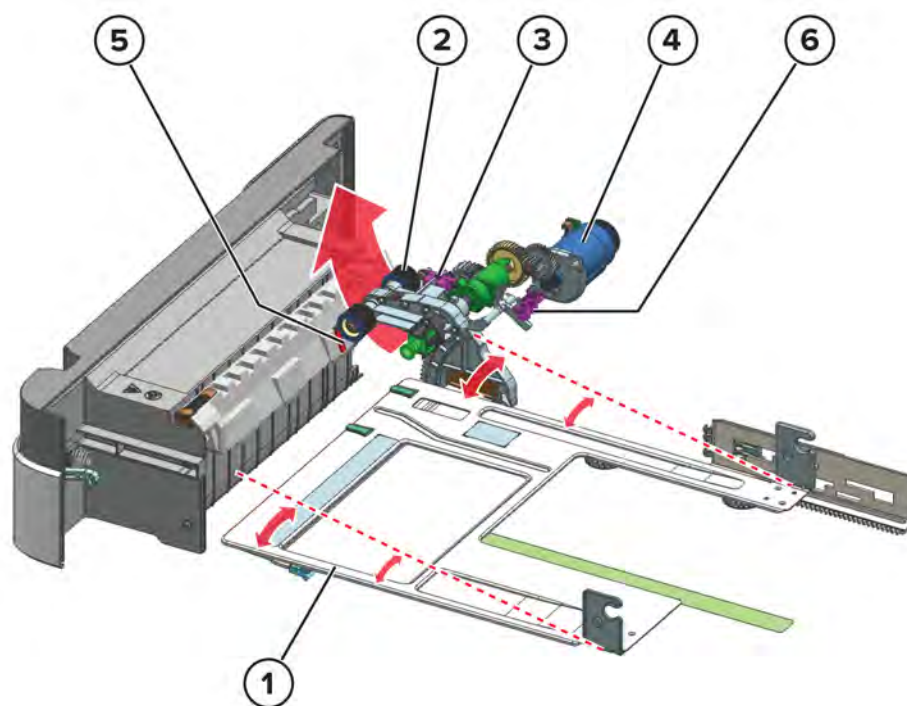

When the print job is done, paper exits the printer into the bin or goes up to the next optional bin.

## Printer paper path sensors

#	Sensor	Functions
1	Sensor (paper size)	Detects the position of paper guides for determining size.
2	Sensor (tray 1 paper present)	Detects the presence or absence of paper on the tray.
3	Sensor (pick position)	Detects if the pick roller is in position to pick.
4	Sensor (pick)	Detects the paper as it is picked and fed to the printer.
5	Sensor (tray 1 pass-through)	Detects the paper fed from optional trays as it enters the printer.
6	Sensor (MPF paper present)	Detects the presence or absence of paper on the MPF tray.
7	Sensor (input)	Detects the paper as it passes the transfer roller.
8	Sensor (fuser exit)	Detects the paper as it passes the fuser.
9	Sensor (narrow media) <b>Note:</b> This part is found in hot roll fusers only.	Detects if the paper width is narrow.
10	Sensor (exit)	Detects the paper as it exits onto the bin.
11	Sensor (duplex path)	Detects the paper as it travels the duplex paper path.

## Tray pick and lift drive

1	Lift plate
2	Pick roller
3	Sensor (pick position)
4	Motor (pick/lift)
5	Separator pad
6	Sensor (paper present)

Paper is lifted by the lift plate until the sensor (pick position) is triggered. The motor (pick/lift) starts, and then enables the pick roller to feed the paper into the printer.

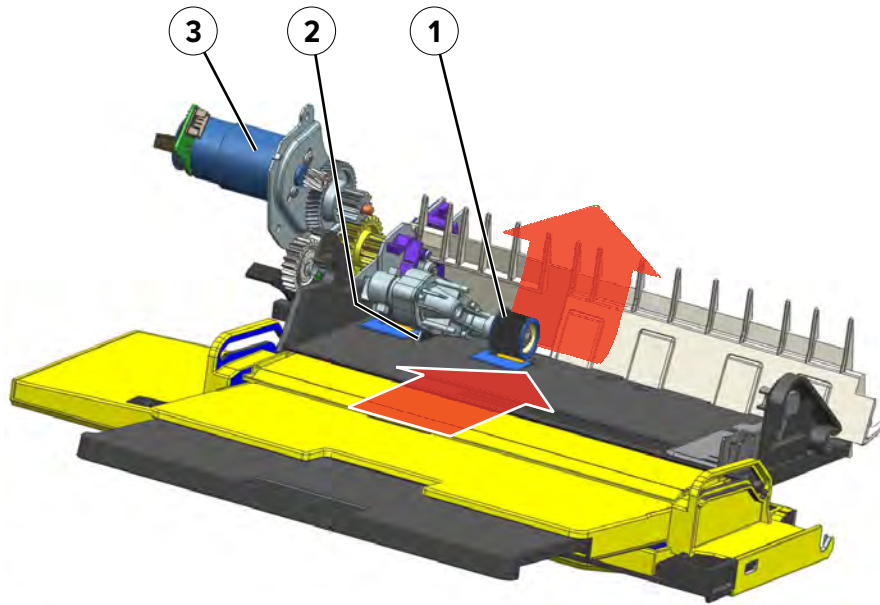

**Note:** The motor (pick/lift) also drives the lift plate when rotating in reverse.

To avoid multi-sheet picking, the friction from the separator pad prevents the extra paper from entering the printer.

The sensor (paper present) detects if the tray is empty.

## MPF pick drive

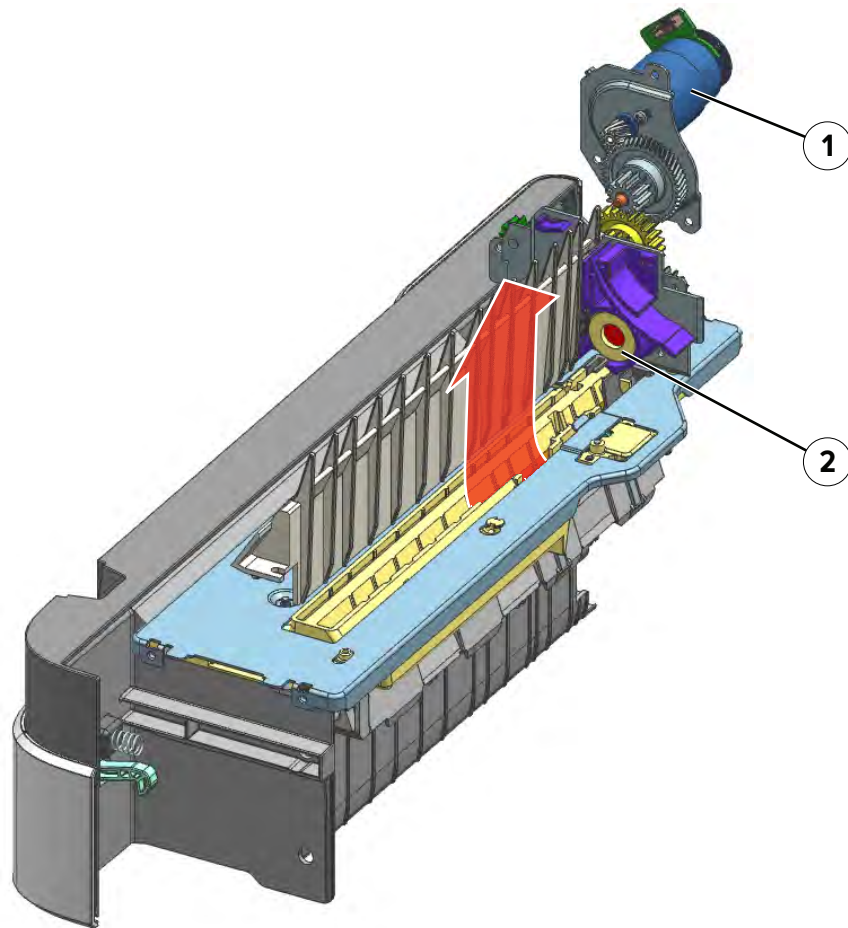

1	Pick roller
2	Sensor (MPF paper present)
3	Motor (MPF)

The MPF pick roller feeds the paper into the printer.

The motor (MPF) controls the pick roller. The sensor (MPF paper present) detects if the MPF tray is empty.

## Lower transport drive

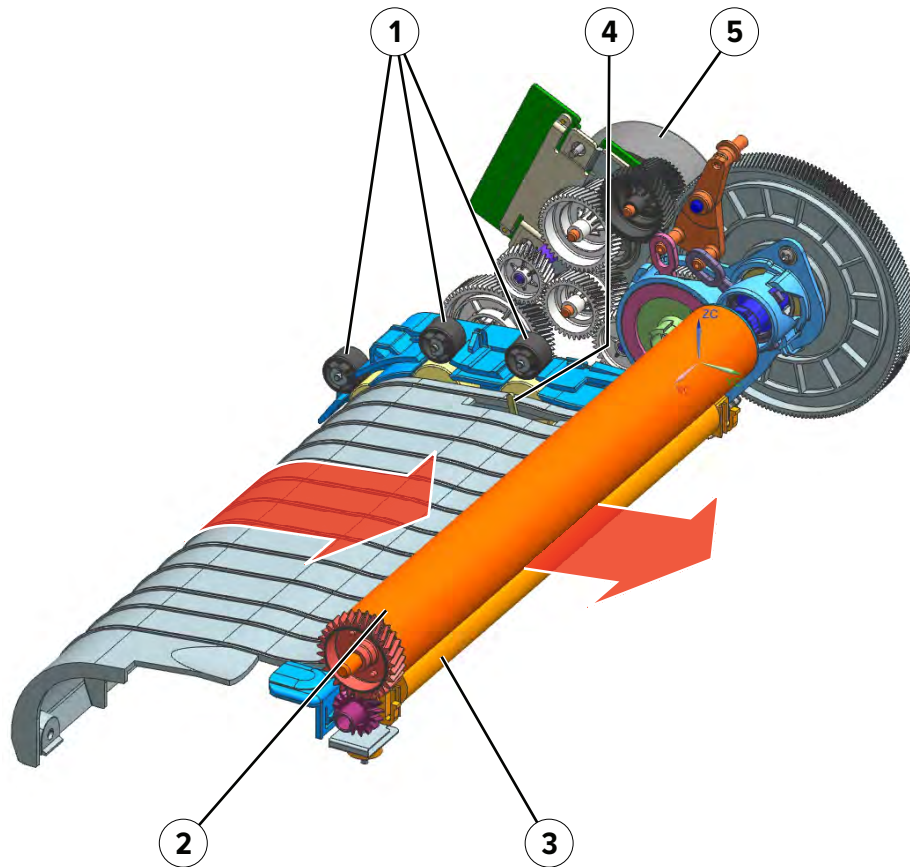

<b>1</b>	Motor (MPF)
<b>2</b>	Lower aligner roller

The motor (MPF) also drives the lower aligner roller.

The roller receives the paper fed from the standard tray or the optional trays.

## Main drive

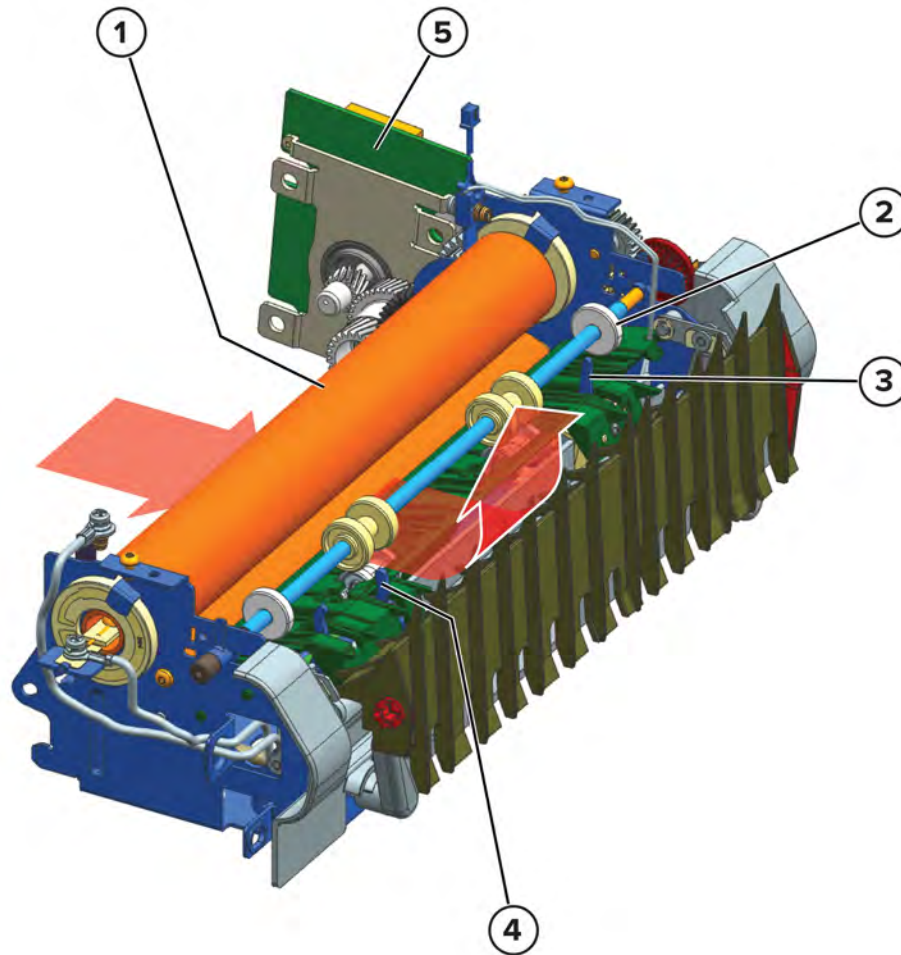

1	Upper aligner rollers
2	Photoconductor drum
3	Transfer roller
4	Sensor (input)
5	Motor (main)

The paper is aligned to its reference edge by the aligner rollers. As the paper is transported by the aligner rollers to the transfer roller, it is detected by the sensor (input).

The upper aligner roller, photoconductor drum, and transfer roller are driven by the motor (main).

## Fuser drive

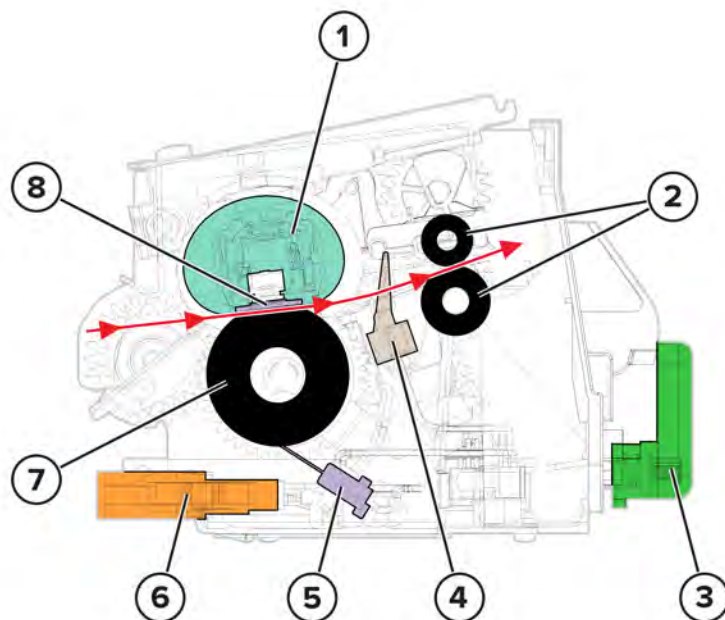

1	Fuser roller/belt
2	Fuser exit roller
3	Sensor (fuser exit)
4	Sensor (narrow media) <b>Note:</b> This parts is found in hot roll fusers only.
5	Motor (fuser)

As the paper passes the fuser roller, heat and pressure are applied to permanently bond the toner to the paper.

The fuser exit roller transports the paper to the exit path. The sensor (fuser exit) detects the paper. The sensor (narrow media) is triggered if the paper is narrow.

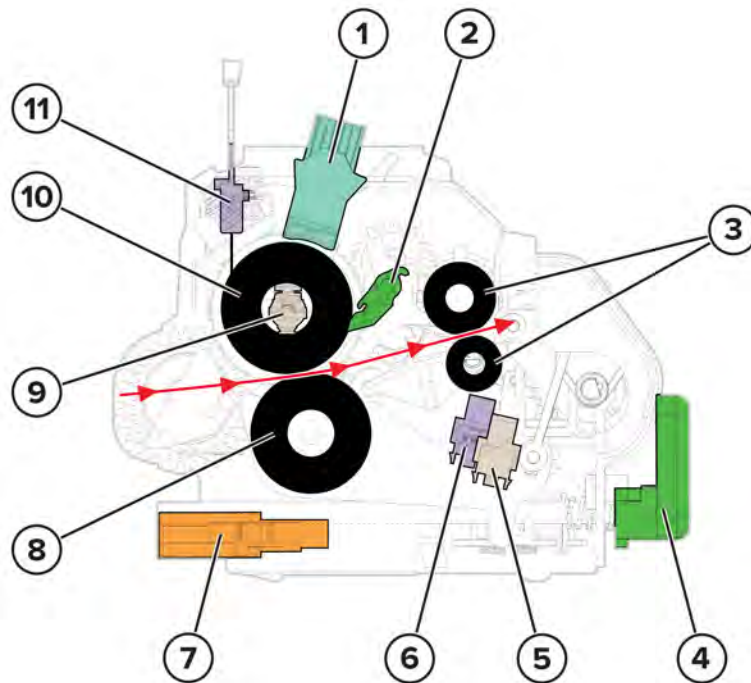

The motor (fuser) drives the fuser roller and fuser exit roller.

## Fuser components

## Belt fuser components

#	Part	Function
1	Hot belt	Applies heat to the paper.
2	Fuser exit rollers	Transports the paper out of the fuser.
3	Knob	Locks or unlocks the fuser.
4	Sensor (fuser exit)	Detects the paper passing the fuser.
5	Thermistor	Detects the temperature of the fuser.
6	Connector	Automatically connects the fuser to the printer when inserting the fuser.
7	Pressure roller	Applies pressure to the paper.
8	Heater bar	Supplies heat to the fusing process.

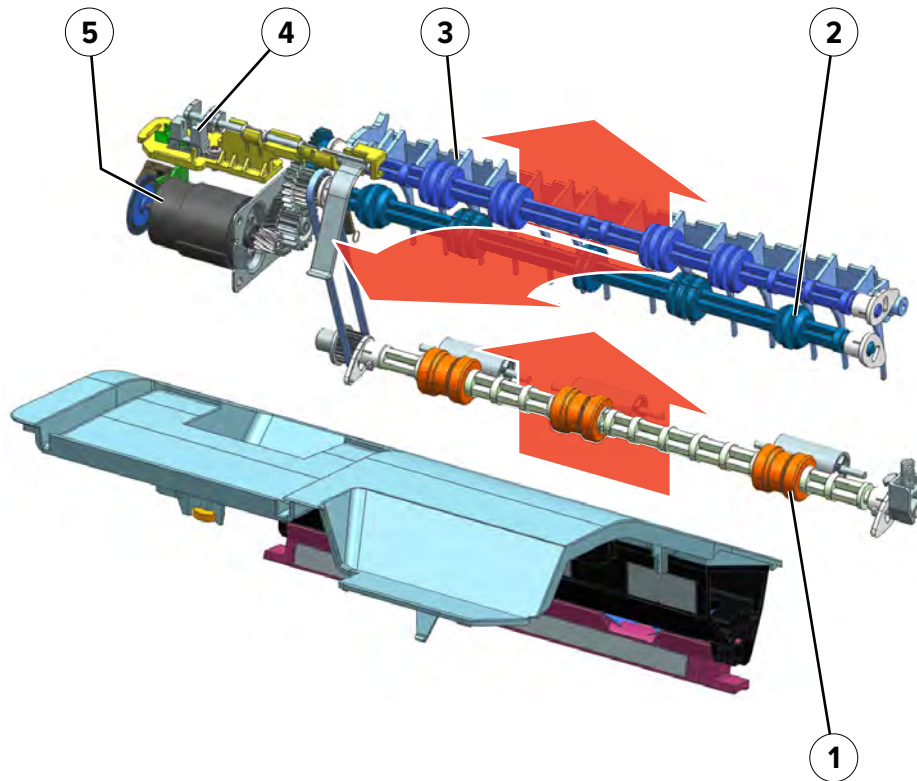

### Hot roll fuser components

#	Part	Function
1	Fuser wiper	Cleans the roller.
2	Detack finger	Separates the paper from the roller.
3	Fuser exit rollers	Transports the paper out of the fuser.
4	Knob	Locks or unlocks the fuser.
5	Sensor (narrow media)	Detects paper with narrow width.
6	Sensor (fuser exit)	Detects the paper passing the fuser.
7	Connector	Automatically connects the fuser to the printer after inserting the fuser.
8	Pressure roller	Applies pressure to the paper.
9	Heater lamp	Supplies heat to the fusing process.
10	Hot roller	Applies heat to the paper.
11	Thermistor	Detects the temperature of the fuser.

## Upper redrive drive

### Exit path

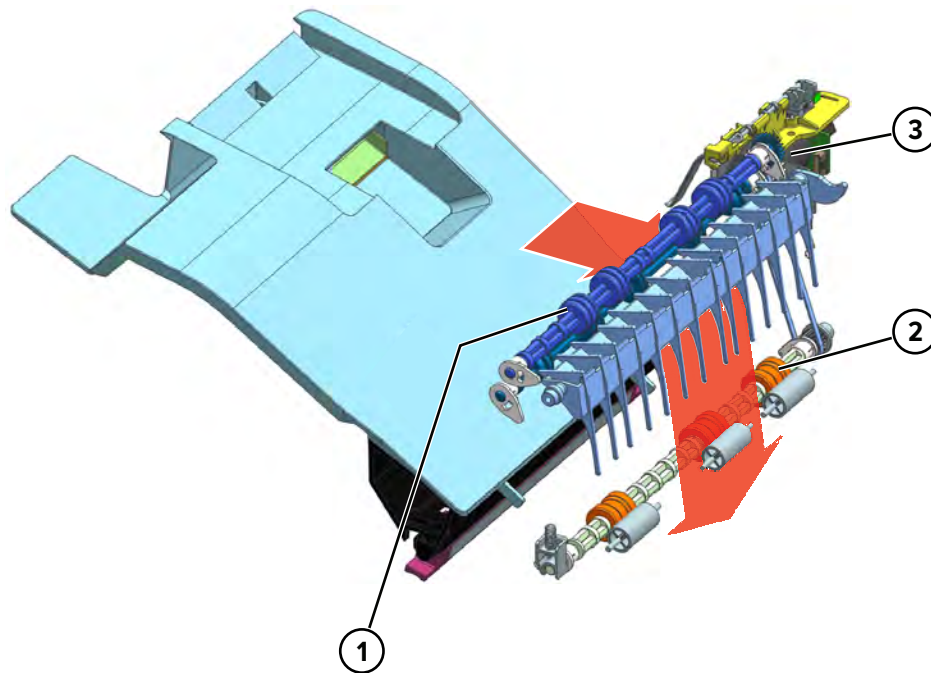

1	Lower redrive roller
2	Upper redrive roller
3	Diverter
4	Sensor (bin full)
5	Motor (redrive)

Paper is ejected by the upper redrive rollers to the bin. By default, the diverter will direct the paper toward the bin. If a plunger changes the position of the diverter, then the paper will move upwards to the optional bin.

The redrive rollers are controlled by the motor (redrive). The sensor (bin full) senses if the bin is already full.

## Duplex path

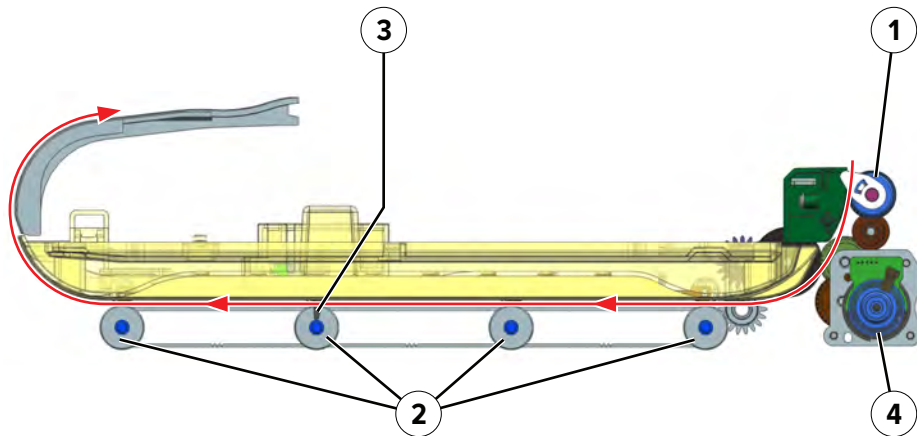

<b>1</b>	Upper redrive roller
<b>2</b>	Lower redrive roller
<b>3</b>	Motor (redrive)

For duplex print jobs, the redrive rollers reverse their rotations to feed the paper back to the printer following the duplex paper path.

The motor (redrive) controls the redrive rollers.

## Duplex transport drive

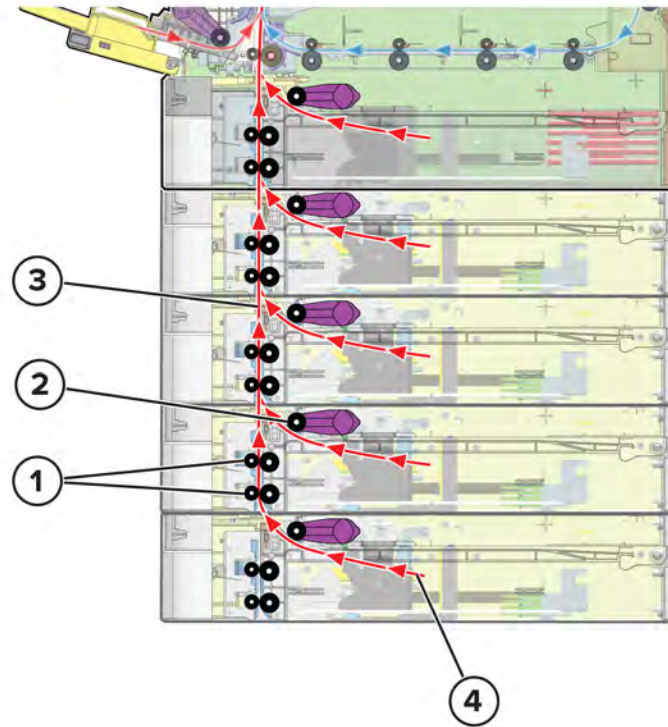

1	Duplex entry roller
2	Duplex aligner rollers
3	Sensor (duplex path)
4	Motor (duplex)

For duplex print jobs, paper from the redrive rollers enters the duplex entry roller. Aligner rollers along the duplex paper path feed the paper back to the standard paper path (see [“Main drive” on page 883](#)). The aligner rollers also align the paper along the reference edge.

The sensor (duplex path) detects the paper as it travels along the duplex path. The motor (duplex) drives the duplex rollers.

# Optional 250- and 550-sheet tray operation

## 250- and 550-sheet tray paper path rollers

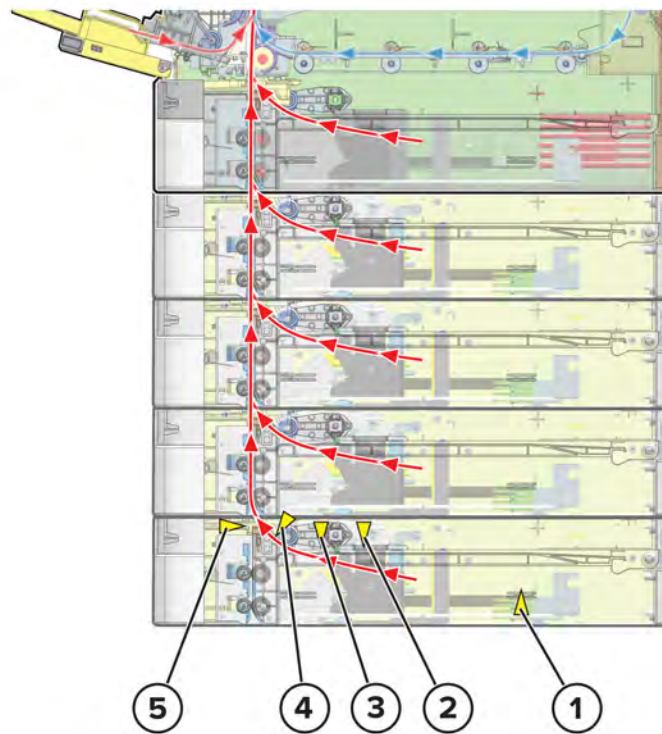

1	Transport rollers
2	Pick roller
3	Pass-through path
4	Feed path

Paper from the optional trays is fed into the printer through the pick rollers.

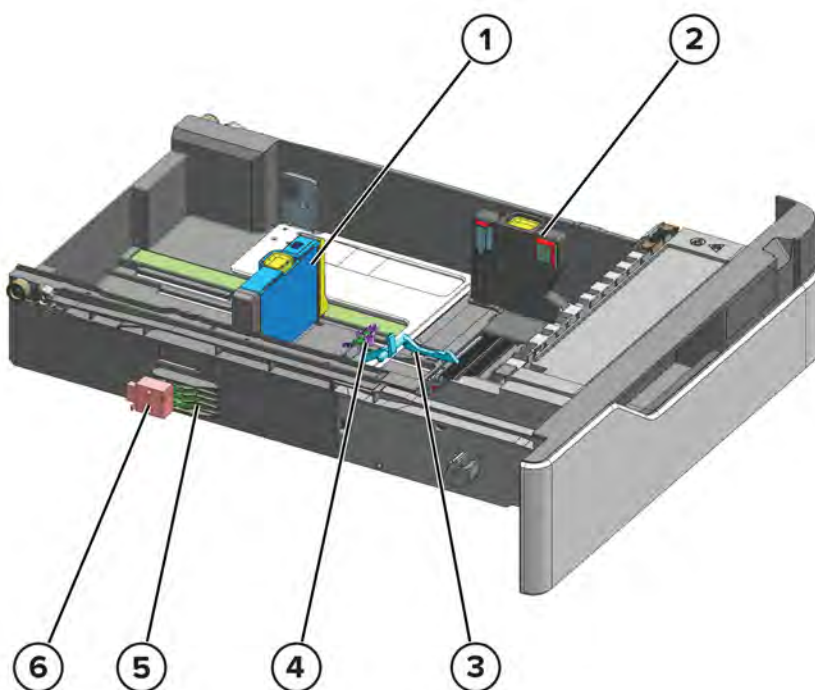

Multiple optional trays use the transport rollers to receive paper from the lower trays.

## 250- and 550-sheet tray paper path sensors

#	Sensor	Functions
1	Sensor (paper size)	Detects the position of the paper guides
2	Sensor (paper present)	Detects paper presence in the tray
3	Sensor (pick roller index)	Detects the position of the pick roller
4	Sensor (pick)	Detects paper as it is picked and fed to the printer
5	Sensor (pass-through)	Detects paper that is fed from the lower trays as it enters the printer

## Paper presence and size detection

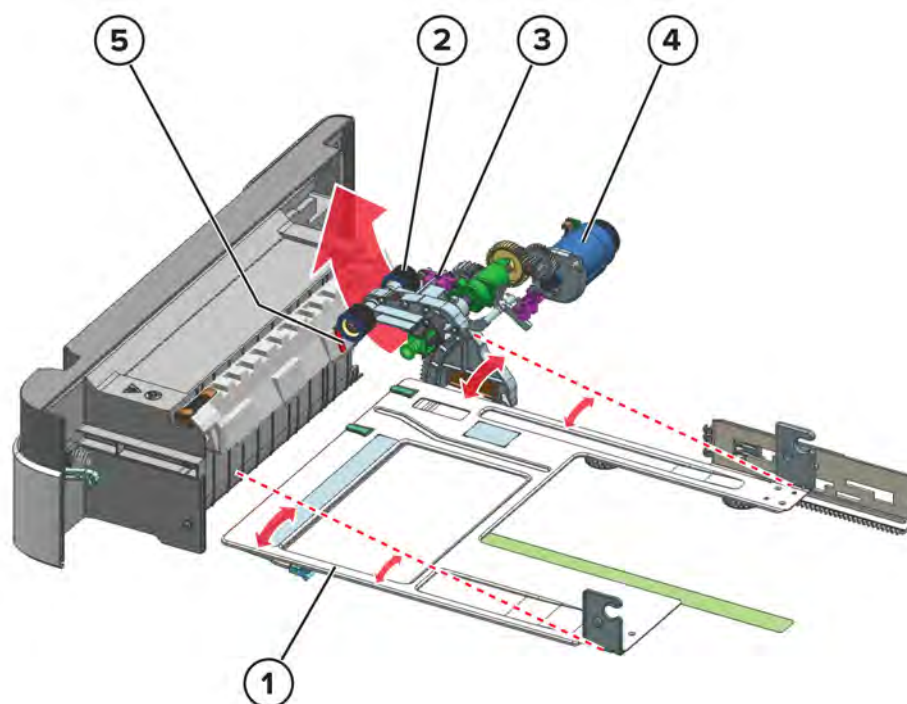

1	Paper length guide
2	Paper width guide
3	Paper presence sensor actuator
4	Sensor (paper present)
5	Paper size sensor actuator
6	Sensor (paper size)

The paper size is detected based on the length guide position. The width guide prevents deskewing.

The fingers of the paper size sensor actuator move according to the position of the paper length guide. The sensor (paper size) detects the formation of the actuator and determines the dimensions of the paper.

When the tray is empty, the paper presence sensor actuator triggers the sensor (paper present).

## Tray pick and lift drive

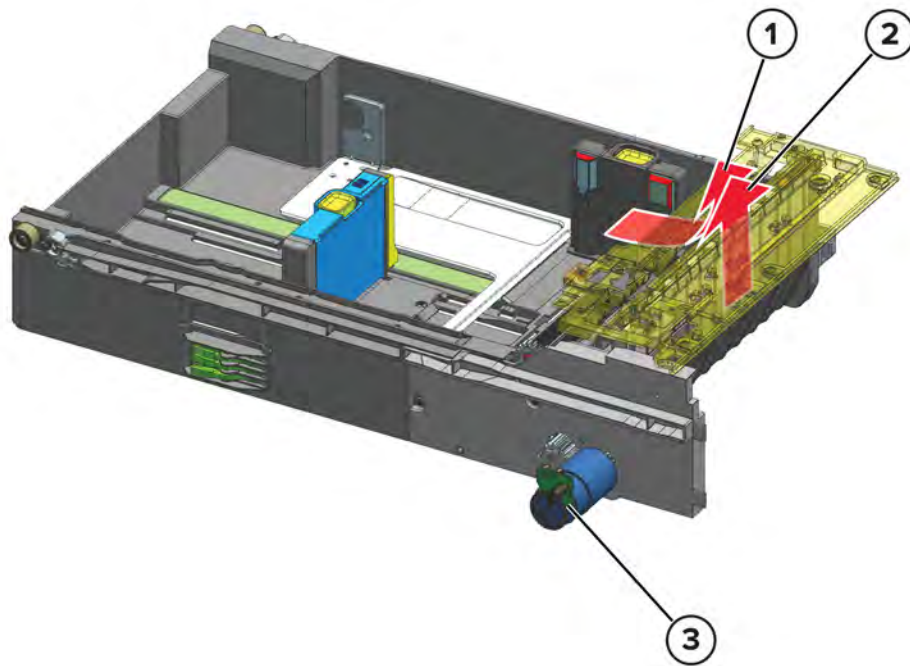

1	Lift plate
2	Pick roller
3	Sensor (pick roller index)
4	Motor (pick/lift)
5	Separator pad

The lift plate lifts the paper until the sensor (pick roller index) is triggered. The motor (pick/lift) starts, and then enables the pick roller to feed the paper into the printer or upper trays.

**Note:** The motor (pick/lift) also drives the lift plate when rotating in reverse.

To avoid multiple-sheet picking, the friction from the separator pad prevents the extra paper from entering the printer.

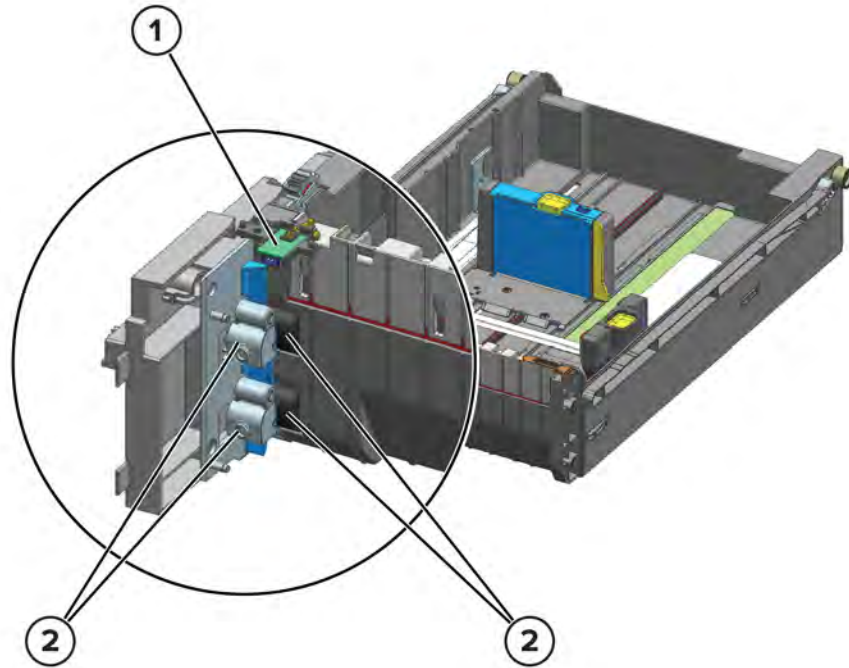

## Transport drive

<b>1</b>	Feed path
<b>2</b>	Pass-through path
<b>3</b>	Motor (transport)

The pass-through path is where paper that is fed from lower trays passes over to the upper trays and into the printer. The motor (transport) drives the transport rollers that move the papers in this path.

The feed path is where paper from the source tray passes over to the pass-through path of the upper tray.

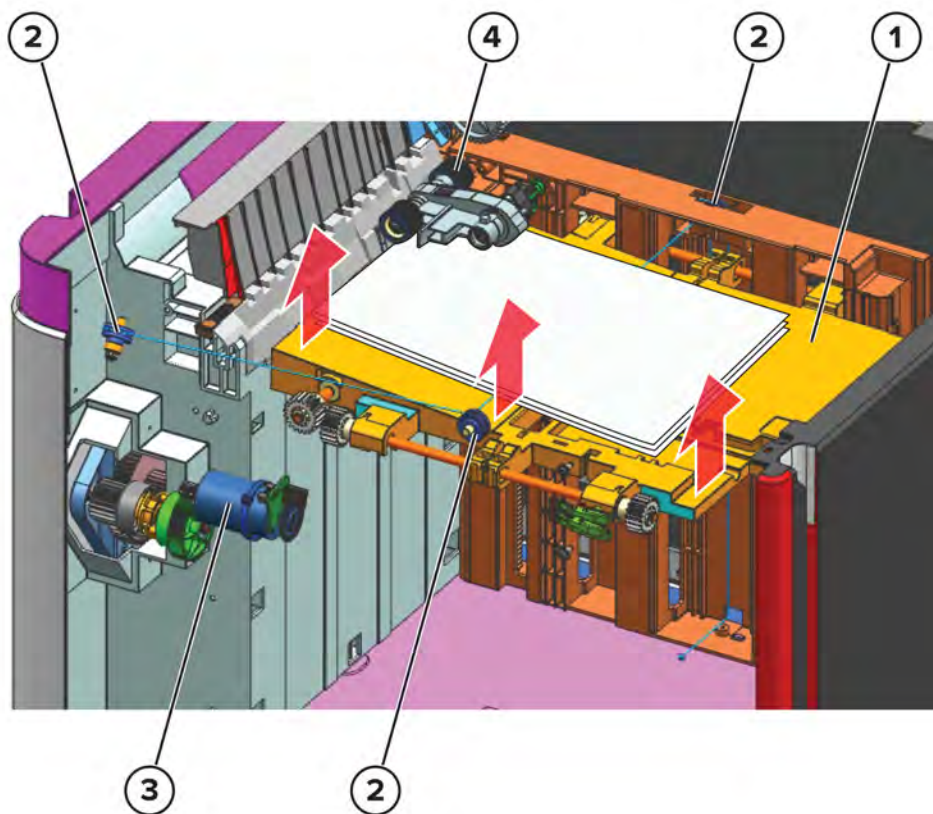

1	Sensor (pass-through)
2	Transport rollers

Paper from the lower trays continue on the pass-through path using the transport rollers of the source tray. The sensor (pass-through) detects if paper is transported from the lower trays.

## Optional 2100-sheet tray operation

### 2100-sheet tray elevator drive

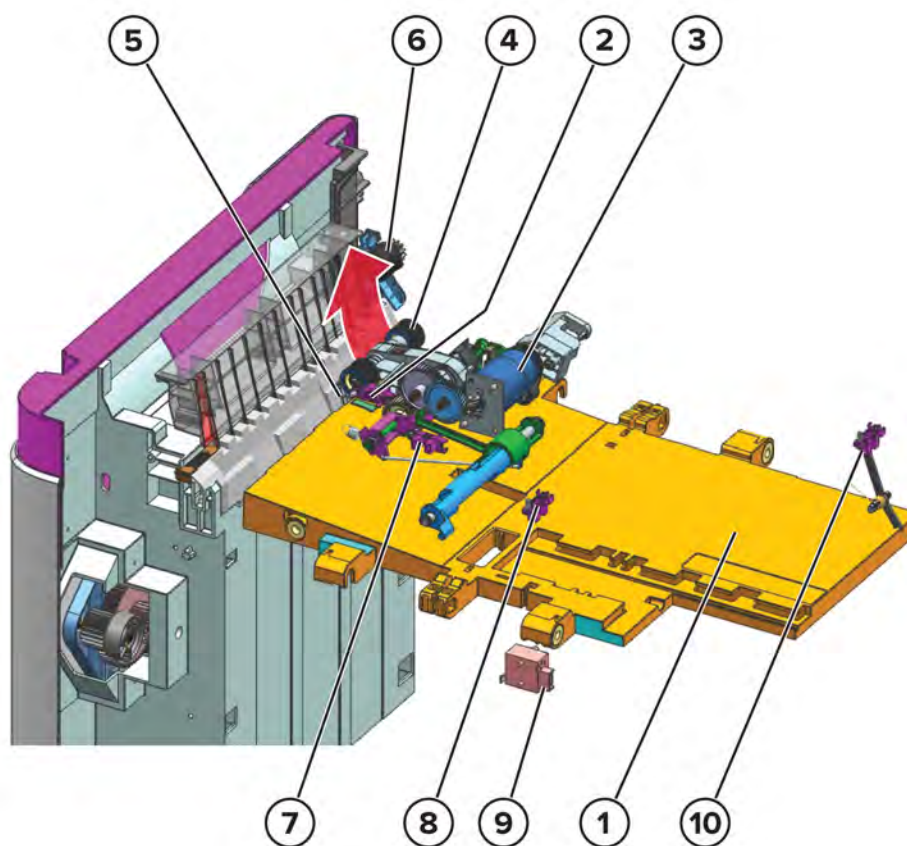

1	Elevator plate
2	Cable pulleys
3	Motor (elevator)
4	Pick roller

In preparation for picking, the elevator plate raises to push the paper against the pick roller.

The motor (elevator) drives a network of cables and pulleys to control the movement of the elevator plate.

## 2100-sheet tray pick drive

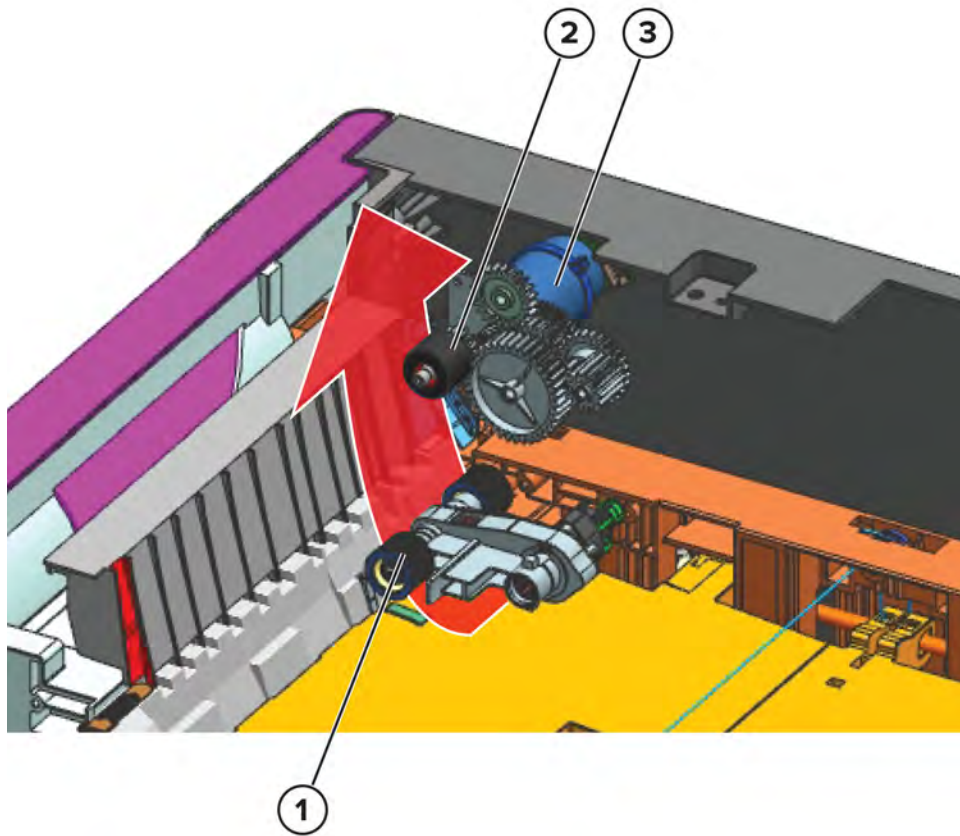

<b>1</b>	Elevator plate
<b>2</b>	Sensor (pick roller index)
<b>3</b>	Motor (pick)
<b>4</b>	Pick roller
<b>5</b>	Separator pad
<b>6</b>	Aligner roller
<b>7</b>	Sensor (paper present)
<b>8</b>	Sensor (A5 length guide)
<b>9</b>	Sensor (paper size)
<b>10</b>	Sensor (tray near empty)

The pick roller is lifted by the elevator plate until it triggers the sensor (pick roller index). At the pick position, the pick roller rotates to pick the topmost paper. The motor (pick) drives the pick roller.

To avoid multi-sheet picking, the friction from the separator pad prevents the extra paper from entering the printer.

The sensor (paper present) detects if the tray is empty. Paper guide positions are also detected by sensors to determine paper size.

## 2100-sheet tray transport drive

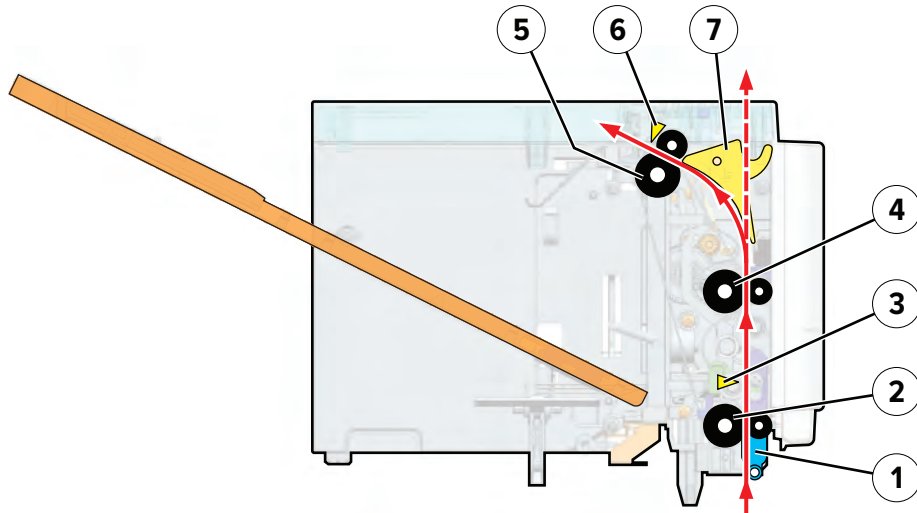

1	Pick roller
2	Aligner roller
3	Motor (transport)

Paper that is picked is received by the aligner roller, and then passed on to the transport roller of the standard tray or optional tray (see [“Lower transport drive” on page 882](#)). The motor (transport) drives the aligner roller.

# Optional output expander operation

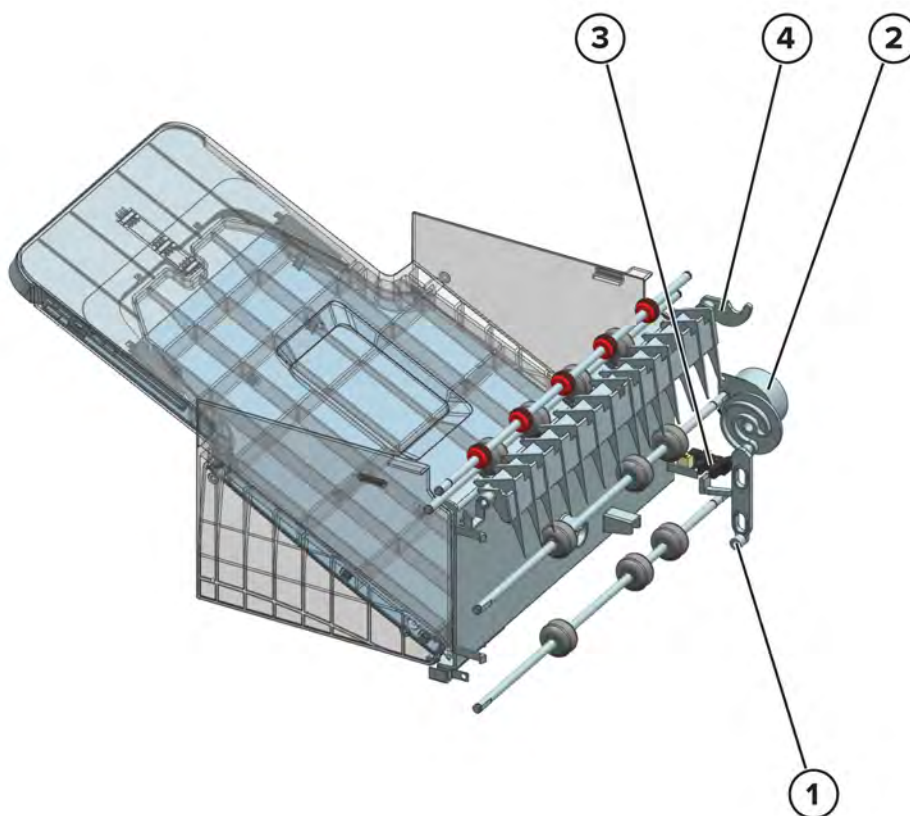

## Output expander paper path

1	Diverter plunger
2	Transport roller 1
3	Sensor (pass-through)
4	Transport roller 2
5	Exit roller
6	Sensor (bin full)
7	Diverter

The output expander increases the output capacity of the printer. Rollers along the paper path control the movement of the paper depending on the destination bin.

## Output expander diverter drive

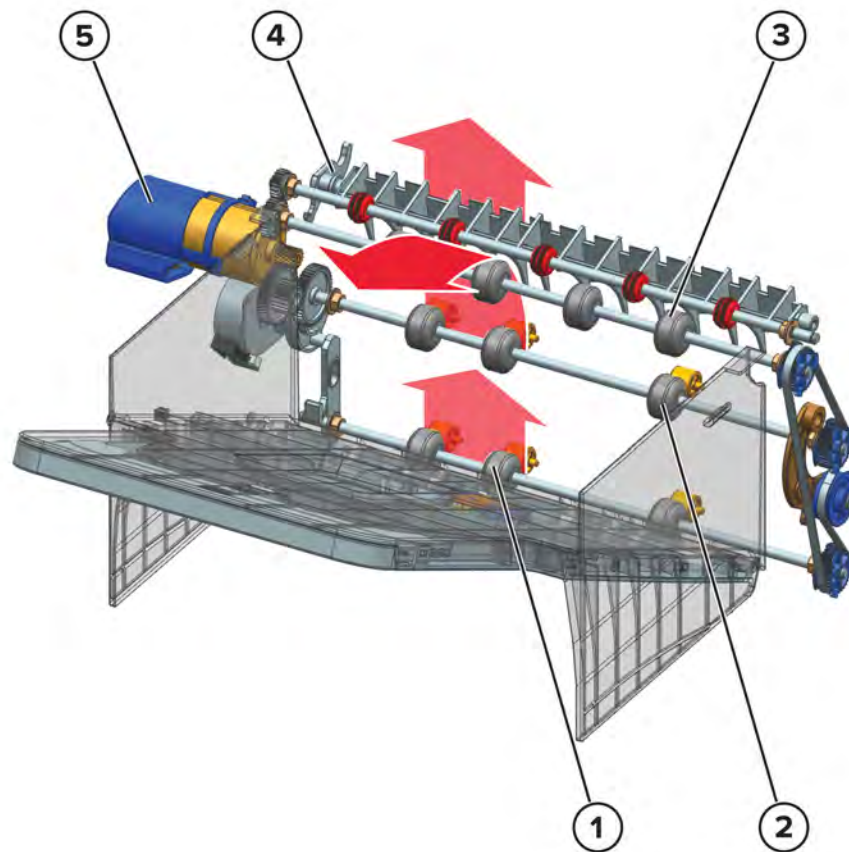

<b>1</b>	Diverter plunger
<b>2</b>	Motor (diverter)
<b>3</b>	Sensor (diverter plunger)
<b>4</b>	Diverter

The diverter (from the printer or optional bin) under the expander switches to open up the paper path of the expander. The diverter plunger controls the position of the diverter below it. The motor (diverter) drives the movement of the plunger. The sensor (diverter plunger) detects the position of the plunger.

By default, the diverter redirects the paper to the expander bin. Paper will only go straight up if an optional bin on top of the expander is the destination bin of the print job.

## Output expander transport drive

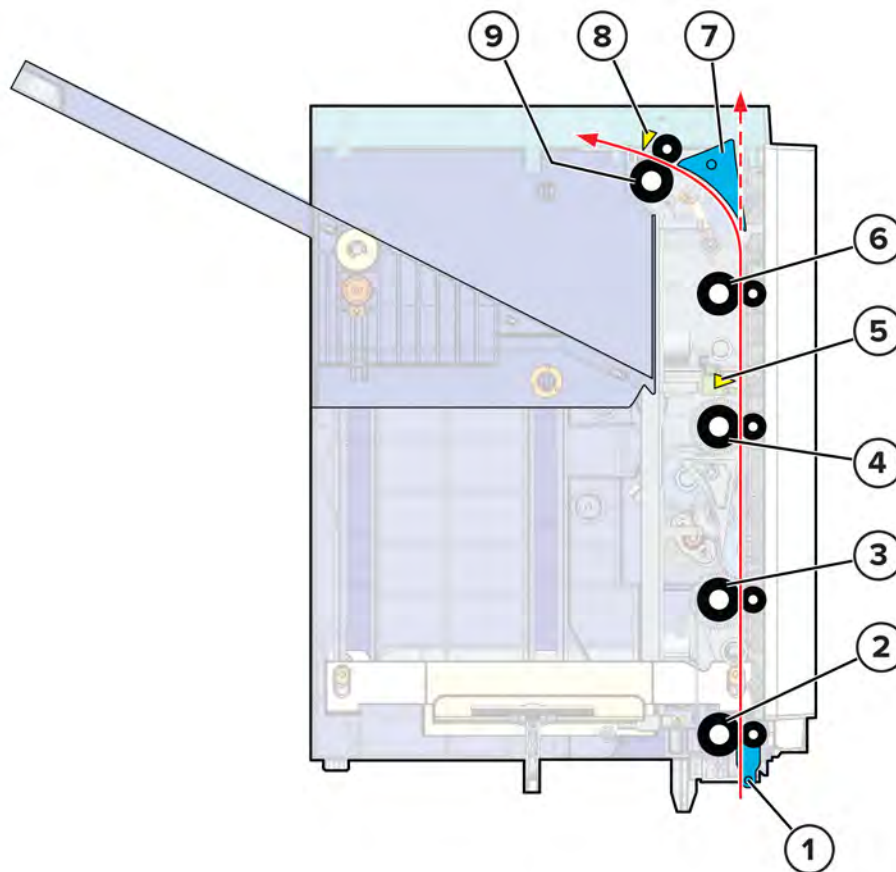

1	Transport roller 1
2	Transport roller 2
3	Exit roller
4	Diverter
5	Motor (transport)

The transport rollers and exit roller along the paper path move the paper depending on the destination bin assigned for the print job.

The motor (transport) drives both the transport and exit rollers.

# Optional high capacity output expander operation

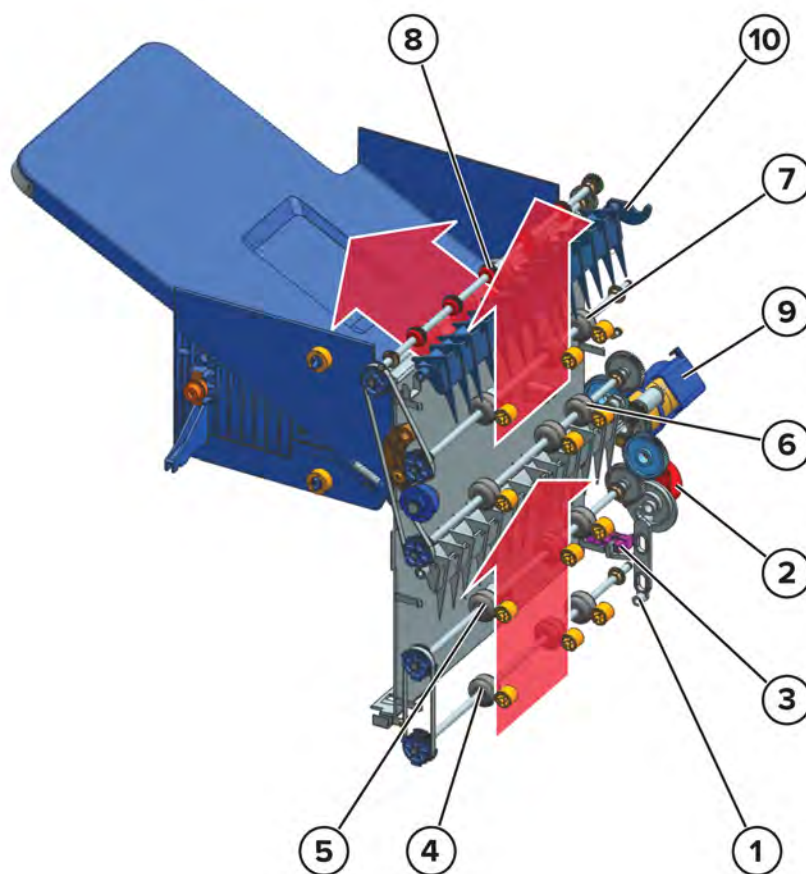

## High capacity output expander paper path

1	Diverter plunger
2	HCOE transport roller 1
3	HCOE transport roller 2
4	HCOE transport roller 3
5	Sensor (HCOE pass-through)
6	HCOE transport roller 4
7	Diverter
8	Sensor (HCOE bin full)
9	HCOE exit roller

The high capacity output expander increases the output capacity of the printer. Rollers along the paper path control the movement of the paper depending on the destination bin.

## HCOE diverter and transport drive

<b>1</b>	Diverter plunger
<b>2</b>	Motor (diverter)
<b>3</b>	Sensor (diverter plunger)
<b>4</b>	Transport roller 1
<b>5</b>	Transport roller 2
<b>6</b>	Transport roller 3
<b>7</b>	Transport roller 4
<b>8</b>	Exit roller
<b>9</b>	Motor (transport)
<b>10</b>	Diverter

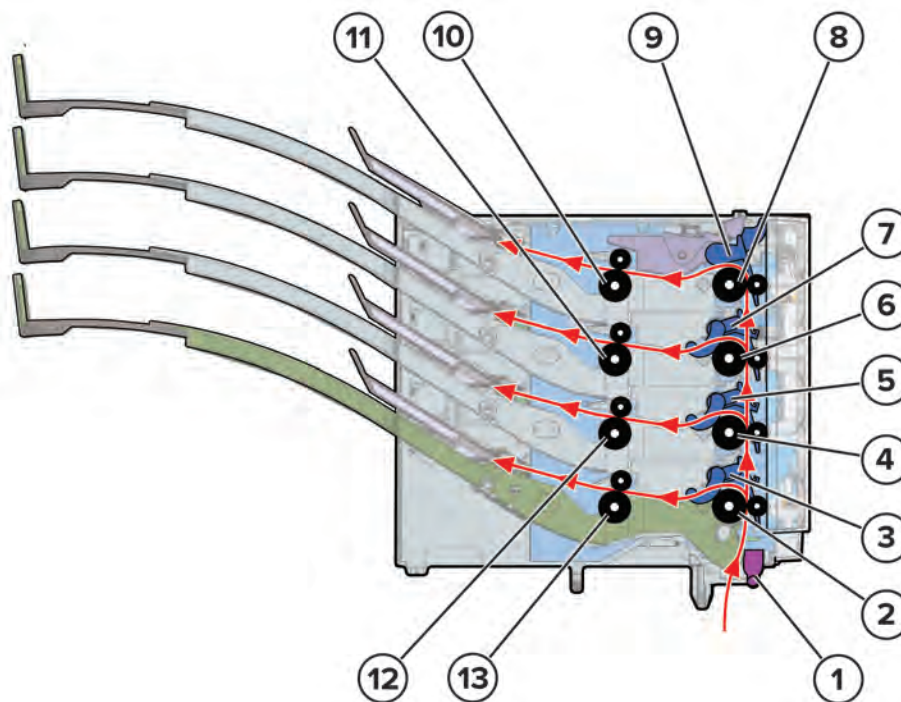

The diverter (from the printer or optional bin) under the HCOE switches to open up the paper path of the expander. The diverter plunger controls the position of the diverter below it. The motor (diverter) drives the movement of the plunger. The sensor (diverter plunger) detects the position of the plunger.

By default, the diverter redirects the paper to the expander bin. Paper will only go straight up if an optional bin on top of the expander is the destination bin of the print job.

The transport rollers and exit roller along the paper path move the paper depending on the destination bin assigned for the print job. The motor (transport) drives both the transport and exit rollers.

## Optional mailbox operation

### Mailbox paper path rollers

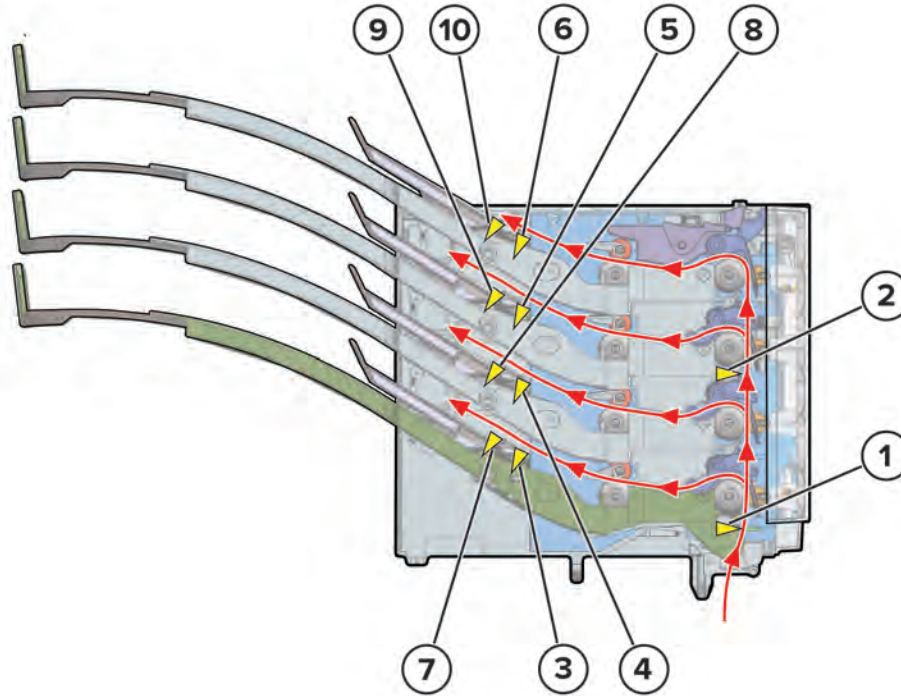

<b>1</b>	Diverter plunger
<b>2</b>	Mailbox transport roller 1
<b>3</b>	Diverter 1
<b>4</b>	Mailbox transport roller 2
<b>5</b>	Diverter 2
<b>6</b>	Mailbox transport roller 3
<b>7</b>	Diverter 3
<b>8</b>	Mailbox transport roller 4
<b>9</b>	Diverter 4
<b>10</b>	Exit roller 4
<b>11</b>	Exit roller 3
<b>12</b>	Exit roller 2
<b>13</b>	Exit roller 1

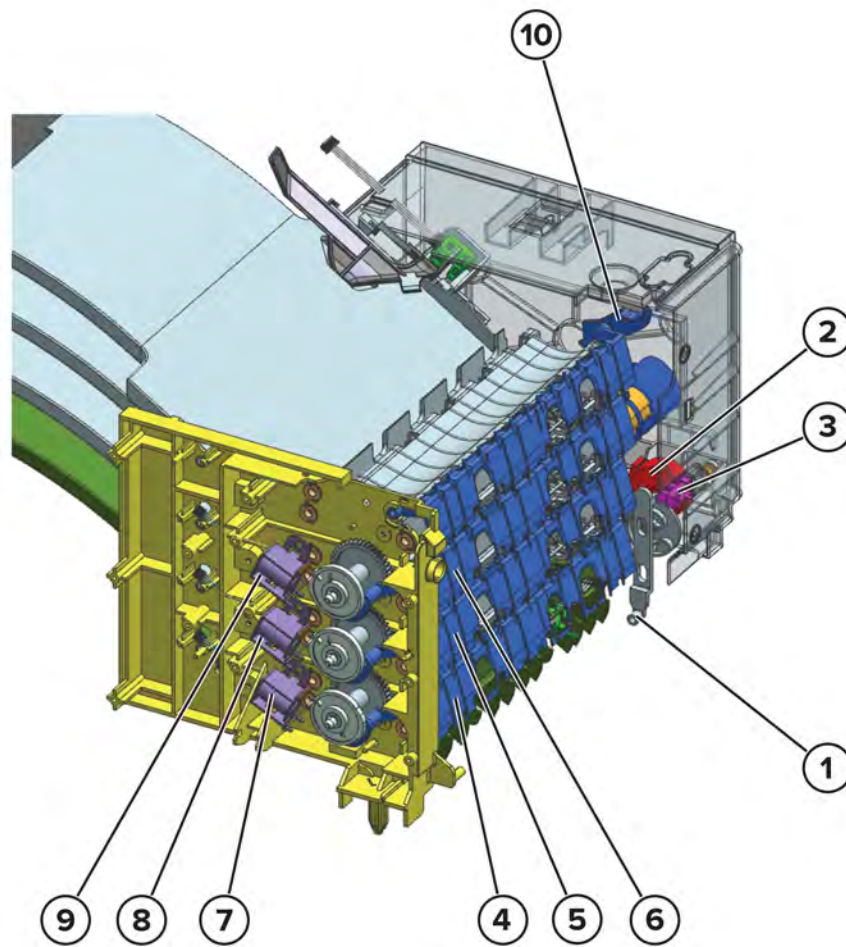

The mailbox delivers print jobs to multiple bin destinations and allows the user to segregate the printed output to an assigned bin. Rollers along the paper path control the movement of the paper depending on the destination bin.

## Mailbox paper path sensors

#	Sensor	Function
1	Sensor (mailbox pass-through 1)	Detects the paper position along the mailbox entrance.
2	Sensor (mailbox pass-through 2)	Detects the paper position along the middle rear door area.
3	Sensor (mailbox bin 1 paper present)	Detects if paper is on bin 1.
4	Sensor (mailbox bin 2 paper present)	Detects if paper is on bin 2.
5	Sensor (mailbox bin 3 paper present)	Detects if paper is on bin 3.
6	Sensor (mailbox bin 4 paper present)	Detects if paper is on bin 4.
7	Sensor (mailbox bin 1 full)	Detects if bin 1 is full.
8	Sensor (mailbox bin 2 full)	Detects if bin 2 is full.
9	Sensor (mailbox bin 3 full)	Detects if bin 3 is full.
10	Sensor (mailbox bin 4 full)	Detects if bin 4 is full.

## Mailbox diverter drive

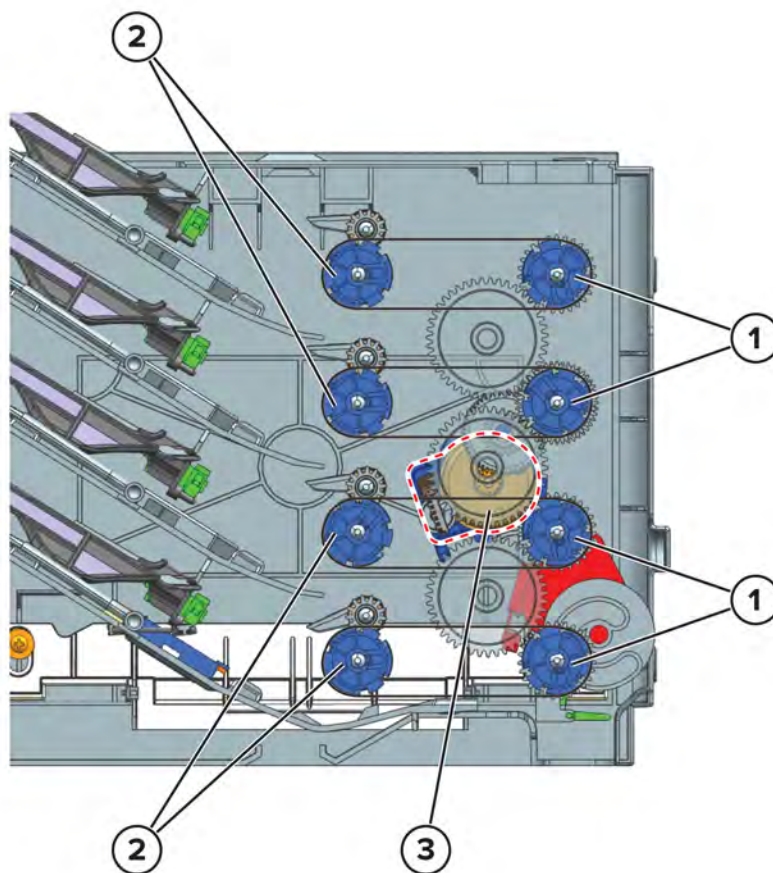

1	Diverter plunger
2	Motor (diverter)
3	Sensor (diverter plunger)
4	Diverter 1
5	Diverter 2
6	Diverter 3
7	Diverter 1 solenoid
8	Diverter 2 solenoid
9	Diverter 3 solenoid
10	Mailbox top diverter

The diverter (from the printer or optional bin) under the mailbox switches to open up the paper path of the mailbox. The diverter plunger controls the position of the diverter below it. The motor (diverter) drives the movement of the plunger. The sensor (diverter plunger) detects the position of the plunger.

By default, diverters 1 to 3 are positioned so that the paper goes straight up. Depending on the destination bin, diverters along the paper path may redirect the paper to the assigned bin. Solenoids control diverters 1 to 3.

On the other hand, the mailbox top diverter is positioned so that the paper exits by default to bin 4. Paper will only go straight up if an optional bin on top of the mailbox is the destination bin of the print job.

## Mailbox transport and exit drive

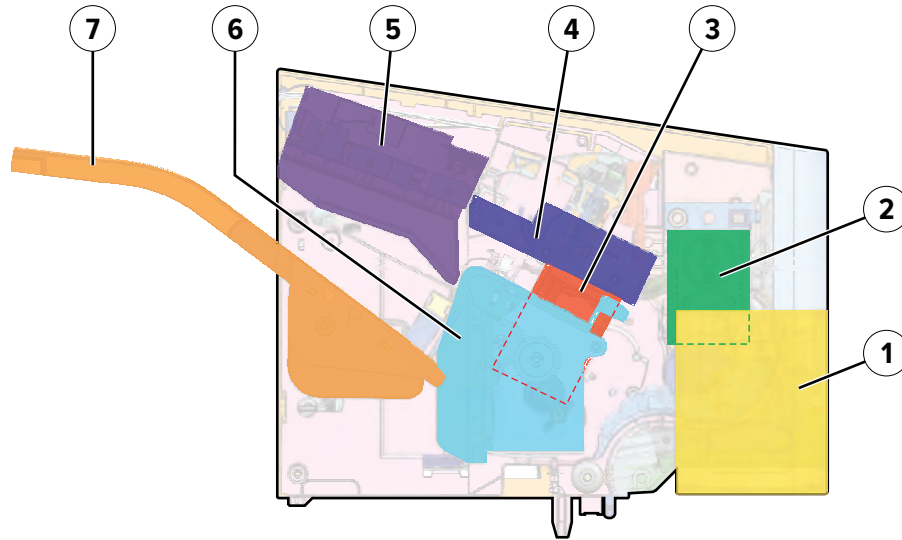

1	Transport rollers
2	Exit rollers
3	Motor (transport)

Transport rollers and exit rollers along the paper path move the paper to the destination bin assigned for the print job.

The motor (transport) drives both the transport and exit rollers.

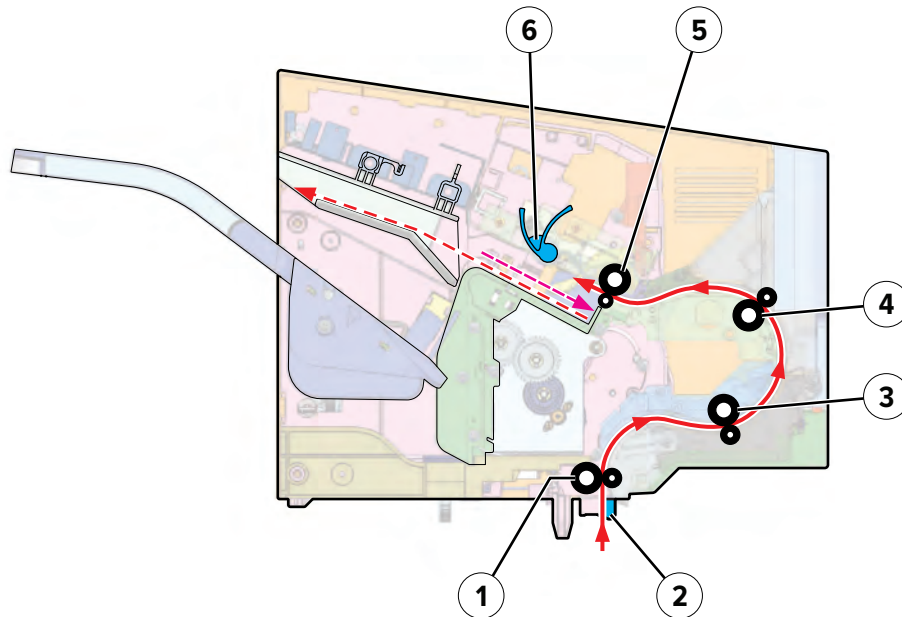

# Optional staple, hole punch finisher operation

## Staple, hole punch finisher (SHPF) layout

<b>1</b>	Hole punch box
<b>2</b>	Hole punch unit
<b>3</b>	Staple unit
<b>4</b>	Paddle and exit
<b>5</b>	Tamper
<b>6</b>	Ejector
<b>7</b>	Bin

## SHPF paper path rollers

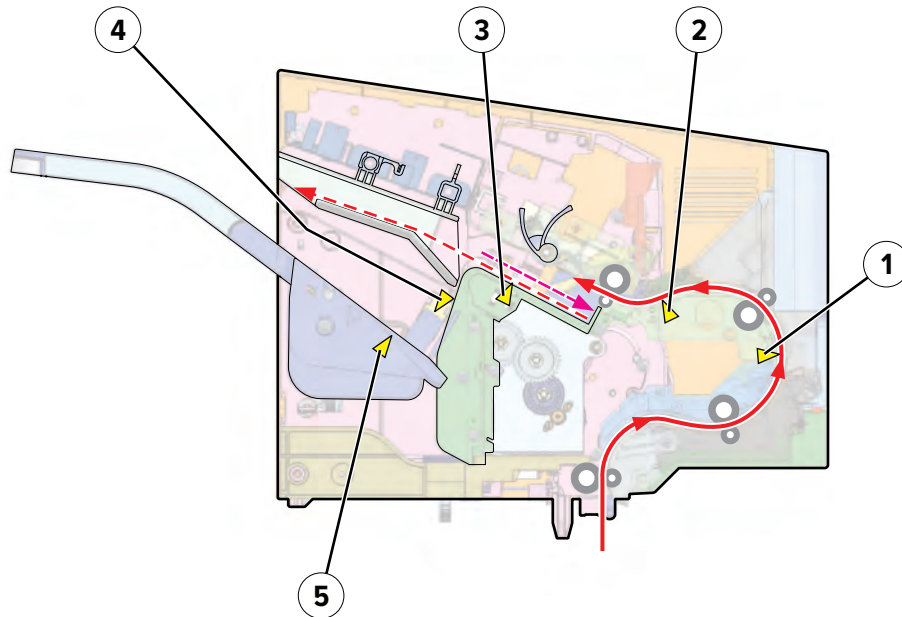

1	SHPF entrance roller
2	Diverter plunger
3	SHPF transport roller 1
4	SHPF transport roller 2
5	SHPF exit roller
6	SHPF paddle roller

For staple or hole punch jobs, the paper path is redirected to the finisher.

Rollers along the paper path control the movement of the paper depending on the type of staple or hole punch job. Before stapling occurs, paper will be stacked on top of each other and aligned along its edges.

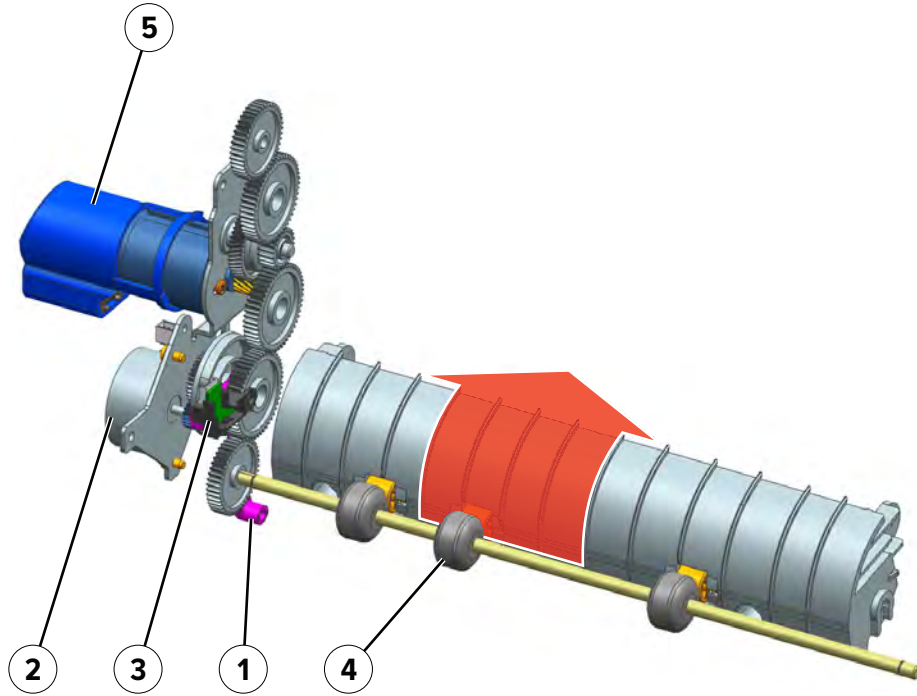

When the staple or hole punch job is done, the paper is ejected to the bin.

## SHPF paper path sensors

#	Sensor	Function
1	Sensor (HPU leading edge)	Detects the paper position along the rear door path.
2	Sensor (HPU trailing edge)	Detects the paper position along the hole punch area.
3	Sensor (SHPF staple throat paper present)	Detects if paper is in the staple unit area.
4	Sensor (SHPF bin full)	Detects if the bin is already full.
5	Sensor (SHPF bin paper present)	Detects if paper is in the bin.

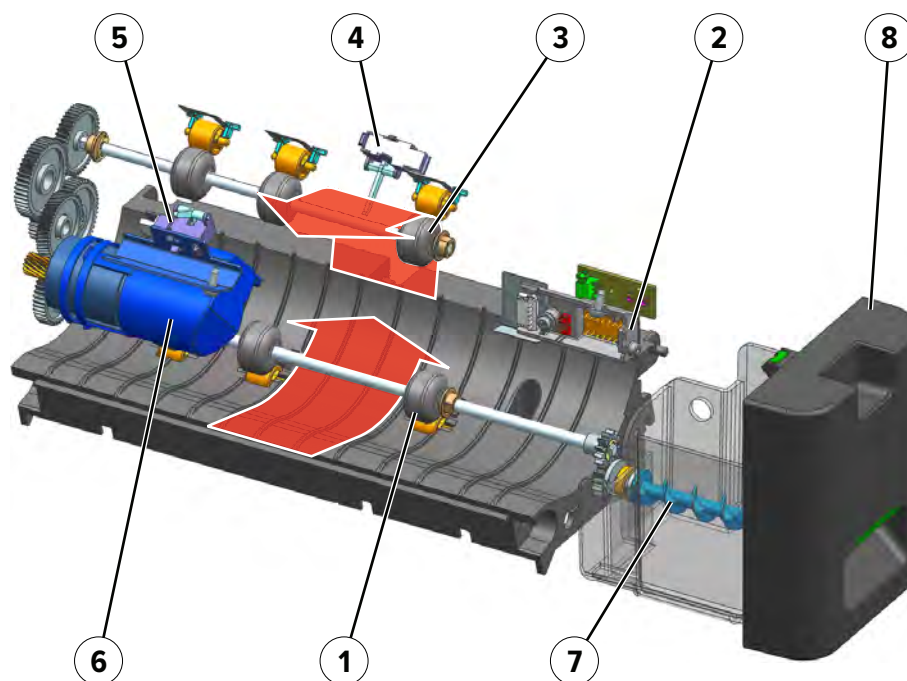

## SHPF entrance drive

<b>1</b>	Diverter plunger
<b>2</b>	Motor (diverter)
<b>3</b>	Sensor (diverter plunger)
<b>4</b>	Entrance roller
<b>5</b>	Motor (SHPF transport)

For staple or hole punch jobs, the diverter (from the printer or optional bin) under the finisher switches to open up the paper path of the finisher. The diverter plunger controls the position of the diverter below it. The motor (diverter) drives the movement of the plunger. The sensor (diverter plunger) detects the position of the plunger. Paper enters the finisher through the entrance roller. The motor (SHPF transport) drives the entrance roller.

## SHPF HPU transport drive

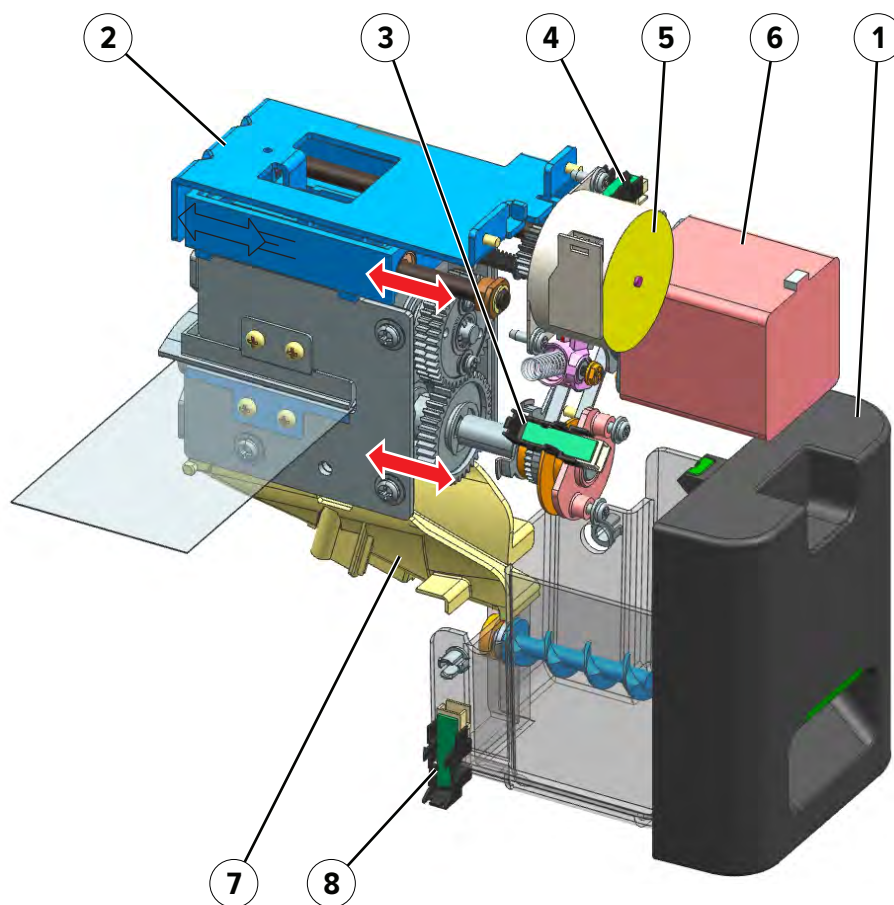

1	Transport roller 1
2	Sensor (light array)
3	Transport roller 2
4	Sensor (HPU leading edge)
5	Sensor (HPU trailing edge)
6	Motor (HPU transport)
7	Hole punch box auger

Transport rollers receive the paper entering the finisher, and then move the paper in the positions where hole punching may be required. The paper is detected by the sensor (HPU leading edge) as it passes between the two transport rollers. Before the paper is fed out by the exit rollers, it is detected by the sensor (HPU trailing edge). The sensor (light array) also detects the paper to ensure proper hole punching.

The motor (HPU transport) not only drives the transport rollers, but the auger in the hole punch box as well. When the hole punch box auger rotates, the chad inside the box is more evenly distributed to maximize the container capacity.

## SHPF hole punch drive

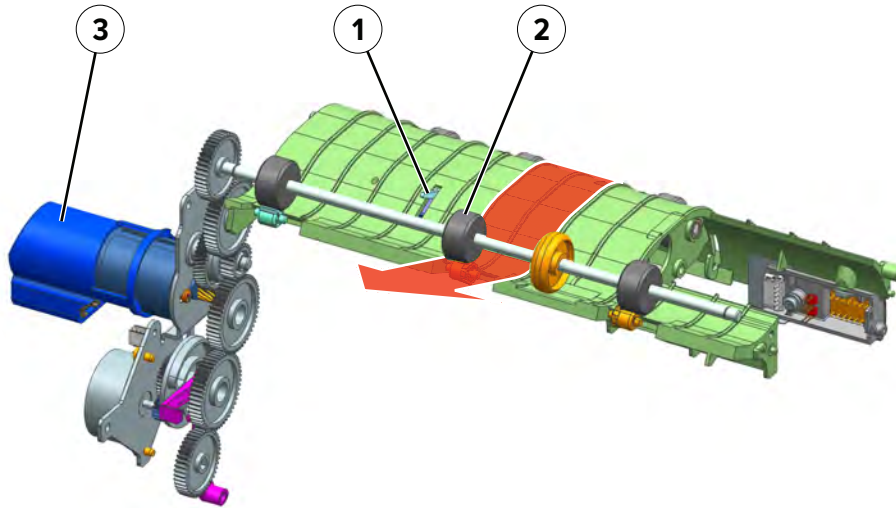

1	Hole punch box
2	HPU carriage
3	Sensor (hole punch)
4	Sensor (HPU carriage position)
5	Motor (HPU carriage)
6	Motor (hole punch)
7	Hopper
8	Sensor (hole punch box present)

During a hole punch job, the HPU carriage position may move to ensure that holes are properly punched at the appropriate positions. The motor (HPU carriage) controls the movement of the carriage. The sensor (HPU carriage position) detects the HPU carriage position.

The blade that punches the paper to create the holes is controlled by the motor (hole punch). The position of the blade is determined by the sensor (hole punch).

After hole punching, the paper chad is collected by a vibrating hopper and poured to the hole punch box.

## SHPF exit drive

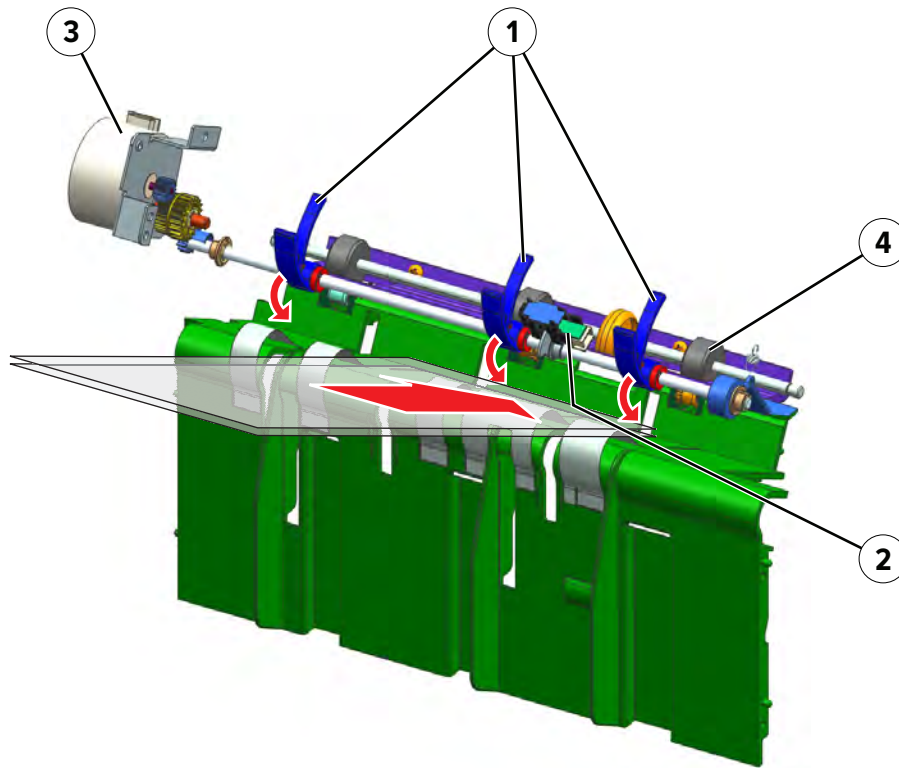

1	Sensor (HPU trailing edge)
2	Exit roller
3	Motor (SHPF transport)

The exit roller receives the paper from the transport rollers, and then ejects the paper to the tamper tray. Paper is stacked on the tamper tray in preparation for stapling.

The motor (SHPF transport) drives both the exit and entrance rollers (see [“SHPF entrance drive” on page 911](#)).

## Paper stack edge alignment drives

### Short edge alignment

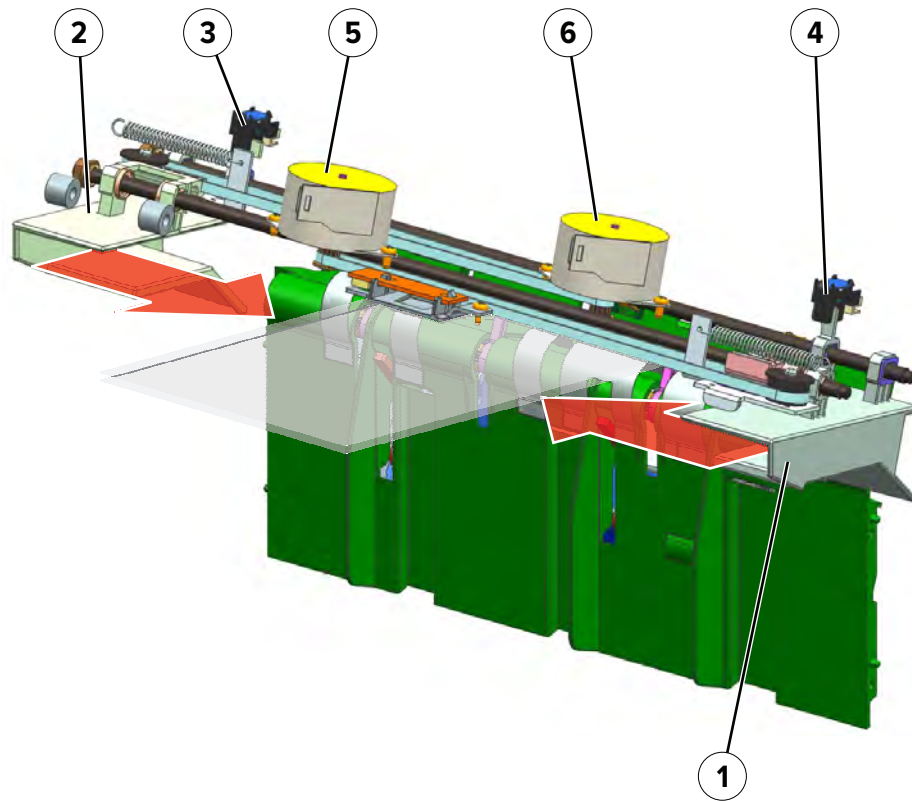

1	Paddles
2	Sensor (paddle)
3	Motor (paddle)
4	Exit roller

Each sheet that is added to the paper stack is aligned along its short edges. The paddles push the paper against a wall to align the trailing edge.

The motor (paddle) drives the paddles. The sensor (paddle) detects the position of the paddle.

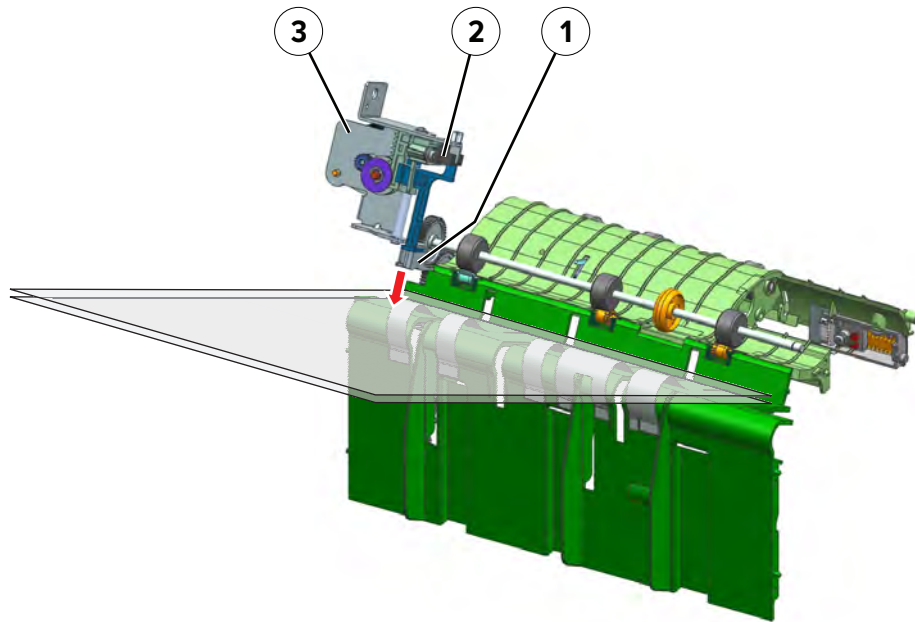

## Long edge alignments

1	Right tamper
2	Left tamper
3	Sensor (left tamper)
4	Sensor (right tamper)
5	Motor (right tamper)
6	Motor (left tamper)

On the tamper tray, each sheet that is added to the paper stack is aligned by tampers. The tampers push inward to align the long edges of the paper stack. Two motors control the position and movement of the tampers. Each tamper is detected by its sensor at its home position.

## Paper stack height detection

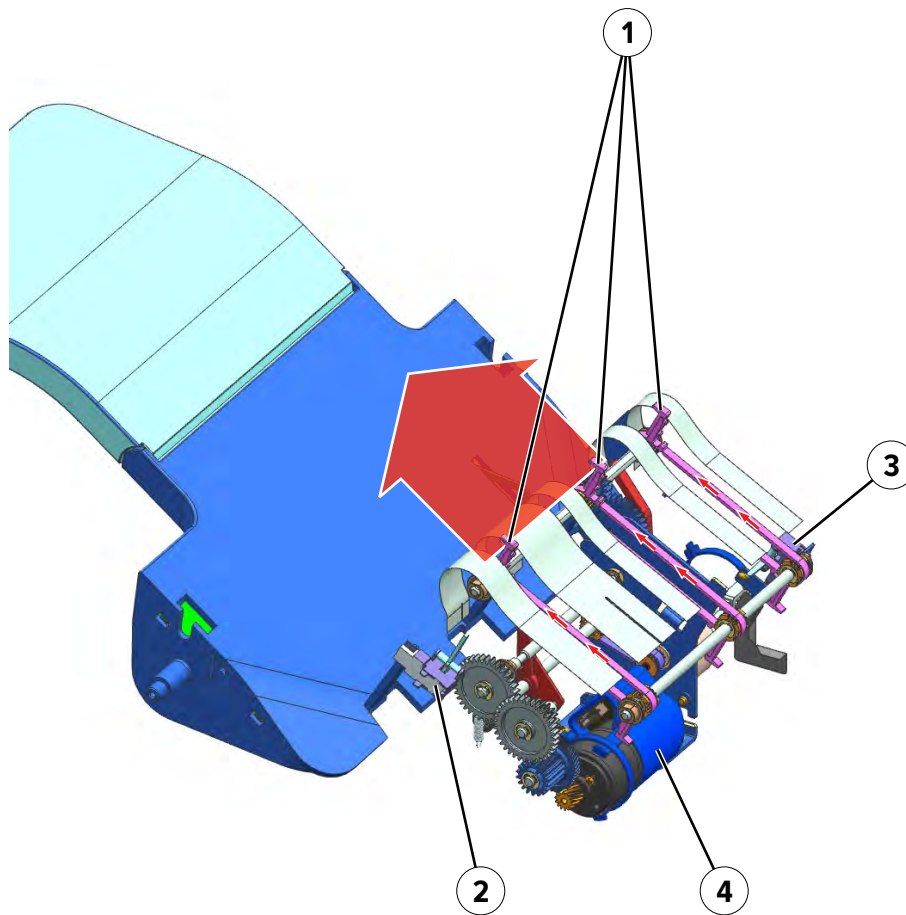

1	Stack height actuator
2	Sensor (stack height)
3	Motor (stack height)

Stack height detection is done each time a sheet is added to the paper stack.

The stack height actuator presses on top of the paper stack. The sensor (stack height) detects if the stack thickness has reached the limit. Limiting the thickness of the stack prevents damage to the staple unit.

The motor (stack height) drives the actuator.

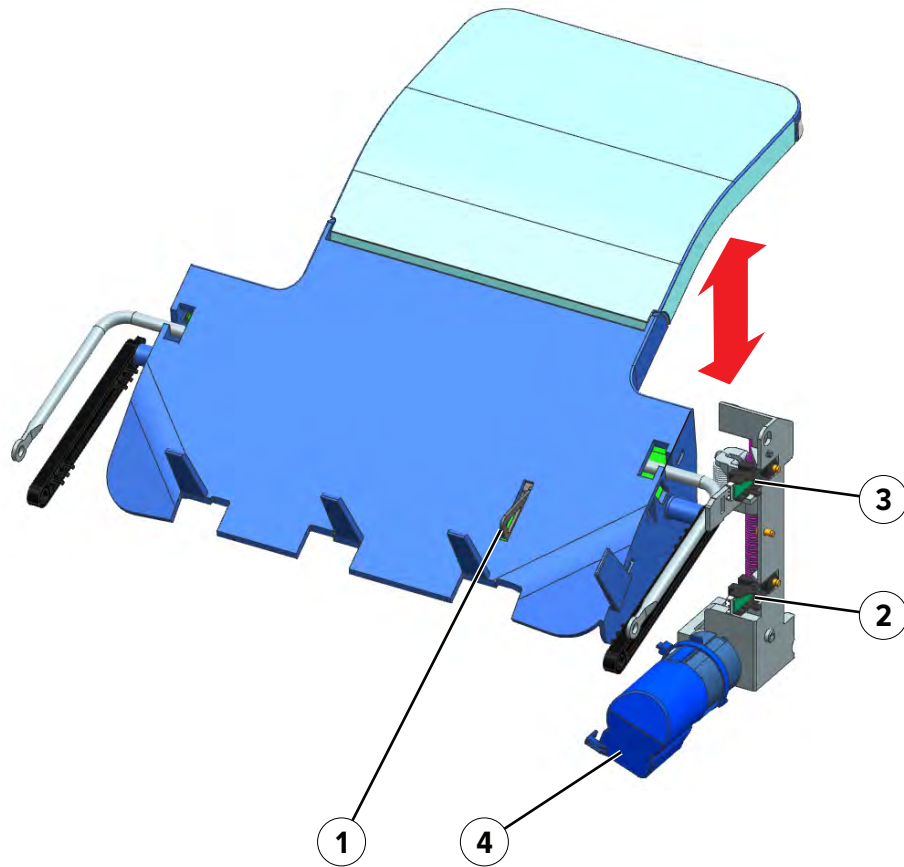

## SHPF ejector drive

1	Ejector paddles
2	Sensor (staple throat paper present)
3	Sensor (ejector)
4	Motor (ejector)

After the paper stack is stapled, the ejector paddles connected to a belt push the stack toward the bin. The motor (ejector) drives the ejector belt. The ejector belt is detected at its home position by the sensor (ejector).

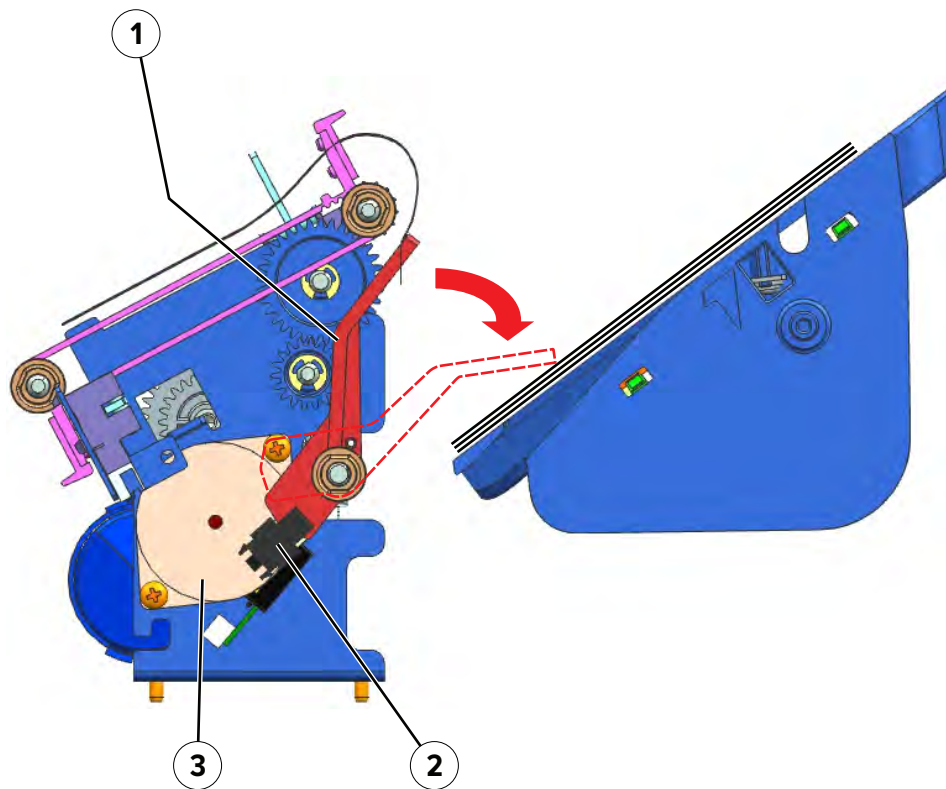

## SHPF elevator drive

1	Sensor (bin paper present)
2	Sensor (elevator, bottom)
3	Sensor (elevator, top)
4	Motor (elevator)

For each sheet that is ejected, the elevator bin lowers as the height of the bin stack increases. The movement of the bin is controlled by the motor (elevator). The bin is detected at its upper and lower positions by sensors.

## SHPF bin clamp drive

1	Bin clamp
2	Sensor (bin clamp)
3	Motor (bin clamp)

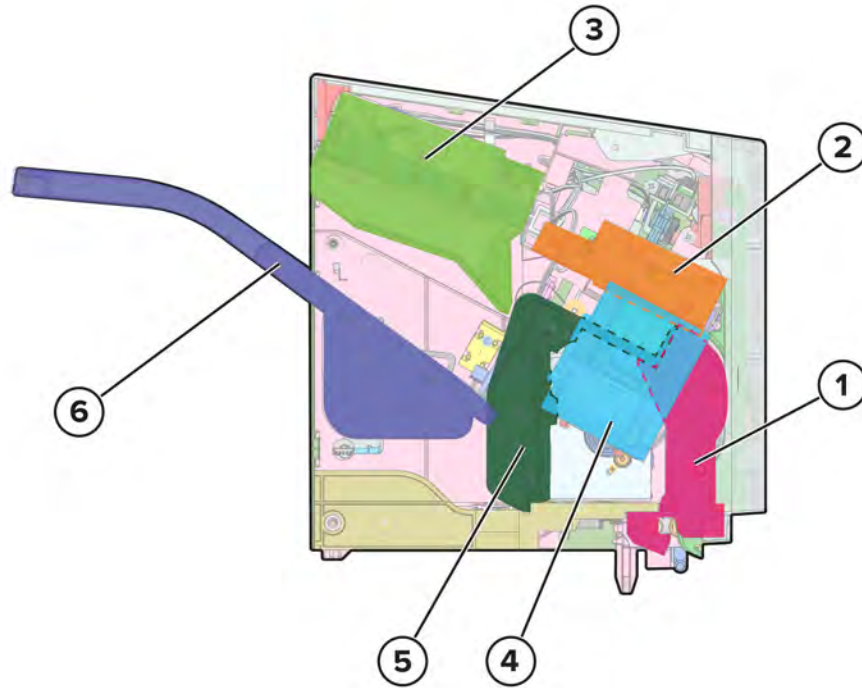

For each sheet that is ejected to the bin, the bin clamp lowers and holds the paper stack. If the level of the paper stack on the bin reaches the sensor (bin full), then the elevator bin will lower to accommodate more sheets.

The motor (bin clamp) controls the bin clamp. The clamp is detected at its home position by the sensor (bin clamp).

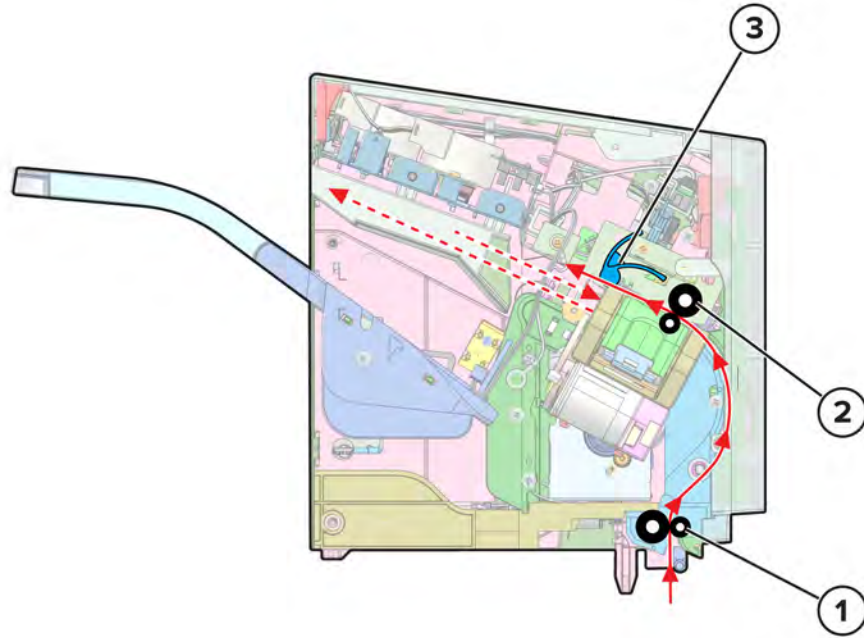

# Optional staple finisher operation

## Staple finisher (SF) layout

1	Feed section
2	Exit section
3	Tamper
4	Staple unit
5	Ejector
6	Bin

## SF paper path rollers

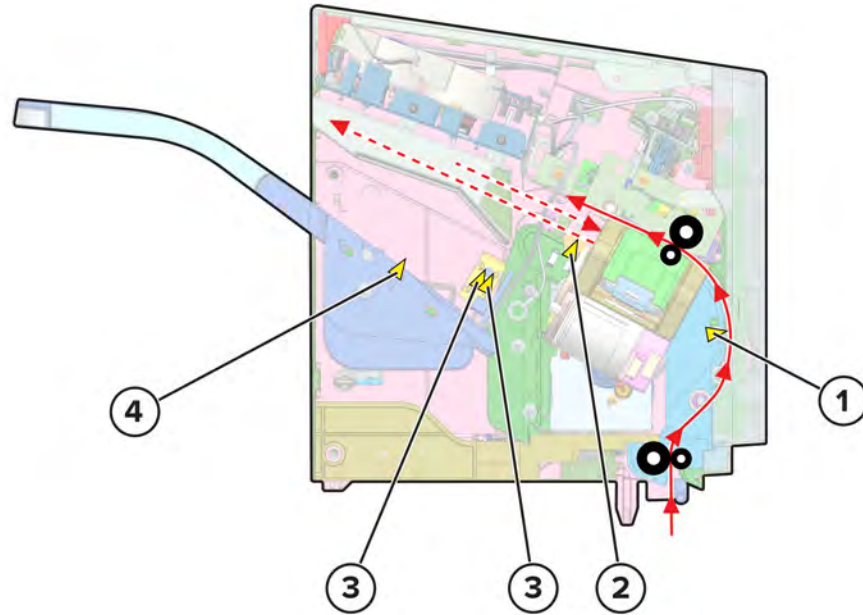

<b>1</b>	Staple finisher entrance rollers
<b>2</b>	Staple finisher exit rollers
<b>3</b>	Staple finisher paddle rollers

For staple jobs, the paper path is redirected to the finisher.

Before stapling occurs, paper is stacked on top of each other and aligned along its edges.

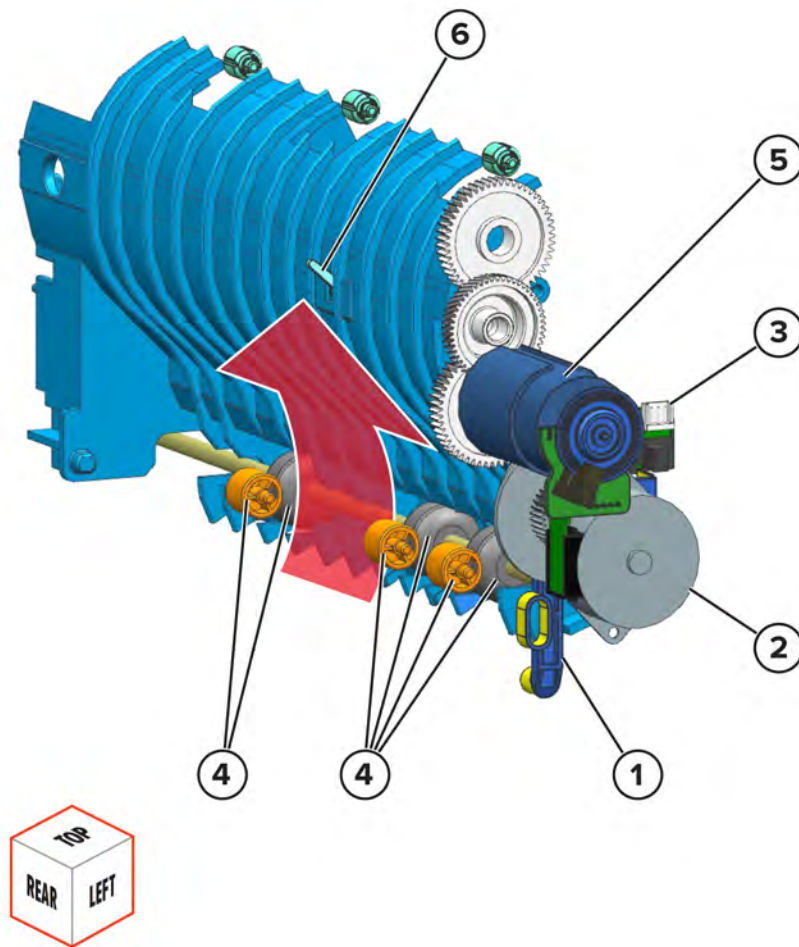

When the staple job is done, the paper is ejected to the bin.

## SF paper path sensors

#	Sensor	Function
1	Sensor (staple finisher pass-through)	Detects paper position along the rear door path
2	Sensor (staple throat paper present)	Detects paper presence in the staple unit area
3	Sensors (staple finisher bin full)	Detects the bin status
4	Sensor (finisher bin paper present)	Detects paper presence in the bin

## SF feed section

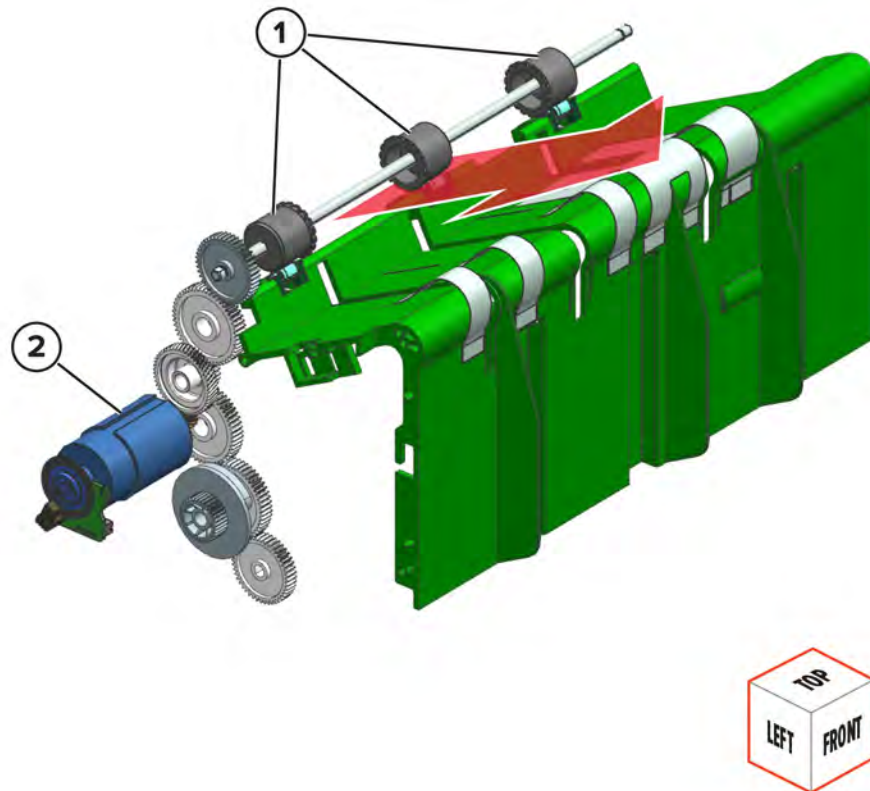

1	Diverter plunger
2	Motor (staple finisher diverter)
3	Sensor (staple finisher diverter plunger)
4	Entrance rollers
5	Motor (staple finisher transport)
6	Sensor (staple finisher pass-through)

The feed section receives paper from the printer. The diverter plunger controls the movement of the diverter. The diverter under the finisher switches to open up the paper path of the finisher. The motor (SF diverter) drives the movement of the plunger. The sensor (SF diverter plunger) detects the position of the plunger.

The entrance rollers transport paper to the compiler section. The motor (SF transport) drives the entrance rollers. The sensor (SF pass-through) detects paper position along the rear door path.

## SF exit section

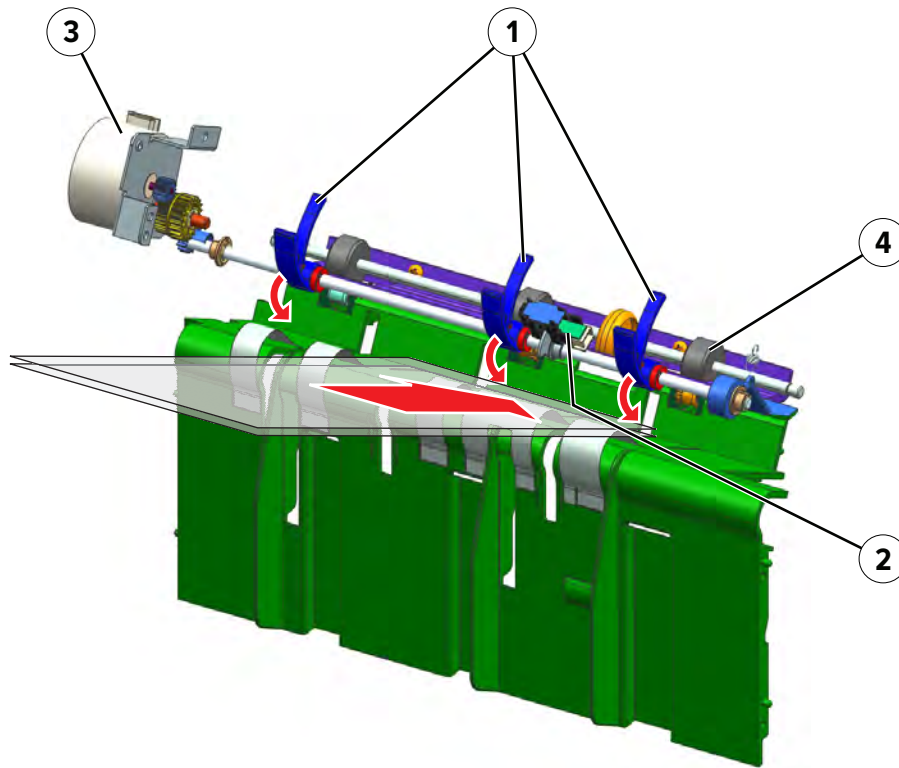

1	Exit rollers
2	Motor (staple finisher transport)

The exit rollers receive the paper from the entrance rollers, and then eject the paper to the compiler section. Paper is stacked on the tamper tray in preparation for stapling.

The motor (SF transport) drives both exit and entrance rollers. See [“SF feed section” on page 924](#).

## SF paper stack edge alignment drives

### Short edge alignment

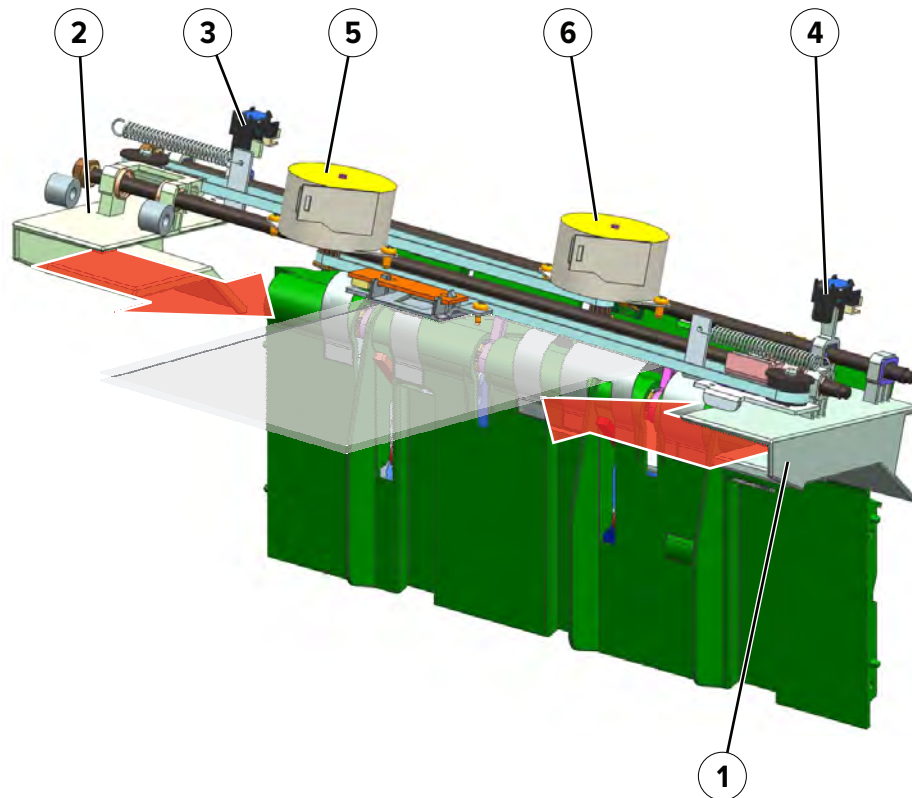

1	Paddles
2	Sensor (staple finisher paddle)
3	Motor (staple finisher paddle)
4	Exit roller

Each sheet that is added to the paper stack is aligned along its short edges. The paddles push the paper against a wall to align the trailing edge.

The motor (SF paddle) drives the paddles. The sensor (SF paddle) detects the position of the paddle.

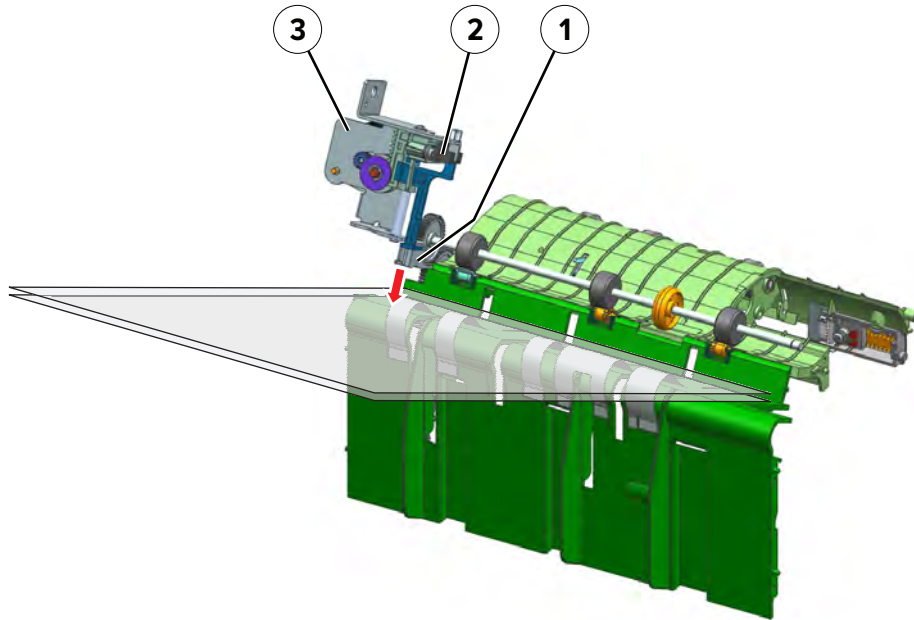

## Long edge alignments

<b>1</b>	Right tamper
<b>2</b>	Left tamper
<b>3</b>	Sensor (staple finisher left tamper)
<b>4</b>	Sensor (staple finisher right tamper)
<b>5</b>	Motor (staple finisher right tamper)
<b>6</b>	Motor (staple finisher left tamper)

On the tamper tray, each sheet that is added to the paper stack is aligned by the tampers. The tampers push inward to align the long edges of the paper stack. Two motors control the position and movement of the tampers. The sensors detect each tamper at its home position.

## SF paper stack height detection

<b>1</b>	Stack height actuator
<b>2</b>	Sensor (staple finisher stack height)
<b>3</b>	Motor (staple finisher stack height)

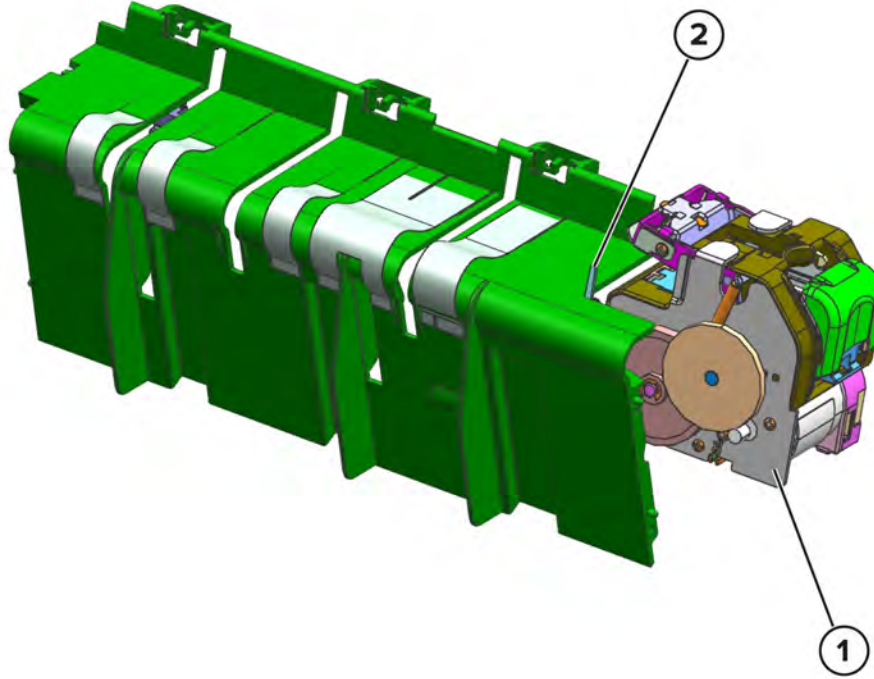

Stack height detection is done each time a sheet is added to the paper stack.

The stack height actuator presses on top of the paper stack. The sensor (SF stack height) detects if the stack thickness has reached the limit. Limiting the thickness of the stack prevents damage to the staple unit.

The motor (SF stack height) drives the actuator.

## SF staple operation

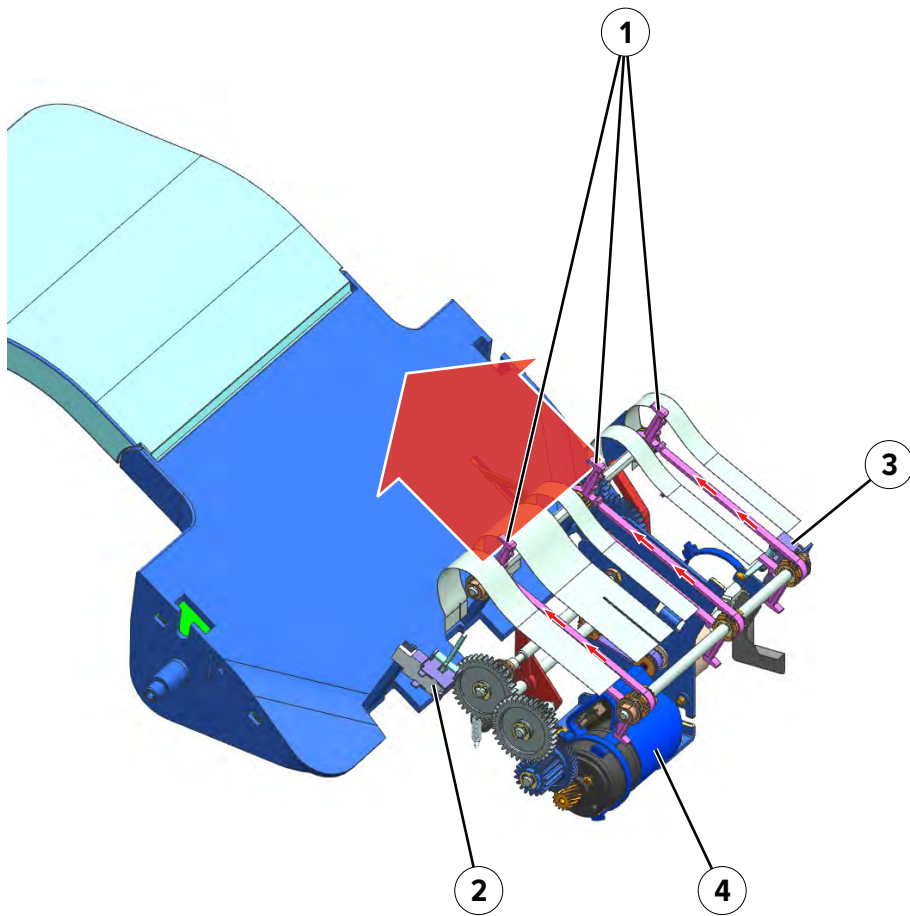

<b>1</b>	Staple unit
<b>2</b>	Sensor (staple throat paper present)

For staple jobs, the paddles push the paper stack to the rear of the finisher.

The sensor (staple throat paper present) detects the paper stack. The staple unit holds down and staples the paper stack.

## SF bin section

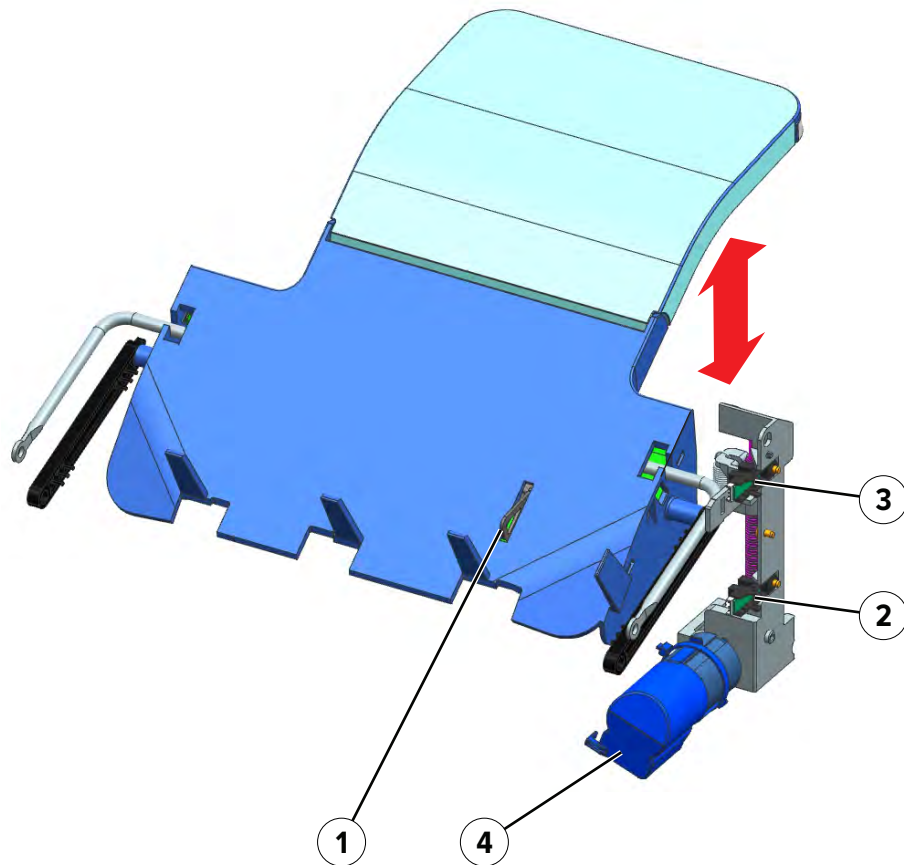

### Ejector drive

<b>1</b>	Ejector paddles
<b>2</b>	Sensor (staple throat paper present)
<b>3</b>	Sensor (staple finisher ejector)
<b>4</b>	Motor (staple finisher ejector)

After the paper stack is stapled, the ejector paddles that are connected to a belt push the stack toward the bin. The motor (SF ejector) drives the ejector belt. The sensor (SF ejector) detects the ejector belt at its home position.

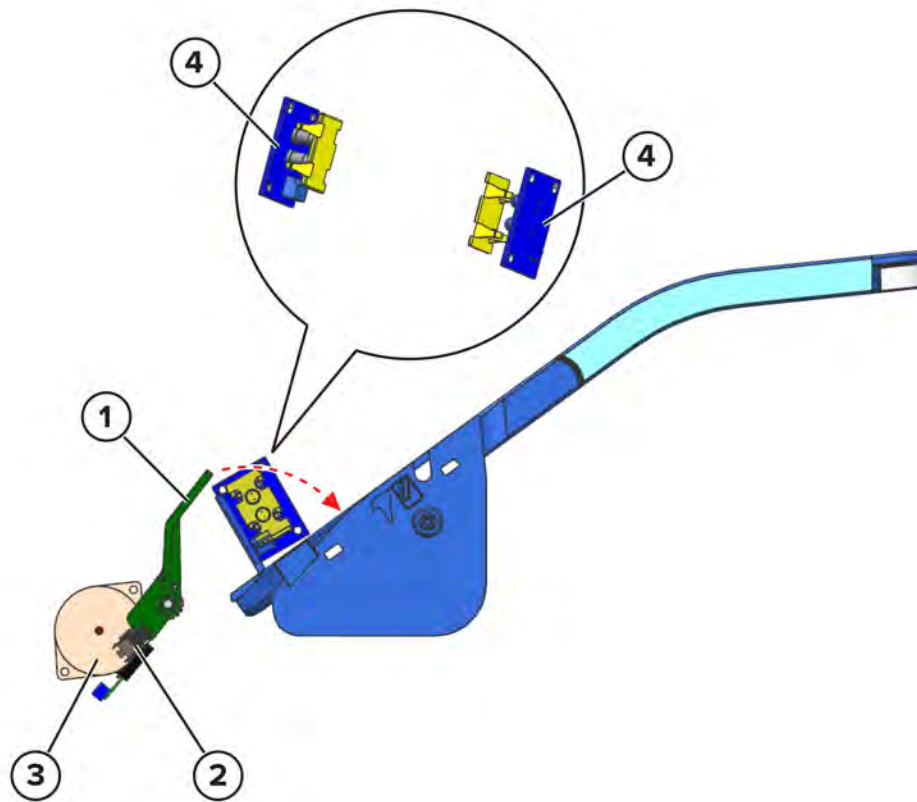

## Elevator drive

1	Sensor (bin paper present)
2	Sensor (elevator, bottom)
3	Sensor (elevator, top)
4	Motor (elevator)

For each sheet that is ejected, the elevator bin lowers as the height of the bin stack increases. The motor (elevator) controls the movement of the bin. The sensors (elevator) detects the bin at its upper and lower positions.

## Clamp drive

1	Bin clamps
2	Sensor (bin clamp)
3	Motor (bin clamp)
4	Sensors (bin full)

For each sheet that is ejected to the bin, the bin clamps lower and hold the paper stack. If the level of the paper stack on the bin reaches the sensors (bin full), then the elevator bin lowers to accommodate more sheets.

If the level of the paper stack exceeds the sensors (bin full), then the bin reaches full capacity.

The motor (bin clamp) controls the movement of the bin clamp. The sensor (bin clamp) detects the clamps at their home position.

41X2181	Spacer.....	800
41X2187	SHPF stack height assembly.....	858
41X2187	Staple finisher stack height assembly.....	840
41X2192	Paddle spring.....	840, 858
41X2193	Output expander spring with string.....	824
41X2194	Controller board (optional 550-sheet tray).....	810
41X2196	Tamper bracket.....	844, 856
41X2198	Staple cartridge door close limit switch.....	842
41X2199	Staple finisher paper stack flap (right).....	846
41X2202	Hole punch box.....	854
41X2208	Tray level indicator.....	808, 814
41X2233	225K Maintenance kit, belt SY fuser (115 V LTR LRP, Type 00).....	804
41X2234	225K Maintenance kit, belt SY fuser (230 V A4 LRP, Type 01).....	804
41X2235	225K Maintenance kit, belt SY fuser (100 V A4 LRP, Type 02).....	804
41X2236	225K Maintenance kit, belt SY fuser (115 V A4 LRP, Type 03).....	804
41X2237	225K Maintenance kit, belt SY fuser (230 V LTR LRP, Type 04).....	804
41X2238	225K Maintenance kit, belt SY fuser (115 V LTR NLRP, Type 05).....	805
41X2239	225K Maintenance kit, belt SY fuser (230 V A4 NLRP, Type 06).....	805
41X2240	225K Maintenance kit, belt SY fuser (100 V A4 NLRP, Type 07).....	805
41X2241	225K Maintenance kit, belt SY fuser (115 V A4 NLRP, Type 08).....	805
41X2242	200K Maintenance kit, hot roll fuser (115 V Contact Detack LRP, Type 11).....	803
41X2243	200K Maintenance kit, hot roll fuser (220 V Contact Detack LRP, Type 13).....	803
41X2244	200K Maintenance kit, hot roll fuser (115 V NLRP Contact Detack ASM, Type 17).....	803
41X2245	200K Maintenance kit, hot roll fuser (220 V NLRP Contact Detack ASM, Type 19).....	803
41X2250	400K Maintenance kit, belt HY fuser (115 V LTR LRP, Type 32).....	806
41X2251	400K Maintenance kit, belt HY fuser (230 V A4LRP, Type 33).....	806
41X2252	400K Maintenance kit, belt HY fuser (115 V A4 LRP, Type 35).....	806
41X2253	400K Maintenance kit, belt HY fuser (230 V LTR LRP, Type 36).....	806
41X2279	Staple finisher controller board.....	840
41X2302	Braille label kit.....	800
41X2304	Front cover (550-sheet tray insert).....	810
41X2316	Cable harness (HVPS, speaker, fan, sensor (front door interlock)).....	780

<b>P/N</b>	<b>Part name</b>	<b>Page</b>
41X2317	Feeder/paper path cable.....	798
41X2318	Sensor/redrive motor cable.....	790
41X2319	Feeder/paper path cable.....	798
41X2320	LVPS cable.....	780
41X2321	Control panel cable.....	794, 796
41X2345	Caster wheel.....	800
41X2352	400K Maintenance kit, rollers.....	805
41X2353	Toner low sensor cable.....	786
41X2354	Paper size sensor cable.....	788
41X2355	Toner cartridge motor cable.....	784
41X2356	USB host cable.....	782
41X2363	Bezel (MS821).....	794
41X2364	Bezel (MS822).....	796
41X2366	Bezel (M5255).....	796
41X2367	Bezel (MS823).....	794
41X2368	Bezel (B2865).....	794
41X2369	Bezel (B2866).....	794
41X2371	Bezel (M5265).....	796
41X2372	Bezel (MS825).....	794
41X2373	Bezel (MS826).....	796
41X2375	Bezel (M5270).....	796
41X2376	Bezel (MS725).....	794
41X2606	Controller board (MS725, MS821, MS823, MS825, and B2865).....	780
41X2610	Guide roller.....	780, 784
41X2673	Transfer roller contact.....	782
41X2690	Control panel (2.4-inch) cover.....	794
41X2703	Combo card—Forms and bar code card/PRESCRIBE card/Simplified Chinese font card (MS725, MS821, MS823, MS825, and B2865).....	799
41X2839	Bin cover.....	774
41X2865	Special media separator pad.....	798, 808, 814

## Part name index

P/N	Part name	Page
41X2242	200K Maintenance kit, hot roll fuser (115 V Contact Detack LRP, Type 11).....	803
41X2244	200K Maintenance kit, hot roll fuser (115 V NLRP Contact Detack ASM, Type 17).....	803
41X2243	200K Maintenance kit, hot roll fuser (220 V Contact Detack LRP, Type 13).....	803
41X2245	200K Maintenance kit, hot roll fuser (220 V NLRP Contact Detack ASM, Type 19).....	803
41X1673	2100-sheet tray base.....	814
40X4585	2100-sheet tray bellcrank.....	818
41X1687	2100-sheet tray elevator drive.....	816
40X8177	2100-sheet tray elevator sensor actuator.....	818
41X1670	2100-sheet tray insert.....	814
41X1683	2100-sheet tray paper feeder.....	818
41X1108	2100-sheet tray pick roller.....	818
41X1684	2100-sheet tray controller board.....	816
41X1675	2100-sheet tray front cover.....	814
41X1685	2100-sheet tray interface cable.....	816
41X1676	2100-sheet tray left cover.....	816
41X1678	2100-sheet tray rear cover.....	816
41X1677	2100-sheet tray right cover.....	816
41X2235	225K Maintenance kit, belt SY fuser (100 V A4 LRP, Type 02).....	804
41X2240	225K Maintenance kit, belt SY fuser (100 V A4 NLRP, Type 07).....	805
41X2236	225K Maintenance kit, belt SY fuser (115 V A4 LRP, Type 03).....	804
41X2241	225K Maintenance kit, belt SY fuser (115 V A4 NLRP, Type 08).....	805
41X2233	225K Maintenance kit, belt SY fuser (115 V LTR LRP, Type 00).....	804
41X2238	225K Maintenance kit, belt SY fuser (115 V LTR NLRP, Type 05).....	805
41X2234	225K Maintenance kit, belt SY fuser (230 V A4 LRP, Type 01).....	804
41X2239	225K Maintenance kit, belt SY fuser (230 V A4 NLRP, Type 06).....	805
41X2237	225K Maintenance kit, belt SY fuser (230 V LTR LRP, Type 04).....	804
41X1650	250-sheet tray insert.....	808
41X2252	400K Maintenance kit, belt HY fuser (115 V A4 LRP, Type 35).....	806
41X2250	400K Maintenance kit, belt HY fuser (115 V LTR LRP, Type 32).....	806
41X2251	400K Maintenance kit, belt HY fuser (230 V A4LRP, Type 33).....	806
41X2253	400K Maintenance kit, belt HY fuser (230 V LTR LRP, Type 36).....	806
41X2352	400K Maintenance kit, rollers.....	805

<b>P/N</b>	<b>Part name</b>	<b>Page</b>
41X1118	550-sheet tray insert.....	808
40X8176	A5 length guide.....	814
